Why Nations Fail - Daron Acemoglu

2013-09-17

Brilliant and engagingly written, *Why Nations Fail* answers the question that has stumped the experts for centuries: Why are some nations rich and others poor, divided by wealth and poverty, health and sickness, food and famine? Is it culture, the weather, geography? Perhaps ignorance of what the right policies are? Simply, no. None of these factors is either definitive or destiny. Otherwise, how to explain why Botswana has become one of the fastest growing countries in the world, while other African nations, such as Zimbabwe, the Congo, and Sierra Leone, are mired in poverty and violence? Daron Acemoglu and James Robinson conclusively show that it is man-made political and economic institutions that underlie economic success (or lack of it). Korea, to take just one of their fascinating examples, is a remarkably homogeneous nation, yet the people of North Korea are among the poorest on earth

while their brothers and sisters in South Korea are among the richest. The south forged a society that created incentives, rewarded innovation, and allowed everyone to participate in economic opportunities. The economic success thus spurred was sustained because the government became accountable and responsive to citizens and the great mass of people. Sadly, the people of the north have endured decades of famine, political repression, and very different economic institutions—with no end in sight. The differences between the Koreas is due to the politics that created these completely different institutional trajectories. Based on fifteen years of original research Acemoglu and Robinson marshal extraordinary historical evidence from the Roman Empire, the Mayan city-states, medieval Venice, the Soviet Union, Latin America, England, Europe, the United States, and Africa to build a new theory of political economy with great relevance for the big questions of today, including: - China has built

an authoritarian growth machine. Will it continue to grow at such high speed and overwhelm the West? - Are America's best days behind it? Are we moving from a virtuous circle in which efforts by elites to aggrandize power are resisted to a vicious one that enriches and empowers a small minority? - What is the most effective way to help move billions of people from the rut of poverty to prosperity? More philanthropy from the wealthy nations of the West? Or learning the hard-won lessons of Acemoglu and Robinson's breakthrough ideas on the interplay between inclusive political and economic institutions? Why Nations Fail will change the way you look at—and understand—the world.

percent. Now nearly ten years old, it has been updated for a new, post-New Economy era. Statistics and figures have been revised to take new trends into account. Rifkin offers a tough, compelling critique of the flaws in the techniques the government uses to compile employment statistics. *The End of Work* is the book our candidates and our country need to understand the employment challenges-and the hopes-facing us in the century ahead.

A User's Guide to the Brain - John J. Ratey, M.D.
2001-11-13

John Ratey, bestselling author and clinical professor of psychiatry at Harvard Medical School, lucidly explains the human brain's workings, and paves the way for a better understanding of how the brain affects who we are. Ratey provides insight into the basic structure and chemistry of the brain, and demonstrates how its systems shape our perceptions, emotions, and behavior. By giving us a greater understanding of how the brain responds to the guidance of its user, he provides us with knowledge that can enable us to improve our lives. In *A User's Guide to the Brain*, Ratey clearly and succinctly surveys what scientists now know about the brain and how we use it. He

looks at the brain as a malleable organ capable of improvement and change, like any muscle, and examines the way specific motor functions might be applied to overcome neural disorders ranging from everyday shyness to autism.

Drawing on examples from his practice and from everyday life, Ratey illustrates that the most important lesson we can learn about our brains is how to use them to their maximum potential.

The Presentation of Self in Everyday Life -
Erving Goffman 2021-09-29

A notable contribution to our understanding of ourselves. This book explores the realm of human behavior in social situations and the way that we appear to others. character to an audience. The discussions of these social techniques offered here are based upon detailed research and observation of social customs in many regions.

Turning the Flywheel - Jim Collins 2019-02-26

A companion guidebook to the number-one bestselling *Good to Great*, focused on implementation of the flywheel concept, one of Jim Collins' most memorable ideas that has been used across industries and the social sectors, and with startups. The key to business success is not a single innovation or one plan. It is the act of turning the flywheel, slowly gaining momentum and eventually reaching a breakthrough. Building upon the flywheel concept introduced in his groundbreaking classic *Good to Great*, Jim Collins teaches readers how to create their own flywheel, how to accelerate the flywheel's momentum, and how to stay on the flywheel in shifting markets and during times of turbulence. Combining research from his *Good to Great* labs and case studies from organizations like Amazon, Vanguard, and the Cleveland Clinic which have turned their flywheels with outstanding results, Collins demonstrates that successful organizations can

disrupt the world around them—and reach unprecedented success—by employing the flywheel concept.

Upside Down - Eduardo Galeano 2014-05-13

From the winner of the first Lannan Prize for Cultural Freedom, a biting funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable *Memory of Fire* Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in *Upside Down*, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a "program of study" about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in "The Impunity of Power" to a seminar on "The Sacred Car"--with tips along the way on "How to Resist Useless Vices" and a declaration

of "The Right to Rave"--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, *Upside Down* makes us see the world anew and even glimpse how it might be set right.

"Galeano's outrage is tempered by intelligence, an ineradicable sense of humor, and hope." -Los Angeles Times, front page

Memory and Amnesia - Paloma Aguilar 2002

I the Supreme - Augusto Roa Bastos 2019-02-26
I the Supreme imagines a dialogue between the nineteenth-century Paraguayan dictator known

as Dr. Francia and Policarpo Patiño, his secretary and only companion. The opening pages present a sign that they had found nailed to the wall of a cathedral, purportedly written by Dr. Francia himself and ordering the execution of all of his servants upon his death. This sign is quickly revealed to be a forgery, which takes leader and secretary into a larger discussion about the nature of truth: "In the light of what Your Eminence says, even the truth appears to be a lie." Their conversation broadens into an epic journey of the mind, stretching across the colonial history of their nation, filled with surrealist imagery, labyrinthine turns, and footnotes supplied by a mysterious "compiler." A towering achievement from a foundational author of modern Latin American literature, *I the Supreme* is a darkly comic, deeply moving meditation on power and its abuse—and on the role of language in making and unmaking whole worlds.

Thinking, Fast and Slow - Daniel Kahneman

2011-10-25

Major New York Times bestseller Winner of the National Academy of Sciences Best Book Award in 2012 Selected by the New York Times Book Review as one of the ten best books of 2011 A Globe and Mail Best Books of the Year 2011 Title One of The Economist's 2011 Books of the Year One of The Wall Street Journal's Best Nonfiction Books of the Year 2011 2013 Presidential Medal of Freedom Recipient Kahneman's work with Amos Tversky is the subject of Michael Lewis's The Undoing Project: A Friendship That Changed Our Minds In the international bestseller, *Thinking, Fast and Slow*, Daniel Kahneman, the renowned psychologist and winner of the Nobel Prize in Economics, takes us on a groundbreaking tour of the mind and explains the two systems that drive the way we think. System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of

predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. He offers practical and enlightening insights into how choices are made in both our business and our personal lives—and how we can use different techniques to guard against the mental glitches that often get us into trouble. Winner of the National Academy of Sciences Best Book Award and the Los Angeles Times Book Prize and selected by The New York Times Book Review as one of the ten best books of 2011, *Thinking, Fast and Slow* is destined to be a classic. *Estudio sobre los factores de éxito de las grandes empresas de servicio en España* - 2009

The Public Health Consequences of Disasters - Eric K. Noji 1996-11-14

Natural and man-made disasters--earthquakes, floods, volcanic eruptions, industrial crises, and many others--have claimed more than 3 million lives during the past 20 years, adversely affected the lives of at least 800 million people, and caused more than 50 billion dollars in property damages. A major disaster occurs almost daily in some part of the world. Increasing population densities in flood plains, along vulnerable coastal areas, and near dangerous faults in the earth's crust, as well as the rapid industrialization of developing economies are factors likely to make the threat posed by natural disasters much bigger in the future. Illustrated with examples from recent research in the field, this book summarizes the most pertinent and useful information about the

public health impact of natural and man-made disasters. It is divided into four sections dealing with general concerns, geophysical events, weather-related problems, and human-generated disasters. The author starts with a comprehensive discussion of the concepts and role of surveillance and epidemiology, highlighting general environmental health concerns, such as sanitation, water, shelter, and sewage. The other chapters, based on a variety of experiences and literature drawn from both developing and industrialized countries, cover discrete types of natural and technological hazards, addressing their history, origin, nature, observation, and control. Throughout the book the focus is on the level of epidemiologic knowledge on each aspect of natural and man-made disasters. Exposure-, disease-, and health-event surveillance are stressed because of the importance of objective data to disaster epidemiology. In addition, Noji pays particular attention to prevention and control measures,

and provides practical recommendations in areas in which the public health practitioner needs more useful information. He advocates stronger epidemiologic awareness as the basis for better understanding and control of disasters. A comprehensive theoretical and practical treatment of the subject, *The Public Health Consequences of Disasters* is an invaluable tool for epidemiologists, disaster relief specialists, and physicians who treat disaster victims.

Narcoland - Anabel Hernandez 2013-09-10

The product of five years’ investigative reporting, the subject of intense national controversy, and the source of death threats that forced the National Human Rights Commission to assign two full-time bodyguards to its author, Anabel Hernández, *Narcoland* has been a publishing and political sensation in Mexico. The definitive history of the drug cartels, *Narcoland* takes readers to the front lines of the “war on drugs,” which has so far cost more than 60,000 lives in just six years. Hernández explains in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names names - not just the narcos, but also the politicians, functionaries, judges and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth

of corruption in Mexico's government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. In awarding Hernández the 2012 Golden Pen of Freedom, the World Association of Newspapers and News Publishers noted, "Mexico has become one of the most dangerous countries in the world for journalists, with violence and impunity remaining major challenges in terms of press freedom. In making this award, we recognize the strong stance Ms. Hernández has taken, at great personal risk, against drug cartels."

Totalitarianism - Hannah Arendt 1968-03-20
The great twentieth-century political philosopher examines how Hitler and Stalin gained and maintained power, and the nature of totalitarian states. In the final volume of her classic work *The Origins of Totalitarianism*, Hannah Arendt focuses on the two genuine forms of the totalitarian state in modern history: the dictatorships of Bolshevism after 1930 and of National Socialism after 1938. Identifying terror as the very essence of this form of government, she discusses the transformation of classes into masses and the use of propaganda in dealing with the nontotalitarian world—and in her brilliant concluding chapter, she analyzes the nature of isolation and loneliness as

preconditions for total domination. “The most original and profound—therefore the most valuable—political theoretician of our times.”
