Riding the Roller Coaster - Charles K. Hyde
2003-02-01

From the Chrysler Six of 1924 to the front-wheel-

drive vehicles of the 70s and 80s to the minivan, Chrysler boasts an impressive list of technological "firsts." But even though the company has catered well to a variety of consumers, it has come to the brink of financial ruin more than once in its seventy-five-year history. How Chrysler has achieved monumental success and then managed colossal failure and sharp recovery is explained in *Riding the Roller Coaster*, a lively, unprecedented look at a major force in the American automobile industry since 1925. Charles Hyde tells the intriguing story behind Chrysler-its products, people, and performance

over time-with particular focus on the company's management. He offers a lens through which the reader can view the U.S. auto industry from the perspective of the smallest of the automakers who, along with Ford and General Motors, make up the "Big Three." The book covers Walter P. Chrysler's life and automotive career before 1925, when he founded the Chrysler Corporation, to 1998, when it merged with Daimler-Benz. Chrysler made a late entrance into the industry in 1925 when it emerged from Chalmers and Maxwell, and further grew when it absorbed Dodge Brothers and American Motors

Corporation. The author traces this journey, explaining the company's leadership in automotive engineering, its styling successes and failures, its changing management, and its activities from auto racing to defense production to real estate. Throughout, the colorful personalities of its leaders-including Chrysler himself and Lee Iacocca-emerge as strong forces in the company's development, imparting a risk-taking mentality that gave the company its verve.

The Yugo - Jason Vuic 2011-03-01

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that

embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who

happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

The History and Theory of Environmental

Scenography - Arnold Aronson 2018-06-28

A classic work of theatre history and criticism when first published, Arnold Aronson's formative study surveyed the phenomenon known as environmental theatre. Now updated in this richly

illustrated second edition to reflect developments and practice since the 1980s, it offers readers a comprehensive study of the theatre practice which has evolved to become the dominant mode of much contemporary innovative performance. For most audiences, particularly in the Western tradition, theatre means going to a building in which seats face a stage on which actors perform a play. But there has always been a vital alternative that came to be known as environmental theatre. Whether in folk performances, street theatre, avant-garde performance, utopian architecture, Happenings,

mass spectacles, or contemporary immersive theatre, the relationship of the spectator to the performance has been one in which the audience is surrounded or immersed in a shared space, in which the multiple events may be happening simultaneously, and in which the experience of theatrical space is visceral and often kinetic. This book examines the history of this phenomenon and looks at a range of contemporary practice. New chapters examine how the 'transformed spaces' of earlier work have become the interactive and immersive productions that characterize the work of companies such as

Punchdrunk, dreamthinkspeak, Teatro da Vertigem, En Garde Arts, and The Industry, among others. Updated to take account of the burgeoning scholarship on the subject, *The History and Theory of Environmental Scenography* remains the authoritative account that illuminates present day theatre practice and its antecedents.

Lemon-Aid New Cars and Trucks 2011 - Phil
Edmonston 2010-11-11

As U.S. and Canadian automakers and dealers
face bankruptcy and Toyota battles
unprecedented quality-control problems, *Lemon-
Aid* guides steer the confused and anxious buyer

through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn you should buy.

Toyota -- enough apologies: "when you mess up, 'fess up."
