There are many books on the market that discuss the Toyota Production System but few that

Dictators, Democrats, and Development in

Southeast Asia - Michael T. Rock 2016-08-24

Getting growth going has been rare in the developing world-since 1960 only nine developing countries have succeeded in sustaining high growth. The aim of Dictators, Democrats and Development in Southeast Asia is to examine how dictators and democrats in three of the nine fast growers -Indonesia, Malaysia and Thailand, hereafter IMT-built and sustained pro-growth political coalitions that enabled them to adopt policies that ushered in sustained high growth.

The focus is on IMT because circa 1960 few thought the three were candidates for high growth and because the three have factor endowments, ethnic heterogeneity, and forms of governance that resemble the Rest. These similarities suggest the Rest may have much to learn from IMT. The focus is unabashedly on the politics of development in IMT because dictators and democrats in IMT built and sustained pro-growth political coalitions that enabled them to link their long term political survival with delivering

development. How and why they did so should be of keen interest to the Rest. Because dictators and democrats in IMT were committed to capitalist, industrial and open economy development strategies but deeply suspicious of a laissez faire approach to development, none of the three ever adopted a Washington Consensus style growth strategy. While all three toyed with a Northeast style capitalist developmental state approach to growth, because governments in IMT lacked the political requisites to make this strategy work, none really stuck to this approach to growth either. Instead dictators and democrats in IMT implemented highly pragmatic growth and development strategies. When markets worked, governments used them. When interventions worked governments relied on them. When either failed to deliver expected results, governments weeded out bad investments to sustain high growth. Such a pragmatic, trial and error approach to development should also be of keen interest to the Rest.

Automotive Industrialisation - Kaoru Natsuda 2020-10-15

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial

policies in the industry and the spread of development from foreign investors to local firms.

East Asian Regionalism from a Legal Perspective - Tamio Nakamura 2009-06-08

Plenty has been written about the political and economical aspects of regionalism, but the legal perspective has been neglected. *East Asian Regionalism From a Legal Perspective* is unique in synthesizing legal, economic and political analyses. In the first part, the book investigates the current features of regionalism from a comparative perspective, looking at economic and currency cooperation and comparing Asian regionalism with Europe and Latin America. In the second part, the contributors go on to look at the present legal features of regionalism, covering institutional frameworks, trade diversity and regional integration. The third part of the book is truly unique in proposing an essential groundwork for the institutionalisation of an East Asian Community. It conceives a draft East Asian Charter, an essential document that distils what East Asian nations have achieved, and also includes integral principles and fundamental rules for future cooperation among countries and peoples in the region. This book will be of interest to graduates and academics interested in regionalism, international relations, international law and Asian studies.
