WHO Guidelines on Hand Hygiene in Health Care - World Health Organization 2009

The WHO Guidelines on Hand Hygiene in Health Care provide health-care workers (HCWs), hospital administrators and health authorities with a thorough review of evidence on hand hygiene in health care and specific recommendations to improve practices and reduce transmission of pathogenic microorganisms to patients and HCWs. The present Guidelines are intended to be implemented in any situation in which health care is delivered either to a patient or to a specific group in a population.

Therefore, this concept applies to all settings where health care is permanently or occasionally performed, such as home care by birth attendants. Definitions of health-care settings are proposed in Appendix 1. These Guidelines and the associated WHO Multimodal Hand Hygiene Improvement Strategy and an Implementation Toolkit (<http://www.who.int/gpsc/en/>) are designed to offer health-care facilities in Member States a conceptual framework and practical tools for the application of

recommendations in practice at the bedside. While ensuring consistency with the Guidelines recommendations, individual adaptation according to local regulations, settings, needs, and resources is desirable. This extensive review includes in one document sufficient technical information to support training materials and help plan implementation strategies. The document comprises six parts.

Australia Circumnavigated. The Voyage of Matthew Flinders in HMS Investigator, 1801-1803 / Volume II - Kenneth Morgan 2020-02-06

This two-volume work provides the first edited publication of Matthew Flinders's fair journals from the circumnavigation of Australia in 1801-1803 in HMS Investigator, and of the 'Memoir' he wrote to accompany his journals and charts. These are among the most important primary texts in Australian maritime history and European voyaging in the Pacific. Flinders was the first explorer to circumnavigate Australia. He was also largely responsible for giving Australia its name. His voyage was supported by the Admiralty, the Navy Board, the East India Company and the patronage of Sir Joseph Banks, President of the Royal Society. Banks ensured that the Investigator expedition included scientific gentlemen to document Australia's flora, fauna, geology and landscape features. The botanist Robert Brown, botanical painter Ferdinand Bauer, landscape artist William Westall and the gardener Peter Good were all members of the voyage. After landfall at Cape Leeuwin, Flinders sailed anti-clockwise round the whole continent, returning to Port Jackson when the ship became unseaworthy. After a series of misfortunes, including a shipwreck and a long detention at the Ile de France (now Mauritius), Flinders returned to England in 1810. He devoted the last four years of his life to preparing A Voyage to

Terra Australis, published in two volumes, and an atlas. Flinders died on 19 July 1814 at the age of forty. The fair journals edited here comprise a daily log with full nautical information and 'remarks' on the coastal landscape, the achievements of previous navigators in Australian waters, encounters with Aborigines and Macassan trepanners, naval routines, scientific findings, and Flinders's surveying and charting. The journals also include instructions for the voyage and some additional correspondence. The 'Memoir' explains Flinders' methodology in compiling his journals and charts and the purpose and content of his surveys. This edition has a substantial introduction

Global Land Ice Measurements from Space - Jeffrey S. Kargel 2014-07-08

An international team of over 150 experts provide up-to-date satellite imaging and quantitative analysis of the state and dynamics of the glaciers around the world, and they provide an in-depth review of analysis methodologies. Includes an e-published supplement. Global Land Ice Measurements from Space - Satellite Multispectral Imaging of Glaciers (GLIMS book for short) is the leading state-of-the-art technical and interpretive presentation of satellite image data and analysis of the changing state of the world's glaciers. The book is the most definitive, comprehensive product of a global glacier remote sensing consortium, Global Land Ice Measurements from Space (GLIMS, <http://www.glims.org>). With 33 chapters and a companion e-supplement, the world's foremost experts in satellite image analysis of glaciers analyze the current state and recent and possible future changes of glaciers across the globe and interpret these findings for policy planners. Climate change is with us for some time to come, and its impacts are being felt by the world's population. The GLIMS Book, to be released about the same time as the IPCC's 5th Assessment report on global climate warming, buttresses and adds rich details and authority to the global change community's understanding of climate change impacts on the cryosphere.

This will be a definitive and technically complete reference for experts and students examining the responses of glaciers to climate change. World experts demonstrate that glaciers are changing in response to the ongoing climatic upheaval in addition to other factors that pertain to the circumstances of individual glaciers. The global mosaic of glacier changes is documented by quantitative analyses and are placed into a perspective of causative factors. Starting with a Foreword, Preface, and Introduction, the GLIMS book gives the rationale for and history of glacier monitoring and satellite data analysis. It includes a comprehensive set of six "how-to" methodology chapters, twenty-five chapters detailing regional glacier state and dynamical changes, and an in-depth summary and interpretation chapter placing the observed glacier changes into a global context of the coupled atmosphere-land-ocean system. An accompanying e-supplement will include oversize imagery and other other highly visual renderings of scientific data.

Mahler's Voices - Julian Johnson 2009-04-30
Passionate and intense in one moment, ironic or brash in the next, Mahler's music speaks with a diversity of voices that often undermine its own ideals of unity, narrative struggle and transcendent affirmation. The composer plays constantly with musical genres and styles, moving between them without warning in a way that often bewildered his contemporaries. Ranging freely across Mahler's symphonies and songs in a thoughtful and thorough study of his musical speech, Julian Johnson considers how this body of music foregrounds the idea of artifice, construction and musical convention while at the same time presenting itself as act of authentic expression and disclosure. Mahler's Voices explores the shaping of this music through strategies of calling forth its own mysterious voice--as if from nature or the Unconscious--while at other times revealing itself as a made object, often self-consciously assembled from familiar and well-worn materials. A unique study not of Mahler's

works as such but of Mahler's musical style, Mahler's Voices brings together a close reading of the renowned composer's music with wide-ranging cultural and historical interpretation. Through a radical self-awareness that links the romantic irony of the late 18th-century to the deconstructive attitude of the late 20th-century, Mahler's music forces us to rethink historical categories themselves. Yet what sets it apart, what continues to fascinate and disturb, is the music's ultimate refusal of

this position, acknowledging the conventionality of all its voices while at the same time, in the intensity of its tone, speaking "as if" what it said were true. However bound up with the Viennese modernism that Mahler prefigured, the urgency of this act remains powerfully resonant for our own age.
