Watershed Condition Classification Technical
Guide - U.s. Department of Agriculture

Forest Service 2012-08-15

The U.S. Department of Agriculture (USDA)

Strategic Plan for fiscal year (FY) 2010–2015 targets the restoration of watershed and forest health as a core management objective of the national forests and grasslands. To achieve this goal, the Forest Service, an agency of USDA, is directed to restore degraded watersheds by strategically focusing investments in watershed improvement projects and conservation practices at landscape and watershed scales. The Forest Service formed the National Watershed Condition Team and tasked it with developing a nationally consistent, science-based approach to classify the condition of all National Forest System (NFS) watersheds and to develop outcome-based performance measures for watershed restoration. The team evaluated alternative approaches for classifying watersheds (USDA Forest Service 2007) and developed the watershed condition classification (WCC) system described in this

technical guide. The team designed the WCC system to—Classify the condition of all NFS watersheds; Be quantitative to the extent feasible; Rely on Geographic Information System (GIS) technology; Be cost effective; Be implementable within existing budgets; Include resource areas and activities that have a significant influence on watershed condition. National forests are required to revise the classification on an annual basis. The WCC system is a national forest-based, reconnaissance level evaluation of watershed condition achievable within existing budgets and staffing levels that can be aggregated for a national assessment of watershed condition. The WCC system offers a systematic, flexible means of classifying watersheds based on a core set of national watershed condition indicators. The system relies on professional judgment exercised by forest interdisciplinary (ID) teams, GIS data,

and national databases to the extent they are available, and on written rule sets and criteria for indicators that describe the three watershed condition classes (functioning properly, functioning at risk, and impaired function). The WCC system relies on Washington Office and regional office oversight for flexible and consistent application among national forests. The WCC system is a first approximation of watershed condition, and we will revise and refine it over time. The expectation is that we will improve and refine individual resource indicators and that we will develop databases and map products to assist with future classifications. The WCC information will be incorporated into the watershed condition framework, which will ultimately be employed to establish priorities, evaluate program performance, and communicate watershed restoration successes to interested stakeholders and Congress. The

watershed condition goal of the Forest Service is “to protect National Forest System watersheds by implementing practices designed to maintain or improve watershed condition, which is the foundation for sustaining ecosystems and the production of renewable natural resources, values, and benefits” (FSM 2520). U.S. Secretary of Agriculture Tom Vilsack reemphasized this policy in his “Vision for the Forest Service” when he stated that achieving restoration of watershed and forest health would be the primary management objective of the Forest Service (USDA 2010). This Watershed Condition Classification Technical Guide helps to implement this policy objective by—1. Establishing a systematic process for determining watershed condition class that all national forests can apply consistently; 2. Improving Forest Service reporting and tracking of watershed condition; 3.

Strengthening the effectiveness of the Forest Service to maintain and restore the productivity and resilience of watersheds and their associated aquatic systems on NFS lands.

New Drugs in Oncology - W. Queisser 1989

Microplastics in the Marine Environment: Sources, Distribution, Biological Effects and Socio-Economic Impacts - André Ricardo Araújo Lima 2021-06-09

Governance and Sustainability - David Crowther 2020-08-19

This book explores the concepts of sustainability and governance in relation to the governance of corporations – hence the ubiquity of the term corporate governance – and other bodies. It examines how these concepts are regularly used by politicians and by the media. The two concepts are however largely treated as being separate

and discrete, and given equal coverage. The argument in this book is that the two concepts are inter-related and that good governance is a prerequisite for sustainability. The focus of the book therefore is different from most, as it seeks to integrate these two important issues. The approach used in this book is based on the tradition of the Social Responsibility Research Network – a worldwide body of scholars that, over its 20-year history, has sought to broaden the discourse and to treat all research as inter-related and business-relevant. The book examines diverse aspects of the changes to corporate and institutional behaviour that have recently manifested by focusing on these two aspects of sustainable development. Thus, the authors explore engagement and partnership between organisations, in order to consider the extent to which the focus has changed so much that we need to think

about new approaches to our understanding of sustainability and differing effects in practice. The international mix of authors makes this an original contribution, sharing some of the best ideas from around the world.

Market Liberalism and Economic Patriotism in the Capitalist World-System - Tamás Gerőcs 2019-02-06

This volume broadens the scope of 'comparative capitalism' within the Varieties of Capitalism (VoC) tradition. It endorses the employment of multiple perspectives, including critical political economy, institutionalist systems of capitalism, structuralist-dependency scholarship and world-systems theory. The contributors deal with the theory of economic patriotism in a conceptual framework, as well as case studies regarding rent-seeking behaviour, the patronage state in Hungary and Poland, the conflict between national regulation and

the European legal framework and the perspective of wage relations in the European institutional framework. The book concludes with the legacy of developmentalism and dirigisme in a core-periphery relation, based on the French state and a range of non-European cases including Iran, Brazil and Egypt.

The Middle East Economies in Times of Transition - Ahmed Galal 2016-04-08

Diwan and Galal looks at the structure and prospects of the Middle East economies after the 2011 Uprisings, focusing on issues of economic growth, inequality, the impact of oil, and the unfolding political transitions. On the growth question, the book looks into the extent of structural transformation of the economy, the political economy reasons for the lack of structural change, and the external conditions in the EU and in the GCC that underpin the lack of structural change. On inequality, the book offers new measures

of equality of opportunity in human development and in the job market, and it also reviews the complex political economy of subsidy removal. Regarding natural resources, the volume provides three innovations: connecting the notion of 'oil curse' to the global phenomena of asset bubbles; evidence that resource curse effects do not rise monotonically with the size of the resource rent, but rather, according to an inverted U shape; and an extension of the concept of rent to the other non-oil rents that are also predominant in the region. Finally, the volume places the political transition in the region in a global perspective using various methods - theoretical, comparative, and empirical, and it explores the relationship between democracy in its variety of forms and economic development.

Village Journey - Thomas R. Berger 1995
The Alaska Native Claims Settlement Act

passed by Congress in 1971, hailed at the time as the most liberal settlement ever achieved with Native Americans, granted 44 million acres and nearly \$1 billion in cash to a new entity -- Native corporations. When this book was published in 1985, that settlement was bitterly resented by the Alaska Natives themselves. Thomas R. Berger, invited by the Inuit Circumpolar Conference to head the Alaska Native Review Commission, traveled to sixty-two villages and towns, held village meetings and listened to testimony from Inuit, Aboriginal peoples, and Aleuts. His report, Village Journey, suggests changes in the law and public attitudes that will be required to reach a fair accommodation with the Alaska Natives and enable them to keep their land for themselves and for their descendants. The author's new Preface deals with problems still facing Alaska Natives and their corporations. This is a new release of

the book published in May 1995.

The Blueprint - Kirk Franklin 2010-05-18
Seven-time Grammy award winning artist offers an inspiring blend of God and grit for building a fulfilling life "The Blueprint is a transparent approach to talking about issues-from marriage to politics to sex and religion-and it's from my perspective. Not from a Princeton, mainline, protestant, evangelical or liberal viewpoint, but from a 2010 Christian moderate with swag." --Kirk Franklin Gospel artist Kirk Franklin's faith wasn't always as strong as it is today. His father abandoned his family; his mother constantly told Kirk that he was an unwanted child and left him to be adopted when he was four; his sister became a crack addict; he never saw a black man who was faithful in marriage. Despite his shaky foundation he found strength and success through his music and through God. In The Blueprint, Franklin will explain how by

communicating with life's architect, God, he learned to see hardships as necessary life propellants and moved on to become the bestselling gospel musician in recent history, as well as a devoted husband and loving father. This is not a step program, it's a lifelong journey. With Franklin's guidance, you will: -pursue your dreams without losing yourself in the chase -do some lifescaping to eliminate the "weeds" that hold you back - declare your life to be drama-free -get past your fears, so you can live and love fully - pass the baton to future generations by leading by example It's time to take faith out of the church pews and into our everyday lives. With hope, devotion, and strength, The Blueprint offers a plan to help you move beyond hardships to create your own personal Blueprint for life. Watch a Video

**The Rise of Sophisticated
Authoritarianism in Southeast Asia -**

Lee Morgenbesser 2020-04-16

This Element offers a way to understand the evolution of authoritarian rule in Southeast Asia. The theoretical framework is based on a set of indicators (judged for their known advantages and mimicry of democratic attributes) as well as a typology (conceptualized as two discreet categories of 'retrograde' and 'sophisticated' authoritarianism). Working with an original dataset, the empirical results reveal vast differences within and across authoritarian regimes in Southeast Asia, but also a discernible shift towards sophisticated authoritarianism over time. The Element concludes with a reflection of its contribution and a statement on its generalizability.

Borrowed Time - James Freeman 2018-08-07

The disturbing, untold story of one of the largest financial institutions in the world, Citigroup—one of the "too big to fail" banks—from its founding in 1812 to its role in the 2008 financial crisis, and the many disasters in between. During the 2008 financial crisis, Citi was presented as the victim of events beyond its control—the larger financial panic, unforeseen economic disruptions, and a perfect storm of credit expansion, private greed, and public incompetence. To save the economy and keep the bank afloat, the government provided huge infusions of cash through multiple bailouts that frustrated and

angered the American public. But, as financial experts James Freeman and Vern McKinley reveal, the 2008 crisis was just one of many disasters Citi has experienced since its founding more than two hundred years ago. In *Borrowed Time*, they reveal Citi's history of instability and government support. It's not a story that either Citi or Washington wants told. From its founding in 1812 and through much of its history the bank has been tied to the federal government—a relationship that has benefited both. Many of its initial stockholders had owned stock in the Bank of the United States, and its first president, Samuel Osgood, had been a member of the Continental Congress and America's first Postmaster General. From its earliest years, Citi took massive risks that led to crisis. But thanks to private investors, including John Jacob Astor, they survived throughout the nineteenth century. In the twentieth

century, Senator Carter Glass blamed Citi CEO "Sunshine Charlie" Mitchell for the 1929 stock market crash, and the bank was actually in violation of the senator's signature achievement, the Glass-Steagall law, in the late 1990s until then U.S. Treasury Secretary Robert Rubin engineered the law's repeal. Rubin later became the chairman of the executive committee of Citigroup, helping to oversee the bank as it ramped up its increasing mortgage risks before the 2008 crash. The scale of the financial panic of 2008 was not, as the media and experts claim, unprecedented. As *Borrowed Time* shows, disasters have been relatively frequent during the century of government-protected banking—especially at Citi.

Butterflies of Malaysian Borneo - Fatimah Abang 2006

Epic of Qayaq - Lela Oman 1995-07-15

This is a splendid presentation of an ancient northern story cycle, brought to life by Lela Kiana Oman, who has been retelling and writing the legends of the Inupiat of the Kobuk Valley, Alaska, nearly all her adult life. In the mid-1940s, she heard these tales from storytellers passing through the mining town of Candle, and translated them from Inupiaq into English. Now, after fifty years, they illuminate one of the world's most vibrant mythologies. The hero is Qayaq, and the cycle traces his wanderings by kayak and on foot along four rivers - the Selawik, the Kobuk, the Noatak and the Yukon - up along the Arctic Ocean to Barrow, over to Herschel Island in Canada, and south to a Tlingit Indian village. Along the way he battles with jealous fathers-in-law and other powerful adversaries; discovers cultural implements (the copper-headed spear and the birchbark canoe); transforms himself into animals, birds and fish, and meets

animals who appear to be human.

Menadelook - Eileen Norbert 2017

Menadelook showcases nearly one hundred photographs taken by the Inupiat

photographer Charles Menadelook that document life in Wales in the Bering Strait between Alaska and Russia, in the early 1900s. Photographs of Inupiat life in the early twentieth century are rare, and photographs taken by an indigenous person are nearly nonexistent. These photographs provide a unique view into the Inupiat world during the early twentieth century and give both a pictorial and Native perspective on Inupiat traditions and historical events.

**Your Fatwa Does Not Apply Here:
Untold Stories from the Fight Against
Muslim Fundamentalism** - Karima

Bennoune 2013-08-26

With a new afterword. “Compelling, meticulously researched. Should be required reading.”—Washington Post In Lahore, Pakistan, Faizan Peerzada resisted being relegated to a “dark corner” by staging a performing arts festival despite bomb attacks. In Senegal, wheelchair-bound Aissatou Cissé produced a comic book to illustrate the injustices faced by disabled women and girls. In Algeria, publisher Omar Belhouchet and his journalists struggled to put out their paper, El Watan (The Nation), the same night that a 1996 jihadist bombing devastated their offices and killed eighteen of their colleagues. In Afghanistan, Young Women for Change took to the streets of

Kabul to denounce sexual harassment, undeterred by threats. In Minneapolis, Minnesota, Abdirizak Bihi organized a Ramadan basketball tournament among Somali refugees to counter the influence of Al Shabaab. From Karachi to Tunis, Kabul to Tehran, across the Middle East, North Africa, South Asia, and beyond, these trailblazers often risked death to combat the rising tide of fundamentalism within their own countries. But this global community of writers, artists, doctors, musicians, museum curators, lawyers, activists, and educators of Muslim heritage remains largely invisible, lost amid the heated coverage of Islamist terror attacks on one side and abuses perpetrated against suspected terrorists on the other. A veteran of twenty years of human rights research and activism, Karima Bennoune draws on extensive fieldwork and interviews to illuminate the inspiring stories of those who represent one of the best

hopes for ending fundamentalist oppression worldwide.

Managing Ethnic Diversity - Dr Reza Hasmath
2012-12-28

The management of ethnic diversity has become a topical and often controversial subject in recent times, with much debate

surrounding multiculturalism as a systematic and comprehensive response for dealing with ethnic diversity. This book engages with these debates, examining the tangible outcomes of multiculturalism as a policy and philosophy in a range of traditional and 'newer' multi-ethnic nations. Exploring the questions of whether multiculturalism can promote 'ethnic harmony', employment equity and trust between various minority and non-minority groups, *Managing Ethnic Diversity* also adopts a comparative perspective on the experiences of multiculturalism in various international contexts, in order to examine whether lessons learned from some jurisdictions can be applied to others. With an international team of experts presenting the latest research from the UK, North America, Europe, China and Australasia, a truly global dialogue is fostered with regard to the utility and limits of multiculturalism in

local and comparative contexts. As such, *Managing Ethnic Diversity* will appeal to social scientists interested in race and ethnicity, multiculturalism and migration.

Conditional Cash Transfers, Adult Work

Incentives, and Poverty - Emmanuel Skoufias 2012

Conditional cash transfer (CCT) programs aim to alleviate poverty through monetary and in-kind benefits, as well as reduce future levels of poverty by encouraging investments in education, health, and nutrition. The success of CCT programs at reducing poverty depends on whether, and the extent to which, cash transfers affect adult work incentives. The authors examine whether the PROGRESA program of Mexico affects adult participation in the labor market and overall adult leisure time, and they link these effects to the impact of the program on poverty. Using the experimental design of PROGRESA's evaluation sample, the authors find that the program does not have any significant effect on adult labor force participation and leisure time. Their findings on adult work incentives are reinforced further by the result that

PROGRESA leads to a substantial reduction in poverty. The poverty reduction effects are stronger for the poverty gap and severity of poverty measures.

Sukuk Securities - Meysam Safari 2014-09-15

The essential guide to global sukuk markets worldwide Sukuk Securities provides complete information and guidance on the latest developments in the burgeoning sukuk securities markets. Written by leading Islamic finance experts, this essential guide offers insight into the concepts, design features, contract structures, yields, and

payoffs in all twelve global sukuk markets, providing Islamic finance professionals with an invaluable addition to their library. The first book to fully introduce the market, this book provides a detailed overview of the sukuk market, with practical guidance toward applying these instruments in real-world scenarios. Readers will learn how sukuk securities are regulated and the issues that arise from regulations, and gain insight into the foundation and principles of Islamic finance as applied to these instruments. Extensive tables illustrate t-test comparisons between conventional bonds and sukuk, risk factors, and the issuance of different types of sukuk securities by country to give readers a deeper understanding of the markets. In 2010, the World Bank recommended sukuk as the best form of lending for growth in developing countries; since then, the value of new issues has grown at 45 percent per

year. The market's present size is close to US \$1,200 billion, with private markets in major financial centers like London, Zurich, and New York. This book provides comprehensive guidance toward understanding and using these instruments, and working within these markets. Get acquainted with the sukuk market, definitions, classification, and pricing Learn the different approaches to structuring and contract design Discover how sukuk is applied, including regulations, ratings, and securitization Examine payoff structures and suggested sukuk valuation in the context of Islamic finance principles With the sukuk market growing the way it is, regulators, investors, and students need to fully understand the mechanisms at work. Sukuk Securities is the complete guide to the sukuk markets, with expert insight. July 2014 saw the first sukuk listing in London. Hong Kong and Seoul have also entered this

niche market. Predictions are that there will be continued high growth of sukuk debt markets around the world, all providing targeted funding via sukuk contracting modes.

The 100 Most Influential Young Entrepreneurs 2019 - 2019

From College to Work - Bikas C. Sanyal 1987
The transition of college graduates to the world of work in the Sudan was studied as a follow-up of earlier research on the relation of education and employment. Of concern were: higher education's response to the changing needs of Sudanese society; students' choices in higher education and their performance; the match between students' qualifications and job

requirements; and the correspondence between students' expectations and achievements in the work world. Enrollments by broad fields of study were identified, along with enrollments by region and province. The unit cost method was employed to assess the cost of higher education. The attitudes of students, graduates, and employers were determined using questionnaires, which are appended. The conceptual framework for these surveys is discussed, with attention to individual and family characteristics, community characteristics, parental education, occupation and income, and educational and occupational background. Final-year secondary school students who were to enter college were surveyed as well as college students. Background information on the Sudanese economy and educational system is included. (SW)

Arab Development Outlook - United Nations Economic and Social Commission for Western Asia 2016-10-03

The Arab region is in crisis and it is easy to succumb to pessimism about its future. This report, however, embraces a vision of hope: one that illustrates the many ways in which the region can act to ensure its future security and prosperity. It envisages a day when authoritarianism, occupation, foreign

domination and all forms of discrimination end. A vision of human development and economic prosperity implies that citizens are free to voice their opinions and practice their beliefs without fear, the rule of law applies equally to all, and the basic necessities for a decent life are affordable even for the least fortunate. It calls for choices to be made in order to lay the foundations of an inclusive society, so as not to slip further into a spiral of deepening violence, instability and recession that would undermine development for generations to come. This report presents a vision of improved governance, advanced social justice and human well-being, transformed economies, and intensified regional integration; in short, an Arab region at peace, stable and prosperous.

An Overview of Islamic Finance - Mr. Mumtaz Hussain 2015-06-02
Islamic finance has started to grow in

international finance across the globe, with some concentration in few countries. Nearly 20 percent annual growth of Islamic finance in recent years seems to point to its resilience and broad appeal, partly owing to principles that govern Islamic financial activities, including equity, participation, and ownership. In theory, Islamic finance is resilient to shocks because of its emphasis on risk sharing, limits on excessive risk taking, and strong link to real activities. Empirical evidence on the stability of Islamic banks, however, is so far mixed. While these banks face similar risks as conventional banks do, they are also exposed to idiosyncratic risks, necessitating a tailoring of current risk management practices. The macroeconomic policy implications of the rapid expansion of Islamic finance are far reaching and need careful considerations.

Disaster Risk Reduction in Indonesia -

Riyanti Djalante 2017-05-02

This book is a unique, transdisciplinary summary of the state of the art of disaster risk reduction (DRR) in Indonesia. It provides a comprehensive overview of disaster risk governance across all levels and multiple actors including diverse perspectives from practitioners and researchers on the challenges and progress of DRR in Indonesia. The book includes novel and emerging topics such as the role of culture, religion, psychology and the media in DRR. It is essential reading for students,

researchers, and policy makers seeking to understand the nature and variety of environmental hazards and risk patterns affecting Indonesia. Following the introduction, the book has four main parts of key discussions. Part I presents disaster risk governance from national to local level and its integration into development sectors, Part II focuses on the roles of different actors for DRR, Part III discusses emerging issues in DRR research and practice, and Part IV puts forward variety of methods and studies to measure hazards, risks and community resilience.
