Madam Atatürk - Ipek Çalislar 2013-10-04

Mustafa Kemal Atatürk is hailed as one of the most charismatic political leaders of the twentieth century, but little is known today about his one and only wife, Latife Hanim. A multilingual intellectual educated at the Sorbonne, Latife's marriage to Atatürk in 1923 set her apart from her contemporaries, raising her to the pinnacle of political power. She played a central role in the creation of a modern and secular Turkey and campaigned tirelessly for women's right to vote. Throughout her marriage, Latife stood beside her husband and acted as his interpreter, promoter and diplomatic aide. She even twice risked her own life to save his. However, after only two years of marriage, Atatürk divorced Latife and she soon disappeared from public life. She was shunned, blamed for the failure of the marriage and portrayed as a sharp-tongued, quarrelsome woman who had strained Atatürk's nerves. Latife spent the rest of her life in seclusion. In the first biography to be written on Latife Hanim, Ipek Çalislar recounts the life of an exceptional and courageous

woman, well ahead of her time, who lived through a remarkable period in Turkish history. 'Rich, surprising and profound' Orhan Pamuk 'A daring biography' Independent 'A unique account of the life and times of an exceptional woman' Moris Farhi, author of Young Turk

Operative Strategy in General Surgery - Jameson L. Chassin 2012-12-06

This surgical atlas should be of great value to all clinical surgeons, both those in training and those in surgical practice, and Dr. Chassin is superbly qualified to author this work. During more than three decades as a member of the faculty of the New York University School of Medicine, he has taught countless residents many aspects of the art of surgical technique. One measure of Dr. Chassin's unusual teaching ability is that he is both Professor of Clinical Surgery at New York University and Director of Surgery at Booth Memorial Hospital, where our fourth-year surgical residents have rotated regularly for the past 12 years. Booth Memorial is the only hospital outside the New

York University Medical Center to which New York University residents rotate. This simple fact well underlines Dr. Chassin's remarkable capability for teaching. When a surgical complication develops after an operation, two or three possibilities should be considered. First, of course, was the diagnosis correct? If it was, then the cause of the complication is usually either an inadequate operative technique or a flawed concept underlying the selection of the operative procedure. When the surgical technique seems faultless, a postoperative complication would strongly indicate that the concept was erroneous, albeit cherished perhaps for decades. Unlike any other atlas on operative technique, this book specifically discusses the conceptual basis of the operation as well as the strategy that will help the surgeon avoid common pitfalls.

Facilities Planning and Maintenance for Private-Independent Schools - 2017-04-02

Your school's facilities and grounds often comprise the "first impression" visitors--including potential students and their families--experience of your institution. Proper facility design and maintenance are critical components in how your school is portrayed to constituents and the public, and reflect strongly on your overall program. *Facilities Planning and Maintenance for Private-Independent schools* pulls together key articles published by Independent School Management addressing plant and campus management--from determining educational specifications for available classroom space to developing a campus master plan to envisioning your facility needs in coming decades and much more. Here you will find the core principles for designing and maintaining your school's facilities--preserving and enhancing your school's unique character and program.

Studies on the Armenian Question - Kemal Çiçek 2020-09-02

The Armenian Question is part of a larger problem, formulated

under the name "The Question of the Orient", which has been brought up in different forms at different times and places. Throughout history, it is part of the games that have been played countless times against the Turkish people and state. Again, this problem constitutes a different face of the imperialist politics applied by the great states throughout the Balkans, the Caucasus, the Middle East and Anatolia throughout history. Although those who direct the issue of "relocation" have acted individually or collectively, the target has always been the Turkish people and state. This valuable work of Kemal Çiçek seeks an answer to this question. It is an extremely rigorous and, most importantly, an impartial study. In addition, this book provides sound information not only for scholars, but also for the general reader who is interested in this problem.

THE CHANGING PERSPECTIVES AND 'NEW' GEOPOLITICS OF THE CAUCASUS IN THE 21ST CENTURY - SERDAR YILMAZ 2021-03-08

The change of the geopolitical realities and dynamics, the latest regional developments and the emergence of a new perception of security due to the new situation in Karabakh have changed current perspectives in the South Caucasus region. This book will provide a comprehensive introduction for students, academics, media representatives, business persons and those who are interested in the region. It will guide you through in a very

readable and engaging style as it covers all the salient points and issues of the North Caucasus (the autonomous republics) succinctly and the South Caucasus (Azerbaijan, Georgia, Armenia) in detail. After the last development and Russian direct involvement in the Karabakh issue, the world's attention has focused increasingly on the Caucasus region. Thus, *THE CHANGING PERSPECTIVES AND 'NEW' GEOPOLITICS OF THE CAUCASUS IN THE 21ST CENTURY* book will be an excellent introduction to the complexities of a little-known the Caucasus region and make a significant contribution to the understanding of fundamental issues of the region. As the editors, we would like to dedicate this book to the heroic Azerbaijani soldiers who were martyred during the struggle for the liberation of the Karabakh lands from the Armenian occupation.

Leadership Challenges in the Current Security Environment - Dr. Murat Şengöz 2020-08-31

The current security environment is characterized by an increase in the number of military conflicts and other human-induced problems that threaten the human life and co-existence. These challenges force the armies, whose first duty is the establishment of security, to focus more on military leadership in order to realize and adopt their duties. The quality of military leadership is critical to the establishment of today's both security and peace environment. This book is written for students of the faculties of economic and administrative sciences, political sciences, and anyone who feels relevant to national security administration. The book provides a detailed understanding of current security environment and the challenges of military leadership. Unlike other books on national security administration that does not focus on wider areas affecting the perception and execution of military leadership, this book will provide readers with a wealth of information about the armys' main structure and the current security environment and the leadership challenges. The book is based on both theories and practices.

CCTV Surveillance - Herman Kruegle 2011-03-15

Continuing in the celebrated tradition of the first edition, the second edition is written to serve as a useful resource for the end-user as well as the technical practitioner. Each chapter begins with an overview, and presents the latest information on the relevant equipment, describing the characteristics, features and application of each device. Coverage of aging or obsolete technology is reduced to a historical perspective, and eight brand new chapters cover digital video technology, multiplexers, integrated camera-lens-housing, smart domes, and rapid deployment CCTV systems. Serves as an indispensable resource on CCTV theory Includes eight new chapters on the use of digital components and other related technologies that have seen a recent explosion in use Fully illustrated, the book contains completely updated photographs and diagrams that represent the latest in CCTV technology advancements

Smarter as the New Urban Agenda - J. Ramon Gil-Garcia 2015-09-07

This book will provide one of the first comprehensive approaches to the study of smart city governments with theories and concepts for understanding and researching 21st century city governments innovative methodologies for the analysis and evaluation of smart city initiatives. The term "smart city" is now generally used to represent efforts that in different ways describe a comprehensive vision of a city for the present and future. A smarter city infuses

information into its physical infrastructure to improve conveniences, facilitate mobility, add efficiencies, conserve energy, improve the quality of air and water, identify problems and fix them quickly, recover rapidly from disasters, collect data to make better decisions, deploy resources effectively and share data to enable collaboration across entities and domains. These and other similar efforts are expected to make cities more intelligent in terms of efficiency, effectiveness, productivity, transparency, and sustainability, among other important aspects. Given this changing social, institutional and technology environment, it seems feasible and likeable to attain smarter cities and by extension, smarter governments: virtually integrated, networked, interconnected, responsive, and efficient. This book will help build the bridge between sound research and practice expertise in the area of smarter cities and will be of interest to researchers and students in the e-government, public administration, political science, communication, information science, administrative sciences and management, sociology, computer science, and information technology. As well as government officials and public managers who will find practical recommendations based on rigorous studies that will contain insights and guidance for the development, management, and evaluation of complex smart cities and smart government initiatives.

We Are Full of Life - Ready Set Go Books 2020

Ethiopia has more than 80 different ethnic groups-different languages, different clothing styles, different traditions. But everyone has ways to celebrate. Many Ethiopians participate in coffee ceremonies and feasts or put on special clothes for special occasions. Meanwhile, in Addis Ababa, people can go dancing almost any night of the week and see many different dance moves and traditions. "We Are Full of Life", written by Jane Kurtz, is a celebration of Ethiopian culture, illustrated through vibrant and dynamic images created by students and instructors at Clark College Economic and Community Development class in Vancouver, WA. Ready Set Go Books, an Open Hearts Big Dreams Project, is focused on increasing the literacy rate in Ethiopia through giving readers books with stories in their heart languages, full of colorful illustrations with Ethiopian settings and details. Profits from books sales will be used to create, print, and distribute more Ready Set Go Books to kids in Ethiopia, Africa's second most populous country. Ethiopia's population is 44% children, ages 0-14 (43 million out of 97 million total). Only 5.5% of children attend pre-school or kindergarten, and the adult literacy rate is 49%. Our books are based on wise Ethiopian sayings that often rhyme in Amharic. If an adult says the first half, many children can chant the second half. Sometimes the meaning of these sayings is clear. Sometimes it has to be puzzled

out and argued over. But sayings and idioms and proverbs help people express truths and beliefs in unusual ways. Open Hearts Big Dreams Fund (OHBD) is a 501(3)(c) not for profit organization that believes the chance to dream big dreams should not depend on where in the world you are born. Our focus is to support nonprofit organizations and their programs that provide literacy, K-12 education, and leadership as well as that support the parents and communities where the kids live, in Ethiopia.

e-Learning and Social Networking Handbook - Frank Rennie 2013-01-04

Digital resources—from games to blogs to social networking—are strong forces in education today, but how can those tools be effectively utilized by educators and course designers in higher education? Filled with practical advice, the e-Learning and Social Networking Handbook, Second Edition provides a comprehensive overview of online learning tools and offers strategies for using these resources in course design, highlighting some of the most relevant and challenging topics in e-learning today, including:

- using social networking for educational purposes
- designing for a distributed environment
- strengths and weaknesses of delivering content in various formats (text, audio, and video)
- potential constraints on course design
- implementation, evaluation, induction, and training

Illustrated by short, descriptive case studies, the e-Learning and Social Networking Handbook, Second Edition also directs the reader to useful resources that will enhance their course design. This helpful guide will be invaluable to all those involved in the design and delivery of online learning in higher education.

Creating a Life Together - Diana Leafe Christian 2003-01-01

An intentional community is a group of people who have chosen to live or work together in pursuit of a common ideal or vision. An ecovillage is a village-scale intentional community that intends to create, ecological, social, economic, and spiritual sustainability over several generations. The 90s saw a revitalized surge of interest in intentional communities and ecovillages in North America: the number of intentional communities listed in the Communities Directory increased 60 percent between 1990 and 1995. But only 10 percent of the actual number of forming-community groups actually succeeded. Ninety percent failed, often in conflict and heartbreak. After visiting and interviewing founders of dozens of successful and failed communities, along with her own forming-community experiences, the author concluded that "the successful 10 percent" had all done the same five or six things right, and "the unsuccessful 90 percent" had made the same handful of mistakes. Recognizing that a wealth of

wisdom were contained in these experiences, she set out to distill and capture them in one place. Creating a Life Together is the only resource available that provides step-by-step, practical "how-to" information on how to launch and sustain a successful ecovillage or intentional community. Through anecdotes, stories, and cautionary tales about real communities, and by profiling seven successful communities in depth, the book examines "the successful 10 percent" and why 90 percent fail; the role of community founders; getting a group off to a good start; vision and vision documents; decision-making and governance; agreements; legal options; finding, financing, and developing land; structuring a community economy; selecting new members; and communication, process, and dealing well with conflict. Sample vision documents, community agreements, and visioning exercises are included, along with abundant resources for learning more.

Microwave Engineering - David M. Pozar 2011-11-22

Pozar's new edition of Microwave Engineering includes more material on active circuits, noise, nonlinear effects, and wireless systems. Chapters on noise and nonlinear distortion, and active devices have been added along with the coverage of noise and more material on intermodulation distortion and related nonlinear effects. On active devices, there's more updated material on bipolar junction and field effect transistors. New and updated material on wireless communications systems, including link budget, link margin, digital modulation methods, and bit error rates is also part of the new edition. Other new material includes a section on transients on transmission lines, the theory of power waves, a discussion of higher order modes and frequency effects for microstrip line, and a discussion of how to determine unloaded.

Doing Business by the Good Book - David Steward 2012-04-24

An indispensable volume that shows how to succeed in business by using the Bible and its lessons as a source of inspiration and guidance. In 1990, David L. Steward founded his company, Worldwide Technology, Inc., on a shoestring budget and borrowed money, well aware of the high-risk nature of the venture he was undertaking. Despite the fact that he was a novice entrepreneur, he was certain he would succeed. Steward believed intensely that God wouldn't let him down. *Doing Business by the Good Book* shares the inspiring lessons culled straight from the Bible, that Steward used to build his privately held billion-dollar company into a global information technology enterprise.
