The Power of Onlyness - Nilofer Merchant 2017-08-29

An 800-CEO-READ Staff Pick Shortlisted for the Thinkers50 Breakthrough Idea Award A Financial Times Business Book of the Month “For any would-be activists who hear the voice: ‘not me’ or ‘not now,’ Merchant makes the strong case for ‘yes you’ and ‘yes now’—and even shows you how to jump in.” —Van Jones, host of CNN’s The Messy Truth, author of Rebuild the Dream and The Green Collar Economy “The Power

of Onlyness is a book for our times. . . . Merchant forces us to dig deep, into the book and ourselves, and it goes beyond self-knowledge and self-empowerment, obliterating the fear of otherness with an understanding of the onlyness of us all.” —Sally Haldorson, 800-CEO-READ An innovation expert illuminates why your power to make a difference is no longer bound by your status If you’re like most people, you wish you had the ability to make a difference, but you don’t have the credentials, or a seat at the table, can’t get past the gatekeepers, and aren’t high enough in any hierarchy to get your ideas heard. In *The Power of Onlyness*, Nilofer Merchant, one of the world’s top-ranked business thinkers, reveals that, in fact, we have now reached an unprecedented moment of opportunity for your ideas to “make a dent” on the world. Now that the Internet has liberated ideas to spread through networks instead of hierarchies, power is no longer determined by your status, but by “onlyness”—that spot in the world only you stand in, a function of your distinct history and experiences, visions and hopes. If you build upon your signature ingredient of purpose and connect with those who are equally passionate, you have a lever by which to move the world. This new ability is already within your grasp, but to command it, you need to know how to meaningfully mobilize others around your ideas. Through inspirational and instructive stories, Merchant reveals proven strategies to unleash the centrifugal force of a new idea, no matter how weird or wild it may seem. Imagine how much better the world could be if every idea could have its shot, not just the ones that come from expected people and places. Which long-intractable problems would we solve, what new levels of creativity would be unlocked, and who might innovate a breakthrough that could benefit ourselves, our communities, and especially our economy. This limitless potential of onlyness has already been recognized by Thinkers 50, the Oscars of management, which cited it one of the five ideas that will shape business for next twenty years. Why do some individuals make scalable impact with their ideas, regardless of their power or status? *The Power of Onlyness* unravels this mystery for the first time so that anyone can make a dent. Even you.

Guide to Management Ideas and Gurus - Tim Hindle 2008-09-01

Good management is a precious commodity in the corporate world. *Guide to Management Ideas and Gurus* is a straight-forward manual on the most innovative management ideas and the management gurus who developed them. The earlier edition, *Guide to Management Ideas*, presented the most significant ideas that continue to underpin business management. This new book builds on those ideas and adds detailed biographies of the people who came up with them—the most influential business thinkers of the past and present. Topics covered include: Active Inertia, Disruptive Technology, Genchi Genbutsu (Japanese for "Go and See for Yourself"), The Halo Effect, The Long Tail, Skunkworks, Tipping Point, Triple Bottom Line, and more. The management gurus covered include: Dale Carnegie, Jim Collins, Stephen Covey, Peter Drucker, Philip Kotler, Michael Porter, Tom Peters, and many others.

Organizational Resilience and Female Entrepreneurship During Crises - Paola Paoloni 2022-03-16

The economic, health, and political crises, as well as the rise of the digital age, have changed and complicated the way in which people, companies, and regions function. The goal is not just survival, but also to innovate and organize themselves to chart new paths for growth and development. This book uses this premise to understand how organizations, in particular female-led businesses, work on their resilience using specific activities and relational capital as a driver of strategic value. The chapters include theoretical as well as practical contributions about how female-owned and female-run companies and organizations can take advantage of such opportunities, in terms of challenges, issues, tools, facilitators, and mechanisms that can support the use of the new opportunities in the near future.

50 Economics Ideas You Really Need to Know - Edmund Conway 2013-11-05

What exactly is a credit crunch? Why do professional athletes earn so much more than the rest of us? Which country is likely to be the world's leading economy in ten years' time? Daily Telegraph economics editor Edmund Conway introduces and explains the central ideas of economics in a series of 50 essays. Beginning with an exploration of the basic

theories, such as Adam Smith's "invisible hand," and concluding with the latest research into the links between wealth and happiness, he sheds light on all the essential topics needed to understand booms and busts, bulls and bears, and the way the world really works.

50 Philosophy Ideas You Really Need to Know - Ben Dupre
2013-10-01

Have you ever lain awake at night worried about how we can be sure of the reality of the external world? Perhaps we are in fact disembodied brains, floating in vats at the whim of some deranged puppetmaster. If so, you are not alone--and what's more, you are in exalted company--for this question and other ones like it have been the stuff of philosophical rumination from Plato to Popper. In a series of accessible and engagingly written essays, *50 Philosophy Ideas You Really Need to Know* introduces and explains the problems of knowledge, consciousness, identity, ethics, belief, justice, and aesthetics that have engaged the attention of thinkers from the era of the ancient Greeks to the present day.

50 Business Classics - Tom Butler Bowdon 2018-04-05

What do great enterprises have in common? What sort of person starts them? A single idea can help you find the next big thing, but it takes time to trawl through hundreds of business books to find inspiration. With insightful commentaries on the landmark writings of old and new, *50 Business Classics* presents the great entrepreneur stories, the best management thinking and the proven ideas on strategy, innovation and marketing - in one volume. *50 Business Classics* presents the key ideas from classic texts such as *My Years with General Motors* and Michael Gerber's *The E-Myth Revisited* to contemporary business lessons from the rise of tech giants like Google, Apple and Amazon. It contains revealing biographies of luminaries like Steve Jobs and Warren Buffett, as well as lesser-known stories including creation of publishing giant Penguin and Chinese behemoth Alibaba. Here you'll find the texts and ideas that matter in: · Entrepreneurship · Leadership · Management · Strategy · Business history · Personal development · Technology and innovation Summarising the smartest thinking for today's professional success, *50 Business Classics* provides inspiration and insights for

entrepreneurs, executives and students of business and management alike.

Sun Tzu - The Art of War for Managers - Gerald A Michaelson
2010-04-18

In today's competitive business world, you must capture the high ground and defend it against your rivals. The secret lies in mastering the strategic arts taught by the ancient Chinese military theorist Sun Tzu. Gerald A. Michaelson's classic book breaks down Sun Tzu's lessons to help you move from manager to leader and vanquish your competition. In this fully updated edition, Steven Michaelson offers new examples drawn from companies ranging from Amazon to Toyota to Google, putting Sun Tzu at your side for today's business challenges. Here is the wisdom--tested for twenty-five centuries--that will help you seize the advantage, storm your competitors' gates, and conquer the marketplace!

Little Bets - Peter Sims 2011-04-19

"An enthusiastic, example-rich argument for innovating in a particular way--by deliberately experimenting and taking small exploratory steps in novel directions. Light, bright, and packed with tidy anecdotes" (The Wall Street Journal). What do Apple CEO Steve Jobs, comedian Chris Rock, prize-winning architect Frank Gehry, and the story developers at Pixar films all have in common? Bestselling author Peter Sims found that rather than start with a big idea or plan a whole project in advance, they make a methodical series of little bets, learning critical information from lots of little failures and from small but significant wins. Reporting on a fascinating range of research, from the psychology of creative blocks to the influential field of design thinking, Sims offers engaging and illuminating accounts of breakthrough innovators at work, and a whole new way of thinking about how to navigate uncertain situations and unleash our untapped creative powers.

50 Psychology Ideas You Really Need to Know - Adrian Furnham
2009-03-02

How different are men and women's brains? Does altruism really exist? Are our minds blank slates at birth? And do dreams reveal our unconscious desires? Psychology is everywhere in today's society. No

crime fiction, documentary, chat show or medical consultation is complete without the introduction of a psychological angle. Psychology seeks to understand and explain thoughts, feelings and behaviour through a dizzying array of ideas and theories, shedding light on everything from memory, social mobility and attitude formation to delusions of grandeur, alcoholism and computer phobia, to name a few. In *50 Psychology Ideas You Really Need to Know*, Professor Adrian Furnham explains the central ideas of psychology in 50 concise and accessible essays. Packed with the latest research, most important case studies and arguments of key thinkers, this book is the perfect introduction to psychological theory. Contents include: Placebo effect; Kicking the habit; Hallucinations; Positive psychology; Emotional intelligence; IQ and you; Multiple intelligences; The Rorschach inkblot test; Detecting lies; Obedience to authority; Self-sacrifice or selfishness; Gambler's fallacy; Remembrance of things past; Artificial intelligence; Tip-of-the-tongue phenomenon; Psychosexual stages; Tabula rasa; Phrenology; Dyslexia.

All Your Worth - Elizabeth Warren 2005

A guide to achieving financial stability and prosperity by the co-authors of *The Two-Income Trap* encourages readers to change the ways they think about and manage money, discussing such topics as balancing a budget, planning for entertainment, and getting out of debt. 150,000 first printing.

50 Mathematical Ideas You Really Need to Know - Tony Crilly 2013-10-01

Just the mention of mathematics is enough to strike fear into the hearts of many, yet without it, the human race couldn't be where it is today. By exploring the subject through its 50 key insights--from the simple (the number one) and the subtle (the invention of zero) to the sophisticated (proving Fermat's last theorem)--this book shows how mathematics has changed the way we look at the world around us.

The Future: 50 Ideas You Really Need to Know - Richard Watson
2012-12-06

A dynamic insight into how science will shape human destiny over the coming century. What will the world look like in 2020, 2030 or even

2100? How will progress in scientific research affect human life in the areas of health and lifestyle, energy and the environment, politics and conflict, space exploration and even the ultimate questions of existence? This book offers an electrifying trip through the wonders - and terrors - awaiting us over the next hundred years.

50 Earth Ideas - Martin Redfern 2012-06-21

This latest book in the bestselling '50 Ideas' series is a wonderfully accessible overview of the only place we know of in the universe that is capable of sustaining life. Expert popular science writer Martin Redfern covers all the natural processes of the Earth: climate, ocean currents, air currents, the elements, plate tectonics, fossils, the evolution of life, volcanology, sea levels and the ultimate fate of the Earth. The 50 Ideas featured include: Geological formation; Rock layers; Formation of the atmosphere; Plate tectonics; Continental rifts; Volcanology; Simple life; Multi-cellular life; Snowball Earth; Gondwana and Pangea; Sexual selection; Complex life; The Cambrian revolution; The dinosaurs; Avalonia; The sauropod puzzle; End of the Mesozoic; The Cenozoic recovery; The Great Warming; The 'Great Flood'; The Holocene; Biodiversity and The fate of the Earth.

SPORT LEADERSHIP IN THE 21ST CENTURY. - JOHN F.; BURTON BORLAND (LAURA J.; KANE, GREGORY.) 2014

How To Win Friends And Influence People - Dale Carnegie
2014-05-06

Simple and timeless tools for success and happiness For more than eighty years, millions of people from Warren Buffett to Oprah Winfrey have benefited from the remarkable wisdom of Dale Carnegie. Intended as a basic sales primer, *How to Win Friends and Influence People* quickly exploded into an overnight success—selling more than fifteen million copies worldwide and becoming one of the most influential books of all time. With an enduring grasp of human nature, Dale Carnegie's *How to Win Friends and Influence People* shows you how to be more persuasive and effective, a better leader and manager, and happier at home and at work. This special new edition of the beloved classic includes an

exclusive foreword by Terry O'Reilly.

Religion - Peter Stanford 2010

Despite frequent prognostications regarding the 'death of God' and the triumph of secular materialism, religion remains a central component in the lives of most people around the world. There are currently thought to be 2 billion Christians, 1.2 billion Muslims, 800 million Hindus, along with some 700 million followers of other religions. *50 Religious Ideas You Really Need to Know* offers a clear path through the conceptual and denominational thickets of global religion. Award-winning religious affairs correspondent Peter Stanford begins with an examination of sacred texts, the divine principle and good and evil, before moving on to a discussion of the different traditions within Christianity, Islam, Judaism and the myriad customs of the East. Contents: The Divine Principle, Baptists, Buddha's teachings, Sacred Texts, Presbyterians, Dhama, Good and Evil, Sects and cults, Forms of Buddhism, Life and Death, Rapture, Confucianism, Golden Rule, God & Torah, Taoism, Rites and Rituals, Anti-Semitism, Shintoism, Life of Christ, Kabbalah, Missionary impulse, God and Mammon, Being Jewish, Just War, Reformation, Mohammed, Church and State, Papacy, Pillars of Islam, Spirituality, Guilt and Misogyny, Shari'ah law, Fundamentalism, Holy Spirit, Sunni & Shia, Darwinist challenge, Saints and sinners, Sufism, People and Creation, Orthodoxy, Islamism, The poor, Lutheranism, Hindu trinity, Sea of faith, Anglicanism, Sansara, Methodism, Sikhs & Jains.

50 Ideas You Really Need to Know - Edmund Conway 2012

What exactly is a credit crunch? Why do footballers earn so much more than the rest of us? Which country is likely to be the world's leading economy in 10 years' time? Daily Telegraph economics editor Edmund Conway introduces and explains the central ideas of economics in a series of fifty essays. Beginning with an exploration of the basic theories, such as Adam Smith's "invisible hand", and concluding with the latest research into the links between wealth and happiness, he sheds light on all the essential topics needed to understand booms and busts, bulls and bears, and the way the world really works.

Getting Things Done - David Allen 2001

ALLEN/GETTING THINGS DONE

The Founder's Dilemmas - Noam Wasserman 2013-04

The Founder's Dilemmas examines how early decisions by entrepreneurs can make or break a startup and its team. Drawing on a decade of research, including quantitative data on almost ten thousand founders as well as inside stories of founders like Evan Williams of Twitter and Tim Westergren of Pandora, Noam Wasserman reveals the common pitfalls founders face and how to avoid them.

Switch - Chip Heath 2010-02-16

Why is it so hard to make lasting changes in our companies, in our communities, and in our own lives? The primary obstacle is a conflict that's built into our brains, say Chip and Dan Heath, authors of the critically acclaimed bestseller *Made to Stick*. Psychologists have discovered that our minds are ruled by two different systems - the rational mind and the emotional mind—that compete for control. The rational mind wants a great beach body; the emotional mind wants that Oreo cookie. The rational mind wants to change something at work; the emotional mind loves the comfort of the existing routine. This tension can doom a change effort - but if it is overcome, change can come quickly. In *Switch*, the Heaths show how everyday people - employees and managers, parents and nurses - have united both minds and, as a result, achieved dramatic results: • The lowly medical interns who managed to defeat an entrenched, decades-old medical practice that was endangering patients • The home-organizing guru who developed a simple technique for overcoming the dread of housekeeping • The manager who transformed a lackadaisical customer-support team into service zealots by removing a standard tool of customer service In a compelling, story-driven narrative, the Heaths bring together decades of counterintuitive research in psychology, sociology, and other fields to shed new light on how we can effect transformative change. *Switch* shows that successful changes follow a pattern, a pattern you can use to make the changes that matter to you, whether your interest is in changing the world or changing your waistline.

[50 Big Ideas You Really Need to Know](#) - Ben Dupre 2022-08-18

In a series of 50 accessible essays, Ben Dupré introduces and explains the central ideas of politics, philosophy, religion, economics, science, and the arts that have engaged key thinkers and leaders, from Plato to the present day. From the Big Bang to romanticism, fate to democracy, 50 Big Ideas You Really Need to Know is a complete introduction to the most important concepts in history.

50 Maths Ideas You Really Need to Know - A. J. Crilly 2014

Who invented zero? Why 60 seconds in a minute? How big is infinity? Where do parallel lines meet? And can a butterfly's wings really cause a storm on the far side of the world? In 50 Maths Ideas You Really Need to Know, Professor Tony Crilly explains in 50 clear and concise essays the mathematical concepts - ancient and modern, theoretical and practical, everyday and esoteric - that allow us to understand and shape the world around us. Packed with diagrams, examples and anecdotes, this book is the perfect overview of this often daunting but always essential subject. For once, mathematics couldn't be simpler. Contents include: Origins of mathematics, from Egyptian fractions to Roman numerals; Pi and primes, Fibonacci numbers and the golden ratio; What calculus, statistics and algebra can actually do; The very real uses of imaginary numbers; The Big Ideas of relativity, Chaos theory, Fractals, Genetics and hyperspace; The reasoning behind Sudoku and code cracking, Lotteries and gambling, Money management and compound interest; Solving of Fermat's last theorem and the million-dollar question of the Riemann hypothesis.

50 Ideas You Really Need to Know: Universe - Joanne Baker

2013-11-05

From dwarf planets to dark energy; and from the Big Bang to the death of stars, this book is the perfect introduction to the cutting-edge science that is shaping our understanding of our place in the Universe and that could lead to the next great discovery--the detection of life beyond Earth.

What Got You Here Won't Get You There - Marshall Goldsmith

2010-09-03

Your hard work is paying off. You are doing well in your field. But there is something standing between you and the next level of achievement. That something may just be one of your own annoying habits. Perhaps one small flaw - a behaviour you barely even recognise - is the only thing that's keeping you from where you want to be. It may be that the very characteristic that you believe got you where you are - like the drive to win at all costs - is what's holding you back. As this book explains, people often do well in spite of certain habits rather than because of them - and need a "to stop" list rather than one listing what "to do". Marshall Goldsmith's expertise is in helping global leaders overcome their unconscious annoying habits and become more successful. His one-on-one coaching comes with a six-figure price tag - but in this book you get his great advice for much less. Recently named as one of the world's five most-respected executive coaches by Forbes, he has worked with over 100 major CEOs and their management teams at the world's top businesses. His clients include corporations such as Goldman Sachs, Glaxo SmithKline, Johnson and Johnson and GE.

50 Maths Ideas You Really Need to Know - Tony Crilly 2022-08-18

Atomic Habits - James Clear 2018-10-16

The #1 New York Times bestseller. Over 4 million copies sold! Tiny Changes, Remarkable Results No matter your goals, Atomic Habits offers a proven framework for improving--every day. James Clear, one of the

world's leading experts on habit formation, reveals practical strategies that will teach you exactly how to form good habits, break bad ones, and master the tiny behaviors that lead to remarkable results. If you're having trouble changing your habits, the problem isn't you. The problem is your system. Bad habits repeat themselves again and again not because you don't want to change, but because you have the wrong system for change. You do not rise to the level of your goals. You fall to the level of your systems. Here, you'll get a proven system that can take you to new heights. Clear is known for his ability to distill complex topics into simple behaviors that can be easily applied to daily life and work. Here, he draws on the most proven ideas from biology, psychology, and neuroscience to create an easy-to-understand guide for making good habits inevitable and bad habits impossible. Along the way, readers will be inspired and entertained with true stories from Olympic gold medalists, award-winning artists, business leaders, life-saving physicians, and star comedians who have used the science of small habits to master their craft and vault to the top of their field. Learn how to: make time for new habits (even when life gets crazy); overcome a lack of motivation and willpower; design your environment to make success easier; get back on track when you fall off course; ...and much more. Atomic Habits will reshape the way you think about progress and success, and give you the tools and strategies you need to transform your habits--whether you are a team looking to win a championship, an organization hoping to redefine an industry, or simply an individual who wishes to quit smoking, lose weight, reduce stress, or achieve any other goal.

50 Physics Ideas You Really Need to Know - Joanne Baker 2013-10-01
In this, the second volume in an important new series presenting core concepts across a range of critical areas of human knowledge, author Joanne Baker unravels the complexities of 20th-century scientific theory for a general readership. From Hubble's law to the Pauli exclusion principle, and from Schrodinger's cat to Heisenberg's uncertainty principle, she explains ideas at the cutting-edge of scientific enquiry, making them comprehensible and accessible to the layperson.

50 Political Ideas You Really Need to Know - Ben Dupre 2013-10-01

At a time of corrosive popular cynicism and profound international unease, the need for clarity over the fundamental concepts of politics has never been greater: the forces of Terrorism and Fundamentalism endanger our Security, while government responses to it pose a basic threat to Liberty, Democracy and Human rights. Corruption, Spin and a suspect Political culture arouse public indignation, which is further aggravated by an array of Pressure groups and the far-from-disinterested attentions of the Mass media. In 50 Political Ideas You Really Need to Know, Ben Dupre clears away the murk that obscures key concepts that we ignore at our peril.

Making Things Happen - Scott Berkun 2008-03-25

Offers a collection of essays on philosophies and strategies for defining, leading, and managing projects. This book explains to technical and non-technical readers alike what it takes to get through a large software or web development project. It does not cite specific methods, but focuses on philosophy and strategy.

168 Hours - Laura Vanderkam 2010-05-27

There are 168 hours in a week. This book is about where the time really goes, and how we can all use it better. It's an unquestioned truth of modern life: we are starved for time. With the rise of two-income families, extreme jobs, and 24/7 connectivity, life is so frenzied we can barely find time to breathe. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or else, if we don't make excuses, we make sacrifices. To get ahead at work we spend less time with our spouses. To carve out more family time, we put off getting in shape. To train for a marathon, we cut back on sleep. There has to be a better way-and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. They focus on what they do best and what only they can do. When plans go wrong and they run out of time, only their lesser priorities suffer. It's not always easy, but the payoff is

enormous. Vanderkam shows that it really is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter. The key is to start with a blank slate and to fill up your 168 hours only with things that deserve your time. Of course, you probably won't read to your children at 2:00 am, or skip a Wednesday morning meeting to go hiking, but you can cut back on how much you watch TV, do laundry, or spend time on other less fulfilling activities. Vanderkam shares creative ways to rearrange your schedule to make room for the things that matter most. *168 Hours* is a fun, inspiring, practical guide that will help men and women of any age, lifestyle, or career get the most out of their time and their lives.

Rework - Jason Fried 2010-03-09

Rework shows you a better, faster, easier way to succeed in business. Most business books give you the same old advice: Write a business plan, study the competition, seek investors, yadda yadda. If you're looking for a book like that, put this one back on the shelf. Read it and you'll know why plans are actually harmful, why you don't need outside investors, and why you're better off ignoring the competition. The truth is, you need less than you think. You don't need to be a workaholic. You don't need to staff up. You don't need to waste time on paperwork or meetings. You don't even need an office. Those are all just excuses. What you really need to do is stop talking and start working. This book shows you the way. You'll learn how to be more productive, how to get exposure without breaking the bank, and tons more counterintuitive ideas that will inspire and provoke you. With its straightforward language and easy-is-better approach, *Rework* is the perfect playbook for anyone who's ever dreamed of doing it on their own. Hardcore entrepreneurs, small-business owners, people stuck in day jobs they hate, victims of "downsizing," and artists who don't want to starve anymore will all find valuable guidance in these pages.

[50 Mathematical Ideas You Really Need to Know](#) - Tony Crilly 2007

"Who invented zero? Why 60 seconds in a minute? How big is infinity? Where do parallel lines meet? And can a butterfly's wings really cause a

storm on the far side of the world? In *50 Mathematical Ideas You Really Need to Know*, Professor Tony Crilly explains in 50 clear and concise essays the mathematical concepts - ancient and modern, theoretical and practical, everyday and esoteric - that allow us to understand and shape the world around us. Beginning with zero itself and concluding with the last great unsolved problem, *50 Mathematical Ideas* introduces the origins of mathematics, from Egyptian fractions to Roman numerals; explains the near-mystical significance of pi and primes, Fibonacci numbers and the golden ratio; tells you the things they didn't at school - what calculus, statistics and algebra can actually do, and the very real uses of imaginary numbers; illuminates the big Ideas of relativity, chaos theory, fractals, genetics and hyperspace; reveals the unspoken reasoning behind Sudoku and code cracking, lotteries and gambling, money management and compound interest; explores the latest mind-shattering developments, including the solving of Fermat's last theorem and the million-dollar question of the Riemann hypothesis. Packed with diagrams, examples and anecdotes, *50 Mathematical Ideas* is the perfect overview of this often daunting but always essential subject. For once, mathematics couldn't be simpler."--Publisher's description.

Capitalism - Jonathan Portes 2016

"Capitalism is the economic system that shapes our society and our lives, the set of principles that underlie our politics and our futures: but what does it really mean? What is money? What drives growth and what happens when it stops? What role can - or should - regulation play? Why did capitalism overcome rival systems in the past, why is it in crisis today - and what is its future? In this engaging set of 50 essays based around central concepts of economics, Jonathan Portes lays out the fundamental tenets of capitalism, the key moments of its history, the ideologies that have opposed it, and the possibilities contained within its future: a future that will impact us all"--Library of Congress.

The Economics Book - DK 2014-12-19

All your complicated economic questions and theories explained by world experts. Economics is a broad topic, and your knowledge might be limited if you're not an economist by profession -- until now! The

50 Management Ideas You Really Need to Know - Edward Russell-Walling 2013-10-01

In *50 Management Ideas You Really Need to Know*, Edward Russell-Walling demystifies the management concepts that any budding entrepreneur needs to grasp. In 50 bite-sized topics he expounds the wisdom of well-known business gurus, from Peters and Porter to Welch and Gates. Helpful theories and tools such as Ansoff's Product/Market grid, the 4Ps, and Boston Matrix are clearly and simply explained. Russell-Walling also expands on management ideas such as branding, outsourcing, and supply and demand, and covers the latest commercial

concepts from the online world. (P)2008 Quercus Editions Ltd

50 Psychology Ideas You Really Need to Know - Adrian Furnham 2009-03-02

How different are men and women's brains? Does altruism really exist? Are our minds blank slates at birth? And do dreams reveal our unconscious desires? Psychology is everywhere in today's society. No crime fiction, documentary, chat show or medical consultation is complete without the introduction of a psychological angle. Psychology seeks to understand and explain thoughts, feelings and behaviour through a dizzying array of ideas and theories, shedding light on everything from memory, social mobility and attitude formation to delusions of grandeur, alcoholism and computer phobia, to name a few. In *50 Psychology Ideas You Really Need to Know*, Professor Adrian Furnham explains the central ideas of psychology in 50 concise and accessible essays. Packed with the latest research, most important case studies and arguments of key thinkers, this book is the perfect introduction to psychological theory. Contents include: Placebo effect; Kicking the habit; Hallucinations; Positive psychology; Emotional intelligence; IQ and you; Multiple intelligences; The Rorschach inkblot test; Detecting lies; Obedience to authority; Self-sacrifice or selfishness; Gambler's fallacy; Remembrance of things past; Artificial intelligence; Tip-of-the-tongue phenomenon; Psychosexual stages; Tabula rasa; Phrenology; Dyslexia.

50 Biology Ideas You Really Need to Know - JV Chamary 2015-11-05

50 Biology Ideas You Really Need to Know is your guide to the most significant and stimulating questions in the study of life. Why do species evolve? Can characteristics be inherited without DNA? Are all organisms made of cells? What makes us human? This book provides succinct answers to all these questions, and many more, in 50 lucid and engaging essays that cover both classic experiments and the latest research. From the mysteries of sex and sleep, from mass extinction to immunity, *50 Biology Ideas You Really Need to Know* will open your eyes to the fundamental processes that are vital to life on Earth, including how genes control the growth and behaviour of living things, how a body

develops from a single cell, and how environmental forces create natural diversity through evolution. Featuring key concepts explained in simple terms, and with clear diagrams and timelines showing major scientific discoveries within their historical context, this book will give you a complete overview of a fascinating subject. Contents include: Evolution, Genes, Homeostasis, Endosymbiosis, Sex, Multicellularity, Nerves, Genetic Drift, Speciation, Convergent Evolution, Pollination, Mimicry, Laws of Inheritance, DNA, Alternative Splicing, Viruses, Epigenetics, Photosynthesis, Cancer, Differentiation, Regeneration, Morphogenesis, Memory, Sleep, Ageing, Consciousness and the Gaia Hypothesis.

Technology Entrepreneur - C. J. Rubis 2012-10

Join a technology entrepreneur as he shares the challenges he faced while operating a high-tech think tank for twenty-five years. Author C. J. Rubis delivers a fascinating story-filled narrative of the Technology Think Tank business and its effects on many government and industry projects.

The numerous adventures, challenges and learned wisdom demonstrate the opportunities for the technology-services entrepreneur in this exploding age of technology to develop services and product innovations. Technology educators, students, budding and struggling entrepreneurs, and others will find real-life stories and dozens of examples to illustrate business principles. Learn about - the history of one company that operated as a microcosm of the think tank industry; - ways to overcome problems of business continuity and stability; - methods for company formation, staffing, and business development and management; and - processes for research, analysis, and development of innovative products. Written as a memoir, this business narrative is meant to inspire and guide entrepreneurship. It shares how to successfully initiate and grow small business opportunities in the huge government and defense technology services industry. You'll be educated and amused by the lessons and stories in Technology Entrepreneur.
