Fluent Forever - Gabriel Wyner 2014-08-05

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick. "A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Zero At Thirty* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

The Name of God Y.eH.oW.aH Which is pronounced as it is Written I_Eh_oU_Ah - Gerard Gertoux 2015-06-10

The understanding of God's name YHWH is so controversial that it is eventually the controversy of controversies, or the ultimate controversy. Indeed, why most of competent Hebrew scholars propagate patently false explanations about God's name? Why do the Jews refuse to read God's name as it is written and read Adonay "my Lord" (a plural of majesty) instead of it? Why God's name is usually punctuated e, â (shewa, qamats) by the Masoretes what makes its reading impossible, because the 4 consonants of the name YHWH must have at least 3 vowels (long or short) to be read, like the words

'aDoNâY and 'eLoHîM "God" (a plural of majesty), which have 4 consonants and 3 vowels? At last, why the obvious reading "Yehowah", according to theophoric names, which all begin by Yehô-, without exception, is so despised, and why the simple biblical meaning, "He will be" from Exodus 3:14, is rejected.

Modern Hebrew for Intermediate Students—which is now revised and updated—and Modern Hebrew for Beginners are the core of a multimedia program for the college-level Hebrew classroom developed at the University of Texas at Austin in the early 2000s. Within an intensive framework of instruction that assumes six weekly hours in the classroom, the program provides for two semesters of instruction, at the end of which most successful students will reach the intermediate-mid or intermediate-high levels of proficiency in speaking and reading, and some will reach advanced-low proficiency, as defined by the American Council on the Teaching of Foreign Languages (ACTFL). In addition to a variety of written exercises, the workbook includes vocabulary lists, reading selections, discussions of cultural topics, illustrations of grammar points, notes on registers, suggestions for class and individual activities, and glossaries. The workbook is complemented by a website (<http://www.laits.utexas.edu/hebrew>) that provides short video segments originally scripted and filmed in Israel and the United States, vocabulary flashcards with sound, interactive exercises on topics included in the workbook, sound files parallel to the reading selections in the workbook, and additional materials that enhance the learning experience. Lexical Polycategoriality - Valentina Vapnarsky 2017-10-15

This book presents a collection of chapters on the nature, flexibility and acquisition of lexical categories. These long-debated issues are looked at anew by exploring the hypothesis of lexical polycategoriality—according to which lexical forms are not fully, or univocally, specified for lexical category—in a wide number of unrelated languages, and within different theoretical and methodological perspectives. Twenty languages are thoroughly analyzed. Apart from French, Arabic and Hebrew, the volume includes mostly understudied languages, spoken in New Guinea, Australia, New Caledonia, Amazonia, Meso- and North America. Resulting from a long-standing collaboration between leading international experts, this book brings under one cover new data analyses and results on word

categories from the linguistic and acquisitional point of view. It will be of the utmost interest to researchers, teachers and graduate students in different fields of linguistics (morpho-syntax, semantics, typology), language acquisition, as well as psycholinguistics, cognition and anthropology.

La-ḥšōb , But La-ḥāzōr? - Silje Alvestad 2009

This is a detailed study on the insertion of epenthetic vowels in verbal and nominal forms primae and mediae gutturalis, in Biblical Hebrew, as well as in normative and spoken Modern Hebrew. The monograph aims at showing the following: 1) Apparent irregularity in a linguistic system, here on the phonological level, can be resolved within a network of transparent rules, which reflect the interaction of various parameters. 2) The tension between the norm and the corresponding reality in a linguistic system is by no means just a modern phenomenon, but can, in the case of Hebrew, be traced all the way back to the classical stages of said linguistic system. 3) The sonority scale in conjunction with the relevant preference laws for syllable structure has once again proven to be a powerful explanatory device in phonological theory and emerged as the central argument in the context of our research. 4) Optimality Theory offers a theoretical framework for arranging an array of relevant constraints in order to account for the variety of observable output forms in the Tiberian Hebrew tradition, many forms of which continue to be valid in modern times.

Experimenting on a Small Planet - William W. Hay

2012-12-13

This book is a thorough introduction to climate science and global change. The author is a geologist who has spent much of his life investigating the climate of Earth from a time when it was warm and dinosaurs roamed the land, to today's changing climate. Bill Hay takes you on a journey to understand how the climate system works. He explores how humans are unintentionally conducting a grand uncontrolled experiment which is leading to unanticipated changes. We follow the twisting path of seemingly unrelated discoveries in physics, chemistry, biology, geology, and even mathematics to learn how they led to our present knowledge of how our planet works. He explains why the weather is becoming increasingly chaotic as our planet warms at a rate far faster than at any time in its geologic past. He speculates on possible future outcomes, and suggests that nature itself may make some unexpected course corrections. Although the book is written for the layman with little knowledge of science or mathematics, it includes information from many diverse fields to provide even those actively working in the field of climatology with a broader view of this developing drama. Experimenting on a Small Planet is a must read for anyone having more than a casual interest in global warming and climate change - one of the most important and challenging issues of our time.

*Language Processing and Acquisition in Languages of
Semitic, Root-Based, Morphology* - Joseph Shimron
2003-04-28

This book puts together contributions of linguists and
psycholinguists whose main interest here is the
representation of Semitic words in the mental lexicon of
Semitic language speakers. The central topic of the book
confronts two views about the morphology of Semitic
words. The point of the argument is: Should we see
Semitic words' morphology as "root-based" or "word-
based?" The proponents of the root-based approach,
present empirical evidence demonstrating that Semitic
language speakers are sensitive to the root and the
template as the two basic elements (bound morphemes) of
Semitic words. Those supporting the word-based approach,
present arguments to the effect that Semitic word
formation is not based on the merging of roots and
templates, but that Semitic words are comprised of word
stems and affixes like we find in Indo-European
languages. The variety of evidence and arguments for
each claim should force the interested readers to
reconsider their views on Semitic morphology.

Acquisition and Development of Hebrew - Ruth A. Berman
2016-08-25

The volume addresses developing knowledge and use of
Hebrew from the dual perspective of typologically
specific factors and of shared cross-linguistic trends,
aimed at providing an overview of acquisition in a
single language from infancy to adolescence while also
shedding light on key issues in the field as a whole.

Essentially non-partisan in approach, the collection
includes distinct approaches to language and language
acquisition (formal-universalist, pragmatic-usage based,
cognitive-constructivist) and deals with a range of
topics not often addressed within a single volume
(phonological perception and production, inflectional
and derivational morphology, simple-clause structure and
complex syntax, early and later literacy, writing
systems), with data deriving from varied research
methodologies (interactive conversations and extended
discourse, adult input and child output, longitudinal
and cross-sectional corpora, structured elicitations).
Each chapter provides background information on Hebrew-
specific facets of the topic of concern, but typically
avoids ethno-centricity by relating to more general
issues in the domain. The book should thus prove
interesting and instructive for linguists,
psychologists, and educators, and for members of the
child language research community both within and beyond
the confines of Hebrew-language expertise.

Jewish Languages from A to Z - Aaron D. Rubin 2020-09-13

special features of the language variety in question, a
discussion of the history of the associated Jewish
community, and some examples of literature and other
texts produced in it. The book thus takes readers on a
stimulating voyage around the Jewish world, from ancient
Babylonia to 21st-century New York, via such diverse
locations as Tajikistan, South Africa, and the
Caribbean. The chapters are accompanied by numerous
full-colour photographs of the literary treasures
produced by Jewish language-speaking communities, from

manuscripts to contemporary novels and newspapers. This
