Tacrolimus Ointment - T. Ruzicka 2013-04-17

Therapeutic breakthroughs in medicine are usually accompanied by a wealth of data. Often they result in a change of disease treatment paradigms. Tacrolimus ointment is the first in the new class of steroid-free Topical Immunomodulators (TIMs), and as such represents the first true breakthrough since the introduction of topical steroids more than 50 years ago for the treatment of T-cell mediated inflammatory skin diseases such as atopic dermatitis. This book gives an easy-to-read overview of the discovery and the development of Tacrolimus ointment for the treatment of atopic dermatitis. Summarising the largest clinical trial program ever conducted in dermatology for a new treatment with more than 13000 patients, it offers a detailed insight into the efficacy and safety profile of Tacrolimus ointment. Based on this large body of data and extensive personal experience, the authors offer practical and hands-on guidance for the physician as to when and how to use Tacrolimus ointment in daily practice.

I Beg to Differ - Peter John Storey 2018

"'Let me say to Mr Botha: apartheid is doomed! It has been condemned in the Councils of God, rejected by every nation on the planet and is no longer believed in by the people who gave it birth. Apartheid is the god that has failed ... let not one more sacred life be offered on its blood-stained altar...' This is what Bishop Peter Storey preached in 1986. Challenging apartheid wherever he could, he led the Methodist Church of Southern Africa into what many white congregants saw as uncomfortable 'political' territory. Join him in his inspiring journey from sailor-turned-minister to the South African Council of Churches leadership in its darkest hour, from tending to Robert Sobukwe and Nelson Mandela on Robben Island, through the forced removals of District Six and to the storm surrounding Stompie Seipei's murder. *I Beg to Differ* spans a humble parish minister's sorrows and joys, his founding of Life Line SA, the bombing of Khotso House, a close shave with death with Archbishop Desmond Tutu, and the Truth and Reconciliation Commission. In his own words, Storey shares his convictions that inspired him to speak out and minister fearlessly amid the teargas, violence and intimidation of the apartheid regime"--Back cover.

The Advanced Theory of Language as Choice and Chance - Gustav Herdan 2012-12-06

In trying to give an account of the statistical properties of language, one is faced with the problem of having to find the common thread which would show the many and multifarious forms of language statistic- embodied in scattered papers

written by linguists, philosophers, mathematicians, engineers, each using his own professional idiom - as belonging to one great whole: quantitative linguistics. This means that the investigator has to find the system of this branch of science which would enable him to arrange the vast material in an orderly fashion, and present it as an organic whole. Such a system is conceived in this book, as comprising the following disciplines as the four main branches of literary statistics: Statistical Linguistics, Stylostatistics, Optimal Systems of Language Structure, and Linguistic Duality (Parts I-IV). The Introduction is meant to define the position of the book with regard to both, linguistics and statistics.

The Book of L - G. Rozenberg 2012-12-06

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the

absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Sculptors of Mapungubwe - Zakes Mda 2018-09-15

In the timeless kingdom of Mapungubwe, the royal sculptor had two sons, Chata and Rendani. As they grew, so grew their rivalry--and their extraordinary talents. But while Rendani became a master carver of the animals that run in the wild hills and lush valleys of the land, Chata learned to carve fantastic beings from his dreams, creatures never before seen on the Earth. From this natural rivalry between brothers, Zakes Mda crafts an irresistibly rich fable of love and family. What makes the better art, perfect mimicry or inspiration? Who makes the better wife, a princess or a mysterious dancer? Ageless and contemporary, deceptive in its simplicity and mythical in its scope, *The Sculptors of Mapungubwe* encompasses all we know of love, envy, and the artist's primal power to forge art from nature and nature into art. Mda's newest novel will only strengthen his international reputation as one of the most trenchant voices of South Africa.
