Information Technology Research, Innovation, and E-Government - National Research Council 2002-05-03

Governments have done much to leverage information technology to deploy e-government services, but much work remains before the vision of e-government can be fully realized. Information Technology Research, Innovation, and E-government examines the emerging visions for e-government, the technologies

required to implement them, and approaches that can be taken to accelerate innovation and the transition of innovative information technologies from the laboratory to operational government systems. In many cases, government can follow the private sector in designing and implementing IT-based services. But there are a number of areas where government requirements differ from those in the commercial world, and in these areas government will need to act on its role as a demand leader. Although researchers and government agencies may appear to be unlikely allies in this endeavor, both groups have a shared interest in innovation and meeting future needs. E-government innovation will require addressing a broad array of issues, including organization and policy as well as engineering practice and technology research and development, and each of these issues is considered in the book.

Why the Rites of Reconciliation Matter - Gerard Moore 2008

How difficult it can be to forgive others or to accept forgiveness or to accept that someone who had offended the community has been reconciled and accepted back into it. For two millennia Christians have pondered the scope of the forgiveness Jesus taught and lived. They have celebrated practices and rites that have enabled the faithful to forgive, to be forgiven, and to accept that God brings reconciliation even when we find it almost impossible to forgive. This book traces that history to the present, offering a sense not only of how the rites of reconciliation matter to Catholics but how our struggles with forgiveness are a real contribution to reconciliation in our world.

(Booklist) Georgia Waltz has things many people only dream of: a plush Manhattan apartment overlooking Central Park, a Hamptons beach house, valuable jewels and art, two bright daughters, and a husband she adores, even after decades of marriage. It's only when Ben suddenly drops dead from a massive coronary while training for the New York City Marathon that Georgia discovers her husband—a successful lawyer—has left them nearly penniless. Their wonderland was built on lies. As the family attorney scours emptied bank accounts, Georgia must not only look for a way to support her family, she needs to face the revelation that Ben was not the perfect husband he appeared to be, just as her daughters—now ensconced back at home with secrets of their own—have to accept that they may not be returning to their lives in Paris and at Stanford subsidized by the Bank of Mom and Dad. As she uncovers hidden resilience, Georgia's sudden midlife shift forces her to consider who she is and what she truly values. That Georgia may also find new love in the land of Spanx and stretch marks surprises everyone—most of all, her. Sally Koslow's fourth novel is deftly told through the alternating viewpoints of her remarkable female protagonists as they plumb for the grit required to reinvent their lives. Inspiring, funny, and deeply satisfying, *The Widow Waltz* explores in a profound way the bonds between mothers and daughters, belligerent siblings, skittish lovers, and bitter rivals as they discover the power of forgiveness, and healing, all while asking, "What is family, really?"

Industrial Organization - Lynne Pepall 2014-01-28

Pepall's *Industrial Organization: Contemporary Theory and Empirical Applications*, 5th Edition offers an accessible text in which topics are organized in a manner that motivates and facilitates progression from one chapter to the next. It serves as a complete, but concise, introduction to modern industrial economics. The text uniquely uses the tools of game theory, information economics, contracting issues, and practical examples to examine multiple facets of industrial organization. The fifth edition is more broadly accessible, balancing the tension between making modern industrial analysis accessible while also presenting the formal abstract modeling that gives the analysis its power. The more overtly mathematical content is presented in the *Contemporary Industrial Organization* text (aimed at the top tier universities) while this Fifth Edition will be less mathematical (aimed at a wider range of four-year colleges and state universities).

Pollutants, Human Health and the Environment - Jane A. Plant 2012-02-08

Pollutants, Human Health and the Environment is a comprehensive, up-to-date overview of environmental pollutants that are of current concern to human health. Clearly structured throughout, the main body of the book is divided by pollutant type with a chapter devoted to each group of pollutants. Each chapter follows a similar format to facilitate comparison and discussion. For each pollutant, the authors describe the sources, pathways, environmental fate and sinks as well as known toxicological effects. Importantly, the second chapter on heavy metals and other inorganic substances deals with trace element deficiencies which can have serious problems for human health. Some rocks and soils are naturally low in some trace elements and intensive agriculture over the past half century has effectively mined many trace elements reducing their levels in soils and crops. The final chapter is a discussion about the various risk assessment frameworks and

regulations covering the main pollutants. Comprehensive, up-to-date coverage of environmental pollutants of concern to human health Clearly divided into pollutant type with each chapter devoted to a different pollutant group Clearly structured throughout with the same format for each chapter to help facilitate comparison and discussion and enable readers to prioritise chemicals of concern Description of the sources, pathways, environmental fate and known toxicological effect Includes contributions from leading researchers and edited by a team of experts in the field

Cold and Ultracold Collisions in Quantum Microscopic and Mesoscopic Systems - John Weiner 2003-12-04

Cold and ultracold collisions occupy a strategic position at the intersection of several powerful themes of current research in chemical physics, in atomic, molecular and optical physics, and even in condensed matter. The nature of these collisions has important consequences for optical manipulation of inelastic and reactive processes, precision measurement of molecular and atomic properties, matter-wave coherences and quantum-statistical condensates of dilute, weakly interacting atoms. This crucial position explains the wide interest and explosive growth of the field since its inception in 1987. The author reviews elements of the quantum theory of scattering theory, collisions taking place in the presence of one or more light fields, and collisions in the dark, below the photon recoil limit imposed by the presence of any light field. Finally, it reviews the essential properties of these mesoscopic quantum systems and describes the key importance of the scattering length to condensate stability.

Marxist Literary Thought in China - Paul G. Pickowicz 2021-02-16

Marxist aesthetic thought has dominated Chinese literary life for half a century, but little is known about how this distinctive Western school of thought came to be accepted. Paul G. Pickowicz fills in the gap, tracing the evolution of Chinese Marxist literary thought by focusing on Ch'u Ch'iu-pai, China's most important Marxist literary intellectual of the twenties and thirties. Ch'u and his contemporaries interpreted the writing of Marx, Engels, Plekhanov, Lafargue, Trotsky, Lenin, and Lunacharsky in ways that would answer important questions about the relationship between art and society, the moral obligations of the writer, the manner in which revolutionaries should perceive the literary treasures of the past, the impact of capitalism on artistic culture, and the nature of art in the socialist society of the future. Paul G. Pickowicz finds that Chinese writers responded to Marxism in a variety of ways. Some stressed voluntaristic themes, some emphasized deterministic elements, others, like Ch'u, attempted to synthesize conflicting strains. Moreover, the transition to Marxism did not constitute a radical break from the liberal traditions associated with the May Fourth literary revolution. Instead, leftist writers interpreted Marxism in ways that were compatible with their deeply

ingrained May Fourth intellectual predispositions. Ch'u was the first to make a Marxist critique of the May Fourth generation of literary intellectuals and to analyze the failings of the leftist literary movement itself. His writings are of contemporary relevance for the issues he raised, such as the failure of leftist writers to place the revolutionary literary movement on a mass base. Ch'u's writings influenced the literary thought of Mao Tse-tung, and the issues Ch'u raised continue to be debated with emotion in China today. Grenada - International Monetary Fund 1995-07-20

This paper describes economic developments in Grenada during the 1990s. The weak growth performance since 1990 reflected largely a continuous contraction in agricultural output, which declined each year from 1989 to 1993. The construction industry experienced a major contraction in 1992 owing to the sharp fall in public investment. In 1993, output declined in the mining and quarrying, construction, and manufacturing sectors as well as in agriculture. In contrast, the hotel and restaurant sector has exhibited strong growth since the late 1980s, with real value added growing by 13.8 percent, on average, each year since 1989.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

Paper Shadows - Wayson Choy 2005

In 1995, during the publicity tour for his much-acclaimed first novel, "The Jade Peony," Wayson Choy received a mysterious phone call from a woman claiming to have just seen his mother on a streetcar. He politely informed the caller that she must be mistaken, since his mother had died long ago. "No, no, not that mother," the voice insisted. "Your real mother." Inspired by the startling realization that, like many children of Chinatown, he had been adopted, Choy constructs a vivid and moving memoir that reveals uncanny similarities between his award-winning first novel and the newly discovered secrets of his Vancouver childhood. From his early experiences with ghosts, through his youthful encounters with cowboys and bachelor uncles, to his discovery of family secrets that crossed the ocean from mainland China to Gold Mountain in the form of paper shadows, this is a beautifully wrought portrait of a child's world from one of Canada's most gifted storytellers.
