Taalregtemonitor 2011 - Johan Lubbe

2016-01-05

The SALRM 2011 provides a rich source of information on a range of language-related subjects. A prominent issue remains the changing of street and place names, including the Pretoria/Tshwane and Louis Trichardt/Makhado sagas. Language in education remains a thorny issue; as medium of instruction at school and tertiary level, and the proposal that passing an African language should be a requirement in order to obtain a tertiary degree in South Africa. In terms of language legislation, the draft version of the National Language Act was proposed. The language of record in courts also received attention in the media.

Potential Development Using Thinking Tools - Cas Olivier 2019-09-12

Educators need to empower learners to be prepared for the Fourth Industrial Revolution, to be thinkers with the

ability to pioneer the future. This book cracks teaching and learning myths that led to learners being perceived as knowledge duplicators instead of being knowledge creators. Thinking tools move the focus of learning from mastering content to critical thinking. This requires the critical thinking toolkit, which is the mothership of all thinking. It engages learners' forever-wandering minds with the learning task at hand, which is the substitute for the traditional expectations of "paying attention" and "memorising". When employing thinking tools, learners become thinking engineers—taking ownership of what they must discover, create or solve. Within this paradigm of teaching, teachers directly engage with learners' brains, which goes beyond learner-centred teaching and defining learning as visual, auditory or kinaesthetic. The book is based on examples of thinking tools sessions. *Guide to the Curriculum* - Clare Sealy 2020-12-31

It's a strange, hard, dangerous world of scum children, bad-tempered matrons and a harsh, unfair principal; a world of smoking cigarette butts, having one's hair shaved off and

The Book of Squares by Fibonacci is a gem in the mathematical literature and one of the most important mathematical treatises written in the Middle Ages. It is a collection of theorems on indeterminate analysis and equations of second degree which yield, among other results, a solution to a problem proposed by Master John of Palermo to Leonardo at the Court of Frederick II. The book was dedicated and presented to the Emperor at Pisa in 1225. Dating back to the 13th century the book exhibits the early and continued fascination of men with our number system and the relationship among numbers with special properties such as prime numbers, squares, and odd numbers. The faithful translation into modern English and the commentary by the translator make this book accessible to professional mathematicians and amateurs who have always been intrigued by the lure of our number system.

The Fall of the University of Cape Town - David Benatar 2021-11-09

Destructive forces have been eroding the University of Cape Town, Africa's leading university. This book tells

the sad, true tale of what has been transpiring. It is a saga of lunacy, criminality, pandering, and identity politics. The mad and the bad - the deranged, deluded, the depraved - have been granted endless latitude in bullying and abusing others. The decline began in 2015 with the Rhodes Must Fall protest that resulted in the offending statue's removal within a month, and which spawned similar protests abroad. Emboldened by their local success, the protestors issued new and ever-increasing demands later that year and then again in 2016 and 2017. Their methods also became criminal - including intimidation, assault, and arson. The university leadership capitulated to this behaviour, and this fostered a broader and now pervasive toxic environment within the institution. These developments offer important lessons for universities around the world that are yielding to the forces of a faux "progressivism".
