*Introductory and Intermediate Algebra: An Applied Approach* -

Richard N. Aufmann

2013-03-01

As in previous editions,

the focus in ALGEBRA:

INTRODUCTORY &

INTERMEDIATE remains on

the Aufmann Interactive

Method (AIM). Students

are encouraged to be

active participants in

the classroom and in

their own studies as

they work through the

How To examples and the

paired Examples and You

Try It problems. Student

engagement is crucial to

success. Presenting

students with worked

examples, and then

providing them with the

opportunity to

immediately solve

similar problems, helps them build their confidence and eventually master the concepts. Simplicity is key in the organization of this edition, as in all other editions. All lessons, exercise sets, tests, and supplements are organized around a carefully constructed hierarchy of objectives. Each exercise mirrors a preceding objective, which helps to reinforce key concepts and promote skill building. This clear, objective-based approach allows students to organize their thoughts around the content, and supports instructors as they work to design syllabi, lesson plans, and other administrative documents. New features like Focus on Success, Apply the Concept, and Concept Check add an increased emphasis on study skills and conceptual understanding

to strengthen the foundation of student success. The Sixth Edition also features a new design, enhancing the Aufmann Interactive Method and making the pages easier for both students and instructors to follow. *Prealgebra* - Lynn

Marecek 2015-09-25

"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students

with diverse backgrounds and learning styles.

Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to previous topics."--BC Campus website.
