"This is the colorful and dramatic biography of two of America's most controversial entrepreneurs: Moses Louis Annenberg, 'the racing wire king,' who built his fortune in racketeering, invested it in publishing, and lost much of it in the biggest tax evasion case in United States history; and his son, Walter, launcher of TV Guide and Seventeen magazines and former ambassador to Great Britain."--Jacket.

*Billy Budd, Sailor* - Herman Melville 2017-03-17

Cheerful, hardworking, and handsome, Billy is pressed into naval service aboard a British ship during the Napoleonic wars. The innocent and lovable young man quickly wins the hearts of all his comrades, save one: Claggart, the implacably bitter master-at-arms, who falsely accuses Billy of inciting mutiny. Rich in ambiguities, Herman Melville's haunting parable of the clash between good and evil raises thought-provoking issues related to the conflict between the requirements of the law and the needs of humanity. This is the definitive edition of Melville's classic tale. Billy Budd, Sailor was discovered unfinished in the author's desk shortly after his 1891 death and remained unpublished until 1924. This text is the result of years of study and scrupulous research by Melville scholars. It offers students and other lovers of literature the best and most authentic version of the American storyteller's final masterpiece.

**Affective Health and Masculinities in South Africa** - Hans Reihling 2020-04-24

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

*Cultures of Taste/Theories of Appetite: Eating Romanticism* - T. Morton 2004-01-16

*Cultures of Taste/Theories of Appetite* brings two major critical impulses within the field of Romanticism to bear upon an important and growing field of research: appetite and its related discourses of taste and consumption. As consumption, in all its metaphorical variety, comes to displace the body as a theoretical site for challenging the distinction between inside and outside, food itself has attracted attention as a device to interrogate the rhetoric and politics of Romanticism. In brief, the volume initiates a dialogue between the cultural politics of food and eating, and the philosophical implications of ingestion, digestion and excretion.

The Revolutionary War in the Hackensack Valley - Adrian Coulter Leiby 1980

After November 1776, the Hackensack Valley--located in northeastern New Jersey and Rockland County, New York--lay between the invading British army in New York City and the main Continental defense forces in the Hudson Highlands. Jersey Dutch patriot and Tory troops carried on a five-year war of neighbors between the

lines, while the grand armies of Britain and America maneuvered on either side of them for a chance to strike a blow at the other. Adrian Leiby offers an exciting narrative of the people of Dutch New Jersey and New York during this conflict. Historians will find colorful details about the Revolutionary War, and genealogists will find much previously unpublished material on hundreds of men and women of Dutch New Jersey and New York in the 1700s.
