Barry Seidel 2019-12-02  
Back in 1982 I opened my own law practice right out of school. This arose out of a combination of necessity and the thought that it could be done! This is the story of what I did, and the various business and personal evolutions that followed. In this book I discuss how I marketed and built a practice, what worked and what didn't, and how I kept moving forward despite facing some serious challenges. I wrote this book to help lawyers and law students who are on their own or are considering that path. I hope my story will encourage people to consider entrepreneurial possibilities, to evaluate their career plans, and to pursue viable career options. As you'll see, once you've started it's easy enough to bring in business and keep busy. But of course, there are many more business and life considerations. I hope my story encourages people to discuss such things. I hope my story helps some people make better decisions and take action if they should. Pro-actively or re-

actively, everyone will have a career path. Sometimes it's hard to state specific goals, but I hope we can share this one! WHEN YOU LOOK BACK â HAVE NO REGRETS! To anyone who is considering entrepreneurial options for their career, and to anyone who is considering their current circumstances and their future path, this book is for you.

**The Underdog Parade** -

Michael Mihaley 2018-12-04  
"[Protagonist] Peter...is appealing, and readers will applaud his small triumphs." -- Booklist "A treasure for readers of any age, The Underdog Parade promises to be an instant classic reminiscent of works like *Kill a Mockingbird*. Crack open this book, and you will not put it down!" --Gary R. Brown, author of *The Coney Island Fakir* "I fell in love with Michael Mihaley's band of

misfit characters. They show us anything is possible with a little bit of faith and a whole lotta heart.” --Barbara J. Taylor, author of *All Waiting Is Long* It’s the summer of the drought, but thirteen-year-old Peter “Nemo” Grady has bigger problems on his mind than the weather. He hates his new home in the exclusive golf club community Willow Creek Landing. His parents are always fighting and he can’t escape the memory of his last seizure—when he flopped around the gymnasium floor like a fish out of water—earning him his dreaded nickname. To top it all off, Peter has no friends, but he receives plenty of unsolicited attention from Chipper, the boy scout super-bully who also happens to be a resident of Willow Creek. His only companion is his little sister, CJ, who thinks she is Wonder Woman. Peter is all too aware that you don’t need rain in the forecast to have dark clouds overhead. Things change when he meets his new neighbor, the mysterious Joshua, who

predicts the drought will end with a storm of biblical proportions. Peter looks to his visiting, wheelchair-bound Uncle Herb, and his neighbors, Mr. James and Mr. Terry, for guidance as Josh prepares for imminent doom. With each passing day, Peter realizes that sooner or later he will have to rely on the strength of the lamest, most jelly-weak individual he knows—himself.

**Cultures of Transnational Adoption** - Toby Alice Volkman 2005-05-20

During the 1990s, the number of children adopted from poorer countries to the more affluent West grew exponentially. Close to 140,000 transnational adoptions occurred in the United States alone. While in an earlier era,

adoption across borders was assumed to be straightforward—a child traveled to a new country and stayed there—by the late twentieth century, adoptees were expected to acquaint themselves with the countries of their birth and explore their multiple identities. Listservs, Web sites, and organizations creating international communities of adoptive parents and adoptees proliferated. With contributors including several adoptive parents, this unique collection looks at how transnational adoption creates and transforms cultures. The cultural experiences considered in this volume raise important questions about race and nation; about kinship, biology, and belonging; and about the politics of the sending and receiving nations. Several essayists explore the images and narratives related to transnational adoption. Others examine the recent preoccupation with “roots” and “birth cultures.” They describe a trip during which a group of

Chilean adoptees and their Swedish parents traveled “home” to Chile, the “culture camps” attended by thousands of young-adult Korean adoptees whom South Korea is now eager to reclaim as “overseas Koreans,” and adopted children from China and their North American parents grappling with the question of what “Chinese” or “Chinese American” identity might mean. Essays on Korean birth mothers, Chinese parents who adopt children within China, and the circulation of children in Brazilian families reveal the complexities surrounding adoption within the so-called sending countries. Together, the contributors trace the new geographies of kinship and belonging created by transnational adoption. Contributors. **Poets, Philosophers, Lovers -**

Frederick Luis Aldama

2020-10-27

This collection of essays, by fifteen scholars across diverse fields, explores forty years of writing by Giannina Braschi, one of the most revolutionary Latinx authors of her generation. Since the 1980s, Braschi's linguistic and structural ingenuities, radical thinking, and poetic hilarity have spanned the genres of theatre, poetry, fiction, essay, musical, manifesto, political philosophy, and spoken word. Her best-known titles are *El imperio de los sueños*, *Yo-Yo Boing!*, and *United States of Banana*. She writes in Spanish, Spanglish, and English and embraces timely and enduring subjects: love, liberty, creativity, environment, economy, censorship, borders, immigration, debt, incarceration, colonialization, terrorism, and revolution. Her work has been widely adapted into theater, photography, film, lithography, painting, sculpture, comics, and music.

The essays in this volume explore the marvelous ways that Braschi's texts shake upside down our ideas of ourselves and enrich our understanding of how powerful narratives can wake us to our higher expectations.

*Opaciphobia and Other Inner Reflections* is a collection of inner experiences decades in the making. Inspired by events from the author's childhood, opaciphobia is a word that attempts to capture an inner state of fear: a fear of the unclear. It began with a distorted window by the front door of the author's childhood

home. It evolved into a personal, multifaceted vantage point that longs for resolution in the divine.

**The Underside of History -**  
Elise Boulding 1992

Two Volume Set Original Line Drawings by Helen Barchilon Redman The Underside of History, now available in a revised, two-volume edition, offers a new generation of scholars and students an alternative to the traditional courtesans/queens/mothers/and mistresses view of women in history. This classic in feminist literature provides an account of women's creativity in every age from pre-history to the present, and attempts to view women's roles in the context of the total time span of human experience. In clear and elegant prose, the author takes us on a breathtaking tour through time: we move through the hundred-thousand-year wanderings of the Paleolithic into the great transition from hunting and gathering to herding and planting; from life inside city walls to the great primary civilizations of the

Middle East and Asia, as well as the feudal civilizations on its fringes; and from the sweep of culture generated by the Greco-Romanic-Islamic empires to "European Enlightenment" and, finally, to the last two centuries and the gradual industrialization-urbanization of the planet. New to this volume is a look at the 20th century women's movement--including a chapter on Third World women--as well as a provocative epilogue entitled "Creating Futures for the 21st Century." When we look at the imbalances regarding women in the social record, we are not simply gleaning information about the status of women: we are getting clues about general imbalances within society at large. For this reason, students, professionals, and practitioners alike will find The Underside of History to be an invigorating intellectual exercise and an essential addition to their libraries. "It is a classic, in all meanings of the word. This book contains a lot of important information and shows us how to re-vision

history and historical data. It won't 'scare' men or newcomers to women's studies." --Elizabeth Moen, University of Colorado, Boulder

**Boys and Girls Forever** - Alison Lurie 2002-12-31  
Are some of the world's most talented children's book authors essentially children themselves? In this engaging series of essays, Pulitzer Prize-winning author Alison Lurie considers this theory, exploring children's classics from many eras and relating them to the authors who wrote them, including Little Women author Louisa May Alcott and Wizard of Oz author Frank Baum, as well as Dr. Seuss and Salman Rushdie. Analyzing these and many others, Lurie shows how these gifted writers have used children's literature to transfigure sorrow, nostalgia, and the struggles of their own experiences.

Medical Consequences of Alcoholism - Frank A. Seixas 1975

*The Heart Has Reasons* - Mark Klemptner 2013-03

"You can't let people be treated in an inhuman way around you....Otherwise you start to become inhuman." So declares rescuer Hetty Voute in this ebook of the updated edition of *The Heart Has Reasons*, an acclaimed historical account that offers an in-depth look into the hearts and minds of the Holocaust rescuers and explores the meaning that their lives and deeds have for us today. Individually or in small "humanitarian cells," the ten

Dutch people profiled in these pages saved the lives of thousands of Jewish children during the Nazi occupation of Holland. How did they do what they did—and why did they risk everything to do it? Although their extraordinary tales of rescue vary greatly, the integrity of the rescuers does not. Thus these narratives provide not only a window on the past but a vision for the future. Framed by Klempner's own quest for meaning, the rescuers' words resonate across generations, providing timeless insight into how people of conscience can navigate ethically in an increasingly complex world.

Redoing Gender - Helana Darwin 2021-11-08

Redoing Gender demonstrates how difficult it is to be anything other than a man or a woman in a society that selectively acknowledges those two genders. Gender nonbinary people—who identify as other genders besides simply “man” or “woman”—have begun to disrupt this binary system, but the limited progress they have

made has required significant everyday labor. Through interviews with 47 nonbinary people, this book offers rich description of these forms of labor, including “rethinking sex and gender,” “resignifying gender,” “redoing relationships,” and “resisting erasure.” The final chapter interrogates the lasting impact of this labor through follow-up interviews with participants four years later. Although nonbinary people are finally managing to achieve some recognition, it is clear that this change has not happened without a fight that continues to this day. The diverse experiences of nonbinary people in this book will help cisgender people relate to gender minorities with more compassion, and may also appeal to those questioning their own gender. This text will also be of keen interest to academics across Sociology and Gender Studies.

Ancestral Throat - Danny Rivera 2021-12-03

In Danny Rivera's *Ancestral Throat*, the death of a father

becomes the occasion for a series of powerful meditations on mortality, parenting, magic, spirituality, and diaspora. Rich in metaphor, the writing draws on the resonance of two languages, Spanish and English, for its music. More than simply remembering the past, Rivera's work seeks to actively engage it in order to "reclaim our bloodborne history." These urgent, often fragmented, lyrics make a place for uncomfortable silences, unexplainable gaps, the unspeakable, the unspoken, yet also for the explosive imperative "your mouth is a flare shot at dusk" commanding us to listen. And we want to keep listening. This stunning collection reminds us that the world is a strangely brutal and beautiful place. - Elaine Equi, author of Sentences and Rain and The Intangibles At one point in this brilliant collection, Danny Rivera writes: "Words loosen themselves/from meaning." With an unerring eye, Rivera stitches and sutures meaning back into a language, following

it down the mysterious and painful paths it takes through the body and through memory. Out of family history, ancient and recent, these poems braid the many voices of our ancestors into one powerful, haunting, indelible voice that revivifies the most human voice of all: the voice of blood. - Gregory Crosby, author of Said No One Ever

**Untangling the Ivy League -**  
Marc Zawel 2005-09-01

Nobody has ever done a book on the Ivy League like this before. We were tired of reading college guides based on one expert's perspective, or from the viewpoint of a major publishing house. So, we set out to create a guide on the Ivy League by Ivy League students and alumni. We figured they would know more from experience, plus they're probably a whole lot smarter. That is why every section in this book, every expert opinion, and every major insight is from the people who know best. The section on Harvard is by a Harvard student; the admissions advice comes from a Yale admissions officer; and important issues such as affirmative action and legacy admission policy receive attention from no less than an Ivy League university president and a Supreme Court justice.

**Sex, Sin, and Blasphemy** - Marjorie Heins 1993

"Sex, Sin, and Blasphemy is a lively, lucid primer on censorship, art, and popular culture. It is also the product of several years on the front lines of the culture wars it describes." "In this book, Marjorie Heins, founding director of the Arts Censorship Project of the American Civil Liberties Union, uses her considerable expertise to help provide a sensible, coherent account of some of the most hotly contested issues of the 1990s." "For all the recent talk about censorship, until now there has been no comprehensive summary of either the legal underpinnings of the assaults on free expression or their social implications. Which laws do self-styled "censors" rely on? How are record labeling, movie ratings, and attacks on museums related? How can a

concerned citizen make sense of genuinely confusing issues that seem to pit the rights of taxpayers against those of artists?" "Using examples from current and historic court cases and public debates, Heins reveals the strategies used by prosecutors and special interest groups, and explains why efforts to suppress artistic expression on painful or offensive subjects won't help solve the problems that beset society today. No other book offers such an accessible summary or such keen insights into America's struggle over free expression."-

**Approaches to the Great Settlement** - Emily Greene Balch 1918

**Fair Science** - Jonathan R. Cole 1987

Although deconstruction has become a popular catchword, as an intellectual movement it has never entirely caught on within the university. For some in the academy, deconstruction, and Jacques Derrida in particular, are responsible for the demise of accountability in the study of literature. Countering these facile dismissals of Derrida and deconstruction, Herman Rapaport explores the incoherence that has plagued critical theory since the 1960s and the resulting legitimacy crisis in the humanities. Against the backdrop of a rich, informed discussion of Derrida's writings -- and how they have been misconstrued by critics and admirers alike -- *The Theory Mess* investigates the vicissitudes of Anglo-American criticism over the

past thirty years and proposes some possibilities for reform.
