**Literacy, Home, and
School** - Peter Hannon
1995

Presents new ways of
thinking about parental
involvement in the
teaching of reading and
writing aimed at both
researchers and
practitioners. It
relates the recent
growth of involvement to
broader considerations
of the nature of
literacy and historical
exclusion of parents
from the curriculum.

**Neurobiology of
Monotremes** - Ken Ashwell
2013-12-01
Neurobiology of
Monotremes brings

together current
information on the
development, structure,
function and behavioural
ecology of the
monotremes. The
monotremes are an
unusual and
evolutionarily important
group of mammals showing
striking behavioural and
physiological
adaptations to their
niches. They are the
only mammals exhibiting
electroreception (in the
trigeminal sensory
pathways) and the
echidna shows
distinctive olfactory
specialisations. The
authors aim to close the
current gap in knowledge
between the genes and
developmental biology of
monotremes on the one
hand, and the adult
structure, function and
ecology of monotremes on
the other. They explore
how the sequence
'embryonic structure >
adult structure >
behaviour' is achieved

in monotremes and how this differs from other mammals. The work also combines a detailed review of the neurobiology of monotremes with photographic and diagrammatic atlases of the sectioned adult brains and peripheral nervous system of the short-beaked echidna and platypus. Pairing of a detailed review of the field with the first published brain atlases of two of the three living monotremes will allow the reader to immediately relate key points in the text to features in the atlases and will extend a universal system of brain nomenclature developed in eutherian brain atlases by G Paxinos and colleagues to monotremes.

Beyond the Big Ditch -
Ashley Carse 2014-10-24
A historical and ethnographic study of the conflict between global transportation and rural development as the two intersect at the Panama Canal. In this innovative book, Ashley Carse traces the water that flows into and out from the Panama Canal to explain how global

shipping is entangled with Panama's cultural and physical landscapes. By following container ships as they travel downstream along maritime routes and tracing rivers upstream across the populated watershed that feeds the canal, he explores the politics of environmental management around a waterway that links faraway ports and markets to nearby farms, forests, cities, and rural communities. Carse draws on a wide range of ethnographic and archival material to show the social and ecological implications of transportation across Panama. The Canal moves ships over an aquatic staircase of locks that demand an enormous amount of fresh water from the surrounding region. Each passing ship drains 52 million gallons out to sea—a volume comparable to the

daily water use of half a million Panamanians. Infrastructures like the Panama Canal, Carse argues, do not simply conquer nature; they rework ecologies in ways that serve specific political and economic priorities. Interweaving histories that range from the depopulation of the U.S. Canal Zone a century ago to road construction conflicts and water hyacinth invasions in canal waters, the book illuminates the human and nonhuman actors that have come together at the margins of the famous trade route. 2014 marks the 100th anniversary of the Panama Canal. Beyond the Big Ditch calls us to consider how infrastructures are materially embedded in place, producing environments with winners and losers.

**Business Secrets of the
Trappist Monks** - August

Turak 2013-07-09

August Turak is a successful entrepreneur, corporate executive, and award-winning author who attributes much of his success to living and working alongside the Trappist monks of Mepkin Abbey for seventeen years. As a frequent monastic guest, he learned firsthand from the monks as they grew an incredibly successful portfolio of businesses. Service and selflessness are at the heart of the 1,500-year-old monastic tradition's remarkable business success. It is an ancient though immensely relevant economic model that preserves what is positive and productive about capitalism while transcending its ethical limitations and internal

contradictions.

Combining vivid case studies from his thirty-year business career with intimate portraits of the monks at work, Turak shows how Trappist principles can be successfully applied to a variety of secular business settings and to our personal lives as well. He demonstrates that monks and people like Warren Buffett are wildly successful not despite their high principles but because of them. Turak also introduces other "transformational organizations" that share the crucial monastic business strategies so critical for success.

OCD - Michael A.

Tompkins 2012-01-01

When someone is diagnosed with obsessive-compulsive disorder (OCD), chances are they've been living with the symptoms for a

long time. People with OCD may have long felt embarrassed by their thoughts and behaviors, which may include fear of contamination, the need for symmetry, pathological doubt, aggressive thoughts, repeating behaviors, and obsessive cleaning. OCD: A Guide for the Newly Diagnosed helps readers understand how OCD works so they can develop better strategies for coping with their symptoms. This pocket guide offers guidance for coping with the diagnosis itself, discusses stigmas related to OCD, and includes help for readers unsure of who they should tell about the diagnosis. Readers also learn about the most effective treatment approaches and easy ways to begin to manage their OCD symptoms. An OCD diagnosis can be a devastating event, or it

can be a catalyst for positive change. Books in the Guides for the Newly Diagnosed series provide readers with all the tools they need to process a diagnosis in the healthiest way possible, and then move forward to manage their symptoms so that the disorder doesn't get in the way of living a fulfilling life. This book has been awarded The Association for Behavioral and Cognitive Therapies Self-Help Seal of Merit – an award bestowed on outstanding self-help books that are consistent with cognitive behavioral therapy (CBT) principles and that incorporate scientifically tested strategies for overcoming mental health difficulties. Used alone or in conjunction with therapy, our books offer powerful tools readers can use to jump-start changes in their lives.

This book is a part of New Harbinger Publications' Guides for the Newly Diagnosed series. The series was created to help people who have recently been diagnosed with a mental health condition. Our goal is to offer user-friendly resources that provide answers to common questions readers may have after receiving a diagnosis, as well as evidence-based strategies to help them cope with and manage their condition, so that they can get back to living a more balanced life. Visit www.newharbinger.com for more books in this series.

Body Piercing and

Tattooing - Robert Z.

Cohen 2013-07-15

With body piercing and tattooing becoming more popular and mainstream, many teens may think about engaging in these forms of body modification. An excellent resource for young people pondering a piercing or tattoo, this title presents some of the pros and cons they should consider. In an honest and engaging manner, the author presents important

information teens need to protect their health, including how to identify a reputable studio, what to expect from the procedures, and how to do proper aftercare. Legal, social, and familial issues are explored, too, including the importance of discussing the decision with their parents and choosing tattoos or piercings they can live with throughout adulthood.

Developmental Biology of Neoplastic Growth -

Alvaro Macieira-Coelho

2006-03-30

In this book, tumour growth is perceived as a deviation from the normal development of the human organism. The molecular, cellular, and tissue determinants of different tumours are discussed showing that each is a different disease, often corresponding to a particular developmental

stage. The natural history of several cancers illustrates how clinical incidence can be just the visible part of the iceberg, while the first changes at the tissue level sometimes occur several years before tumour growth becomes manifest.

Several mechanisms are proposed to explain the distribution of cancers during the human life span and the decline of the incidence of cancers during human senescence.

Clusters in Automotive and Information & Communication Technology
- Paul J.J. Welfens

2014-07-08
Information & communication technology (ICT) and the automotive sector are two of the most important industries in the EU and the US. The EU's eastern expansion and economic globalization have reinforced competition on the one hand; on the other hand the importance of outsourcing and offshoring has increased. Against this background the intensification of innovation dynamics becomes crucial – and with them the role of regional innovation clusters. The analysis examines seven regions and six EU countries. The focus is on cluster and network dynamics in both industries, as regional ICT clusters are playing an increasingly central role in many European regions. Specialization and structural change in

the automotive sector are highlighted, and new strategic approaches for multinational companies and changes in policy options are identified.
