Psychological First Aid - World

Health Organization 2014-05

This manual is designed to

orient helpers to offer

psychological first aid (PFA) to

people following a serious crisis

event. PFA involves humane,

supportive and practical

assistance for people who are

distressed, in ways that respect

their dignity, culture and

abilities. The instructions and

materials in this manual are for

a half-day orientation (4 hours

excluding breaks) to prepare

helpers to support people

recently affected by very

stressful events. If you have

more time available for the

orientation, extra activities and

slides are included in text boxes

to deliver a full day orientation

(five and a half hours excluding

breaks). Where possible, one should organize full day orientations to allow for deeper learning. It is important to adapt the orientation and materials to the local culture, language and context, and to the likely kinds of crisis situations in which your participants would be helping.

This facilitator's manual is to be used together with Psychological First Aid: Guide for Field Workers.
