## *The Golden Passport* - Duff McDonald 2017-04-25

A riveting and timely intellectual history of one of our most important capitalist institutions, Harvard Business School, from the bestselling author of *The Firm*. With *The Firm*, financial

journalist Duff McDonald pulled back the curtain on consulting giant McKinsey & Company. In *The Golden Passport*, he reveals the inner workings of a singular nexus of power, ambition, and influence: Harvard Business School. Harvard University occupies a unique place in the public's imagination, but HBS has arguably eclipsed its parent in terms of its influence on modern society. A Harvard degree guarantees respect. An HBS degree is, as the *New York Times* proclaimed in 1978, "the golden passport to life in the upper class." Those holding Harvard MBAs are near-guaranteed entrance into Western capitalism's most powerful realm—the corner office. Most people have a vague knowledge of the power of the HBS network, but few understand the dynamics that have made HBS an indestructible and powerful force for almost a century. As McDonald explores these dynamics, he also reveals how, despite HBS's enormous success, it has failed with respect to the stated goal of its founders: "the multiplication of men who will handle their current business problems in socially constructive ways." While HBS graduates tend to be very good at whatever they do, that is rarely the doing of good. In addition to teasing out the essence of this exclusive, if not necessarily "secret" club, McDonald explores two important questions: Has the school failed at reaching the goals it set for itself? And is HBS therefore complicit in the moral failings of Western capitalism? At a time of pronounced economic disparity and political unrest, this hard-hitting yet fair portrait offers a much-needed look at an institution that has a profound influence on the shape of our society and all our lives.

Method for Teaching Speed Reading & Memory Improvement

You may have even taken a normal speed reading course in the past, only to realize that you didn't retain anything you read. The sad irony is that in order to properly learn things like speed reading skills and memory techniques in the past, you had to read dozens of books and psychological journals to decode the science behind it. Or, you had to hire an expensive private tutor who specializes in SuperLearning. That's what I did. And it changed my life. Fortunately, my co-authors (experts and innovators in the fields of superlearning, memory improvement, and speed reading) agreed to help me transform their materials into the first ever digital course. Over 25,000 satisfied students later, we have transformed our course into a book you can enjoy anywhere. Our teaching methodology relies heavily on at-home exercises. The chapters themselves are only part of what you're buying. You will be practicing various exercises and assignments on a regular basis over the course a 7 week schedule. In addition to the lectures, there are hours of supplemental video and articles which are considered part of the curriculum. "This vital book contains all the tools needed to learn, memorize, and reproduce anything you want with the joy that ease brings. Don't take another class until you've read it!" -Dr. Anthony Metivier, Author & Memory Expert

If you wish to improve memory and concentration, learn more effectively, read faster, and learn the techniques of memory champions - look no further! An awesome read that will push the limits of your brain. Levi does an incredible job of guiding you through, to bring your brain from average to UNSTOPPABLE!" -Nelson Dellis, 4-Time USA Memory Champion

*Grit* - Angela Duckworth 2016-05-03

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-genius everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but

a unique combination of passion and long-term perseverance. In *Grit*, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. "Duckworth's ideas about the cultivation of tenacity have clearly changed some lives for the better" (The New York Times Book Review). Among *Grit's* most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, *Grit* is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is "a fascinating tour of the psychological research on success" (The Wall Street Journal).

In Chris' latest book (called "Networking to Get Customers, a Job or Anything You Want"), you will learn how to significantly increase your chances of getting a job, customers and anything you want by networking. This book has over 200 pages plus over 2 hours of video lectures and 15 downloadable templates and 11 exercises to help you master networking and achieve your most ambitious professional and personal goals. Professor Haroun has successfully changed

careers by networking (he worked at Goldman Sachs, then in the hedge fund industry at hedge fund giant Citadel, in the venture capital industry and in the consulting + tech sectors). He has raised/managed over \$1bn in his career and enjoys teaching his in class MBA and undergraduate business students how to network to get a job, customers, etc. Written by Chris Haroun, who is an award winning business school professor and the author of the book "101 Crucial Lessons They Don't Teach You in Business School," which Business Insider wrote is "the most popular book of 2016 according to Business Insider readers." In 2015 Forbes called this book "1 of 6 books that all entrepreneurs must read right now." Chris also has the top selling online business course on Udemy.com called "An Entire MBA in 1 Course." Chris Haroun has an MBA in finance from Columbia University and a Bachelor of Commerce degree from McGill University where he is a McGill University Dobson Fellow (awarded for contributions to helping students and alumni with venture capital entrepreneurship advice). *An Entire MBA in 1 Course* - Chris Haroun  
2016-02-09

\*\* ACCORDING TO BUSINESS INSIDER: "Getting your MBA has never been easier. Haroun is one of the highest rated professors on Udemy, so you can expect to be in good hands through the course of your education." \*\* This is the book version of the popular Udemy.com course called "An Entire MBA in 1 Course." From the Author of "101 Crucial Lessons They Don't Teach You in Business School," which Forbes magazine calls "1 of 6 books that all entrepreneurs need to read right now." This book will teach you everything you need to know about business....from starting a company to taking it public. Most business books are significantly outdated. This book leverages many online resources and makes the general business, accounting and finance process very easy to understand (and enjoyable too)! There are many incredibly engaging and entertaining video links in the book to YouTube and other sources; 'edutainment' works! Although this book is close to 400 pages, I tried to visualize the content of this book as much as possible as this is a more impactful and

enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently, based on my experience at a prominent San Francisco based venture capital firm. I also included many helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of Commerce degree at McGill University. Think of this book as a "greatest hits" business summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. As the title of this book suggests, this is an entire MBA in one book; it's also a practical manual to help you accomplish your business career goals. I have minimized "boring theoretical concepts" in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the San Francisco Bay Area, you can find other courses that I teach online at [www.udemy.com/user/chris-haroun/](http://www.udemy.com/user/chris-haroun/).  
*The Psychology of Money* - Morgan Housel  
2020-09-08

Doing well with money isn't necessarily about what you know. It's about how you behave. And behavior is hard to teach, even to really smart people. Money—investing, personal finance, and business decisions—is typically taught as a math-based field, where data and formulas tell us exactly what to do. But in the real world people don't make financial decisions on a spreadsheet. They make them at the dinner table, or in a meeting room, where personal history, your own unique view of the world, ego, pride, marketing, and odd incentives are scrambled together. In *The Psychology of Money*, award-winning author Morgan Housel shares 19 short stories exploring the strange ways people think about money and teaches you how to make better sense of one of life's most important topics.

*The Family Firm* - Emily Oster 2022-08-02

The instant New York Times bestseller! \* One of Behavioral Scientist's Notable Books of 2021 "Emily Oster dives into the data on parenting issues, cuts through the clutter, and gives families the bottom line to help them make better decisions." -Good Morning America "A targeted mini-MBA program designed to help moms and dads establish best practices for day-to-day operations." -The Washington Post From the bestselling author of *Expecting Better* and *Cribsheet*, the next step in data driven parenting from economist Emily Oster. In *The Family Firm*, Brown professor of economics and mom of two Emily Oster offers a classic business school framework for data-driven parents to think more deliberately about the key issues of the elementary years: school, health, extracurricular activities, and more. Unlike the hourly challenges of infant parenting, the big questions in this age come up less frequently. But we live with the consequences of our decisions for much longer. What's the right kind of school and at what age should a particular kid start? How do you encourage a healthy diet? Should kids play a sport and how seriously? How do you think smartly about encouraging children's independence? Along with these bigger questions, Oster investigates how to navigate the complexity of day-to-day family logistics. Making these decisions is less about finding the specific answer and more about taking the right approach. Parents of this age are often still working in baby mode, which is to say, under stress and on the fly. That is a classic management problem, and Oster takes a page from her time as a business school professor at the University of Chicago to show us that thoughtful business process can help smooth out tough family decisions. *The Family Firm* is a smart and winning guide to how to think clearly--and with less ambient stress--about the key decisions of the elementary school years. Parenting is a full-time job. It's time we start treating it like one.

*The Street Smart MBA* - James Mangraviti  
2014-03-01

Business schools have long enticed students into their MBA programs with the promise that, after a short stint spent studying the ins and outs of the business world, they will be able to step right into the upper echelons of management or launch a business that soon has them flitting about the world in a private jet. "Sounds great," you say. "Sign me up!" Not so fast. Sure, business school might prove a necessary prerequisite for those aiming to gain employment at a large financial institution, land a job with a consultancy, or accelerate their journey to managerial superstardom at a Fortune 500 company. But for aspiring entrepreneurs and established business owners alike, the truth of the matter is this: The ability to get a business off the ground and running successfully is not the byproduct of toiling away in a classroom, learning esoteric subjects like the economics of competition. Rather, all it takes to start and run a truly successful business are a few sensible, time-proven techniques that have been needlessly forgotten in business innovators' haste to reinvent the wheel. That's why, in *The Street Smart MBA*, Steve Babitsky and James J. Mangraviti, Jr., encourage you to ditch class—or, better yet, ditch b-school altogether—and go back to the business basics with a series of ten simple steps that will do more for your company

than the letters M, B, and A ever will. There are no forays into game theory in *The Street Smart MBA*, no parables, and no intellectualizing. Instead what you will find is a practical, easy-to-understand, step-by-step business strategy guide that encourages you to revive a handful of basic yet essential practices that many business owners have lost sight of, such as: Building a brand that is so synonymous with quality that you'll be able to maximize your company's profits in no time; Turning your company's products and services into profits by finding your company a niche, working with deadlines, and honoring your company's image above all else; Dealing with customer complaints head-on so that you can turn gripes into opportunities; Doing favors, mentoring, and sending gifts, in order to grow your business network; And much more. With its emphasis on ten simple yet time-honored principles that lead to business success, *The Street Smart MBA* is all the business education that entrepreneurs with great ideas and business owners with the drive to succeed will ever need. *Applying MBA Knowledge and Skills to Healthcare* - Reza Nassab 2011

Clinicians increasingly need a firm grasp of the fundamental principles of business management, finance and related subjects. Even so, business disciplines are still rarely taught during medical training, while busy practices and complicated accounting tasks mean that gaining business acumen 'on the job' is impractical for many. As a result, increasing numbers of clinicians learn the skills they need by taking an MBA (Masters in Business Administration). While an MBA may be the answer for some, the formidable costs and time commitment it demands leave many busy practitioners seeking more accessible options. This book provides a readable, tightly organised alternative - a primer on MBA principles and their practical application. Twelve compact, carefully structured modules cover the entire gamut of a business education, from basic finance and accounting principles, to strategic management methods and leadership theories. Unlike some similar texts, this book is designed to be light in tone, easy to read and digest, and thoroughly practical. Busy clinicians, academic surgeons, administrative physicians and other healthcare professionals will find this an invaluable resource in understanding the core principles of business

management. Allied medical professionals, and nurses will also find it useful, as will interview candidates who increasingly face management questions as part of selection processes. 'An invaluable resource in understanding the core principles of business management, and in learning how to apply them. For busy clinicians, the value proposition is enormous in terms of the knowledge gained, versus the amount of reading required to capture what the authors have so capably managed to distill between the covers. The authors have done a remarkable task in capturing the latest concepts and thinking in the business management arena [and] the essence of an entire MBA education, and customise it for healthcare professionals. A delight.' From the Foreword by B Sonny Bal

**Dare to Lead** - Brené Brown 2018-10-09

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise

strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries *Brené Brown: Atlas of the Heart!* **NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG** Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over

comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

**Zero to One** - Peter Thiel 2014-09-16

#1 NEW YORK TIMES BESTSELLER • "This book delivers completely new and refreshing ideas on how to create value in the world."—Mark Zuckerberg, CEO of Meta "Peter Thiel has built multiple breakthrough companies, and Zero to One shows how."—Elon Musk, CEO of SpaceX and Tesla The great secret of our time is that there are still uncharted frontiers to explore and new inventions to create. In *Zero to One*, legendary entrepreneur and investor Peter Thiel shows how we can find singular ways to create those new things. Thiel begins with the contrarian premise that we live in an age of technological stagnation, even if we're too distracted by shiny mobile devices to notice. Information technology

has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. *Zero to One* presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.
