Multiple Choice Questions

in Anatomy and Neurobiology for Undergraduates - Michael J. Blunt 2013-10-22

Multiple Choice Questions in Anatomy and Neurobiology for Undergraduates is a collection of multiple choice questions in anatomy and neurobiology for undergraduate students. Questions are grouped for each visceral system and the nervous system. In the case of the body framework (including peripheral nerves and blood vessels), however, a regional grouping is used. Each question has the corresponding correct answer. This book is comprised of eight chapters covering the upper limb, head and neck, musculoskeletal trunk, lower limb, cardiovascular and respiratory systems, gastrointestinal and genitourinary systems, and neurobiology. Each chapter contains three types of questions designed to test

knowledge in different ways. Type A items involve choosing a single correct answer from five available choices. Type L items are used to elicit information on the cause-effect relationship between sets of data. Type E items call for the perception of one or more correct responses among four alternatives, and the responses may be grouped in five different ways. Most questions are also accompanied by an indication of the percentage of students who obtained the correct answer on occasions of previous settings and by a biserial correlation coefficient (r biserial), indicative of the capacity of the question to distinguish between more able and less able students. This monograph is primarily intended for medical undergraduates and will also be useful to academic anatomists building up their own question banks.

Anatomy: 1800 Multiple
Choice Questions contains
1,800 multiple choice
questions related to
anatomy. The questions are
supported by illustrations
and arranged into nine
sections: Upper Limb,
Lower Limb, Thorax,
Abdomen, Pelvis and
Perineum, Head and Neck,
Nervous System, Histology,
and Embryology. In the

Histology section, the questions in each of the six standard formats are arranged in the same sequence, as follows: the Cell; the Tissues (commencing with the Epithelia and ending with Nervous Tissue); and the Systems (commencing with the Cardiovascular and ending with the Reproductive). Readers will encounter questions dealing with the spine of the scapula, the vein that pierces the clavipectoral fascia, branch of the axillary artery, and the quadriceps femoris muscle. Other topics include muscle pair inserted into iliotibial tract, bony prominences on which you kneel, muscle that flexes hip and knee, and the chromosomal formula of the oocyte at ovulation. This text also discusses the rate of regeneration of peripheral nerves following injury; structures that occupy the carotid sheath; and the location of sphincter urethrae. This

book will be extremely valuable to students and teachers of anatomy.

Examination Questions and Answers in Basic Anatomy and Physiology -
Martin Caon 2020-08-03

This third edition provides 2900 multiple choice questions on human anatomy and physiology, and some biophysical science, separated into 20 chapters and 68 categories. In addition, there are 64 essay topics. The answer to each question is accompanied by an explanation. Each chapter

has an introduction to set the scene for the questions to come. However, not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The textbook offers a more holistic approach to the subjects of anatomy and physiology by also including biomechanics, biophysics and biochemistry. The questions have been used in end-of-semester examinations for undergraduate anatomy and physiology courses, and as such, reflect the focus of these particular courses and are pitched at this level to challenge students that are beginning their training in anatomy and physiology. The question and answer combinations are intended for use by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students

enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition and dietetics, health sciences, exercise science, and students taking an anatomy and physiology course as an elective.

Examination Questions and Answers in Basic Anatomy and Physiology -

Martin Caon 2016-10-11

This book provides two thousand multiple choice questions on human anatomy and physiology, separated into 40

categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing,

midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective. *Multiple Choice Questions in Ophthalmic and Neuroanatomy* - O.J. Lehmann 2013-10-22 Multiple Choice Questions in Ophthalmic and Neuroanatomy was written from notes that made by the author while preparing for the College of Ophthalmologists' primary examination. At the time it was difficult to gauge the standard expected as there were no questions available. This book aims to help many candidates who need to learn this sort of anatomy and hopes that its appeal extends beyond budding ophthalmologists and general surgeons to include optometrists and orthoptists. The questions deal with the following topics: osteology; anatomy of the head and neck;

vascular anatomy;
neuroanatomy; orbital and
autonomic anatomy; ocular
adnexae and extraocular
muscles; cranial nerves and
visual pathway; ocular
anatomy; and embryology.

**Anatomy: Abdomen &
Lowerlimb (Vol. 3)** -

Brijandra Singh 2015-04-01

The ultimate aim of any
teaching system is to
produce the best scholars &
the best professionals in the
today's scenario with
futuristic approach so that
when given a chance they
must be able to exhibit their
past knowledge. To verify or
quantify this knowledge the
student/scholar has to
undergo certain exam.

Nowadays the best exams
are supposed to be those
having Multiple Choice
Questions i.e. MCQ's as
integral part because of two
important reasons, First
easy to conduct & uniform
evaluation for all students,
that is no bias, Second
MCQ's checks
memory/recall memory/
reasoning & ability to be
precise in terms of reading
/understanding and speed

with ability to record answers with accuracy too. The book on this subject "Exam Success Review ANATOMY MCQ's- Volume-3, Abdomen & Lowerlimb for Medical Students - MBBS 1st Prof & PG Entrance" will be helpful as a companion for fast revision during examination and will help them certainly to secure full marks in the Multiple Choice Questions in examination. I must let you know that MCQ's make about 20% to 40% of total marks in the 1st prof. MBBS exam and anybody who knows the con-cepts and art to answer the MCQ's is going to be winner not only at MBBS level but also at various Postgraduate

entrance Examinations at national & state level to get the PG Course of their choices.
