The Restoration of Engravings, Drawings, Books, and Other Works on Paper - Max Schweidler 2006

Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandetzung von Kupferstichen, Zeichnungen, Buchern usw* has been recognized as a seminal modern text on the conservation and restoration of works on paper. To address what he saw as a woeful dearth of relevant literature and in order to assist those who have 'set themselves the goal of preserving cultural treasures, ' the noted German restorer composed

a thorough technical manual covering a wide range of specific techniques, including detailed instructions on how to execute structural repairs and alterations that, if skilfully done, can be virtually undetectable. By the mid-twentieth century, curators and conservators of graphic arts, discovering a nearly invisible repair in an old master print or drawing, might comment that the object had been 'Schweidlerized.' This volume, based on the authoritative revised German edition of 1949, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated critical edition. The editor's introduction places the work in

its historical context and probes the philosophical issues the book raises, while some two hundred annotated

Daughter of Cana (Jerusalem Road Book #1) - Angela Hunt 2020-03-31

Thomas and Tasmin, twin siblings hired to oversee a wedding feast in Cana, worry when the host runs out of wine . . . until a guest tells Tasmin to have the servants fill the pitchers by the gate with water from the cistern. Reluctantly, she obeys and is amazed when rainwater turns into the finest wine ever tasted in Cana. When Thomas impulsively decides to follow the teacher from Nazareth, he and Tasmin argue--since the twins have been together since the womb, Tasmin can't accept losing her brother to some magician-prophet. Aided by Jude, younger brother to Jesus of Nazareth, she decides to follow the Nazarene's group and do whatever she must to mend the fractured relationship and bring her brother home.

Dictionary of American Hand Tools - Alvin Sellens 2002
Here is the greatest assembly of hand tools ever assembled. It is a fascinating chronicle of nearly every tool ever used in North America, including ancient tools used by Native Americans; trade tools used to create coaches, pianos, ships, and saddles; tools for harvesting farm goods, turpentine, and ice; and tools for fine trades such as bookbinding and watch repair. The tools are organized according to profession, from Beekeeper to Wheelwright, and will fascinate today's practitioners of these trades and hobbies. This comprehensive volume includes more than 4,500 images from catalog illustrations, trade literature, and hand drawings. Descriptions provide dimensions and applications. This is a must have for the tool collector and antique dealer, as well as anyone fascinated by the

means of production.

The Death of Expertise - Tom Nichols 2017-02-01
Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other

reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

Manual of First and Second Fixing Carpentry - Les Goring 2010

Beginning with the fundamentals of carpentry work within a domestic construction setting, this book outlines which tools are required, and examines their care and proper use before covering the interpretation of technical drawings. It goes on to explain a wide range of first-fixing operations prior to plastering, and second-fixing operations after plastering. Each chapter covers the subject in great detail, with step-by-step illustrations and text to provide the reader with a complete picture of the sequence of work required to carry out each job. Goring's *Manual of First and Second Fixing Carpentry* has been updated to take recent developments in the building trades into account, and is also fully up to date with current industry best practice. Printed in full colour throughout, new chapter has been incorporated to address the sharpening of traditional saws. The breadth of coverage and easily accessible 'how-to' approach makes this book an ideal resource for apprentices taking NVQs and those following Construction Awards within the Wood Occupations from City & Guilds/Construction Skills. The technical detail and practical focus ensures that this book will be a vital purchase for all students, and an essential reference for any experienced carpenter or joiner.

Building the Timber Frame House - Tedd Benson 1981-09-01
For centuries, post-and-beam construction has proved to

be one of the most durable building techniques. It is being enthusiastically revived today not only for its sturdiness but because it can be easily insulated, it is attractive, and it offers the builder the unique satisfaction of working with timbers. Building the Timber Frame House is the most comprehensive manual available on the technique. In it you will find a short history, of timber framing and a fully illustrated discussion of the different kinds of joinery, assembly of timbers, and raising of the frame. There are also detailed sections on present-day design and materials, house plans, site development, foundation laying, insulation, tools, and methods.

The Excavation of Ste Marie I - Kenneth E. Kidd
1949-12-15

This report sets forth the results of the excavation of the site known as Ste Marie I on the Wye River, near Midland, Ontario. It is hoped that it will be in some measure a contribution to our knowledge of a small but important episode in Canadian history; namely, the activities of the Jesuit Fathers in the decade of their residence among the Huron Indians. In the decade of their residence among the Hurons, the Jesuits attempted to build a native commonwealth founded on Christian belief: an attempt which was suddenly and utterly ended by the Iroquois raids of 1649. The very heart and core of this famous enterprise was the establishment called by the Jesuits themselves Ste Marie. Hitherto, knowledge of it has been confined to what could be learned from written records; this can now be augmented, especially in regard to its physical aspects, with the information obtained by means of archaeology, and presented in this report.

One Good Turn - Witold Rybczynski 2013-07-23

The Best Tool of the Millennium The seeds of Rybczynski's elegant and illuminating new book were sown by The New York Times, whose editors asked him to write an essay identifying "the best tool of the millennium." The award-winning author of *Home, A Clearing in the Distance*, and *Now I Sit Me Down*, Rybczynski once built a house using only hand tools. His intimate knowledge of the toolbox -- both its contents and its history -- serves him beautifully on his quest. *One Good Turn* is a story starring Archimedes, who invented the water screw and introduced the helix, and Leonardo, who sketched a machine for carving wood screws. It is a story of mechanical discovery and genius that takes readers from ancient Greece to car design in the age of American industry. Rybczynski writes an ode to the screw, without which there would be no telescope, no microscope -- in short, no enlightenment science. One of our finest cultural and architectural historians, Rybczynski renders a graceful, original, and engaging portrait of the tool that changed the course of civilization.

The Sumerians - Samuel Noah Kramer 2010-09-17

The Sumerians, the pragmatic and gifted people who preceded the Semites in the land first known as Sumer and later as Babylonia, created what was probably the first high civilization in the history of man, spanning the fifth to the second millenniums B.C. This book is an unparalleled compendium of what is known about them. Professor Kramer communicates his enthusiasm for his

subject as he outlines the history of the Sumerian civilization and describes their cities, religion, literature, education, scientific achievements, social structure, and psychology. Finally, he considers the legacy of Sumer to the ancient and modern world. "There are few scholars in the world qualified to write such a book, and certainly Kramer is one of them. . . . One of the most valuable features of this book is the quantity of texts and fragments which are published for the first time in a form available to the general reader. For the layman the book provides a readable and up-to-date introduction to a most fascinating culture. For the specialist it presents a synthesis with which he may not agree but from which he will nonetheless derive stimulation."—American Journal of Archaeology "An uncontested authority on the civilization of Sumer, Professor Kramer writes with grace and urbanity."—Library Journal

Architecture in Ancient Central Italy - Charlotte R. Potts 2022-03-31

Architecture in Ancient Central Italy takes studies of individual elements and sites as a starting point to reconstruct a much larger picture of architecture in western central Italy as an industry, and to position the result in space (in the Mediterranean world and beyond) and time (from the second millennium BC to Late Antiquity). This volume demonstrates that buildings in pre-Roman Italy have close connections with Bronze Age and Roman architecture, with practices in local and distant societies, and with the natural world and the cosmos. It also argues that buildings serve as windows into the minds and lives of those who made and used them, revealing the concerns and character of communities in early Etruria, Rome, and Latium. Architecture consequently emerges as a valuable historical source, and moreover a part of life that shaped society as much as reflected it.

Death Island - Kelsey Ketch 2020-11-25

After arriving at Death Island, Meriden Cummings became haunted by dreams of a young Mayan woman's death. A death, Meriden fears, foreshadows her own. And she soon discovers that in this tropical paradise, there are many ways to die. On top of that, the pirates after her great-grandfather's treasure are not far behind. Can she and her crew stay one step ahead of them and the Mayan god that inhabits the island? Meriden is not the only one haunted by the young Mayan woman's death. Gregory Wilson has had similar dreams the moment he stepped foot on the island. In addition, he has seen the Mayan god of death, Ah Puch. Will he be able to protect Meriden from the earthly dangers as well as the supernatural forces seeking her demise?

Old Ways of Working Wood - Alex Bealer 2009-02-05

A revised edition of a classic guide to woodworking methods that have been refined and developed over thousands of years. It teaches and preserves techniques and historical information that were lost when modern woodworking technology, dedicated to mass production, displaced the craftsman. Every woodworking operation—chopping, splitting, using the workbench, sawing, hewing, boring, chiseling, shaping, planing, turning—is described in detail. There is also information on the role of various tools in the evolution of wood products, the types and characteristics of wood, the preparation and maintenance of tools, collective tools of antique value, and instruction on the subtleties of the craft, from rabbeting to molding. The professional woodworker, the hobbyist, the collector, the antiques dealer, and the craft enthusiast will discover valuable information in this definitive work. It is reference, guide, and

history all in one volume. This book contains over 200 line drawings by the author to illustrate age-old, yet fascinating, ways of working with wood. With chapters that describe the ways to fell a tree, methods for splitting wood, and more, along with a complete appendix and index, this is a great reference for anyone interested in the ways of wood working.

Hammer Head: The Making of a Carpenter - Nina MacLaughlin 2015-03-16

"No other book has made me want to re-read Ovid and retiling my bathroom floor, nor given me the conviction that I can do both. I loved it." –Rosie Schaap, author of *Drinking with Men* A warm and inspiring book for anyone who has ever dreamed of changing tracks, *Hammer Head* is the story of a young woman who quit her desk job

to become a carpenter. Writing with infectious curiosity, Nina MacLaughlin—a Classics major who couldn't tell a Phillips from a flathead screwdriver—describes the joys and frustrations of making things by hand. Filled with the wisdom of writers from Ovid to Mary Oliver and MacLaughlin's own memorable accounts of working with wood, unfamiliar tools, and her unforgettable mentor, *Hammer Head* is a passionate book full of sweat, bashed thumbs, and a deep sense of finding real meaning in work and life.
