Proceedings of CECNet 2022 - A.J. Tallón-Ballesteros 2022-12-29

Electronics, communication and networks coexist, and it is not possible to conceive of our current society without them. Within the next decade we will probably see the consolidation of 6G-based technology, accompanied by many compatible devices, and fiber-optic is already an advanced technology with many applications. This book presents the proceedings of CECNet 2022, the 12th International Conference on Electronics, Communications and Networks, held as a virtual event with no face-to-face participation in Xiamen,

China, from 4 to 7 November 2022. CECNet is held annually, and covers many interrelated groups of topics such as electronics technology, communication engineering and technology, wireless communications engineering and technology and computer engineering and technology. This year the conference committee received 313 submissions. All papers were carefully reviewed by program committee members, taking into consideration the breadth and depth of research topics falling within the scope of the conference, and after further discussion, 79 papers were selected for presentation at the conference and for publication in this book. This represents an acceptance rate of about 25%. The book offers an overview of the latest research and developments in these rapidly evolving fields, and will be of interest to all those working with electronics, communication and networks.

Do We Care? - K. Sujatha Rao 2016-12-20

India is one of the fastest-growing economies in the world. Yet health is not a part of our ambitious development story. In fact, India's disproportionately stingy healthcare budget makes some of the poorer nations look better in

comparison. Statistics, however, speak louder than critics: we have one of the highest numbers of women dying in childbirth and under-five mortality rates. Every year nearly sixty million people get pushed below the poverty line due to the health expenditures that they incur. But there are a few bright spots too: India has eradicated polio and reversed the incidence of HIV/AIDS by an impressive margin. Drawing on her experience as the former union health secretary, K. Sujatha Rao gives us an unsparingly candid insider's view of India's health system. This richly detailed book favours increasing the health budget, greater use of technology, and providing leadership and good governance. Rao argues that unless good health is ~~Distribut~~ as a national goal, India's growth story will remain largely self-congratulatory.
