

Annual Report Project Tesla Motors Inc Emory

This is likewise one of the factors by obtaining the soft documents of this **Annual Report Project Tesla Motors Inc Emory** by online. You might not require more get older to spend to go to the ebook introduction as with ease as search for them. In some cases, you likewise attain not discover the notice Annual Report Project Tesla Motors Inc Emory that you are looking for. It will enormously squander the time.

However below, as soon as you visit this web page, it will be so enormously easy to acquire as competently as download lead Annual Report Project Tesla Motors Inc Emory

It will not believe many era as we notify before. You can get it while be in something else at house and even in your workplace. as a result easy! So, are you question? Just exercise just what we provide under as skillfully as review **Annual Report Project Tesla Motors Inc Emory** what you gone to read!

Los Angeles Magazine - 2003-11

Los Angeles magazine is a regional magazine of national stature. Our combination of award-winning feature writing, investigative reporting, service journalism, and design covers the people, lifestyle, culture,

entertainment, fashion, art and architecture, and news that define Southern California. Started in the spring of 1961, Los Angeles magazine has been addressing the needs and interests of our region for 48 years. The magazine continues to be the definitive resource for

an affluent population that is intensely interested in a lifestyle that is uniquely Southern Californian.

America - Shi, David E.
2021-12-21

America: A Narrative History puts narrative front and center with David Shi's rich storytelling style, colorful biographical sketches, and vivid first-person quotations. The new editions further reflect our society and our students today by continuing to incorporate diverse voices into the narrative with new coverage of the Latino/a experience as well as enhanced coverage of women and gender, African American, Native American, immigration, and LGBTQ history. With dynamic digital tools, including the InQuizitive adaptive learning tool, and new digital activities focused on primary and secondary sources, America: A Narrative History gives students regular opportunities to engage with the story and build critical history skills. The Brief Edition text narrative is 15% shorter

than the Full Edition.
Deep Brain Stimulation Think Tank: Updates in Neurotechnology and Neuromodulation Research - Michael S. Okun 2021-12-02

Newsletter - 1994

Intellectual Property and Biotechnology - Matthew Rimmer 2008-01-01

Dr Rimmer's book is a marvellous introduction to a crucial topic of our time. He writes engagingly, provocatively and always with good humour. A highly technical and complex area of law has been reduced to clear descriptions and searching analysis. Truly, this is an important book on an essential topic that will help define the ethics of a future that includes nothing less than the future of our species. From the foreword by the Hon Justice Michael Kirby AC CMG, the High Court of Australia . . . the author has done an excellent job by explaining the subject in an open and accessible manner. This book is a timely and very

thought-provoking analysis of patent law and biotechnology. . . The book is a unique theoretical contribution to the controversial public debate over commercialization of biological inventions. . . there is an extensive bibliography. . . a valuable resource for further reading. The book will be of prime interest to lawyers and patent attorneys, scientists and researchers, business managers and technology transfer specialists. *Journal of Intellectual Property Rights* Rimmer's book is highly recommended for anyone interested in the issues and debate related to biological inventions, regardless of which side the reader is on. Stefan M. Miller, *Journal of Commercial Biotechnology* . . . this book gives an excellent account of the most celebrated biotechnology cases from three continents, and for this alone is to be thoroughly recommended. David Rogers, *European Intellectual Property Review* Rimmer has put a great deal of thought and effort into this series of chapters. For

those looking at how to reform, direct and develop laws in relation to biotechnology, this book is brimming with ideas, suggestions and recommendations of what to do next. Rebecca Halford-Harrison, *Chartered Institute of Patent Attorneys* . . . an excellent introduction to a wide range of legal thinking in an increasingly controversial and relevant area to humankind. Sharon Givoni, *Australian Intellectual Property Law Bulletin* Rimmer's new book is a timely and very thought-provoking analysis of patent law and biotechnology and asks a very serious question: can a 19th century patent system adequately deal with a 21st century industry? Kate McDonald, *Australian Life Scientist* This book documents and evaluates the dramatic expansion of intellectual property law to accommodate various forms of biotechnology from micro-organisms, plants, and animals to human genes and stem cells. It makes a unique theoretical contribution to the controversial public

debate over the commercialization of biological inventions. The author also considers the contradictions between the Supreme Court of Canada rulings in respect of the Harvard oncomouse, and genetically modified canola. He explores law, policy, and practice in both Australia and New Zealand in respect to gene patents and non-coding DNA. This study charts the rebellion against the European Union Biotechnology Directive particularly in respect of Myriad Genetics BRCA1 and BRCA2 patents, and stem cell patent applications. The book also considers whether patent law will accommodate frontier technologies such as bioinformatics, haplotype mapping, proteomics, pharmacogenomics, and nanotechnology. Intellectual Property and Biotechnology will be of prime interest to lawyers and patent attorneys, scientists and researchers, business managers and technology transfer specialists. From Underdogs to Tigers - Ashish Arora 2005-03-03

Given that the software industry is commonly viewed as a high-tech industry, how is it that its spectacular growth has occurred in countries where high-tech industries would not seem likely to develop? This book examines the reasons behind this phenomenon, and asks whether it suggests a new model of economic development.

Getting to Zero Alcohol- Impaired Driving Fatalities - National Academies of Sciences, Engineering, and Medicine 2018-04-25

Alcohol-impaired driving is an important health and social issue as it remains a major risk to Americans' health today, surpassing deaths per year of certain cancers, HIV/AIDS, and drownings, among others, and contributing to long-term disabilities from head and

spinal injuries. Progress has been made over the past decades towards reducing these trends, but that progress has been incremental and has stagnated more recently. Getting to Zero Alcohol-Impaired Driving Fatalities examines which interventions (programs, systems, and policies) are most promising to prevent injuries and death from alcohol-impaired driving, the barriers to action and approaches to overcome them, and which interventions need to be changed or adopted. This report makes broad-reaching recommendations that will serve as a blueprint for the nation to accelerate the progress in reducing alcohol-impaired driving fatalities.

The End of Accounting and the Path Forward for Investors and Managers -

Baruch Lev 2016-06-14

An innovative new valuation framework with truly useful economic indicators The End of Accounting and the Path Forward for Investors and Managers shows how the ubiquitous financial reports

have become useless in capital market decisions and lays out an actionable alternative. Based on a comprehensive, large-sample empirical analysis, this book reports financial documents' continuous deterioration in relevance to investors' decisions. An enlightening discussion details the reasons why accounting is losing relevance in today's market, backed by numerous examples with real-world impact. Beyond simply identifying the problem, this report offers a solution—the Value Creation Report—and demonstrates its utility in key industries. New indicators focus on strategy and execution to identify and evaluate a company's true value-creating resources for a more up-to-date approach to critical investment decision-making. While entire industries have come to rely on financial reports for vital information, these documents are flawed and insufficient when it comes to the way investors and lenders work in the current economic climate. This book

demonstrates an alternative, giving you a new framework for more informed decision making. Discover a new, comprehensive system of economic indicators Focus on strategic, value-creating resources in company valuation Learn how traditional financial documents are quickly losing their utility Find a path forward with actionable, up-to-date information Major corporate decisions, such as restructuring and M&A, are predicated on financial indicators of profitability and asset/liabilities values. These documents move mountains, so what happens if they're based on faulty indicators that fail to show the true value of the company? The End of Accounting and the Path Forward for Investors and Managers shows you the reality and offers a new blueprint for more accurate valuation.

Odyssey - Homer 1895

World Economic and Social Survey 2018 - United Nations Publications 2018-10-15

This publication reviews the advances in frontier technologies including automation, robotics, renewable energy technologies, electric vehicles, biotechnologies and artificial intelligence and analyzes their economic, social and environmental impact. These technologies present immense potentials for the 2030 Agenda, fostering growth, prosperity and environmental sustainability. They also pose significant risks of unemployment, underemployment and rising income and wealth inequality and raise new ethical and moral concerns. The Survey identifies policy measures at national levels with the capacity to both maximize the potential of these technologies and mitigate their risks, thereby striking a balance among economic efficiency, equity and ethical considerations
Atlanta - 2004-07
Atlanta magazine's editorial mission is to engage our community through

provocative writing, authoritative reporting, and superlative design that illuminate the people, the issues, the trends, and the events that define our city. The magazine informs, challenges, and entertains our readers each month while helping them make intelligent choices, not only about what they do and where they go, but what they think about matters of importance to the community and the region. An Essay on the Shaking Palsy - James Parkinson 1817

The Sustainability Edge -

Suhas Apte 2017-01-06

Business leaders need to embrace sustainability in order to ensure the lasting success of their organizations. Co-authors Suhas Apte and Jagdish Sheth bring their expertise from practice and from academia to illustrate how business leaders can embed sustainability in a truly holistic and transformative way. Through an examination of such companies as Walmart, AT&T, IKEA and the Tata Group, Apte and Sheth have developed a proven and actionable framework rooted in the real world success of these companies. The case studies reveal how business leaders proactively engage, energize and promote market sustainability to all of their stakeholders including customers, employees, suppliers, investors and the government. The Sustainability Edge enables companies to critically engage their stakeholders and influence them to accept sustainability as part of their core mission.

The Rule of Three - Jagdish
Sheth 2002-05-14

Name any industry and more likely than not you will find that the three strongest, most efficient companies control 70 to 90 percent of the market. Here are just a few examples: McDonald's, Burger King, and Wendy's General Mills, Kellogg, and Post Nike, Adidas, and Reebok Bank of America, Chase Manhattan, and Banc One American, United, and Delta Merck, Johnson & Johnson, and Bristol-Myers Squibb Based on extensive studies of market forces, the distinguished business school strategists and corporate advisers Jagdish Sheth and Rajendra Sisodia show that natural competitive forces shape the vast majority of companies under "the rule of three." This stunning new concept has powerful strategic implications for businesses large and small alike. Drawing

on years of research covering hundreds of industries both local and global, The Rule of Three documents the evolution of markets into two complementary sectors -- generalists, which cater to a large, mainstream group of customers; and specialists, which satisfy the needs of customers at both the high and low ends of the market. Any company caught in the middle ("the ditch") is likely to be swallowed up or destroyed. Sheth and Sisodia show how most markets resemble a shopping mall with specialty shops anchored by large stores. Drawing wisdom from these markets, The Rule of Three offers counterintuitive insights, with suggested strategies for the "Big 3" players, as well as for mid-sized companies that may want to mount a challenge and for specialists striving to flourish in the shadow of industry giants. The book explains how to recognize signs of market disruptions that can result in serious reversals and upheavals for companies

caught unprepared. Such disruptions include new technologies, regulatory shifts, innovations in distribution and packaging, demographic and cultural shifts, and venture capital as well as other forms of investor funding. Years in the making and sweeping in scope, *The Rule of Three* provides authoritative, research-based insights into market dynamics that no business manager should be without.

Handbook of Corporate

Finance - B. Espen Eckbo

2007-05-21

Judging by the sheer number of papers reviewed in this Handbook, the empirical analysis of firms' financing and investment

decisions—empirical corporate finance—has become a dominant field in financial economics. The growing interest in everything “corporate is fueled by a healthy combination of fundamental theoretical developments and recent widespread access to large transactional data bases. A less

scientific—but nevertheless important—source of inspiration is a growing awareness of the important social implications of corporate behavior and governance. This Handbook takes stock of the main empirical findings to date across an unprecedented spectrum of corporate finance issues, ranging from econometric methodology, to raising capital and capital structure choice, and to managerial incentives and corporate investment behavior. The surveys are written by leading empirical researchers that remain active in their respective areas of interest. With few exceptions, the writing style makes the chapters accessible to industry practitioners. For doctoral students and seasoned academics, the surveys offer dense roadmaps into the empirical research landscape and provide suggestions for future work. *The Handbooks in Finance series offers a broad group of outstanding volumes in various areas of finance *Each individual volume in the

series should present an accurate self-contained survey of a sub-field of finance *The series is international in scope with contributions from field leaders the world over

Intellectual Property and Climate Change - Matthew Rimmer 2011-11-01

'An historically grounded study on a cutting-edge topic, Intellectual Property and Climate Change has it all. Not only is it well-written, concise, and hugely informative, it is also a timely intervention addressing truly global challenges. Quite simply, a must-read.' Eva Hemmungs Wirtén, Uppsala University, Sweden 'Rimmer provides a much needed, well written, authoritative book on the intellectual property aspects of climate change, natural disasters, clean vehicles, and renewable energy. The book is essential reading for those wishing to better understand the complex patent issues involved with transitioning away from our current fossil-dominated economy to a more environmentally sustainable

and equitable energy future.' Benjamin K. Sovacool, National University of Singapore In the wake of the international summits in Copenhagen and Cancún, there is an urgent need to consider the role of intellectual property law in encouraging research, development, and diffusion of clean technologies to mitigate and adapt to the effects of climate change. This book charts the patent landscapes and legal conflicts emerging in a range of fields of innovation including renewable forms of energy, such as solar power, wind power, and geothermal energy; as well as biofuels, green chemistry, green vehicles, energy efficiency, and smart grids. As well as reviewing key international treaties, this book provides a detailed analysis of current trends in patent policy and administration in key nation states, and offers clear recommendations for law reform. It considers such options as technology transfer, compulsory licensing, public sector licensing, and patent

pools; and analyses the development of Climate Innovation Centres, the Eco-Patent Commons, and environmental prizes, such as the L-Prize, the H-Prize, and the X-Prizes. This book will have particular appeal to policy-makers given its focus upon recent legislative developments and reform proposals, as well as legal practitioners by developing a better understanding of recent legal, scientific, and business developments, and how they affect their practice.

Innovators, scientists and researchers will also benefit from reading this book.

Leadership Theory - John P. Dugan 2017-02-06

The facilitator's guide brings to life the content of the survey text, Leadership Theory. It offers instructive advice on how to prepare for the use of a critical perspective as well as providing practical resources to translate survey text content to practice. The facilitator's guide consists of: An overview of how to use the guide as well as recommended skills and

reflection questions for educators prior to implementing material. Objectives, critical concepts, a chapter overview, and a chapter framework for each chapter from Leadership Theory Lesson plan "walk-throughs" containing 2-3 activities for each chapter of the survey text, with information for learning outcomes, activity setup, and additional notes for facilitation.

The Good Funeral - Thomas G. Long 2013

"Before long I began to understand that showing up, being there, helping in an otherwise helpless situation was made heroic by the same gravity I had sensed when I first stood in that embalming room as a boy—the presence of the dead made the presence of the living more meaningful somehow, as if it involved a basic and intuitively human duty to witness." —from Chapter 1, "How We Come to Be the Ones We Are" Two of the most authoritative voices on the funeral industry come together here in one volume to

discuss the current state of the funeral. Through their different lenses—one as a preacher and one as a funeral director—Thomas G. Long and Thomas Lynch alternately discuss several challenges facing "the good funeral," including the commercial aspects that have led many to be suspicious of funeral directors, the sometimes tense relationship between pastors and funeral directors, the tendency of modern funerals to exclude the body from the service, and the rapid growth in cremation. The book features forewords from Patrick Lynch, President of the National Funeral Directors Association, and Barbara Brown Taylor, highly praised author and preacher. It is an essential resource for funeral directors, morticians, and pastors, and anyone else with an interest in current funeral practices.

Who's who in Finance and Industry 2000-2001 - 1999

Technological Innovation - Marie C. Thursby 2016-08-23

This is the 2nd edition of Technological Innovation. Profiting from technological innovation requires scientific and engineering expertise, and an understanding of how business and legal factors facilitate commercialization. This volume presents a multidisciplinary view of issues in technology commercialization and entrepreneurship.

Who's who in Finance and Industry - 1999

An Assessment of Illness in U.S. Government Employees and Their Families at Overseas Embassies - National Academies of Sciences, Engineering, and Medicine
2020-12-05

In late 2016, U.S. Embassy personnel in Havana, Cuba, began to report the development of an unusual set of symptoms and clinical signs. For some of these patients, their case began with the sudden onset of a loud noise, perceived to have directional features, and accompanied by pain in one or both ears or

across a broad region of the head, and in some cases, a sensation of head pressure or vibration, dizziness, followed in some cases by tinnitus, visual problems, vertigo, and cognitive difficulties. Other personnel attached to the U.S. Consulate in Guangzhou, China, reported similar symptoms and signs to varying degrees, beginning in the following year. As of June 2020, many of these personnel continue to suffer from these and/or other health problems. Multiple hypotheses and mechanisms have been proposed to explain these clinical cases, but evidence has been lacking, no hypothesis has been proven, and the circumstances remain unclear. The Department of State asked the National Academies to review the cases, their clinical features and management, epidemiologic investigations, and scientific evidence in support of possible causes, and advise on approaches for the investigation of potential future cases. In An Assessment of Illness in U.S. Government

Employees and Their Families at Overseas Embassies, the committee identifies distinctive clinical features, considers possible causes, evaluates plausible mechanisms and rehabilitation efforts, and offers recommendations for future planning and responses.

Learning, Arts, and the Brain - Carolyn H. Asbury 2008

Hacking - Erickson Karnel 2021-01-04

4 Manuscripts in 1 Book! Have you always been interested and fascinated by the world of hacking? Do you wish to learn more about networking? Do you want to know how to protect your system from being compromised and learn about advanced security protocols? If you want to understand how to hack from basic level to advanced, keep reading... This book set includes: Book 1)

Hacking for Beginners: Step by Step Guide to Cracking codes discipline, penetration testing and computer virus. Learning basic security tools on how to ethical hack and grow Book 2) Hacker Basic Security: Learning effective methods of security and how to manage the cyber risks. Awareness program with attack and defense strategy tools. Art of exploitation in hacking. Book 3) Networking Hacking: Complete guide tools for computer wireless network technology, connections and communications system. Practical penetration of a network via services and hardware. Book 4) Kali Linux for Hackers: Computer hacking guide. Learning the secrets of wireless penetration testing, security tools and techniques for hacking with Kali Linux. Network attacks and exploitation. The first book "Hacking for Beginners" will teach you the basics of hacking as well as the different types of hacking and how hackers think. By reading it, you will not only discover why they are

attacking your computers, but you will also be able to understand how they can scan your system and gain access to your computer. The second book "Hacker Basic Security" contains various simple and straightforward strategies to protect your devices both at work and at home and to improve your understanding of security online and fundamental concepts of cybersecurity. The third book "Networking Hacking" will teach you the basics of a computer network, countermeasures that you can use to prevent a social engineering and physical attack and how to assess the physical vulnerabilities within your organization. The fourth book "Kali Linux for Hackers" will help you understand the better use of Kali Linux and it will teach you how you can protect yourself from most common hacking attacks. Kali-Linux is popular among security experts, it allows you to examine your own systems for vulnerabilities and to simulate attacks. Below we

explain the most exciting parts of the book set. An introduction to hacking. Google hacking and Web hacking Fingerprinting Different types of attackers Defects in software The basics of a computer network How to select the suitable security assessment tools Social engineering. How to crack passwords. Network security Linux tools Exploitation of security holes The fundamentals and importance of cybersecurity Types of cybersecurity with threats and attacks How to prevent data security breaches Computer virus and prevention techniques Cryptography And there's so much more to learn! Follow me, and let's dive into the world of hacking! Don't keep waiting to start your new journey as a hacker; get started now and order your copy today!

The Immigrant Exodus - Vivek Wadhwa 2012-10-02

A 2012 ECONOMIST BOOK OF THE YEAR Many of the United States' most innovative entrepreneurs have been immigrants, from Andrew

Carnegie, Alexander Graham Bell, and Charles Pfizer to Sergey Brin, Vinod Khosla, and Elon Musk. Nearly half of Fortune 500 companies and one-quarter of all new small businesses were founded by immigrants, generating trillions of dollars annually, employing millions of workers, and helping establish the United States as the most entrepreneurial, technologically advanced society on earth. Now, Vivek Wadhwa, an immigrant tech entrepreneur turned academic with appointments at Duke, Stanford, Emory, and Singularity Universities, draws on his new Kauffman Foundation research to show that the United States is in the midst of an unprecedented halt in high-growth, immigrant-founded start-ups. He argues that increased competition from countries like China and India and US immigration policies are leaving some of the most educated and talented entrepreneurial immigrants with no choice but to take their innovation elsewhere. The

consequences to our economy are dire; our multi-trillion dollar loss will be the gain of our global competitors. With his signature fearlessness and clarity, Wadhwa offers a concise framework for understanding the Immigrant Exodus and offers a recipe for reversal and rapid recovery.

Autonomous Vehicle

Technology - James M.

Anderson 2014-01-10

Autonomous vehicle technology has the potential to significantly improve social welfare. This report addresses the numerous legislative, regulatory, and liability issues this technology will raise.

the book of the ocean - ernest ingsoll 1898

Archaeology, Anthropology, and Interstellar

Communication - National Aeronautics Administration 2014-09-06

Addressing a field that has been dominated by astronomers, physicists, engineers, and computer scientists, the contributors to this collection raise questions

that may have been overlooked by physical scientists about the ease of establishing meaningful communication with an extraterrestrial intelligence. These scholars are grappling with some of the enormous challenges that will face humanity if an information-rich signal emanating from another world is detected. By drawing on issues at the core of contemporary archaeology and anthropology, we can be much better prepared for contact with an extraterrestrial civilization, should that day ever come.

National Drug Control Strategy - United States.

Office of National Drug Control Policy 2001

Angels Don't Play this HAARP - Nick Begich 2002

"The U.S. Government has a new ground based "Star Wars" weapon which is being tested in the remote bush country of Alaska. This new system manipulates the environment which can: Disrupt human mental processes. Jam all global communications

systems. Change weather patterns over large areas. Interfere with wildlife migration patterns. Negatively affect your health. Unnaturally impact the Earth's upper atmosphere. The U.S. military calls its zapper HAARP (High-frequency Active Auroral Research Project). But this skybuster is not about the Northern Lights. This device will turn on lights never intended to be artificially manipulated. Their first target is the electrojet - a river of electricity that flows thousands of miles through the sky and down into the polar icecap. The electrojet will become a vibrating artificial antenna for sending electromagnetic radiation raining down on the earth. The U.S. military can then "X-ray" the earth and talk to submarines. But there's much more they can do with HAARP. This book reveals surprises from secret meetings"--Back cover.

Evolving IP Marketplace -

Suzanne Michael 2011-05-01

This report recommends improvements to two areas of

patent law policies affecting how well a patent gives notice to the public of what technology is protected and remedies for patent infringement. The report provides valuable insights on how courts can reform the patent system to best serve consumers. It recognizes that patents play a critical role in encouraging innovation, but it also observes that some strategies by patent holders risk distorting competition and deterring innovation. This is especially true for activity driven by poor patent notice, and by remedies that do not align the compensation received by patent holders for infringement with the economic value of their patented inventions. This is a print on demand report.

Can You Survive Death-Defying Ocean Encounters? -

Allison Lassieur 2022-08

Could you survive being stranded at sea? Imagine encountering a barracuda in the Caribbean Sea, a jellyfish in Australia's Great Barrier Reef, or a humpback whale in

the Arctic Ocean. How far would you be willing to go to save your own life? Would it work? Flip through these pages to find out!

Rising to the Challenge -
National Research Council
2012-08-06

America's position as the source of much of the world's global innovation has been the foundation of its economic vitality and military power in the post-war. No longer is U.S. pre-eminence assured as a place to turn laboratory discoveries into new commercial products, companies, industries, and high-paying jobs. As the pillars of the U.S. innovation system erode through wavering financial and policy support, the rest of the world is racing to improve its capacity to generate new technologies and products, attract and grow existing industries, and build positions in the high technology industries of tomorrow. *Rising to the Challenge: U.S. Innovation Policy for Global Economy* emphasizes the importance of

sustaining global leadership in the commercialization of innovation which is vital to America's security, its role as a world power, and the welfare of its people. The second decade of the 21st century is witnessing the rise of a global competition that is based on innovative advantage. To this end, both advanced as well as emerging nations are developing and pursuing policies and programs that are in many cases less constrained by ideological limitations on the role of government and the concept of free market economics. The rapid transformation of the global innovation landscape presents tremendous challenges as well as important opportunities for the United States. This report argues that far more vigorous attention be paid to capturing the outputs of innovation - the commercial products, the industries, and particularly high-quality jobs to restore full employment. America's economic and national security future depends on our succeeding in this endeavor.

The Neurobiology of Trust -

Frank Krueger 2021-12-16

This is a multi-disciplinary introduction to the study of trust, written by experts from the social, behavioural, and neural sciences.

Standing up for a Sustainable World - Claude Henry

2020-12-25

The world has witnessed extraordinary economic growth, poverty reduction and increased life expectancy and population since the end of WWII, but it has occurred at

the expense of undermining life support systems on Earth and subjecting future generations to the real risk of destabilising the planet. This timely book exposes and explores this colossal environmental cost and the dangerous position the world is now in. Standing up for a Sustainable World is written by and about key individuals who have not only understood the threats to our planet, but also become witness to them and confronted them.
