[Neuroarchitecture](#) - Ian Ritchie 2020-12-21

Applying the insights of neuroscience to architecture has the potential to deliver buildings and spaces that measurably promote well-being and create healthier or more effective environments for specific activities. There is, however, a risk that neuroarchitecture will become just another buzzword, a passing architectural fashion or a marketing exercise just as 'eco', 'green' and 'sustainable' have become. This issue of AD offers the reader an alternative to 'neuro' sound-bites and exposes them to the thinking which led to the design of the Sainsbury Wellcome Centre for Neural Circuits and Behaviour (SWC), a pioneering medical research facility designed to foster collaboration between researchers. Multi award winning, the SWC was one of the first buildings in the world designed to take into account what has been learned about how the work space affects behaviour and is a highly effective building in which to work. Readers will gain a richer, deeper insight into the complex mental and existential aspects of architecture, design, and our many senses, how they interact and might interact in the future, and how that knowledge can be used to design more effective buildings and built environments.

The Human Body: Concepts of Anatomy and Physiology - Bruce Wingerd 2020-04-06

The new edition of Bruce Wingerd's *The Human Body: Concepts of Anatomy and Physiology* helps encourage learning through concept building, and is truly written with the student in mind. Learning Concepts divide each chapter into easily absorbed subunits of information, making learning more achievable. Since students in a one-semester course may have little experience with biological and chemical concepts, giving them tools such as "concept statements," "concept check" questions, and a "concept block study sheet" at the end of each chapter help them relate complex ideas to simple everyday events. The book also has a companion Student Notebook and Study Guide (available separately) that reinvents the traditional study guide by giving students a tool to help grasp information in class and then reinforce learning outside of class.
