*Ed McGowin* - Ed McGowin 2006  
Ed McGowin (b. 1938) has, under a

variety of names and guises, created an expansive body of art that ultimately falls outside of traditional categories. His paintings, sculptures, conceptual art

projects, films, writings, and public art installations have in common a southern sensibility, one rooted in his early experiences in Mississippi and Alabama. Ed McGowin, *Name Change* is a retrospective of a project started in 1970 to explore a theory he conceived about the way art history would evolve. As a metaphor for this theory he had his name changed legally twelve times over the course of eighteen months and made works of art for each name, a practice he continued for thirty-five years. This catalog includes full-color reproductions of paintings, sculptures, mixed-media installations, and site-specific art, along with the official applications and confirmations of his name changes. Ed McGowin, of New York City, has had more than sixty solo exhibitions at such places as Museum of Modern Art of the City of Paris and the Corcoran Gallery of Art in Washington, D.C. His work is in the

permanent collection of the Whitney Museum of American Art, the Guggenheim Museum, the National Museum of American Art, and other private and public collections. J. Richard Gruber is director of the Ogden Museum of Southern Art, University of New Orleans, and a member of the University of New Orleans faculty. Anders HSrm is the curator at the Kunsthalle/Tallinn in Tallinn, Estonia. Thomas Sokolowski is director of the Andy Warhol Museum in Pittsburgh, Pennsylvania. Paul Richelson is assistant director and chief curator of Mobile Museum of Art.

"The lessons in this book remind us that we can—and that we must—do better, for the sake of our children, their futures, and the sake of our nation. . . . This volume is a call to action, and I encourage everyone who reads it to take steps to ensure that all America's children are given an equal chance to succeed. pipeline to responsible, productive adulthood." —From the Foreword by Marian Wright Edelman, JD, President and founder, Children's Defense Fund, Washington, DC "Juvenile Justice: Advancing Research, Policy, and Practice appears at a critical time, when promising juvenile justice reforms are underway in so many jurisdictions across the United States. Sherman and Jacobs, and their impressive array of expert authors, fill a significant gap in the literature, making the current body of juvenile justice research and experience accessible to policymakers, researchers, and funders, and doing so through a practical and positive lens." —Patrick McCarthy, President and Chief Executive Officer, Annie E. Jacobs have diligently collected essays from the top experts in the juvenile justice field who tell an empirically based and powerful narrative of who is really in the delinquency system. As this book makes clear, until we ask and answer the right questions, we will remain unable to help the youth most in need." —Alexander Busansky, President, The National Council on Crime and Delinquency, Oakland, CA A comprehensive reference presenting a rehabilitative, youth- and community-centered vision of juvenile justice

*Transforming the Workforce for*

*Children Birth Through Age 8 - National Research Council 2015-07-23*  
Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report

examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their

individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
