Pengantar Custody Transfer Petroleum & Petroleum Product - Siswanto 2021-02-01

Indonesia adalah negara yang memproduksi, mengolah dan memperdagangkan komoditi minyak dan gas atau sering disebut dengan migas. Pernah menjadi anggota dari organisasi negara-negara pengekspor minyak, OPEC. Selain mengekspor Indonesia juga mengimpor minyak dari negara lain. Adanya aktivitas ekspor-impor maupun distribusi domestik menyebabkan banyak dilakukan operasi serah terima minyak (oil custody transfer) di berbagai wilayah Indonesia. Untuk itu, kami menghadirkan buku berjudul "Pengantar Custody Transfer Petroleum & Petroleum

Product” ini dengan harapan dapat memberikan gambaran mengenai masalah tersebut. Pengantar Custody Transfer Petroleum & Petroleum Product ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

Orifice Plates and Venturi Tubes - Michael Reader-Harris 2015-04-29

This book gives the background to differential-pressure flow measurement and goes through the requirements explaining the reason for them. For those who want to use an orifice plate or a Venturi tube the standard ISO 5167 and its associated Technical Reports give the instructions required. However, they rarely tell the users why they should follow certain instructions. This book helps users of the ISO standards for orifice plates and Venturi tubes to understand the reasons why the standards are as they are, to apply them effectively, and to understand the consequences of deviations from the standards.

Multiphase Flow Metering - Gioia Falcone 2009-11-16

Over the last two decades the development, evaluation and use of MFM systems has been a major focus for the Oil & Gas industry worldwide. Since the early 1990's, when the first commercial meters started to appear, there have been around 2,000 field applications of MFM for field allocation, production optimisation and well testing. So far, many alternative metering systems have been developed, but none of them can be referred to as generally applicable or universally accurate. Both established and novel technologies suitable to measure the flow rates of gas, oil and water in a three-phase flow are reviewed and assessed within this book. Those technologies already implemented in the various commercial meters are evaluated in terms of operational and economical advantages or shortcomings from an operator point of view. The lessons learned about the practical reliability, accuracy and use of the available technology is discussed. The book suggests where the research to develop the next generation of MFM devices will be focused in order to meet the as yet unsolved problems. The book provides a critical and independent review of the current status and future trends of MFM,

supported by the authors' strong background on multiphase flow and by practical examples. These are based on the authors' direct experience on MFM, gained over many years of research in connection with both operators and service companies. As there are currently no books on the subject of Multiphase Flow Metering for the Oil & Gas industry, this book will fill in the gap and provide a theoretical and practical reference for professionals, academics, and students. * Written by leading scholars and industry experts of international standing * Includes strong coverage of the theoretical background, yet also provides practical examples and current developments * Provides practical reference for professionals, students and academics

Trigger # 02. Uncertainty - 2021

What if we allow speculation, messiness and befoggedness to set the conditions for documentary gestures and practices? Contemporary documentary practice has a crucial role to play within art, mainstream media and activism. It constitutes less a genre, and more ?a critical method? in its own right. How can we rethink the documentary attitude conceptually, formally and methodologically? Uncertainty has become documentary?s given. What if this unfinished business of the documentary, creates even more possibilities for speculation and imagination? How can we make decentralized, deformatted and polycentric documentaries, even if we assume that we will never fully succeed? 00Trigger #2 on the issue of UNCERTAINTY is made in collaboration with The School of Speculative Documentary (associated with KASK Conservatorium / School of Arts Gent in Belgium) and FOMU (Photography Museum, Antwerp). With contributions by, amongst others, Liz Orton, Petra Van Brabandt, T.J. Demos, Duncan Forbes, Max Pinckers, Georges Senga, Hoda Afshar, Fred Ritchin and Wilco Versteeg.
