Recent Advances in Histopathology: 24 features a collection of in depth reviews of the latest developments in the field. Written in an accessible and easy to read format and featuring such topics as the implementation of digital histology, molecular pathology of pancreatic cancer and the big bang theory of tumour development: how cancers start, each chapter provides a comprehensive overview, and emphasises the salient points of interest. This latest volume in the series is an invaluable resource for busy clinicians and those sitting FRCPath examinations. Key Points 12 chapters summarising important recent advances within the field of Histopathology All topics are written in a practical and clinically relevant manner, further enhanced by the 'key clinical points for practice' sections at the end of each chapter Provides an effective exam revision tool for FRCPath(UK) All chapters written by expert authors ensuring authoritative and accurate content Full colour photographs throughout

Royal Society of Medicine Career Handbook: ST3 - Senior Doctor - Kaji Sritharan 2012-05-25

Whether you are just starting out as a senior doctor or half way up the ladder, this book will give you the help and advice you need to develop your career pathway in primary care or hospital medicine and achieve success in your professional life. Simple, practical tips; strategies; and well-researched advice will empower you to: Excel when applying and interviewing for that all-important ST3 position Achieve examination success in your chosen specialty Make the most of conferences, courses, and other networking opportunities Obtain research funding and choose research areas Deal with workplace politics and management challenges Make the right decisions in choosing your final job, whether at home or overseas Brimming with sound practical advice, hints, and tips, this text with its readily accessible style and approach is an essential survival guide for all embarking on their career as a senior doctor.

The Science of Paediatrics: MRCPCH Mastercourse - Tom Lissauer 2016-03-21

This book is "innovative and original in assisting the reader to apply the principles of science to paediatric practice". Professor Neena Modi, President, Royal College of Paediatrics and Child Health. The Science of Paediatrics, MRCPCH Mastercourse, provides essential background preparation for the MRCPCH Theory and Science examination. It contains an up-to-date review of the application of science to everyday paediatric clinical practice, whether it is interpreting clinical signs or investigations, prescribing drugs or identifying best management. Although this understanding is essential in order to make informed clinical decisions, it is difficult to obtain as it is not usually covered in clinical textbooks. Key features • MRCPCH exam-format questions embedded in each

chapter to test understanding • Emphasis on embryology to explain many congenital abnormalities • An overview of the relevant anatomy and physiology • Focus on the application and interpretation of investigations • Examples of recent advances in science and clinical research that have benefited the children's care • All clinical specialties covered by paediatric specialists. • Chapters covering evidence-based paediatrics, statistics, ethics and quality improvement.

FRCOphth Part 1: 400 SBAs and CRQs - Nikki Hall 2016-01-13

First published in 2016. Routledge is an imprint of Taylor & Francis, an informa company.

How to Get a Specialty Training Post - Danny C. G. Lim 2011-05-05

Each year, thousands of junior doctors apply for highly competitive training jobs in a variety of specialties. Obtaining a training job can be a difficult and stressful process, with some specialties attracting 40 applicants per post. This book helps doctors to improve their chances of getting that highly sought-after post. It is a wide-ranging, accessible guide to the application process, covering every step, from online application to the selection panel. It includes essential tips on career development, interview technique, and specialty-specific advice.

Modernising Medical Careers - Great Britain. Parliament. House of Commons. Health Committee 2008-05-08

An earlier volume of written evidence published in 2007 as HC 25-II (ISBN 9780215037268)

Get Through Postgraduate Medical Interviews - Kaji Sritharan 2008-06-02

Get Through Postgraduate Medical Interviews aims to forearm candidates with practical advice on how to maximise their chances of success in the postgraduate medical interview. Following short-listing, the interview is the final and often the toughest hurdle standing between a candidate and their career path of choice. For many candidates there will only be 'one shot' and competition is likely to be fierce. Formatted in a style that lends itself to easy reading and information access, this book systematically and logically examines the entire interview process from start to finish, dispelling common myths and advising the candidate on how to prepare, what to expect and what will be expected of them. It gives guidance on commonly encountered 'hot interview topics' and advice on ways to approach the 'awkward' interview question. It also gives guidance on constructing a portfolio as well as a CV and tips on how to sell your best attributes and maximise your chances of success. Get Through Postgraduate Medical Interviews is an essential text for all junior doctors to help them through this very stressful time.

Secrets of Success: Getting into Specialty Training - Manoj Ramachandran 2009-12-04

Secrets of Success: Getting into Specialty Training is written for all junior doctors applying for specialty training (ST) posts and is intended to guide applicants through the various challenges of the application process. All major topics that may arise during the application process are covered, including academic achievements, teaching and learning, professional integrity, teamwork and leadership skills, clinical prioritization, and time management. There is a section on ST interviews, and another on addressing specialty-specific questions with good and bad example answers. The book also provides a useful "what next" section, including invaluable advice on what to do if things don't go to plan. Secrets of Success: Getting into Specialty Training is a practical handbook, presented in a clear and friendly style, with space for readers to write their own notes as they go along. This book is an essential guide for all junior doctors before and during the application and interview process, and will arm readers with the tools they need to help them successfully clear this important career hurdle.

Preparing to Pass the FRCA - Caroline Whymark 2016-02-04

Preparing to Pass the FRCA: Strategies for Exam Success equips you with the skills of effective revision and time management to maximise your success. The book takes each element of the FRCA exam and provides tips and techniques on how to approach the different types of questions, and includes worked examples with answers, so that you can undertake your revision accordingly. It will help you to target your revision so you can cover the breadth of topics in the FRCA syllabus and ensure that you structure your revision in an efficient way, as well as helping you to approach the exam and convey your knowledge through writing or speech correctly. Taking many common problems candidates face when preparing for this exam, the book covers motivation, effective studying, managing nerves, and scheduling time to study amongst other commitments.

Handbook for Psychiatric Trainees - Dinesh Bhugra 2008-02

This handbook is a must for anyone trying to navigate the landscape of postgraduate medical education.

Paediatric Rheumatology - Helen E. Foster 2018-05-09

The new edition of Paediatric Rheumatology is an indispensable resource for the identification and management of specific rheumatological disorders. Fully revised to provide up to date knowledge on common and rare rheumatological problems, including chapters on investigations and emergencies, this practical handbook designed for quick reference is essential reading for those who treat rheumatological conditions.

FRCR Physics Notes - Christopher Clarke 2020-11-13

Comprehensive medical imaging physics notes aimed at those sitting the first FRCR physics exam in the UK and covering the scope of the Royal College of Radiologists syllabus. Written by Radiologists, the notes are concise and clearly organised with 100's of beautiful diagrams to aid understanding. The notes cover all of radiology physics, including basic science, x-ray imaging, CT, ultrasound, MRI, molecular imaging, and radiation dosimetry, protection and legislation. Although aimed at UK radiology trainees, it is also suitable for international residents taking similar examinations, postgraduate medical physics students and radiographers. The notes provide an excellent overview for anyone interested in the physics of radiology or just refreshing their knowledge. This third edition includes updates to reflect new legislation and many new illustrations, added sections, and removal of content no longer relevant to the FRCR physics exam. This edition has gone through strict critique and evaluation by physicists and other specialists to provide an accurate, understandable and up-to-date resource. The

book summarises and pulls together content from the FRCR Physics Notes at Radiology Cafe and delivers it as a paperback or eBook for you to keep and read anytime. There are 7 main chapters, which are further subdivided into 60 sub-chapters so topics are easy to find. There is a comprehensive appendix and index at the back of the book.

Specialist Training in Oncology E-Book - Thankamma V Ajithkumar 2011-10-28

This textbook of oncology is aimed at specialist registrars in the early phase of their training. The basic concepts of cancer practice is touched upon in undergraduate and junior postgraduate years, but new trainees frequently seek additional resources to boost their knowledge in the field of Oncology. This title offers a concise account of the multidisciplinary management of common cancers and cancer-related problems appropriate to doctors at the start of their careers in this specialty. The content of the book is based on latest available evidence and reflects the training guidelines. Readable and concise style, aimed at the beginner in this specialty. Well illustrated in colour with graphics, clinical photographs and radiographs. Section on research methodology. Approachable design in the 'Specialist Training in...' series style.

Revision Notes for the FRCM Primary - Mark Harrison 2017-02-09

The new edition of this work is the only book that MCEM candidates will need to pass the MCEM Part A exam

Oxford Handbook for the Foundation Programme - Tim Raine 2011-08-11

Extensively revised and fully updated, this new edition of the Oxford Handbook for the Foundation Programme provides everything you need to excel in your first two years as a doctor. Following the latest curriculum for the Foundation Programme, and the latest career planning guidance, this handbook is the indispensable guide for all junior doctors. Now in full colour throughout, this handbook has never been easier to use, with expanded and reordered sections on prescribing and drug doses, emergencies, and clinical medicine. It includes the parts of the job rarely covered at medical school such as day-to-day life on the wards, referrals, clerking patients, procedures, and hospital paperwork, as well as providing advice on ethics, communication, and what to do when things go wrong. The handbook has practical tips on the current career system, MMC, completing your portfolio, interviews, application forms, and how to get published. With practical advice from the authors' personal experience, and key evidence-based clinical information, this is the ultimate quick-reference survival guide to the Foundation Programme.

Textbook of Adult Emergency Medicine E-Book - Peter Cameron 2014-04-01

Now fully revised and updated, Textbook of Adult Emergency Medicine provides clear and consistent coverage of this rapidly evolving specialty. Building on the success of previous editions, it covers all the major topics that present to the trainee doctor in the emergency department. It will also prove invaluable to the range of other professionals working in this setting - including nurse specialists and paramedics - who require concise, highly practical guidance, incorporating latest best practices and current guidelines. For the first time, this edition now comes with access to additional ancillary material, including practical procedure videos and self-assessment material. Updates throughout reflect latest practice developments, curricula requirements and essential guidelines Key point boxes highlight topic 'essentials' as well as controversial areas of treatment An expanded list of leading international contributors ensures comprehensive coverage and maximizes worldwide relevance New and enhanced coverage of important and topical areas - including latest imaging in emergency medicine; organ donation;

massive transfusion protocols; medico legal issues; patient safety and quality measures All new accompanying electronic ancillary material, including procedure videos and self-assessment materials to check your understanding and aid exam preparation Expansion of administration section - especially patient safety New and enhanced coverage of important and topical areas - including latest imaging in emergency medicine; organ donation; massive transfusion protocols; medico legal issues; patient safety and quality measures All new accompanying electronic ancillary materials - including practical procedures videos and self-assessment materials

Conflict and Catastrophe Medicine - James M. Ryan 2014-01-13

The first edition of conflict and catastrophe was produced in 2002 and a second, successful edition, followed in 2009. The decision to produce these works sprung from painful problems experienced by colleagues and authors themselves during many humanitarian and related deployments. The guide for both editions was to provide, in one volume, an entry level text covering all aspects of deployment, with an emphasis on medicine and healthcare in these environments. This third revised, expanded and updated edition of *Conflict and Catastrophe Medicine: A Practical Guide* follows its successful predecessors in providing a framework for use by health professionals visiting a resource constrained environment. Encompassing problems brought about by local conflict or natural disasters, the book covers preparation, organisation, logistics, treatment of major trauma and medical emergencies, and the special problems of delivering medicine in a hostile environment. This book comprehensively tackles: Self-preparation of health professionals to face a range of medical and related problems which occur in hostile and remote environments; War and disaster medicine, covering acute management, rehabilitation, reconstruction and prevention; Bridging the fields of medicine, nursing, international relations, history, politics and economics. The book also touches on nutrition, infection, trauma, psychiatry and psychological medicine and training.

Medical Psychotherapy - Jessica Yakeley 2016

'Medical Psychotherapy' draws together succinct descriptions of the major models of psychotherapy, written by specialists who offer an accessible, theoretical and evidence based depiction of each therapy and its clinical role for patients. It will appeal to specialist trainees in psychiatry and consultants working in psychotherapy, along with psychologists and allied health professionals.

The Essential Handbook for GP Training and Education - Ramesh Mehay 2021-07-28

The much anticipated practical educational manual for General Practice (GP) trainers, programme directors, and other teachers and educators in primary care has finally arrived. This extensive, full-colour guide is written by a select group of hands-on educators who are passionate and knowledgeable. The book captures their wisdom and vast experience in an accessible and practical way. Although it's aimed at GP training, there are many chapters in this book that are relevant and transferrable to teachers and educators in areas outside of General Practice (and worldwide). We are sure that GP appraisers, Foundation Year trainers and other medical/nursing student educators will find the detailed comprehensive explorations inspirational. Beautifully presented, the chapters cover a wide educational framework employing a variety of presentational methods such as flowcharts, diagrams, conversational pieces, scenarios and anecdotes. Each chapter has a corresponding webpage containing over 300 additional resources - providing practical tools as well as additional reading material. This book was awarded the Royal College of GP's 'Paul Freeling Prize' in 2013 for meritorious work in the

field of General Practice education. It is also used as the foundation textbook for the Postgraduate Certificate in Medical Education (PGCE) in at least seven UK universities. The *Essential Handbook for GP Training and Education* adopts a relaxed, personable approach to primary care education that won't leave you with a headache.

Modernising Medical Careers - House of Commons - Health Committee 2008-05-08

The Modernising Medical Careers (MMC) programme of work was established in 2003 to address difficulties in poor training and indifferent career prospects experienced by some doctors at Senior House Officer (SHO) level and by many of those in Staff Grade and Associate Specialist (SAS) posts. A new Foundation programme was introduced in 2005, the Specialty Training system was reformed and the SHO grade scrapped in 2007. As a result of inadequate preparation during the implementation of the reforms, in 2007 the MMC programme plunged into crisis. The new centralised recruitment system, the Medical Training Application Service (MTAS), proved highly unpopular with both candidates and assessors. A major inquiry, led by Sir John Tooke, examined the 2007 crisis and called both for major changes to the structure of training and for the creation of a new body, NHS Medical Education England, to oversee medical education. The Committee's investigation finds that a divided and inappropriate governance structure, flawed project and risk management and poor communication with junior doctors were the most serious failings. Co-ordination between the Department of Health and the Home Office on restricting medical migration was inadequate. These practical shortcomings were responsible for some of the direct causes of the 2007 crisis, including the defective application form and other aspects of the short-listing process, the unsafe computer system and the failure to limit the number of applications from overseas doctors. The leadership shown by the Department of Health was inadequate. The Chief Medical Officer chose not to take on a clear leadership role and thus did not accept responsibility for the 2007 crisis. The Committee makes a number of recommendations for change and improvement to achieve a more flexible training system, and calls on the Department to address policy issues relating to the wider medical workforce.

Retrieval Medicine - Dr. Charlotte Evans 2016-11-17

Retrieval Medicine is a core, concise and practical text covering the complex clinical and logistical problems experienced in the retrieval environment. Focusing on evidence-based management and clear clinical guidance, this easily portable handbook provides a comprehensive and accessible guide to this growing field for all health professionals involved in the retrieval and transfer of critically ill patients. Covering the practice of acute, emergency and critical care medicine in the transport environment, this handbook provides the practical guidance and clinical knowledge to enable medical practitioners to function independently in highly variable and resource limited environments with acutely unwell, unstable and often clinically undifferentiated patients over long durations. Closely mapped to the Royal College of Surgeons syllabus on retrieval and transfer medicine, this title comprehensively covers all aspects of retrieval medicine, from basic flight physiology to more complex retrievals and common pitfalls. Authored by an authoritative, international team of expert editors and specialist authors, this clinically focused text is complemented by a range of checklists and reference tools for practical and accessible use in the field. These deliver core information for use in the primary retrieval setting, allowing the retriever to structure their approach to a crisis and correct the problem with suggested interventions. Topics include retrieval systems and coordination, crisis resource management, shock, and a range of chapters focusing on responding

to specific areas of medicine when encountered in the retrieval environment, such as cardiology and obstetrics and gynaecology.

Oxford Handbook for the Foundation Programme - Tim Raine 2014

Oxford Handbook for the Foundation Programme has everything you ever needed to know about life on the wards that medical school didn't tell you. Includes practical advice coming from direct from the author's experience on topics from dealing with paperwork to interpreting chest x-rays.

Organizational Video-Ethnography Revisited - Sylvie Grosjean 2021-03-05

This book explores the undeveloped potential of video-ethnography to study the material, embodied and sensory dimensions of workplace practices. With the growing interest in sociomateriality and the development of research on the embodied and sensory dimensions of organizational practices, some methodological challenges of this type of research need to be addressed. The main purpose of this book is to present various forms of video-ethnography that make organizational phenomena visible and help better appreciate the organizing properties of bodies, affects, senses and spaces in workplace practices. To do so, illustrative cases based on video-ethnography was discussed to understand how experiential and unspoken ways of knowing produced through a video-based approach can be made meaningful and relevant to study the material, embodied and sensory dimension of work practices. This book is addressed to researchers and students in social sciences and organizational studies and offers a methodological reflection on how to study the material, embodied, and sensory dimensions of organizational life.

Bulletin of the Royal College of Surgeons of England - 2005

Cracking the General Surgical Interviews for ST3 - Sala Abdalla 2022-02-18

ST3 interviews are extremely competitive and achieving the highest possible score is essential in securing the surgical training post of choice. The key to success in these interviews is through diligent preparation. This book outlines the structure and format of the ST3 general surgical interviews, with chapters dedicated to each component area that is assessed on the day. Written in an engaging style, it provides an essential resource for the interviews, with all of the required material in one book, a bonus for many readers with time constraints imposed by a demanding work schedule. It is aimed at instilling prospective surgeons with the tools and confidence needed to succeed at the ST3 general surgical interview. Success in these structured interviews will lead to the award of a 'national training number'.

Making the Most of Your Medical Career - David McGowan 2021-04-05

This book provides an excellent and easy-to-read path to making the most of your medical career starting as a student...and a ready source of really useful hints and tips that will help anyone reading this book maximise their personal and professional development.' From the Foreword by Dr Inam Haq Want to optimise your chances of success? Take a fresh look at the clinical world. Medical careers have changed and learning how to play the game is as important as being the best in your field. This inspirational new guide considers your medical career from a wide-ranging perspective, encouraging a positive, early outlook. On a highly practical note, it acts as a comprehensive information source, covering all aspects of job applications and medical careers. On a personal note the book fosters a complete reassessment of the way you view your working life. It offers fresh ideas to help identify important opportunities to improve your CV - taking opportunities when you can whilst making the most of what you have. Easy to read and conversational in tone, it details invaluable ideas on developing your

portfolio and innovative methods to successfully market yourself, alongside sound approaches to the challenges and intricacies of the modern medical career.

Medical School at a Glance - Rachel K. Thomas 2016-12-27

Starting Medical School can be incredibly daunting, and the transition to being a medical student can be enormously challenging. Medical School at a Glance is an accessible guide to help give you confidence and to gain a running start to your medical school training. Covering core areas such as medical training, developing effective learning strategies, understanding common principles, learning how to behave in the clinical setting and how to interact with patients and peers, this book will help to demystify the process and prepare you as you embark on your medical career. Providing an insider's view of useful information to build a solid basic foundation for your learning, Medical School at a Glance is essential for those considering studying medicine or are in their first years of study.

Oxford Handbook of Paediatrics - Robert C. Tasker 2013-01-31

Fully revised for the new edition, this handbook covers all significant aspects of acute and chronic paediatrics. Areas such as neonatology, surgery, genetics and congenital malformations and child protection are covered in a user-friendly and succinct style.

Working in Public Health - Fiona Sim 2014-08-07

What can you contribute to improving and protecting the health of your community? Public health is becoming an increasingly central area of healthcare practice and people working in public health come from a wide range of disciplines and backgrounds. This practical and accessible book maps out the range of exciting and varied options open to people considering a career in public health, and provides helpful information on how to get there, either as a fully-fledged specialist or in an operational practitioner role. Designed especially for those wanting to learn about public health, it looks at public health work in a range of settings, from health services to the commercial sector, and in a range of different roles, from health protection to public health intelligence. Numerous personal accounts and case studies from highly experienced practitioners and specialists, as well as those new to their roles, illustrate what their roles involve and how have they had an impact on improving health and reducing inequality. This is the ideal book for anyone interested in putting public health at the centre of their working lives.

2012-12-20

Winner of the prize for New Edited Book at The Royal Society of Medicine & The Society of Authors' Medical Book Awards, this textbook for medical students covers orthopaedics, trauma and rheumatology in one volume. It offers both core information regarding what the student needs to know about these specialties and an extensive series of cases with questions and answers that illustrate the thinking behind common everyday practice. The book offers a standard approach to history taking and physical examination, and relevant anatomy, highlighting the reasons for the different approaches within each specialty as required. Provides a comprehensive overview of musculoskeletal medicine and surgery perfectly tailored for the busy medical student Illustrated in full colour throughout Succinct coverage of essential topics helps aid understanding whilst avoid unnecessary detail thus saving time Uniform style of chapters throughout allows readers to easily scan through for the information required Useful summary boxes outline the main points of each condition including aetiology, pathology, epidemiology, clinical features, investigations, management and prognosis 100 case histories with questions illustrate the range of clinical problems that students will encounter during their clinical placements A new chapter on Sports and Exercise Injury A new restructured chapter on fractures pulls together the text into a more logical presentation of the subject Additional text on sports injuries to children will be included A refocused chapter on the multi-professional team approach to the management of musculoskeletal disorders An update of the therapeutics in all chapters 50 new case studies included.

So you want to be a brain surgeon? - Lydia Spurr 2022-04-12

A medical degree opens many doors, but how do you decide which is the right one to go through? Whether you are wondering how to choose a career or want to know how to follow a particular path, you'll find the answers in this book. Deciding which medical career to pursue has a huge impact on your future, and yet few doctors or medical students ever receive formal careers advice. Fortunately help is at hand: this book has been fully rewritten to include the latest information on training and career progression, as well as summaries of over 100 different careers open to medical graduates. Whether you aspire to be a general practitioner, medical manager, forensic pathologist or even a brain surgeon, you'll find details on the job, lifestyle, and specific career route. Each career chapter has been written by specialists in their field to give you a unique 'insider's opinion', resulting in the most complete and up to date medical careers guide ever published. Alongside the careers chapters there are new and updated sections on the Foundation Programme, Core Training, Specialty Training, and Academic Training. These describe the major hurdles in each area and how to overcome them. In addition, alternatives and adaptations to formal training are explored, including taking time out, working outside the UK, and working less than full time. From choosing jobs and filling application forms, to interviews and improving your CV, this book covers every aspect in detail.

Perinatal Pathology - E. Grundmann 2012-12-06

Core Curriculum for Neonatal Intensive Care Nursing - E-Book - AWHONN 2014-04-22

Perfect as a resource in the field or for exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each

condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shiftwork and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.

The Hands-on Guide to Surgical Training - Matthew Stephenson 2011-11-16

Thinking about a surgical career? About to start surgical training? Do you know what to expect and how to thrive? The Hands-on Guide to Surgical Training is the ultimate, practical guide for medical students and junior doctors thinking about taking the plunge into surgery, and also for surgical trainees already in training. It's full of invaluable, practical information and career guidance to ensure you get the most out of your surgical career. It offers general guidance and advice on surgical training, together with detailed information on each of the nine surgical subspecialties, each written by seniors and consultants, as you make both clinical and career-based choices. Undoubtedly one of the most comprehensive resources for surgical trainees available, The Hands-on Guide to Surgical Training will be essential reading throughout your training and surgical career. Take the stress out of surgical training with The Hands-on Guide!

Training in Paediatrics - Mark Gardiner 2009-09-10

The complete guide to specialty training in paediatrics. Designed in conjunction with the syllabus and structure of the MRCPCH exams
