Discusses renowned masters including Roberto Rossellini and Federico Fellini, as well as directors lesser known outside Italy like Dino Risi and Ettore Scola. The author examines overlooked Italian genre films such as horror movies, comedies,

and Westerns, and he also devotes attention to neglected periods like the Fascist era. the author recreates the world of Italian cinema.

*Crisis in the European Monetary Union* - Giuseppe Celi 2017-12-22

After decades of economic integration and EU enlargement, the economic geography of Europe has shifted, with new peripheries emerging and the core showing signs of fragmentation. This book examines the paths of the core and peripheral countries, with a focus on their diverse productive capabilities and their interdependence. *Crisis in the European Monetary Union: A Core-Periphery Perspective* provides a new framework for analysing the economic crisis that has shaken the Eurozone countries. Its analysis goes beyond the short-term, to study the medium and long-term relations between 'core' countries (particularly Germany) and Southern European 'peripheral' countries. The authors argue that long-term sustainability means

assigning the state a key role in guiding investment, which in turn implies industrial policies geared towards diversifying, innovating and strengthening the economic structures of peripheral countries to help them thrive. Offering a fresh angle on the European crisis, this volume will appeal to students, academics and policymakers interested in the past, present and future construction of Europe.

*The Nation as a Local Metaphor* - Alon Confino 2000-11-09

All nations make themselves up as they go along, but not all make themselves up in the same way. In this study, Alon Confino explores how Germans turned national and argues that they imagined the nation as an extension of their local place. In 1871, the work of political unification had been completed, but Germany remained a patchwork of regions with different histories and traditions. Germans had to construct a

national memory to reconcile the peculiarities of the region and the totality of the nation. This identity project, examined by Confino as it evolved in the southwestern state of Württemberg, oscillated between failure and success. The national holiday of Sedan Day failed in the 1870s and 1880s to symbolically commingle localness and nationhood. Later, the idea of the Heimat, or homeland, did prove capable of representing interchangeably the locality, the region, and the nation in a distinct national narrative and in visual images. The German nationhood project was successful, argues Confino, because Germans made the nation into an everyday, local experience through a variety of cultural forms, including museums, school textbooks, popular poems, travel guides, posters, and postcards. But it was not unique. Confino situates German nationhood within the larger context of

modernity, and in doing so he raises broader questions about how people in the modern world use the past in the construction of identity.

**Globalization and the Rise of Mass Education** - David Mitch

2019-10-24

This edited collection explores the historical determinants of the rise of mass schooling and human capital accumulation based on a global, long-run perspective, focusing on a variety of countries in Europe, the Middle East, Asia, Africa and the Americas. The authors analyze the increasing importance attached to globalization as a factor in how social, institutional and economic change shapes national and regional educational trends. Although recent research in economic history has increasingly devoted more attention to global forces in shaping the institutions and fortunes of different world regions, the link and contrast between national education

policies and the forces of globalization remains largely under-researched within the field. The globalization of the world economy, starting in the nineteenth century, brought about important changes that affected school policy itself, as well as the process of long-term human capital accumulation. Large migrations prompted brain drain and gain across countries, alongside rapid transformations in the sectoral composition of the economy and demand for skills. Ideas on education and schooling circulated more easily, bringing about relevant changes in public policy, while the changing political voice of winners and losers from globalization determined the path followed by public choice. Similarly, religion and the spread of missions came to play a crucial role for the rise of schooling globally.

*Crisis and Sustainability* -

Alessandro Vercelli 2016-12-09

This book offers a novel

interpretation of the Great Recession and the ensuing Euro Crisis as a consequence of the evolution of capitalism since the 1970s. Chapters argue that the neoliberal development trajectory pursued in recent decades is unsustainable, and posit that neither sound macroeconomics nor empirical data support the unqualified faith in free markets that inspired it. The book begins by providing a broad critical perspective on key concepts such as freedom, free market, free trade, globalisation and financialisation, before going on to analyse the long and deep recent crisis as a result of the neoliberal policy strategy adopted since the early 1980s. The alternative narrative outlined in the book provides insights into the policy strategy required to achieve a sustainable development trajectory.

The Castle on the Hudson -

Renato Cantore

2017-07-25T00:00:00+02:00

Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20.000 books, the Paterno Library, to the Casa

Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

**Mapping the Nation** - Gopal Balakrishnan 2012-11-13

In nearly two decades since Samuel P. Huntington proposed his influential and troubling ‘clash of civilizations’ thesis, nationalism has only continued to puzzle and frustrate commentators, policy analysts and political theorists. No consensus exists concerning its identity, genesis or future. Are we reverting to the petty nationalisms of the nineteenth century or evolving into a globalized, supranational world? Has the nation-state outlived its usefulness and exhausted its progressive and emancipatory role? Opening with powerful statements by Lord Acton and

Otto Bauer – the classic liberal and socialist positions, respectively – Mapping the Nation presents a wealth of thought on this issue: the debate between Ernest Gellner and Miroslav Hroch; Gopal Balakrishnan’s critique of Benedict Anderson’s seminal *Imagined Communities*; Partha Chatterjee on the limitations of the Enlightenment approach to nationhood; and contributions from Michael Mann, Eric Hobsbawm, Tom Nairn, and Jürgen Habermas.

[The Routledge Handbook of Heterodox Economics](#) - Tae-Hee Jo 2017-07-28

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a ‘pluralistic’ heterodox perspective. Contributions throughout the Handbook explore different theoretical perspectives including: Marxian-radical

political economics; Post Keynesian-Sraffian economics; institutionalist-evolutionary economics; feminist economics; social economics; Régulation theory; the Social Structure of Accumulation approach; and ecological economics. They explain the structural properties and dynamics of capitalism, as well as propose economic and social policies for the benefit of the majority of the population. This book aims, firstly, to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward-looking manner. Secondly, it delineates the future directions, as well as the current state, of heterodox economics, and then provides both 'heat and light' on controversial issues, drawing out the commonalities and differences among different heterodox economic approaches. The volume also envisions transformative economic and

social policies for the majority of the population and explains why economics is, and should be treated as, a social science. This Handbook will be of compelling interest to those, including students, who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media, and to critical economists and other social scientists who are concerned with analyzing pressing socio-economic issues.

**How Loose, How Tight? A Measure of Monetary and Fiscal Stance for the Euro Area** -

Nicoletta Batini 2020-06-05

This paper builds a model-based dynamic monetary and fiscal conditions index (DMFCI) and uses it to examine the evolution of the joint stance of monetary and fiscal policies in the euro area (EA) and in its three largest member countries over the period 2007-2018. The index is

based on the relative impacts of monetary and fiscal policy on demand using actual and simulated data from rich estimated models featuring also financial intermediaries and long-term government debt. The analysis highlights a short-lived fiscal expansion in the aftermath of the Global Financial Crisis, followed by a quick tightening, with monetary policy left to be the “only game in town” after 2013. Individual countries’ DMFCIs show that national policy stances did not always mirror the evolution of the aggregate stance at the EA level, due to heterogeneity in the fiscal stance.

**Essays on the History of Religions** - Raffaele Pettazzoni 1954

**Crossing the Mangrove** - Maryse Conde 2011-03-02

In this beautifully crafted, Rashomon-like novel, Maryse Conde has written a gripping

story imbued with all the nuances and traditions of Caribbean culture. Francis Sancher--a handsome outsider, loved by some and reviled by others--is found dead, face down in the mud on a path outside Riviere au Sel, a small village in Guadeloupe. None of the villagers are particularly surprised, since Sancher, a secretive and melancholy man, had often predicted an unnatural death for himself. As the villagers come to pay their respects they each--either in a speech to the mourners, or in an internal monologue--reveal another piece of the mystery behind Sancher's life and death. Like pieces of an elaborate puzzle, their memories interlock to create a rich and intriguing portrait of a man and a community. In the lush and vivid prose for which she has become famous, Conde has constructed a Guadeloupean wake for Francis Sancher.

Retaining the full color and vibrance of Conde's homeland, *Crossing the Mangrove* pays homage to Guadeloupe in both subject and structure.

*Rogue Economics* - Loretta Napoleoni 2011-01-04

What do Eastern Europe's booming sex trade, America's subprime mortgage lending scandal, China's fake goods industry, and celebrity philanthropy in Africa have in common? With biopirates trolling the blood industry, fish-farming bandits ravaging the high seas, pornography developing virtually in Second Life, and games like *World of Warcraft* spawning online sweatshops, how are rogue industries transmuting into global empires? And will the entire system be transformed by the advent of sharia economics? With the precision of an economist and the narrative deftness of a storyteller, syndicated journalist Loretta Napoleoni examines how the

world is being reshaped by dark economic forces, creating victims out of millions of ordinary people whose lives have become trapped inside a fantasy world of consumerism. Napoleoni reveals the architecture of our world, and in doing so provides fresh insight into many of the most insoluble problems of our era.

Overtime - Kyle Lewis

2021-09-14

Overtime is about the politics of time, and specifically the amount of time that we spend labouring within capitalist society. It argues that reactivating the longstanding demand for shorter working hours should be central to any progressive trajectory in the years ahead. This book explains what a shorter working week means, as well as its history and its political implications. Will Stronge and Kyle Lewis examine the idea of reducing the time we all spend labouring for other on both a theoretical and political level, and offer an analysis rooted

in the radical traditions from which the idea first emerged.

Throughout, the reader is introduced to key theorists of work and working time alongside the relevant research regarding our contemporary 'crisis of work', to which the authors' proposal of a shorter working week responds.

the material presented.

**Non sarà un pranzo di gala -**

Emiliano Brancaccio

2020-11-12T00:00:00+01:00

Un innovatore del pensiero critico dibatte con i massimi protagonisti della politica economica italiana e internazionale. A partire da una tesi di fondo: la lotta tra capitali per la conquista dei mercati mondiali conduce alla centralizzazione del potere nelle mani di pochi vincitori e alla consequenziale reazione sovranista degli sconfitti. Una “pura lotta di classe in senso marxiano, ma tutta interna alla classe capitalista”, con il lavoro totalmente zittito. A meno di una svolta.

**La tenaglia magistrati-economisti sui cittadini -** Francesco Felis

2019-04-30

Devono le leggi economiche dominare i rapporti sociali? Nell'ambito di questo dilemma, nella ricerca di un equilibrio, si muove il presente lavoro. Due sono i pilastri su cui esso si fonda: argomenti e temi giuridici da un lato, che, però, hanno anche un impatto economico, e, dall'altro, la pretesa di egemonia del dato economico su ogni altro valore. Pretesa molte volte ammantata di scientificità, che travolge i rapporti reciproci, influenza il caos delle stesse pronunce giudiziali e il caos normativo,

rendendo incerto il destino delle persone. “Per aver paura dei magistrati non bisogna essere necessariamente colpevoli (ma anche con gli economisti non si scherza)” ironizza l’autore, e in questo importante saggio, per contenuti e dimensioni, con garbo e autorevolezza ci spiega chiaramente il perché. Francesco Felis è nato ad Albenga (SV) nel 1957. Vive a Genova dal 1967, dove si è laureato in Giurisprudenza con 110 e lode nel 1982. È notaio dal 1988. Autore di molteplici pubblicazioni, giuridiche e non, è intervenuto a diversi convegni giuridici e politici.

*The Enlightenment* - Dorinda Outram 2005-09-08

Debate over the meaning of 'Enlightenment' began in the eighteenth century and has continued unabated until our own times. This period saw the opening of arguments on the nature of man, truth, on the place

of God, and the international circulation of ideas, people and gold. Did the Enlightenment mean the same for men and women, for rich and poor, for Europeans and non-Europeans? In the second edition of her book, Dorinda Outram addresses these, and other questions about the Enlightenment. She studies it as a global phenomenon, setting the period against broader social changes. This new edition offers a fresh introduction, a new chapter on slavery, and new material on the Enlightenment as a global phenomenon. The bibliography and short biographies have been extended. This accessible synthesis of scholarship will prove invaluable reading to students of eighteenth-century history, philosophy, and the history of ideas.

### **The Foundations of Economic Policy** - Nicola Acocella 1998-10

Recent developments in public economics have largely been in the direction of reaffirming the limits of the market and of establishing new ones. The possible existence of fundamental non-convexities, imperfect and asymmetric information, incentive compatibility, imperfect competition, strategic complementarity, and scale economies led to the conclusion that a large set of market failures exist; such situations also imply

government failure. Acocella, considers this complicated picture and provides a discussion of the different approaches to establishing social 'rankings' of the possible situations and the underlying principles. The arguments for and against different institutions are then analysed at a micro and macroeconomic level. The market and the government are recognised as imperfect, and thus complementary, institutions. Specific policy targets and instruments are considered in the areas of micro and macro-economic policy. Special attention is devoted to questions of policy management in an open economy. Finally, problems of domestic and international policy co-ordination are considered.

*Inequality in Financial Capitalism* - Pasquale Tridico 2017-03-16

Recently, the issue of inequality

has regained attention in the economic and political debate. This is due to both an increase in income inequality, in particular among rich countries, and an increasing interest in this issue by researchers and politicians. In the last three decades, income inequality among rich countries increased. This period also witnessed the growth of "financial capitalism", characterised by the strong dependency of economies on the financial sector, by the globalisation and intensification of international trade and capital mobility, and by the "flexibilisation" of labour markets and the reduction of wage shares. From the 1980s to the present day, this book considers the theoretical aspects of inequality (its foundations, definitions, approaches and origins) and examines empirical evidence of income inequality in a wide range of advanced economies. The key arguments in this

volume are that income inequality increased during this period because labour and welfare became seen as costs to be compressed in "financial capitalism" rather than as a fundamental part of aggregate demand to be expanded.

However, the welfare state is not a drain on economic performance and competitiveness, nor is it a barrier to economic efficiency.

Instead, it is demonstrated that in countries that adopt "welfare capitalism", welfare state expenditure not only contributes to a reduction in inequality but also fosters economic growth.

Inequality in Financial Capitalism is of great importance to those who study economics, political economy, labour economics and globalisation.

Re-Thinking Kinship and Feudalism in Early Medieval Europe - STEPHEN D. WHITE  
2018-09-27

This is the second collection of studies by Stephen D. White to be published by Variorum (the first being *Feuding and Peace-Making in Eleventh-Century France*). The essays in this volume look principally at

France and England from Merovingian and Anglo-Saxon times up to the 12th century. They analyze Latin and Old French discourses that medieval nobles used to construct their relationships with kin, lords, men, and friends, and investigate the political dimensions of such relationships with particular reference to patronage/clientage, the use of land as an item of exchange, and feuding. In so doing, the essays call into question the conventional practice of studying kinship and feudalism as independent systems of legal institutions and propose new strategies for studying them.

### **A Philosophy for Europe -**

Roberto Esposito 2018-06-11

Amid a devastating economic crisis, two tragic events coming from the outside – the wave of immigration and Islamic terrorism – have radically changed the profile and significance of the space we call

Europe. Given a paradigm leap of this sort, philosophical reflection is in a position to exert its creative power more than other types of knowledge. But this can only happen if it is able to go beyond its own lexical boundaries, by turning its gaze outside itself. Here the leading Italian philosopher Roberto Esposito looks at how various strands of German, French, and Italian thought have achieved this outward turn and successfully captured international attention by breaking with the language of early nineteenth-century crisis philosophies. When analyzed from this novel perspective, the great texts of Adorno, Derrida, Foucault, and Deleuze, as well as works by the latest Italian thinkers, are cast in a new light. From the relationship and tension between them, reconstructed here with extraordinary theoretical sensitivity, a form of thought can

arise that is equal to the challenges faced by Europe today. This erudite and wide-ranging analysis of European thought in the light of the crises

facing the continent today will appeal to students and scholars of philosophy, critical theory, and beyond.
