Teacher Involvement in High-Stakes Language Testing - Daniel Xerri 2018-04-27
This book advocates that teachers should play an active role in high-stakes language testing and that more weight should be given to teacher judgement. This is likely to increase the formative potential of high-stakes tests and provide teachers with a sense of ownership. The implication is that the knowledge and skills they develop by being involved in these tests will feed

into their own classroom practices. The book also considers the arguments against teacher involvement, e.g. the contention that teacher involvement might entrench the practice of teaching to the test, or that teachers should not be actively involved in high-stakes language testing because their judgement is insufficiently reliable. Using contributions from a wide range of international educational contexts, the book proposes that a lack of reliability in teacher judgement is best addressed by means of training and not by barring educators from participating in high-stakes language testing. It also argues that their involvement in testing helps teachers to bolster confidence in their own judgement and develop their assessment literacy. Moreover, teacher involvement empowers them to play a role in reforming high-stakes language testing so that it is more equitable and more likely to enhance classroom practices. High-stakes language tests that adopt such an inclusive approach facilitate more effective learning on the part of teachers, which ultimately benefits all their students.

Dynamic Assessment of Students' Academic Writing - Prithvi N. Shrestha 2020-09-11
This book explores the application of an innovative assessment approach known as Dynamic Assessment (DA) to academic writing assessment, as developed within the Vygotskian sociocultural theory of learning. DA blends instruction with assessment by targeting and further developing students' Zone of Proximal Development (ZPD). The book presents the application of DA to assessing academic writing by developing a set of DA procedures for academic writing teachers. It further

demonstrates the application of Hallidayan Systemic Functional Linguistics (SFL), combined with DA, to track undergraduate business management students' academic writing and conceptual development in distance education. This work extends previous DA studies in three key ways: i) it explicitly focuses on the construction of a macrogenre (whole text) as opposed to investigations of decontextualized language fragments, ii) it offers the first in-depth application of the powerful SFL tool to analyse students' academic writing to track their academic writing trajectory in DA research, and iii) it identifies a range of mediational strategies and consequently expands Poehner's (2005) framework of mediation typologies. *Dynamic Assessment of Students' Academic Writing* will be of great value to academic writing researchers and teachers, language assessment researchers and postgraduate students interested in academic writing, alternative assessment and formative feedback in higher education.

Validity - Micheline Chalhoub-Deville 2020

This monograph provides a historical overview of validity, targeting developments in both the UK and the US. It explores theoretical notions of validity as well as pragmatic validation practices and expands the arguments that need to be attended to document quality. The authors examine the need to consider, in addition to the psychometric evidence, which has continued to prevail especially in the US, other critical sources of quality evidence. They call attention to principled design and the evidence accumulated from various departments/groups involved in test design and development. They also promote the concept of impact by design, which places consequences at the top of the evidence chain to guide all testing efforts and quality documentation. They envision validity scholarship to attend to consequences at the individual, aggregate/group, and larger educational/organisational/societal levels.

Concomitant with this attention to consequences are considerations of stakeholders and the tailoring of communication to engage intended groups. Such an approach yields a more convincing validity argument. The monograph ends by calling on professionals in the field to publish case studies, which showcases localised

validity arguments in practice. Local case studies represent critical endeavours to illustrate how evidence and arguments are pulled together to support the quality of a testing programme and all that it entails.

Designing Listening Tests - Rita Green 2017-02-20

This book examines the crucial role that sound file selection plays in assessing listening ability and introduces the reader to the procedure of textmapping, which explores how to exploit a sound file. The book discusses the role of the task identifier, the task instructions and the example, and analyses the strengths and weaknesses of different test methods. Guidelines for developing listening items, and procedures that can be used in peer review and task revision are also provided. A range of sample listening tasks illustrates the benefits of following the test development approach described in the book. *Developing Listening Tests* also provides insights into the advantages that field trials, statistical analyses and standard setting can offer the language test developer in determining how well their tasks work. This practical book will be of interest to researchers, language testers, testing commissions, and teachers engaged in assessing listening performance around the world.

Formulaic Sequences - Norbert Schmitt 2004

Formulaic sequences (FS) are now recognized as an essential element of language use. However, research on FS has generally been limited to a focus on description, or on the place of FS in L1 acquisition. This volume opens new directions in FS research, concentrating on how FS are acquired and processed by the mind, both in the L1 and L2. The ten original studies in the volume illustrate the L2 acquisition of FS, the relationship between L1 and L2 FS, the relationship between corpus recurrence of FS and their psycholinguistic reality, the processes involved in reading FS, and pedagogical issues in teaching FS. The studies use a wide range of methodologies, many of them innovative, and thus the volume serves as a model for future research in the area. The volume begins with three survey chapters offering a background on the characteristics and measurement of FS.

The Way - Fanny S.M. 2021-06-11

Not many would dare to take challenging

decisions in life when life itself is full of uncertainties and confusions. But I had to; may be because of my birth as the eldest daughter to a typical Indian middle class family which was surmounted by a variety of problems and the responsibilities attached therewith. But the Way I tread never deceived me, rather I was led to a glorious place called the Parliament of India about which I have never dreamt of. The Way is the inspiring account of my life which vividly portrays the struggles I had to face to reach this place from a humble beginning. Though circumstances were not in my favour, faith in God and willingness to move on with optimism helped me to achieve success in life. Jesus had been my counselor during the difficult period of life and set my Way because He Himself is the Way. My life is a wakeup call for the readers to move on in life in spite of various unfavorable situations and to assure that all the sorrows and uncertainties will be transformed into joy and peace soon.

Research Methods in Education - Joseph Check
2011-10-27

Research Methods in Education introduces research methods as an integrated set of techniques for investigating questions about the educational world. This lively, innovative text helps students connect technique and substance, appreciate the value of both qualitative and quantitative methodologies, and make ethical research decisions. It weaves actual research "stories" into the presentation of research topics, and it emphasizes validity, authenticity, and practical significance as overarching research goals. The text is divided into three sections: Foundations of Research (five chapters), Research Design and Data Collection (seven chapters), and Analyzing and Reporting Data (three chapters). This tripartite conceptual framework honors traditional quantitative approaches while reflecting the growing popularity of qualitative studies, mixed method designs, and school-based techniques. This approach provides a comprehensive, conceptually unified, and well-written introduction to the exciting but complex field of educational research.

Assessing English on the Global Stage - Cyril J. Weir 2017

This book tells the story of the British Council's

seventy-five year involvement in the field of English language testing. The first section of the book explores the role of the British Council in spreading British influence around the world through the export of British English language examinations and British expertise in language testing. Founded in 1934, the organisation formally entered the world of English language testing with the signing of an agreement with the University of Cambridge Local Examination Syndicate (UCLES) in 1941. This agreement, which was to last until 1993, saw the British Council provide substantial English as a Foreign Language (EFL) expertise and technical and financial assistance to help UCLES develop their suite of English language tests. Perhaps the high points of this phase were the British Council inspired Cambridge Diploma of English Studies introduced in the 1940s and the central role played by the British Council in the conceptualisation and development of the highly innovative English Language Testing Service (ELTS) in the 1970s, the precursor to the present day International English Language Testing System (IELTS). British Council support for the development of indigenous national English language tests around the world over the last thirty years further enhanced the promotion of English and the creation of soft power for Britain. In the early 1990s the focus of the British Council changed from test development to delivery of British examinations through its global network. However, by the early years of the 21st century, the organisation was actively considering a return to test development, a strategy that was realised with the founding of the Assessment Research Group in early 2012. This was followed later that year by the introduction of the Aptis English language testing service; the first major test developed in-house for over thirty years. As well as setting the stage for the re-emergence of professional expertise in language testing within the organisation, these initiatives have resulted in a growing strategic influence for the organisation on assessment in English language education. This influence derives from a commitment to test localisation, the development and provision of flexible, accessible and affordable tests and an efficient delivery, marking and reporting system underpinned by an innovative socio-cognitive

approach to language testing. This final period can be seen as a clear return by the British Council to using language testing as a tool for enhancing soft power for Britain: a return to the original *raison d'être* of the organisation.

Poverty in the Philippines - Asian Development Bank 2009-12-01

Against the backdrop of the global financial crisis and rising food, fuel, and commodity prices, addressing poverty and inequality in the Philippines remains a challenge. The proportion of households living below the official poverty line has declined slowly and unevenly in the past four decades, and poverty reduction has been much slower than in neighboring countries such as the People's Republic of China, Indonesia, Thailand, and Viet Nam. Economic growth has gone through boom and bust cycles, and recent episodes of moderate economic expansion have had limited impact on the poor. Great inequality across income brackets, regions, and sectors, as well as unmanaged population growth, are considered some of the key factors constraining poverty reduction efforts. This publication analyzes the causes of poverty and recommends ways to accelerate poverty reduction and achieve more inclusive growth. It also provides an overview of current government responses, strategies, and achievements in the fight against poverty and identifies and prioritizes future needs and interventions. The analysis is based on current literature and the latest available data, including the 2006 Family Income and Expenditure Survey.

Kon-Tiki - Thor Heyerdahl 2014-11-11

"One of the great adventures of our time." —Life
"Am going to cross Pacific on a wooden raft to support a theory that the South Sea islands were peopled from Peru. Will you come? . . . Reply at once." That is how six brave and inquisitive men came to seek a dangerous path to test a scientific theory. On a primitive raft made of forty-foot balsa logs and named "Kon-Tiki" in honor of a legendary sun king, Thor Heyerdahl and five companions deliberately risked their lives to show that the ancient Peruvians could have made the 4,300-mile voyage to the Polynesian islands on a similar craft. For three months, the bold young men made their way across the Pacific at the complete mercy of the ocean. They encountered storms that threatened to tear their raft apart, whales large enough to sink them in the blink of an eye, and sharks ready to feast on any man unfortunate enough to fall overboard. In the true spirit of adventure, they held on until finally making landfall on a remote Polynesian island, proving Heyerdahl's theory possible after all. On every page of this true chronicle—from the actual building of the raft through all the dangerous and comic adventures on the sea, to the spectacular crash landing and the native islanders' hula dances—each reader will find a wholesome and spellbinding escape from the twenty-first century.

Local Language Testing - Slobodanka Dimova
2020-02-20

Local Language Testing: Design, Implementation, and Development describes the language testing practice that exists in the intermediate space between large-scale standardized testing and classroom assessment, an area that is rarely addressed in the language testing and assessment literature. Covering both theory and practice, the book focuses on the advantages of local tests, fosters and encourages their use, and provides suggested ideas for their development and maintenance. The authors include examples of operational tests with well-proven track records and discuss: the ability of local tests to represent local contexts and values, explicitly and purposefully embed test results within instructional practice, and provide data for program evaluation and research; local testing practices grounded in the theoretical principles of language testing, drawing from experiences with local testing and providing practical examples of local language tests, illustrating how they can be designed to effectively function within and across different institutional contexts; examples of how local language tests and assessments are developed for use within a specific context and how they serve a variety of purposes (e.g., entry-level proficiency testing, placement testing, international teaching assistant testing, writing assessment, and program evaluation). Aimed at language program directors, graduate students, and researchers involved in language program development and evaluation, this is a timely book in that it focuses on the advantages of local tests, fosters and encourages their use, and outlines their development and maintenance. It constitutes essential reading for language program directors, graduate students, and researchers involved in language program development and evaluation.

Measuring L2 Proficiency - Pascale Leclercq
2014-07-01

The creation of the Common European
Framework of Reference for Languages (CEFR)
has given rise to interest and debate among
policy makers, testers, teachers and researchers
alike in the reliability and feasibility of the
assessment of second language (L2) proficiency.
This volume brings together concrete ideas on
identifying and measuring L2 proficiency from
different branches of SLA research
(psycholinguistic, sociolinguistic, corpus-based,
applied linguistics) to contribute to a deeper
understanding of what it means to be proficient
in an L2. The chapters introduce a wide range of
tools that are innovative, reliable, and easy-to-
use for the evaluation of learners' language level
with respect to both productive and receptive
skills and provide a variety of answers to the
question of how to assess L2 proficiency in a
valid, reliable and practical manner. The
collection will therefore inspire language
teachers, teacher trainers and language testing
specialists and help them adapt their assessment
practices when necessary, and will also be a
valuable resource for postgraduate students and
researchers.

The Iliad & The Odyssey - Homer 2013-04-29

The Iliad: Join Achilles at the Gates of Troy as he slays Hector to Avenge the death of Patroclus. Here is a story of love and war, hope and despair, and honor and glory. The recent major motion picture Helen of Troy starring Brad Pitt proves that this epic is as relevant today as it was twenty five hundred years ago when it was first written. So journey back to the Trojan War with Homer and relive the grandest adventure of all times. The Odyssey: Journey with Ulysses as he battles to bring his victorious, but decimated, troops home from the Trojan War, dogged by the wrath of the god Poseidon at every turn. Having been away for twenty years, little does he know what awaits him when he finally makes his way home. These two books are some of the most important books in the literary canon, having influenced virtually every adventure tale ever told. And yet they are still accessible and immediate and now you can have both in one binding.
