**Debates in Geography Education** - Mark Jones  
2013-01-04

Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to

enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject's expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to 'global learning'; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own research and writing.

Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching.

**Exam Literacy** - Jake Hunton 2018-08-13

In Exam Literacy: A guide to doing what works (and not what doesn't) to better prepare students

for exams, Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. 'Read, highlight, reread, repeat if such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, Exam Literacy provides teachers with user-friendly advice on how they can make the content they cover stick, and shares up-to-date, evidence-based information

on: The nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques, such as rereading, highlighting and summarising, may not be as effective as you think. How revision strategies that have been identified as being more effective such as interleaving, elaborative interrogation, self-explanation and retrieval practice can be embedded into day-to-day teaching. How students can be encouraged to make use of these winning strategies when revising independently.
