Psychology - Geoffrey Shoemsmith 2014-03-25

This book provides simple, clear, in-depth explanations of all the topics in the AQA GCSE specification 4180 syllabus but it will prove invaluable to students at many levels on many courses and to the independent reader. It can be used as a stand-alone home study course, as a classroom text, as a reference text or just for pleasure for those who love to think about what makes people tick. Psychology describes up-to-date research as well as some classic psychology studies and even debunks one or two psychology research myths. It leads the reader through all the topics in the syllabus as a teacher would in a classroom setting. Topics are presented as a series of lessons followed by Check Your Understanding sections, which are designed to help you check and retain the information in each lesson. An assessment record provided at the end of the book will help you keep track of your progress. Lessons are interactive with many opportunities to jot down your thoughts and reactions, reflect on how a topic relates to your own experience, discuss with other people and become more involved with the material presented. Students can pinpoint the topics they are studying for GCSE by using the table mapping the GCSE specification against the lessons in this book. For those studying outside formal classrooms there are guidelines about how best to approach your studies. The book assumes that readers have no previous knowledge of psychology and among the topics covered are: - Conformity and Obedience - would you press a button to kill someone just because you are told to do so? Many people would, it seems. - Sex and Gender - do girls and boys, men and women behave so differently? If so, why? - Memory - how does memory work and how accurate is it? - Non-Verbal Communication - do we reveal our true feelings in our body language? - Development of Personality - what exactly is Anti-Social Personality Disorder? - Prejudice and Discrimination - are we bound to discriminate against people who are unlike us? - Learning - how to remove your fear of spiders/snakes/flying/open spaces or anything else using the principles of learning. - Aggression - is aggression born into us? Is it in our hormones? Or do we learn to fight? - Research Methods and the Ethics of Psychology - psychology is based on evidence, not just ideas. But what type of study constitutes good evidence and how should we treat the people in our studies?

MEMORY ENHANCING TECHNIQUES FOR INVESTIGATIVE INTERVIEWING - Ronald P. Fisher 1992-01-01

Despite the obvious importance of eyewitness information in criminal investigation, police receive surprisingly little instruction on how to conduct an effective interview with a cooperative eyewitness. More than half of police departments have no formal training whatsoever for newly appointed investigators. Most texts in police science either completely omit the issue of effective interviewing techniques or provide only superficial coverage. This manual provides guiding principles to effective interviewing, with specific techniques to be used and others to be avoided. There are principles of memory retrieval so that the reader will understand why to employ specific techniques -- for example, when to use open-ended versus direct short-answer questions, effective use of pauses, asking follow-up questions, cues to name and number recall, etc. There is the strategy of interview sequential structure -- that is, what to probe for at the beginning, middle, and end of the interview. Also included are practical exercises and real-world experiences. The book will also be helpful for attorneys in conducting investigative interviews.

AQA Psychology for A Level Year 2 - Student Book - Cara Flanagan 2016

New 2015 A-level Psychology - Katherine Faudemer 2015

Ethical Issues in Psychology - Philip Banyard 2013-03-01

How do we know right from wrong, good from bad, help from hindrance, and how can we judge the behaviour of others? Ethics are the rules and guidelines that we use to make such judgements. Often there are no clear answers, which make this subject both interesting and potentially frustrating. In this book, the authors offer readers the opportunity to develop and express their own opinions in relation to ethics in psychology. There are many psychological studies that appear to have been harmful or cruel to the people or animals that took part in them. For example, memory researchers carried out studies on a man who had no memory for over forty years, but because he had no memory he was never able to agree to the studies. Is this a reasonable thing to do to someone? Comparative psychologist Harry Harlow found that he could create severe and lasting distress in monkeys by keeping them in social isolation. Is this a reasonable thing to do even if we find out useful things about human distress? If you were able to use psychological techniques to break someone down so that they revealed information that was useful to your government, would you do it? If so, why? If not, why not? These ethical issues are not easy to resolve and the debates continue as we encounter new dilemmas. This book uses examples from psychological research to look at: key ethical issues ethical guidelines of psychologists socially sensitive research ethics in applied psychology the use of animals in research This book is essential reading for undergraduate and pre-undergraduate students of psychology and related subjects such as philosophy and social policy.

Things Fall Apart - Chinua Achebe 2009-06-05

THINGS FALL APART tells two overlapping, intertwining stories, both of which center around Okonkwo, a "strong man" of an Ibo village in Nigeria. The first of these stories traces Okonkwo's fall from grace with the tribal world in which he lives, and in its classical purity of line and economical beauty it provides us with a powerful fable about the immemorial conflict between the individual and society. The second story, which is as modern as the first is ancient, and which elevates the book to a tragic plane, concerns the clash of cultures and the destruction of Okonkwo's world through the arrival of aggressive, proselytizing European missionaries. These twin dramas are perfectly harmonized, and they are modulated by an awareness capable of encompassing at once the life of nature, human history, and the mysterious compulsions of the soul. THINGS FALL APART is the most illuminating and permanent monument we have to the modern African experience as seen from within.
