As recognized, adventure as with ease as experience more or less lesson, amusement, as well as arrangement can be gotten by just checking out a book **Aquaculture Law And Policy Towards Principled Access And Operations Routledge Advances In Maritime Research** as well as it is not directly done, you could recognize even more on the order of this life, approximately the world.

We allow you this proper as skillfully as simple showing off to acquire those all. We provide Aquaculture Law And Policy Towards Principled Access And Operations Routledge Advances In Maritime Research and numerous ebook collections from fictions to scientific research in any way. among them is this Aquaculture Law And Policy Towards Principled Access And Operations Routledge Advances In Maritime Research that can be your partner.

Seafarm - Elisabeth Mann Borgese 1980  
Discusses the importance of the food and energy resources available in the sea and surveys aquaculture techniques currently used in various parts of the world.

**Global Commodity Governance** - F. Gale 2011-02-01

The Forest and the Marine Stewardship Councils constitute new global governance institutions using voluntary certification and labelling as market incentives to encourage sustainable management. Utilizing a comparative political economic framework, the authors analyse shifting British, Canadian and Australian responses to the stewardship councils.

**General Reports of the XVIIIth Congress of the International Academy of Comparative Law/Rapports Généraux du XVIIIème Congrès de l'Académie Internationale de Droit Comparé** -

Karen B. Brown 2011-12-29  
This title presents twenty-nine topics, prepared by leading scholars in more than 20 countries, providing a comparative analysis of cutting-

edge legal topics of the 21st century. Considering topics of vital moment to contemporary legal scholars, the title includes pieces on Surrogate Motherhood, The Balance of Copyright in Comparative Perspective, International Law in Domestic Systems, Constitutional Courts as "Positive Legislators," Same-sex Marriage, Climate Change and the Law, The Regulation of Private Equity, Hedge Funds, and State Funds, and Regulation of Corporate Tax Evasion. Each chapter surveys legal developments in the U.S. and Canada, Europe, Asia, Latin and South America, Africa, and the Middle East in a format that permits the reader easy access to similarities and differences in the approaches of the selected national regimes. This comprehensive volume tells the story of parallel trends in the evolution of legal doctrine despite jurisdictional, cultural, and political barriers. While each of the covered countries stands alone as a sovereign, in a technologically advanced world their disparate

systems nonetheless have converged to adopt comparable strategies in dealing with complex legal issues. The volume is a critical addition to the library of any scholar hoping to keep abreast of the major trends in contemporary law.

*Farming the Waters for People and Food* - Rohana P. Subasinghe 2012  
The Global Conference on Aquaculture 2010 brought together a wide range of experts and important stakeholders and reviewed the present status and trends in aquaculture development, evaluated the progress made in the implementation of the 2000 Bangkok Declaration and Strategy, addressed emerging issues relevant to aquaculture development, assessed opportunities and challenges for future aquaculture development and built consensus on advancing aquaculture as a global, sustainable and competitive food production sector. This volume, yet another joint effort of FAO and NACA, brings the outcome of the Global Conference on Aquaculture 2010, the much-needed clear and comprehensive technical information on how aquaculture could be mobilized to alleviate global poverty and improve food and nutrition security in the coming decades.

**Solving Complex Ocean Challenges Through Interdisciplinary Research: Advances from Early Career Marine Scientists** - Stephanie Brodie  
2022-06-01

The Topic Editors Stephanie Brodie, Christopher Cvitanovic, Maria Grazia Pennino, Jon Lopez and André Fraïner declare that they are members of the IMBeR (Integrated Marine Biosphere Research) network and IMECaN (Interdisciplinary Marine Early Career Network) and are collaborating with the IMBeR research community.

Fish for Life - J. Kooiman 2005  
An interdisciplinary survey addressing the problems of

overfishing worldwide, and the best way forward toward good ecological practice and global cooperative governance.

Current Publications in Legal and Related Fields - 2007

*The Law of the Sea* - 2008-04-08  
Compiled by the United Nations Office of Legal Affairs, this bibliography covers 21 subject categories based on the major topics of the United Nations Convention of the Law of the Sea. It is intended for the use of those interested in ocean affairs and the law of the sea matters in general and in the UN Conventional on the Law in the Sea in particular.

*Aquaculture Law and Policy* - Nigel Bankes 2016-09-28

With aquaculture operations fast expanding around the world, the adequacy of aquaculture-related laws and policies has become a hot topic. This much-needed book provides a three-part guide to the complex regulatory landscape. The expert contributors first review the international legal dimensions, including chapters on law of the sea, trade, and access and benefit sharing. Part Two offers regional perspectives, discussing the EU and regional fisheries management organizations. The final part contains eleven case studies exploring how leading aquaculture producing countries have been putting sustainability principles into practice.

*Principles of Aquaculture* - Robert R. Stickney 1994-03-31

Based on the author's previous work, *Principles of Warmwater Aquaculture*, this text updates and expands upon the basic principles of aquaculture. Encompasses a wider diversity of aquatic animals including coldwater fishes. Focuses on the practical aspects of water quality, feeding and nutrition, reproduction, breeding,

diseases and operations. Deals with the environmental, social and economic aspects of aquaculture. Many of the examples feature species of both sport and commercial interest. The State of World Fisheries and Aquaculture 2020 - FAO 2020-06-01

The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the "custodian" agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide

audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

Recasting Transboundary Fisheries Management Arrangements in Light of Sustainability Principles - Dawn A. Russell 2010-10-25

This volume reviews and critiques efforts to recast governance of marine fisheries on the basis of sustainability principles (e.g., precautionary and ecosystem approaches), with a focus on Canada's transboundary fisheries management arrangements, and surveys international laws and policy developments governing transboundary fisheries.

Cage Aquaculture - Malcolm Beveridge 2004-11-12

Since the first edition of this book, 17 years ago, aquaculture has consolidated its position as an important means of producing food and as a contributor to global food security. Cage aquaculture too has continued to expand apace. The third edition of this important, useful and well-received book maintains the original aim of providing a thorough synthesis of information on cages and cage aquaculture practices with data and examples encompassing all major world regions. Fully updated, the book's comprehensive contents include details of the origin and principles of cage aquaculture and an overview of its current position. Contents of the chapters following include key information on cage design and construction, site selection, environmental impacts and environmental capacity, management, and potential problems in cage aquaculture systems. A comprehensive reference list and index are included to help readers. The volume is essential reading for all personnel involved in fish and shellfish farms that use cages, and for all those

embarking on a career in aquaculture. Cage manufacturers and others supplying the aquaculture trade will find much of commercial use within the book. All those involved in aquaculture research and equipment design should have a copy of this most useful book. All libraries in universities and research establishments where aquaculture, environmental science, aquatic science, fish biology and fisheries are studied and taught should have several copies on their shelves.

*The Future of Ocean Governance and Capacity Development* - Dirk Werle 2018

The International Ocean Institute - Canada has compiled more than 80 insightful essays on the future of ocean governance and capacity development, based largely on themes of its Training Program at Dalhousie University in Canada, to honor the work of Elisabeth Mann Borgese (1918-2002).

The Duty to Consult - Dwight G. Newman 2009-10-25

"[W]hen precisely does a duty to consult arise? The foundation of the duty in the Crown's honour and the goal of reconciliation suggest that the duty arises when the Crown has knowledge, real or constructive, of the potential existence of the Aboriginal right or title and contemplates conduct that might adversely affect it." Chief Justice Beverley McLachlin, Supreme Court of Canada, *Haida Nation v. British Columbia*, 2004. Canada's Supreme Court has established a new legal framework requiring governments to consult with Aboriginal peoples when contemplating actions that may affect their rights. The nature of the duty is to be defined by negotiation, best practices, and future court decisions. According to Professor Newman, good consultations are about developing relationships and finding

ways of living together in the encounter that history has thrust upon us. Professor Newman examines Supreme Court and lower court decisions, legislation at various levels, policies developed by governments and Aboriginal communities, and consultative round tables that have been held to deal with important questions regarding this duty. He succinctly examines issues such as: when is consultation required; who is to be consulted; what is the nature of a "good" consultation; can consultation be carried out by quasi-judicial agencies and third parties; to what extent does the duty apply in treaty areas; and what duty is owed to Métis and non-status Indians? Professor Newman also examines the evolving duty to consult in international law, similar developments in Australia, and the philosophical underpinnings of the duty.

**Green Criminology and the Law** - James Gacek 2022-01-01

This edited collection is grounded in a green criminological approach to understand whether the law, both in effect and implications, reflects, refracts, or sublimates the social, political and ecological conditions of our times. Since its initial proposal in the 1990s, green criminology has focused the criminological gaze on a wide array of harms and crimes affecting humans, animals other than humans, ecological systems, and the planet as a whole. As a continuously blossoming field of criminological inquiry, green criminology recognizes and examines behaviours that are both illegal and legal (yet detrimental), and in varying ways has made great efforts to provide insight into harms in a more fulsome manner. At the same time, there have been many significant legal instances, domestic, and international,

including case law, legislation, regulation, treaties, agreements and executive directives which have troubled the law's understanding of green harms, illegal and legal activity, pushing legal boundaries in the process. Recognizing that humanity and nature are inextricably integrated, Green Criminology and the Law reflects the range and depth of high-quality research and scholarship, combining contributions from established scholars willing to explore new topics and recent entrants who are breaking new scholarly ground.

**What is the Code of Conduct for Responsible Fisheries?** - Food and Agriculture Organization of the United Nations 2001

The actual Code of conduct is also available (1996) (ISBN 9251038341). UNB Law Journal - 2006

*Entrepreneurship in Small Island States and Territories* - Godfrey Baldacchino 2015-05-15

Entrepreneurship in Small Island States and Territories is the first publication to consider the 'creative' side of enterprise in small island states and territories. Rather than playing out as remote, vulnerable and dependent backwaters of neo-colonialism, the world's small island states and territories (with resident populations of less than 1 million) show considerable resourcefulness in facing up to the very real challenges of their predicament. The creative endeavours of their residents, facilitated by adroit public policy, has created economic and investment opportunities that translate into some private sector employment and decent livelihoods for many. Their ingenuity, coupled with strategic investments and the support of the diaspora, has led to a suite of (sometimes unlikely) products and

services: from citizenship and higher-level internet domain names, to place-branded foods and beverages; from electronic gaming to niche manufacturing. There is much more to small island survival than subsistence farming, aid, remittances and public sector workfare.

Entrepreneurship in Small Island States and Territories helps to dispel this myth, showcasing an aspect of life in small island states and territories that is rarely documented or critically reviewed.

**Aquaculture Development** - 2001

*The Small-Scale Fisheries Guidelines* - Svein Jentoft 2017-06-10

In June 2014, FAO member-states endorsed the Voluntary Guidelines for Securing Sustainable Small-Scale Fisheries (SSF Guidelines). These Guidelines are one of the most significant landmarks for small-scale fisheries around the world. They are comprehensive in terms of topics covered, and progressive, with their foundations based on human rights and other key principles. It can be anticipated that implementing the SSF Guidelines, whether at local, national, or regional levels, will be challenging. This book contains in-depth case studies where authors discuss the extent to which the Guidelines can help improve the realities of small-scale fishing men and women globally and make their livelihoods and communities more secure. This will require policy intervention and innovation, along with contributions of civil society organizations and academia. However, most of all it will necessitate the empowerment of fishing people so that they can become active participants in decision making on matters where their well-being and human rights are at stake. By endorsing the SSF Guidelines, states have committed themselves to support and facilitate

this development. This book asks whether states can successfully “walk the talk,” and provides advice as to how they can do so. The collection of case studies sets the platform for an interactive dialogue space for researchers, policy makers, civil society and small-scale fishing communities to start the conversation about the monitoring and evaluation of the implementation of the SSF Guidelines at local, national, regional and global levels. An added value is that it helps add focus to our work as civil society activists involved in ensuring the application of the SSF Guidelines. Naseegh Jaffer – General Secretary, World Forum of Fisher People (WFFP) This collection offers many ways in which institutions enabling small-scale fisheries can protect and promote sustainability, food security, customary tenure, self-management, and market access, while fostering such benefits as ecosystem-based management, protected areas, incorporation of local knowledge, and poverty alleviation. You will want to put this book in the hands of policy-makers and practitioners immediately -- and for years to come. Evelyn Pinkerton – Professor, Simon Fraser University, Canada

**The Blue Economy in Sub-Saharan Africa** - DONALD L. SPARKS 2021-06-17  
The blue economy, comprising coastal and marine resources, offers vast benefits for sub-Saharan Africa: of the 53 countries and territories in the region, 32 are coastal states; there are 13 million sq km of maritime zones; more than 90% of the region’s exports and imports come by sea; and the African Union hails the blue economy as the ‘new frontier of African renaissance’. Despite their importance, the region’s coastal and marine resources have been neither fully appreciated nor fully utilized. They are only now being recognized as

being key to Africa’s potential prosperity. As the region grows, it has, in general, not taken adequate safeguards to protect these valuable resources. That is partly because some of the problems (pollution, for example) are regional and know no borders. All too often, short-term gains are made at the expense of the long term (overfishing, for example). This book provides, for the first time, a study of the constraints and opportunities the blue economy offers for sub-Saharan Africa. It includes an introduction and overview; sectoral analyses (including tourism, fisheries, mineral resources, culture, shipping and maritime safety); country case studies; and analyses of regional and international efforts towards better coastal zone and marine management.  
[A Living Countryside?](#) - John McDonagh 2009

By examining a range of experiences from both the north and south of Ireland, this book asks what the ideal of sustainable development might mean to specific rural groups and how sustainable development goals have been pursued across the policy spectrum.

*Aquaculture Law and Policy* - David L. VanderZwaag 2006-10-16

The aquaculture industry is fast expanding around the globe and causing major environmental and social disruptions. The volume is about getting a 'good governance' grip on this important industry. The book highlights the numerous law and policy issues that must be addressed in the search for effective regulation of aquaculture. Those issues include among others: the equitable and fair assignment of property rights; the design of effective dispute resolution mechanisms; clarification of what maritime laws apply to aquaculture; adoption of a proper taxation system

for aquaculture; resolution of aboriginal offshore title and rights claims; recognition of international trade law restrictions such as labeling limitations and food safety requirements; and determination of whether genetically modified fish should be allowed and if so under what controls. This book will appeal to a broad range of audiences: undergraduate and postgraduate students, academic researchers, policy makers, NGOs, practicing lawyers and industry representatives. **Bulletin** - 2002

Environmental Law in Canada - Jamie Benidickson 2020-01-14

Derived from the renowned multi-volume International Encyclopaedia of Laws, this book provides ready access to legislation and practice concerning the environment in Canada. A general introduction covers geographic considerations, political, social and cultural aspects of environmental study, the sources and principles of environmental law, environmental legislation, and the role of public authorities. The main body of the book deals first with laws aimed directly at protecting the environment from pollution in specific areas such as air, water, waste, soil, noise, and radiation. Then, a section on nature and conservation management covers protection of natural and cultural resources such as monuments, landscapes, parks and reserves, wildlife, agriculture, forests, fish, subsoil, and minerals. Further treatment includes the application of zoning and land-use planning, rules on liability, and administrative and judicial remedies to environmental issues. There is also an analysis of the impact of international and regional legislation and treaties on environmental regulation. Its succinct yet scholarly nature, as

well as the practical quality of the information it provides, make this book a valuable resource for environmental lawyers handling cases affecting Canada. Academics and researchers, as well as business investors and the various international organizations in the field, will welcome this very useful guide, and will appreciate its value in the study of comparative environmental law and policy.

**Routledge Handbook of National and Regional Ocean Policies** - Biliana Cicin-Sain 2015-05-15

This comprehensive handbook, prepared by leading ocean policy academics and practitioners from around the world, presents in-depth analyses of the experiences of fifteen developed and developing nations and four key regions of the world that have taken concrete steps toward cross-cutting and integrated national and regional ocean policy. All chapters follow a common framework for policy analysis. While most coastal nations of the world already have a variety of sectoral policies in place to manage different uses of the ocean (such as shipping, fishing, oil and gas development), in the last two decades, the coastal nations covered in the book have undertaken concerted efforts to articulate and implement an integrated, ecosystem-based vision for the governance of ocean areas under their jurisdiction. This includes goals and procedures to harmonize existing uses and laws, to foster sustainable development of ocean areas, to protect biodiversity and vulnerable resources and ecosystems, and to coordinate the actions of the many government agencies that are typically involved in oceans affairs. The book highlights the serious conflicts of use in most national ocean zones and the varying attempts by nations to follow the prescriptions emanating

from the 1982 UN Law of the Sea Convention and the outcomes of the 1992, 2002, and 2012 sustainable development summits. The interrelationship among uses and processes in the coast and ocean requires that ocean governance be integrated, precautionary, and anticipatory. Overall, the book provides a definitive state-of-the-art review and analysis of national and regional ocean policies around the world.

Building an Ecosystem Approach to Aquaculture - Doris Soto 2008

520 Aquaculture growth worldwide involves the expansion of cultivated areas, a higher density of aquaculture installations and farmed individuals, and greater use of feed resources produced outside the immediate culture area. To ensure that such development of the sector does not carry negative impacts on the environment and on parts of society due to weak regulation or poor management, an ecosystem approach for aquaculture (EAA) is encouraged. These proceedings consider aspects relevant for an ecosystem-based management in aquaculture. The document also includes two comprehensive reviews covering the status of brackish, marine and freshwater aquaculture within an ecosystem approach perspective.--Publisher's description.

**Canada, the State of the Federation 2003** - Michael Murphy 2005

An examination of federal reform and Aboriginal-state relations.

**The Future of U.S. Ocean Policy** - Biliana Cicin-Sain 2000-01-02

The United States is about to embark on the most thorough reconsideration of its ocean policy in more than three decades. With 1998 designated as the International Year of the Ocean by the United Nations, and with both the executive branch and the

Congress currently working toward developing new approaches to formulating and implementing ocean policy, a comprehensive overview of key issues and concerns is essential. The Future of U.S. Ocean Policy provides such an overview, with an in-depth analysis of the evolution of U.S. ocean policy and a timely discussion of the most important ocean and coastal issues facing the nation. The book assesses the current status of ocean policy, examines national and international trends, and considers choices for policymakers in the 21st century. Following an introductory chapter that reviews national ocean policy and the process by which it is made, the authors: review the history of development of U.S. ocean and coastal policy examine the major ocean laws enacted in the 1970s and review and assess their record of implementation examine factors that will affect U.S. ocean policy in the coming decade discuss the need to make policy more coherent, and to develop institutional mechanisms that can foster more effective guidance and oversight present a set of policy options for improving U.S. ocean policy The Future of U.S. Ocean Policy is the only recent book that focuses on national ocean policy in its entirety, and will play an important role in upcoming debates concerning the future direction of policy initiatives. Agency personnel, members and staff of nongovernmental organizations, industry groups, Congressional staffers, state and local government officials, academics, and concerned citizens will find the book an invaluable guide, as will students and faculty in courses in marine and coastal management and in environmental management.

**The British National Bibliography** - Arthur James Wells 2006

Aquaculture Engineering - Odd-Ivar Lekang 2013-01-15

As aquaculture continues to grow at a rapid pace, understanding the engineering behind aquatic production facilities is of increasing importance for all those working in the industry. Aquaculture engineering requires knowledge of the many general aspects of engineering such as material technology, building design and construction, mechanical engineering, and environmental engineering. In this comprehensive book now in its second edition, author Odd-Ivar Lekang introduces these principles and demonstrates how such technical knowledge can be applied to aquaculture systems. Review of the first edition: 'Fish farmers and other personnel involved in the aquaculture industry, suppliers to the fish farming business and designers and manufacturers will find this book an invaluable resource. The book will be an important addition to the shelves of all libraries in universities and research institutions where aquaculture, agriculture and environmental sciences are studied and taught.' Aquaculture Europe 'A useful book that, hopefully, will inspire successors that focus more on warm water aquaculture and on large-scale mariculture such as tuna farming.' Cision

**Organic Aquaculture** - Giuseppe Lembo 2019-03-28

This book addresses, reviews and evaluates key themes in organic aquaculture and is set out to show how these relate to the challenges and bottlenecks for a responsible organic aquaculture production in Europe. The key themes reflect the main challenges facing the organic aquaculture industry: guarantee and certification system, nutrition, reproduction, production system

design and animal welfare. In addition, it assesses the impact of new and future potential development of new knowledge to update and modify the criteria and standards for organic aquaculture. Organic aquaculture is an alternative production approach driven by the growing interest in sustainable utilization of resources. It is rightly viewed as an important contributor to the economy and to the well-being and health of communities. This work will contribute to the scientific knowledge that needs to strengthen effective organic aquaculture. The collation of information on research and data will be of applied value to researchers, university students, end users and policy authorities in the EU and worldwide.

*The State of World Fisheries and Aquaculture 2018* - Food and Agriculture Organization of the United Nations 2018-07-10

The 2018 edition of *The State of World Fisheries and Aquaculture* emphasizes the sector's role in achieving the 2030 Agenda for Sustainable Development and the Sustainable Development Goals, and measurement of progress towards these goals. It notes the particular contributions of inland and small-scale fisheries, and highlights the importance of rights-based governance for equitable and inclusive development. As in past editions, the publication begins with a global analysis of trends in fisheries and aquaculture production, stocks, processing and use, trade and consumption, based on the latest official statistics, along with a review of the status of the world's fishing fleets and human engagement and governance in the sector. Topics explored in Parts 2 to 4 include aquatic biodiversity; the ecosystem approach to fisheries and to

aquaculture; climate change impacts and responses; the sector's contribution to food security and human nutrition; and issues related to international trade, consumer protection and sustainable value chains. Global developments in combating illegal, unreported and unregulated fishing, selected ocean pollution concerns and FAO's efforts to improve capture fishery data are also discussed. The issue concludes with the outlook for the sector, including projections to 2030. As always, *The State of World Fisheries and Aquaculture* aims to provide objective, reliable and up-to-date information to a wide audience, including policy-makers, managers, scientists, stakeholders and indeed all those interested in the fisheries and aquaculture sector.

*Offshore Petroleum Politics* - Peter Clancy 2011-09-01

The extraction of oil and gas from offshore continental shelves constitutes one of the most dynamic sectors of global petroleum development. It is also one of the most complex. Atlantic Canada is no exception, and the history of Scotian Basin petroleum over the past half century reveals a fascinating series of political challenges, accommodations, and settlements. Peter Clancy's comprehensive analysis of petroleum politics in Nova Scotia demonstrates the complex intergovernmental and intercorporate relationships, ecological concerns, and Aboriginal interests that have complicated offshore development. His incisive analysis of the complex politics at play provides new insights into the unique challenges facing the petroleum industry in Atlantic Canada.

*Ocean and Coastal Law and Policy* - Donald C. Baur 2008

*Ocean and Coastal Law and Policy* addresses the reasons for this

decline and explains the laws protecting the marine environment in a clear and concise manner. The authors have real-world experience with their topics, and discuss how the law works in practice rather than merely in theory. This is an excellent resource for the practitioner, government official, or scholar in their efforts to transition to an ecosystem-based management approach.

Canadian Who's Who 2007 - Elizabeth Lumley 2007

Now in its ninety-seventh year of publication, this standard Canadian reference source contains the most comprehensive and authoritative biographical information on notable living Canadians. Those listed are carefully selected because of the positions they hold in Canadian society; or because of the contribution they have made to life in Canada. The volume is updated annually to ensure accuracy, and 600 new entries are added each year to keep current with developing trends and issues in Canadian society. Included are outstanding Canadians from all walks of life: politics, media, academia, business, sports, and the arts, from every area of human activity. Each entry details birth date and place, education, family, career history, memberships, creative works, honours and awards, and full addresses. Indispensable to researchers, students, media, business, government, and schools, Canadian Who's Who is an invaluable source of general knowledge.

**Governing Sustainable Seafood** - Simon R. Bush 2019-01-08

Taking a social science approach, this book explores the governance of sustainable seafood, which is

fundamental to food and nutrition security as well as being an important source of income and employment in many regions. Due to the importance of protein and other fishery and aquaculture by-products, many wild fisheries are coming under pressure, and this increasing demand has created a strong driver to expand aquaculture. As a result, the social and environmental sustainability of these production systems have come into question. The authors of the book explore the governance of sustainable seafood, taking into account the rise of social movements through environmental non-governmental organisations, the nature and perceived limits of government regulation within and beyond the state, and the promise of market-based approaches to governance such as ecolabelling. The book focuses on how concern over sustainable seafood has been translated into different current forms of governance. It then assesses what alternative governance approaches are starting to emerge that combine movements, states and markets for sustainable seafood production and consumption, and their effects. The book concludes with a vision for the future through key principles for evaluating the collective impact of governing sustainable seafood. This timely volume will be key reading for researchers interested in fisheries and aquaculture governance, as well as coastal and marine policies and sustainable food movements more broadly. It will also be of interest to practitioners and policymakers engaged in creating fishery policies and sustainable fishery development. *American Book Publishing Record* - 2005
