Factors contributing to academic performance of students in a Junior High School - Anthony Abaidoo 2018-11-22

Bachelor Thesis from the year 2018 in the subject Pedagogy - School System, Educational and School Politics, grade:

5 (GHA-System), University of Education (Distance Learning), course: Post Graduate Diploma in Education, language: English, abstract: Students' academic performance is a key feature in education. This study was therefore conducted primarily to assess the factors contributing to improvement in academic performance of Junior High Students (JHS) in a Basic School which is in the Gomo-East District in the Central Region of Ghana. The mixed and descriptive research design was used and a sample size of 87 respondents (79 students and 8 teachers) were selected through random sampling technique. The findings revealed that the average academic performance (47.0%) of the JHS students in the Basic School is weak and their performance in Mathematics (average

score of 31.48%) and English Language (average score of 39.99%) is a fail. It was noticed that student factors that contribute to an improvement in academic performance include; regular studying, self-motivation, punctuality and regular class attendance, hard-work and interest in a subject. The teacher factors were completion of syllabus, use of TLM's, frequent feedback to students and given students special attention. Per the findings, parent factors which was very key was parent showing concern in their children's academics and providing them their academic needs. School factors that were significant included availability of text books and TLM's. The study also found that parent level of education and gender has

a positive relationship with academic performance but it's insignificant. However, age has a positive significant (5% significance level) relationship with academic performance. Based on findings, the study recommends that there should be strict monitoring on teachers to vary their teaching methods to suit their needs of the students and also to provide the students with constant feedback on their academic performance. Again, the students should be motivated and orientated to take ownership of their studies by having regular studies and attending school during school days.

Kautilya's Arthashastra - Kau?alya 2009-01-01
Kautilya, also known as Chanakya, is India's most illustrious political economist of all time. He regarded economic activity as the driving force behind the functioning of any political dispensation. In fact, he went to the extent of saying that revenue should take priority over the army because sustaining the army was possible out of a well-managed revenue system. Kautilya advocated limiting the taxation power of the State, having low rates of taxation, maintaining a gradual increase in taxation and most importantly devising a tax structure that

ensured compliance. He strongly encouraged foreign trade, basing it on the premise that for a successful trade contract to be established, it had to be beneficial to all. He emphasised State control and investment in land, water and mining.

Kautilya was a true statesman who bridged the gap between experience and vision. For Kautilya, good governance was paramount. He suggested built-in checks and balances in systems and procedures for the containment of malpractices. Many postulates of Kautilya's philosophy of political economy are applicable to contemporary times.

**How the Economy Works -
Roger E. A. Farmer
2010-04-08**

"Of all the economic bubbles that have been pricked," the editors of The Economist recently observed, "few have burst more spectacularly than the reputation of economics itself."

Indeed, the financial crisis that crested in 2008 destroyed the credibility of the economic thinking that had guided policymakers for a generation. But what will take its place? In How the Economy Works, one of our leading economists provides a jargon-free exploration of the current crisis, offering a powerful argument for how economics must change to get us out of it. Roger E. A. Farmer traces the swings between classical and Keynesian economics since the early twentieth century,

gracefully explaining the elements of both theories. During the Great Depression, Keynes challenged the longstanding idea that an economy was a self-correcting mechanism; but his school gave way to a resurgence of classical economics in the 1970s—a rise that ended with the current crisis. Rather than simply allowing the pendulum to swing back, Farmer writes, we must synthesize the two. From classical economics, he takes the idea that a sound theory must explain how individuals behave—how our collective choices shape the economy. From Keynesian economics, he adopts the principle that markets do not always work well, that capitalism needs some guidance. The goal, he writes, is to correct the excesses of a free-market economy without

stifling entrepreneurship and instituting central planning. Recent events have shown that we cannot afford to treat economics as an ivory-tower abstraction. It has a direct impact on our lives by guiding regulators and policymakers as they make decisions with far-reaching practical consequences. Written in clear, accessible language, *How the Economy Works* makes an argument that no one should ignore.

Complete Writings -
Isotta Nogarola
2007-11-01

Renowned in her day for her scholarship and eloquence, Isotta Nogarola (1418-66) remained one of the most famous women of the Italian Renaissance for centuries after her death. And because she was one of the first women to carve out a place for herself in the

male-dominated republic of letters, Nogarola served as a crucial role model for generations of aspiring female artists and writers. This volume presents English translations of all of Nogarola's extant works and highlights just how daring and original her convictions were. In her letters and orations, Nogarola elegantly synthesized Greco-Roman thought with biblical teachings. And striding across the stage in public, she lectured the Veronese citizenry on everything from history and religion to politics and morality. But the most influential of Nogarola's works was a performance piece, *Dialogue on Adam and Eve*, in which she discussed the relative sinfulness of Adam and Eve—thereby opening up a centuries-long debate in Europe on gender and the nature of woman and

establishing herself as an important figure in Western intellectual history. This book will be a must read for teachers and students of Women's Studies as well as of Renaissance literature and history. *Explorations in the Functions of Language* - M. A. K. Halliday 1973

A Theory of Human Motivation - A. H.

Maslow 2013-12-06

The present paper is an attempt to formulate a positive theory of motivation which will satisfy these theoretical demands and at the same time conform to the known facts, clinical and observational as well as experimental. It derives most directly, however, from clinical experience. This theory is, I think, in the functionalist tradition of James and Dewey, and is fused with the holism of Wertheimer,

Goldstein, and Gestalt Psychology, and with the dynamicism of Freud and Adler. This fusion or synthesis may arbitrarily be called a 'general-dynamic' theory. It is far easier to perceive and to criticize the aspects in motivation theory than to remedy them. Mostly this is because of the very serious lack of sound data in this area. I conceive this lack of sound facts to be due primarily to the absence of a valid theory of motivation. The present theory then must be considered to be a suggested program or framework for future research and must stand or fall, not so much on facts available or evidence presented, as upon researches to be done, researches suggested perhaps, by the questions raised in this paper.

The Book of Hope - Jane Goodall 2021-10-19

****THE INSTANT NEW YORK TIMES BESTSELLER**** In a world that seems so troubled, how do we hold on to hope? Looking at the headlines—the worsening climate crisis, a global pandemic, loss of biodiversity, political upheaval—it can be hard to feel optimistic. And yet hope has never been more desperately needed. In this urgent book, Jane Goodall, the world's most famous living naturalist, and Douglas Abrams, the internationally bestselling co-author of

The Book of Joy, explore through intimate and thought-provoking dialogue one of the most sought after and least understood elements of human nature: hope. In The Book of Hope, Jane focuses on her "Four Reasons for Hope": The Amazing Human Intellect, The Resilience of Nature, The Power of Young People, and The Indomitable Human Spirit. Drawing on decades of work that has helped expand our understanding of what it means to be human and what we all need to do to help build a better world, The Book of Hope touches on vital questions, including: How do we stay hopeful when everything seems hopeless? How do we cultivate hope in our children? What is the relationship between hope and action? Filled with moving and inspirational stories

and photographs from Jane's remarkable career, The Book of Hope is a deeply personal conversation with one of the most beloved figures in the world today. While discussing the experiences that shaped her discoveries and beliefs, Jane tells the story of how she became a messenger of hope, from living through World War II to her years in Gombe to realizing she had to leave the forest to travel the world in her role as an advocate for environmental justice. And for the first time, she shares her profound revelations about her next, and perhaps final, adventure. The second book in the Global Icons Series—which launched with the instant classic The Book of Joy with His Holiness the Dalai Lama and Archbishop Desmond Tutu—The Book of Hope is a rare and intimate look

not only at the nature of hope but also into the heart and mind of a woman who revolutionized how we view the world around us and has spent a lifetime fighting for our future. There is still hope, and this book will help guide us to it.

The Social Cancer - Jose Rizal 2009-06-01
Filipino national hero

Jose Rizal wrote *The Social Cancer* in Berlin in 1887. Upon his return to his country, he was summoned to the palace by the Governor General because of the subversive ideas his book had inspired in the nation. Rizal wrote of his consequent persecution by the church: "My book made a lot of noise; everywhere, I am asked

about it. They wanted to anathematize me ['to excommunicate me'] because of it ... I am considered a German spy, an agent of Bismarck, they say I am a Protestant, a freemason, a sorcerer, a damned soul and evil. It is whispered that I want to draw plans, that I have a foreign passport and that I wander through the streets by night ..."
