

# Architecture Sri Lanka Institute Of Information Technology

Recognizing the pretentiousness ways to get this book **Architecture Sri Lanka Institute Of Information Technology** is additionally useful. You have remained in right site to begin getting this info. acquire the Architecture Sri Lanka Institute Of Information Technology belong to that we have the funds for here and check out the link.

You could purchase guide Architecture Sri Lanka Institute Of Information Technology or acquire it as soon as feasible. You could speedily download this Architecture Sri Lanka Institute Of Information Technology after getting deal. So, following you require the book swiftly, you can straight acquire it. Its as a result definitely easy and in view of that fats, isnt it? You have to favor to in this spread

## **Innovative Strategies in Technical and Vocational Education and Training for Accelerated Human Resource Development in South Asia: Sri Lanka** - Asian Development Bank 2015-11-01

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

## **The Wiley Handbook of Sustainability in Higher Education Learning and Teaching** - Kelum A. A. Gamage 2022-03-30

A comprehensive resource for higher education professionals interested in sustainability pedagogy In The Wiley Handbook of Sustainability in Higher Education Learning and Teaching, a team of distinguished researchers delivers an insightful reference for higher education professionals seeking to embed sustainability in learning and teaching. The book offers a way for higher education institutions to implement sustainability goals in their curricula and provides comprehensive guidance to educators, researchers and practitioners. The authors discuss recent developments in technological innovations, best practices, lessons learned, current challenges, and reflections in the area of sustainability teaching in higher education. They also examine the impact of the COVID-19 pandemic on sustainability education. With contributors from a variety of disciplines, including engineering, medicine, urban design, business, environmental science, and social science, the book considers the embedding of sustainability in regenerative learning ecologies, living laboratories, and transgressive forms of learning. It also includes: A thorough introduction to activist learning for sustainability and outcome-based education towards achieving sustainable goals in higher education Comprehensive explorations of factors that hinder the implementation of

sustainability initiatives in higher education institutions Practical discussions of developing stakeholder agency in higher education sustainability initiatives In-depth examinations of global trends and country-specific initiatives in sustainability teaching Perfect for education developers seeking to incorporate sustainability, The Wiley Handbook of Sustainability in Higher Education Learning and Teaching is also ideal for academics, researchers, policymakers, and accreditation personnel working in the area of sustainability. *Proceedings of First International Conference on Information and Communication Technology for Intelligent Systems: Volume 1* - Suresh Chandra Satapathy 2016-06-30

This volume contains 59 papers presented at ICTIS 2015: International Conference on Information and Communication Technology for Intelligent Systems. The conference was held during 28th and 29th November, 2015, Ahmedabad, India and organized communally by Venus International College of Technology, Association of Computer Machinery, Ahmedabad Chapter and Supported by Computer Society of India Division IV – Communication and Division V – Education and Research. This volume contains papers mainly focused on ICT for Computation, Algorithms and Data Analytics etc.

**High quality design on a low budget** - Dorothea Sommer 2016-03-07

This publication brings together a range of building projects from National, Academic and Public Libraries from different countries of the world showing how these libraries are able to continue to provide high quality library space that is affordable in times of difficult economic circumstances. We will hear about the building processes, co-operation with architects and engineers and how librarians and users have reacted to these new buildings.

**Revolutionary Applications of Blockchain-Enabled Privacy and Access Control** - Singh, Surjit 2021-04-16

The security of an organizational information system with the invention of next-generation technologies is a prime focus these

days. The industries and institutions in the field of computing and communication, especially in internet of things, cloud computing, mobile networks, next-generation networks, the energy market, banking sector, government sector, and many more, are primarily focused on these security and privacy issues. Blockchain is a new technology that has changed the scenario when it comes to addressing security concerns and resolving traditional safety issues. These industries have started developing applications based on the blockchain underlying platform to tap into this unlimited potential. Blockchain technologies have a great future, but there are still many challenges and issues to resolve for optimal design and utilization of the technology. Revolutionary Applications of Blockchain-Enabled Privacy and Access Control focuses on the recent challenges, design, and issues in the field of blockchain technologies-enabled privacy and advanced security practices in computing and communication. This book provides the latest research findings, solutions, and relevant theoretical frameworks in blockchain technologies, information security, and privacy in computing and communication. While highlighting the technology itself along with its applications and future outlook, this book is ideal for IT specialists, security analysts, cybersecurity professionals, researchers, academicians, students, scientists, and IT sector industry practitioners looking for research exposure and new ideas in the field of blockchain.

**Recent Advances on Soft Computing and Data Mining** - Tutut Herawan 2016-12-27

This book provides a comprehensive introduction and practical look at the concepts and techniques readers need to get the most out of their data in real-world, large-scale data mining projects. It also guides readers through the data-analytic thinking necessary for extracting useful knowledge and business value from the data. The book is based on the Soft Computing and Data Mining (SCDM-16) conference, which was held in Bandung, Indonesia on August 18th–20th 2016 to discuss the state of the art in soft

computing techniques, and offer participants sufficient knowledge to tackle a wide range of complex systems. The scope of the conference is reflected in the book, which presents a balance of soft computing techniques and data mining approaches. The two constituents are introduced to the reader systematically and brought together using different combinations of applications and practices. It offers engineers, data analysts, practitioners, scientists and managers the insights into the concepts, tools and techniques employed, and as such enables them to better understand the design choice and options of soft computing techniques and data mining approaches that are necessary to thrive in this data-driven ecosystem.

*Innovative Strategies for Accelerated Human Resources*

*Development in South Asia* - Asian Development Bank 2017-12-01

South Asia remains one of the fastest-growing regions in the world but concerns are rising that its workforce lacks the skills and education to drive its economy into the 21st century. Providing access to quality education and skills training is now a priority of policymakers in the region. But even though government spending on education has increased significantly in recent years, it has not resulted in effective education outcomes. This report is one in a series of four publications that examines how education and training systems in the region can be improved. In particular, it looks at the role that the private sector can play in improving standards through investments in education and training.

**Innovative Strategies in Higher Education for Accelerated Human Resource Development in South Asia** - Asian

Development Bank 2016-06-01

This publication is part of a series of six country reports on technical and vocational education and training (TVET) and higher education in Bangladesh, Nepal, and Sri Lanka. Each report presents current arrangements and initiatives in the respective country's skills development strategies. These are complemented by critical analyses to determine key issues, challenges, and

opportunities for innovative strategies toward global competitiveness, increased productivity, and inclusive growth. The emphasis is to make skills training more relevant, efficient, and responsive to emerging domestic and international labor markets. The reports were finalized in 2013 under the Australian AID-supported Phase 1 of Subproject 11 (Innovative Strategies for Accelerated Human Resource Development) of Regional Technical Assistance 6337 (Development Partnership Program for South Asia).

*Proceedings of the Future Technologies Conference (FTC) 2020, Volume 3* - Kohei Arai 2020-10-30

This book provides the state-of-the-art intelligent methods and techniques for solving real-world problems along with a vision of the future research. The fifth 2020 Future Technologies Conference was organized virtually and received a total of 590 submissions from academic pioneering researchers, scientists, industrial engineers, and students from all over the world. The submitted papers covered a wide range of important topics including but not limited to computing, electronics, artificial intelligence, robotics, security and communications and their applications to the real world. After a double-blind peer review process, 210 submissions (including 6 poster papers) have been selected to be included in these proceedings. One of the meaningful and valuable dimensions of this conference is the way it brings together a large group of technology geniuses in one venue to not only present breakthrough research in future technologies, but also to promote discussions and debate of relevant issues, challenges, opportunities and research findings. The authors hope that readers find the book interesting, exciting and inspiring.

Mobile Web Performance Optimization - S. S. Niranga 2015-12-28

Deliver a better mobile user experience by improving and optimizing your website – follow these practical steps for cutting-edge application development About This Book Optimize your

website or application for an improved mobile performance Learn how to create lightweight, intuitive mobile UI and make sure it's supported by a robust application architecture Find out how to improve the performance of your applications by asking the right design questions at each stage in the development workflow Who This Book Is For This book has been created for web developers who want to optimize their website for today's mobile users. If you understand just how important user experience is, this book is for you – it will help you throughout the entire optimization process. What You Will Learn Learn the three pillars of mobile performance Find out how to ask – and answer – crucial design questions such as 'mobile or responsive?' Learn how to minify CSS and JavaScript for improved performance Monitor and debug your website with the leading browser testing tools Explore the impact of caching on performance – and improve it using JavaScript and CSS frameworks Make third-party plugins your friend – avoid common issues and pitfalls In Detail With users increasingly accessing the web on mobile devices, it's crucial to make sure your website is built to seamlessly fit this radical change in user behavior. Mobile Web Performance Optimization is designed to help you do exactly that – it's been created to help you build fast, and mobile-user-friendly websites and applications. Featuring guidance through a range of techniques and tools essential to modern mobile development, this accessible guide will make sure you're delivering a seamless and intuitive experience for your website's users. Begin by exploring the fundamental components of mobile web design and website optimization, before learning how to put the concepts into practice. Featuring cross-platform solutions, insights on developing lightweight yet robust UI, and insights on how to successfully manage data, this application development book takes you through every stage in the development process – so you can be confident that you're asking the right questions and using the best tools in the most effective way. By the end, you'll understand implicitly what it means to 'build for performance'–

you'll be a more confident developer, capable of building projects that adapt to a changing world. Style and approach This book takes a step-by-step approach to mobile web optimization, explaining the topics in a conversational and easy-to-follow style. Each topic includes detailed explanations of the basic and advanced features of mobile web optimization.

**Enhancing Competitive Advantage With Dynamic Management and Engineering** - Machado, Carolina 2018-06-15

While many advances have been made in understanding the complexity of manufacturing and production engineering, the social and organizational context remains problematic due to the abstract nature of leadership and diverse personnel. Interdisciplinary perspectives to increase knowledge and understanding of engineering management and related processes are necessary in the industry. Enhancing Competitive Advantage With Dynamic Management and Engineering is an essential reference source containing scholarly research on the relevant theoretical frameworks and the latest empirical research findings of strategic administration in engineering. It also explores how to better merge, interrelationship organizations, management, and employee needs in order to increase efficiency, productivity, and profitability. Featuring coverage on a broad range of topics such as business process orientation, diversity management, and enterprise architecture, this book provides vital research for managers, researchers, engineers, and other professionals within engineering and production management.

**Business Information Systems: Concepts, Methodologies, Tools and Applications** - Management Association, Information Resources 2010-06-30

Business Information Systems: Concepts, Methodologies, Tools and Applications offers a complete view of current business information systems within organizations and the advancements that technology has provided to the business community. This four-volume reference uncovers how technological advancements

have revolutionized financial transactions, management infrastructure, and knowledge workers.

**Handbook of Research on Technological Advances of Library and Information Science in Industry 5.0** - Holland, Barbara Jane 2022-12-29

Industry 5.0 is advancing the collaboration between humans and machines and is finding value through connected virtual and human experiences. This technological revolution benefits numerous fields; however, the library and information science industry in particular can evolve and expand by embracing Industry 5.0. The Handbook of Research on Technological Advances of Library and Information Science in Industry 5.0 considers the current research and future trends of technological advances in library and information science related to Industry 5.0. Covering key topics such as robotics, smart libraries, augmented reality, digital libraries, and artificial intelligence, this major reference work is ideal for librarians, industry professionals, researchers, scholars, practitioners, academicians, instructors, and students.

Southeast Asia Building - 1995

Regional Cooperation for Sustainable Food Security in South Asia - Nagesh Kumar 2019-08-26

This volume foregrounds the importance of regional cooperation in the context of food security challenges in South Asia. South Asia holds the key to global achievement of SDG targets of ending hunger and malnutrition – it accounts for nearly one-third of food-insecure people on the planet, with every third child suffering from stunting due to malnutrition. Similar food preferences, production systems, and the transboundary nature of agrarian ecosystems call for coordinated action by South Asian countries, complementing national actions dealing with food security challenges. In this volume, leading experts discuss the perspectives of key South Asian countries in leveraging regional

cooperation for addressing food security challenges and reflect on the potential of cooperative actions in different areas. The book proposes a ten-point regional policy agenda covering cooperation for combatting climate change, regional trade liberalization, operationalization of regional food reserves, leveraging technology, sharing of good practices, regional institution building, coordinated positions in multilateral trade negotiations, addressing trans-boundary outbreak of livestock diseases, strengthening food safety standards, and the management of shared natural resources. A key volume on accomplishing SDGs in the South Asian context, this book will be of immense interest to policy makers, researchers, and development practitioners. It is also essential reading for scholars and researchers in the areas of development studies, South Asia studies, food security, environment and sustainability.

**Offshoring Information Technology** - Erran Carmel 2005-05-12

The decision to source software development to an overseas firm (offshoring) is looked at frequently in simple economic terms - it's cheaper, and skilled labor is easier to find. In practice, however, offshoring is fraught with difficulties. As well as the considerable challenge of controlling projects at a distance, there are differences in culture, language, business methods, politics, and many other issues to contend with. Nevertheless, as many firms have discovered, the benefits of getting it right are too great to ignore. This book explains everything you need to know to put offshoring into practice, avoid the pitfalls, and develop effective working relationships. It covers a comprehensive range of the important offshoring issues: from ROI to strategy, from SLA to culture, from country comparisons to provider marketing. Written for CTOs, CIOs, consultants, and other IT executives, this book is also an excellent introduction to sourcing for business students.

**StarBriefs 2001** - 2012-12-06

This compilation probably looks like one of the craziest things a human being could spend his or her time on. Yet nobody would

wonder at someone taking a short walk every day - after twenty five years that person would have covered a surprisingly long distance. This is exactly the story behind this list, which appeared first as a few pages within the directory StarGuides (or whatever name it had at that time) and as a distinct sister publication since 1990. The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations, acronyms, contractions and symbols which they might encounter in all aspects of the vast range of their professional activities, including traveling. Perhaps it is a bit paradoxical, but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline, they will probably encounter more difficulties when dealing with adjacent fields. It is for this purpose that this dictionary might be most often used. Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions.

**Employment, Technology and Construction Development -**

Sivaguru Ganesan 2019-07-05

This title was first published in 2000: An in depth analysis of employment and technology issues in the housing and construction industries of developing countries, in the context of globalization of economies and increased opportunities for advanced technology transfer. Supported by case studies from Asia including the misallocation of resources that led to the Asian crisis of 1997 and the experience of Shanghai in advanced technology transfer. Ganesan advances a number of strategies to achieve higher employment creation, a proper mix of resources and sustained growth.

StarBriefs Plus - Andre Heck 2004-03-31

With about 200,000 entries, StarBriefs Plus represents the most comprehensive and accurately validated collection of abbreviations, acronyms, contractions and symbols within astronomy, related space sciences and other related fields. As

such, this invaluable reference source (and its companion volume, StarGuides Plus) should be on the reference shelf of every library, organization or individual with any interest in these areas. Besides astronomy and associated space sciences, related fields such as aeronautics, aeronomy, astronautics, atmospheric sciences, chemistry, communications, computer sciences, data processing, education, electronics, engineering, energetics, environment, geodesy, geophysics, information handling, management, mathematics, meteorology, optics, physics, remote sensing, and so on, are also covered when justified. Terms in common use and/or of general interest have also been included where appropriate.

*Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics* - Khosrow-Pour, D.B.A., Mehdi 2018-10-19

From cloud computing to data analytics, society stores vast supplies of information through wireless networks and mobile computing. As organizations are becoming increasingly more wireless, ensuring the security and seamless function of electronic gadgets while creating a strong network is imperative. *Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics* highlights the challenges associated with creating a strong network architecture in a perpetually online society. Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data. This book is an important resource for information technology professionals, software developers, data analysts, graduate-level students, researchers, computer engineers, and IT specialists seeking modern information on emerging methods in data mining, information technology, and wireless networks.

Architectural Research Addressing Societal Challenges - Manuel Jorge Rodrigues Couceiro da Costa 2019-08-08

The escalating interdependency of nations drives global geopolitics to shift ever more quickly. Societies seem unable to control any change that affects their cities, whether positively or negatively. Challenges are global, but solutions need to be implemented locally. How can architectural research contribute to the future of our changing society? How has it contributed in the past? The theme of the 10th EAAE/ARCC International Conference, "Architectural Research Addressing Societal Challenges", was set to address these questions. This book, *Architectural Research Addressing Societal Challenges*, includes reviewed papers presented in June 2016, at the 10th EAAE/ARCC International Conference, which was held at the facilities of the Faculty of Architecture of the University of Lisbon. The papers have been further divided into the following five sub-themes: a Changing Society; In Transit - Global Migration; Renaturalization of the City; Emerging Fields of Architectural Practice; and Research on Architectural Education. The EAAE/ARCC International Conference, held under the aegis of the EAAE and of the ARCC, is a conference organized every other year, in collaboration with one of the member schools/ universities of those associations, alternatively in North America or in Europe.

*Professional Issues in Information Technology* - Frank Bott 2005-05-20

Professional IT practitioners need not only the appropriate technical skills, but also a broad understanding of the context in which they operate. This book provides a unique introduction to: social, legal, financial, organizational and ethical issues in the context of the IT industry; the role of professional codes of conduct and ethics; and key legislation. It is designed to accompany the BCS Professional Examination Core Diploma Module: Professional Issues in Information Systems Practice.

*Innovative Solutions and Applications of Web Services Technology*

- Zhang, Liang-Jie 2018-10-19

With the development of Web 2.0 technologies, the internet has become a huge platform for information and data sharing. As such, web services provide an important foundation for branching technologies in end-user computing and applications. To make online technology more accessible for users, it is important to optimize web services to function properly or offer a personalized experience. *Innovative Solutions and Applications of Web Services Technology* is a collection of innovative research on the methods and applications of existing technologies for web service usability and accessibility. Highlighting a range of topics including business processes, cyber-physical systems, and recommendation accuracy, this book is ideally designed for IT professionals, researchers, graduate-level students, software developers, academicians, and computer engineers seeking current research on adapting online information and services to user needs.

ICIME 2011-Proceedings of the 2nd International Conference on Information Management and Evaluation - Ken Grant

Following on from the continued success of the European Conference on Information Management and Evaluation, we are delighted at the Ted Rogers School of Management, Ryerson University to be able to host the 2nd International Conference on Information Management and Evaluation (ICIME 2011). ICIME aims to bring together individuals researching and working in the broad field of information management, including information technology evaluation. We hope that this year's conference will provide you with plenty of opportunities to share your expertise with colleagues from around the world. This year's opening keynote address will be delivered by Dr Catherine Middleton, Ted Rogers School of Information Technology Management, Ryerson University, Toronto, Canada.

*Voices On South Asia: Interdisciplinary Perspectives On Women's Status, Challenges And Futures* - Emma J Flatt 2020-06-24

This book investigates the contemporary social, political and

economic issues faced by women in South Asia. It focuses on the policies and practices that have challenged or perpetuated gender inequalities, and the evolving role of women in South Asian societies. With contributions from practitioners, policy makers, academics and civil society activists from across South Asia, this volume provides a broad and diverse range of viewpoints on South Asian women's labour force participation, political participation, education, and health, as well as country-specific insights. The volume is conceived as a stage for debate where specific insights act as a window into wider themes, practices and policies. Each essay is followed by policy-relevant recommendations and suggestions for avenues to improve current practice. This book will be relevant for undergraduate students and lecturers of South Asian studies, development, and policy studies, as well as industry practitioners.

**BIM Development and Trends in Developing Countries:**

**Case Studies** - John Rogers, Heap-Yih Chong, Christopher Preece, Chai Chai Lim and Himel Suranga Jayasena 2015-03-06

Building Information Modeling (BIM), or the process of generating and managing digital information about physical representations of constructions, has been effectively adopted and benefited numerous civil engineering projects across the globe, particularly in developed countries. BIM Development and Trends in Developing Countries addresses the philosophies and practices for improved application of BIM in developing countries. Two case

studies are presented in this reference: one from Malaysia and another representing Sri Lanka. Readers are given an introduction and background of the Malaysian and Sri Lankan construction industry and a critical review of BIM's philosophies, development and applications in different stages of a construction project. The authors present their recommendations on the way forward for BIM practices articulated from the two perspectives, namely, academia and industrial BIM practice. The case studies in this book highlight the role of adequate BIM software techniques and the importance of governmental support in facing building challenges at the moment. . BIM Development and Trends in Developing Countries provides readers useful insights on the evolution of BIM practice in emerging countries and is a unique report on two specific scenarios in BIM development. Engineers, architects, urban planners and policy makers around the globe seeking to understand practical BIM implementation and trends will find this reference invaluable.

**Rebuilding Communities After Displacement** - Mo Hamza 2023-02-19

This book presents a collection of double-blind peer reviewed papers under the scope of sustainable and resilient approaches for rebuilding displaced and host communities. Forced displacement is a major development challenge, not only a humanitarian concern. A surge in violent conflict, as well as increasing levels of disaster risk and environmental degradation driven by climate change, has forced people to leave or flee their homes – both internally displaced as well as refugees. The rate of forced displacement befalling in different countries all over the world today is phenomenal, with an increasingly higher rate of the population being affected on daily basis than ever. These displacement situations are becoming increasingly protracted, many lasting over 5 years. Therefore, there is a need to develop more sustainable and resilient approaches to rebuild these displaced communities ensuring the long-term satisfaction of

communities and enhancing the social cohesion between the displaced and host communities. Accordingly, chapters are arranged around five main themes of rebuilding communities after displacement. Response management for displaced communities  
The Built environment in resettlement planning Governance of displacement Socio-Economic interventions for sustainable resettlement

Handbook of Research on Investigations in Artificial Life Research and Development - Habib, Maki 2018-06-08

Research on artificial life is critical to solving various dynamic obstacles individuals face on a daily basis. From electric wheelchairs to navigation, artificial life can play a role in improving both the simple and complex aspects of civilian life. The Handbook of Research on Investigations in Artificial Life Research and Development is a vital scholarly reference source that examines emergent research in handling real-world problems through the application of various computation technologies and techniques. Examining topics such as computational intelligence, multi-agent systems, and fuzzy logic, this publication is a valuable resource for academicians, scientists, researchers, and individuals interested in artificial intelligence developments.

**Algorithmic and Architectural Gaming Design: Implementation and Development** - Kumar, Ashok 2012-05-31

Video games represent a unique blend of programming, art, music, and unbridled creativity. To the general public, they are perhaps the most exciting computer applications ever undertaken. In the field of computer science, they have been the impetus for a continuous stream of innovations designed to provide gaming enthusiasts with the most realistic and enjoyable gaming experience possible. Algorithmic and Architectural Gaming Design: Implementation and Development discusses the most recent advances in the field of video game design, with particular emphasis on practical examples of game development, including design and implementation. The target audience of this book

includes educators, students, practitioners, professionals, and researchers working in the area of video game design and development. Anyone actively developing video games will benefit from the practical application of fundamental computer science concepts demonstrated in this book.

Particulate Plastics in Terrestrial and Aquatic Environments - Nanthi S. Bolan 2020-07-30

The manufacture of plastic as well as its indiscriminate disposal and destruction by incineration pollutes atmospheric, terrestrial, and aquatic ecosystems. Synthetic plastics do not break down; they accumulate in the environment as macro-, micro-, and nanoplastics. These particulate plastics are a major source of pollutants in soil and marine ecosystems. Particulate Plastics in Terrestrial and Aquatic Environments provides a fundamental understanding of the sources of these plastics and the threats they pose to the environment. The book demonstrates the ecotoxicity of particulate plastics using case studies and offers management practices to mitigate particulate plastic contamination in the environment. Features · Describes physical and chemical properties of particulate plastics in terrestrial and aquatic ecosystems · Presents information on characteristics of particulate plastics as impacted by weathering processes · Provides numerous approaches for managing particulate plastic contamination · Identifies sources of particulate plastics in the environment; distribution and characteristics of particulate plastics; and management strategies of particulate plastics  
Written by a global team of scientists, this book is for researchers in the fields of environmental safety and waste management or individuals interested in the impact of particulate plastics on environmental health.

**Promoting Information and Communication Technology in ADB Operations** - Asian Development Bank 2014-09-01

Rapid advances in information and communication technology (ICT) continue to create tremendous opportunities for economic and social gains in the world's poorest areas. A key infrastructure of knowledge-based economies. ICT is a driving force for rapidly growing new sectors. The Strategy 2020 of the Asian Development Bank (ADB) reinforces the importance of drawing on ICT to enhance development in Asia and the Pacific. In line with Strategy 2020, ADB's 2013 ICT for Development Strategy and with the

support of the Republic of Korea's e-Asia and Knowledge Partnership Fund (EAKPF), this study examines and identifies opportunities for promoting ICT in ADB operations.

*Strategic Information Systems: Concepts, Methodologies, Tools, and Applications* - Hunter, M. Gordon 2009-08-31

"This 4-volume set provides a compendium of comprehensive advanced research articles written by an international collaboration of experts involved with the strategic use of information systems"--Provided by publisher.
