Introduction to Integrated Education - Imam Bahroni 2018-07-24

Education is a process to change the behavior of an individual in the society and his surrounding, through teaching and guiding as the fundamental activity among other activities in the community. This definition stresses on the change of behavior from bad to good, from minimum to maximum from potential to actual and from passive to active. All the changes are

through the teaching process, which does not end at the level of individual, but up to the level of society. In this sense, the educational process will enhance individual as well as social piety. Islamic education on the other hand, can be defined as all efforts to educate and develop individual self and his human resources for a perfect person. This definition is in accordance with the view of Islam on the real meaning of education, that is to actualize a person who has strong faith in Allah the Almighty and at the same time, he is able to keep in balance his pious relationship with his God and fellow being positively as well as constructively. Islamic education is an education which has fundamental principles like independent methods, learning based on self-reliance, freedom in teaching, self-study, special attention on children, encouraging the skill and potencies of the student, appreciation of the students' intelligence, teaching

through suitable approaches, kind guidance, and softness. Islamic education focuses on the behavior education, giving special attention on the development of skill in oratory, reasoning and speech presentation, reading enrichment on the classical Islamic book and consistent in learning, research and teaching which all are based on long life education. Meanwhile, the aim of Islamic education is personality construction, educating the mind and heart, nourishing the potencies, inhabits good conduct and preparing the child to be sincere and clean in mind and heart based on the teaching of Islam. The whole activities and the subjects taught at the process of education should be tahdhibul akhlaq (etiquette construction). The author in this book tries to describe the foundation of integrated education based on the light of al-Qur'an and Prophetic Tradition. The elaboration of its nature also includes the basic principle, curriculum and

method of this institution. In the end of narration, the book explains vividly the historical studies on its ideal model that developed significantly through the passage of times.

*BASIC STATISTICAL CALCULATIONS
CORRELATION OF THREE VARIABLES* - Ferri
Susanto 2023-03-09

The limitless human imagination is a great prospect that continues to flow and melt into a unified whole so that it has an extraordinary bond towards a single point of scientific thinking. This thinking leads all scientific civilizations to be collectively arranged in a systematic way like a network that strengthens each other. Scientific thinking based on critical thinking wrapped in technology also gives the nuances of the current human civilization that led to the industrial revolution 5.0, namely society. In facing the era of society 5.0, the world of education plays an important role in

improving the quality of human resources. Students are expected to have 21st century life skills known as 4Cs, namely creativity, critical thinking, communication, and collaboration.

Proceedings of the 1st International Conference on Demographics and Civil-registratation (INCODEC 2021) - Diana Lukitasari 2023-01-10

This is an open access book. Massive development of the internet in the current era of openness delivers enormous benefits for easy access to information for both individual users, groups and governments. However on the other hand, this development has also resulted in various types of challenges with certain consequences, one of the challenges is guaranteeing the security of access to personal data. The important role of personal data is to complete individual rights, such as in obtaining social security,

banking services, conducting general elections and others, as in this case the presence of the state in participating in ensuring the confidentiality of personal data is very necessary. The State through the 1945 Constitution of the Republic of Indonesia in Article 28G clearly stipulates “every person has the right on protection for his/herself, family, honor, dignity, and property of objects that under his/her power, and entitled on a sense of safe and protection from the threat of fear to do or not to do something which is a human right”. Along with the development of information through the internet, technology continues to find various applications and various variations of new technology. Technological growth is directly align to development growth and impulsively drives population movement. As the object and subject of development, the population is recognized, identified, sorted and analyzed

as the development policies implemented capable to be targeted. Population data and information thus occupy a very strategic position. Through Law Number 52 of 2009 on the Population Development and Family Development, the central government and local one are given the mandate to collect, process and present data and information on population and family. These efforts can be done through censuses, surveys and family data collection. One of the developed and applied technologies is the development of Big Data technology. Big Data technology utilized to improve public services provided by the government. The development of this technology consistently utilized to build a complete and centralized database in a single identity. In its implementation, the government has opportunities and challenges to take advantage of this technology. Some of the challenges are related to data security and

the community's perspective on managing their population data. Therefore, it is necessary to conduct a more in-depth study of the application of this technology from various scientific sides to address the opportunities and challenges, especially regarding the security of population data and the behavior of the society towards the guarantee of population data which is managed in the current era of openness. Based on the background above, the D-4 Demographic and Civil Registration Study Program, Sebelas Maret University, Surakarta Vocational School will hosting an Online International Seminar on Demography and Civil Registration with main theme: "Challenges on Population Data Security, Demographic Behavior and Transformation in the Openness Era".

ISSHE 2020 - La Ino 2021-04-15
International Seminar on Social Science, Humanities and Education (ISSHE) is motivated by efforts to increase the quality of research and respond to the development of studies related to social science, humanities and education fields. This

seminar aims: (1) to bring together all scientists, researchers, practitioners, and lecturers, (2) to share and discuss theoretical and practical knowledge about social science, humanities and education fields. The conference was held virtually by using Zoom on November, 25th 2020. The host of the conference was the Faculty of Cultural Sciences of Universitas Haluoleo, Kendari, Indonesia in collaboration with Graduate Program of Linguistics Universitas Warmadewa, Denpasar-Bali, Indonesia. By organising the seminar, it is expected it can be used as a scientific forum to accommodate discussions among young researchers originated from Indonesia in the fields of social science, humanities, and education. Therefore, the keynote speakers and invited speakers in the seminar are the researchers that are reputable and well-known in the world. We would like to thank the organising committee and the board of

reviewers for their kind assistance and intention in reviewing all the papers. We would also extend our best gratitude to keynote speakers for their invaluable contributions and worthwhile ideas shared in the seminar. As a result, ISSHE is expected to be able to be used as academic media to exchange ideas that will impact on conduction of any study related to social science, humanities, and education phenomena.

Proceedings of the 2nd International Conference on Languages and Arts across Cultures (ICLAAC 2022) - I. G. A.

Lokita Purnamika Utami 2023-01-13

This is an open access book. The 2nd International Conference on Languages and Arts across Cultures (ICLAAC) aims to provide a venue for lecturers, teachers, researchers, as well as language and art professionals to share their insights, experiences, and ideas. This conference will

also bridge the knowledge gap by presenting their works on languages and arts issues. The event will provide limitless resources and opportunities to interact with prominent scholars in this field worldwide. This will allow us to significantly expand our existing global network. The conference theme will give us a better understanding of humans through languages and arts. The development of cultural value occurring in today's global communities is certainly a stimulant for artist and language users in creating their artifacts. Restoring cross-cultural understanding is a bridge to understanding the complexities of language, culture, and the role of art in them. Cross-cultural understanding refers to people's attempts to understand one another, particularly between people of different cultural backgrounds. Significant cultural and artistic creations are incorporated into a language that promotes scholarly debate

and scientific comprehension. As an attempt to minimize the spread of covid-19 virus, the conference presenters will be invited to present their papers online via zoom.

In this study, the writer researched about "The Influence of English program on television shows towards Students' Interest in Learning English to Eleventh Grade Students of SMA Negeri I Peureulak." There are five problems in this study namely: 1) Is there any influence of English program on television shows towards students' interest in learning English? 2) Do English program

on television shows increase students' interest in learning English? 3) Do students who often watch English program on television shows get good results in learning English? 4) Do students who not watch English program on television shows get bad results in learning English? 5) Is there any English program on television shows attract students' interest in learning English?

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution - Ratri Wulandari
2021-08-25

The 7th Bandung Creative Movement conference presented the theme "Dynamics of Industrial Revolution 4.0" which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart

cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that

is more ecologically 'smart.' We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward discussions on dynamic changes, ups and downs, innovations, relations of industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.

Proceedings of the Unima International Conference on Social Sciences and Humanities (UNICSSH 2022) - Recky Harold Elby Sendouw 2023-02-17

This is an open access book. The Unima International Conference on Social Sciences and Humanity (UNICSSH) 2022 was conducted on October, 11th - 13th 2022, at The Grand Kawanua International City, Manado, North Sulawesi, Indonesia. In 2022, Universitas Negeri Manado will host the Indonesian National Education Convention (KONASPI) X. Konaspi is a routine activity of the PPTKN which is held once every four years. The fourth industrial revolution (4.0) is marked by technological advances and supported by artificial intelligence that creates opportunities and challenges for the education system. University and vocational school graduates are facing a world transformed by technology which in turn is transforming the workplace from task-based to human-centered characteristics. Certain skills such as critical thinking, emotional intelligence, problem-solving, cognitive flexibility, and knowledge production are

required. To answer this demand, the education system must put revolutionary innovation on its agenda. Scholars, researchers, and practitioners are invited to share ideas, research results, and best practices about education, science, and technology now and in the future at an international conference held by Universitas Negeri Manado as part of the Indonesian National Education Convention (KONASPI). As part of KONASPI X activities, Universitas Negeri Manado is holding the 2022 International Conference on Education, Social Science, and Humanities (ICESSHum). The topics in this international conference are Education, Law, Politics and Social Sciences, Economics, Public Administration, and Humanities. Through these themes, it is expected to involve many professionals who have indirect roles in related fields. To enrich this event, the committee invites all national and international participants

(including academics, researchers, professionals, and other relevant stakeholders) to send research papers or review papers to be presented at the conference.
