Administrative Leadership in the Social Services - Yeheskel Hasenfeld
2012-11-12

What should be the roles and behavior of administrators to meet the challenges facing social service agencies today? Here is a thought-provoking book that provides a great deal of insight into administrative leadership, an essential component in the survival and effectiveness of social service agencies. In response to the enormous challenges that social service agencies are facing, including justification of their mission, mobilization of resources, and responsiveness to new social needs, experts present theoretical and empirical studies on administrative leadership in the social services, reviewing the most recent theories and research on the relationship between leadership and service effectiveness. They also focus on emerging issues in social work administration, including a description of the role of women in social work administration and an assessment of a feminist model of macro practice; the rise of for-profit social service agencies; management-union relations; and entrepreneurship as a new model for administrators. *Administrative Leadership in the Social Services* is especially useful for administrators of social service agencies by providing them with insight into their own practice and giving them guidance to improve their administrative effectiveness. To students and scholars, this outstanding new volume presents a review of theories and research on

current and emerging issues in social work administration.

The Community in Urban Society - Larry Lyon 2011-12-16

The community is more than an abstract object of theoretical inquiry. It is also a place where people live. It is difficult to determine where community research and theory merge, because the community is a unique place where theory and the real world come together. Local conditions change and new research techniques emerge. In the second edition of *The Community in Urban Society*, the authors solve this problem by distilling the historic and foundational theories of community, applying traditional approaches (typology, ecology, systems theory, and conflict theory) to current conditions, and exploring new and relevant theories that impact today's communities. The latest edition also examines recent and emerging technologies that facilitate examination and evaluation of the modern community condition. Updated coverage includes topics such as New Urbanism, modern network analysis methods, the urban political economy approach to community, the growth machine approach, GIS mapping, recent holistic studies, cyberspace communities, and up-to-date discussions of community indicator studies, quality of life, community power, and regime politics.

Progeny - Shaun Hutson 2020-11-05

Can you imagine what it would be like not to have any memory of your first ten years of life?

Jake Howard knows how that feels. He's a successful psychiatrist and writer. He has an apparently adoring lover and the respect of his peers. But he also has a huge gap where his childhood memories should be. What's more, Jake is tormented by the worst kind of nightmares. Nightmares he's not even sure are his.

Tormented by dreams and visions that threaten his sanity, he must find their source in order to understand and banish them.

His hunt will take him to a run-down seaside town, to the place where he was raised and also forty years back in time, to what he must confront to release himself from the grip of the visions and also to discover the hidden memories.

However, he will discover things about himself he did not dare imagine. Things he really didn't want to know.

And he will also discover that not everyone is what they appear to be. Those revelations will expose a darkness and horror that no one should have to confront.

Sometimes a lie is preferable.

Some truth is best left undiscovered...

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained

relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.
