Shattered Lens - Mary Alice Beasley
2010-10-05

As a toddler, Mary sustains an injury to her left eye. In elementary school, she is diagnosed with a traumatic cataract caused by a shattered lens

and is advised to always wear glasses to protect her better eye. Not wanting to be teased by peers, she disguises her impairment by wearing tinted shades of various hues. These camouflages affect the way she views life and

alters her perception of people and events. Believing that everyone encountered would initially focus on her eyes, she limits her social interactions and becomes an avid reader. After ending an abusive marriage to Chico, her high school and college boyfriend, and later identifying with the Hebrew Israelites, she decides to take off the colorful blinders and face life, with all of its complexities, clearly focused by going on a Caribbean cruise to reflect on her experiences in order to resolve the inner conflicts which led to years of unhappiness and deferred dreams. The Creation story in the book of Genesis guides her thinking as she desperately attempts to recreate her life by analyzing over thirty years of experiences in seven short days. It begins with her understanding the causes of her blurred vision and ends with an enlightened sense of self pride, purpose and spiritual awareness. Throughout this true adventure, she uses her visual impairment as a metaphor for the blindness she

suffers as she journeys along life's path. The book is filled with tales of her family structure and social values; issues of marriage, domestic violence, infidelity, deception and divorce; the challenges of single parenting; the frustrations of religious persecution and professional discrimination; the disappointments encountered in attempts to establish friendships and develop intimate relationships; and finally the blessings of finding true love and restoring trust.

Planning Theory for Practitioners - Michael Brooks
2019-07-09

This book is recommended reading for planners preparing to take the AICP exam. In this new book, the author bridges the gap between theory and practice. The author describes an original approach-Feedback Strategy-that builds on the

strengths of previous planning theories with one big difference: it not only acknowledges but welcomes politics-the bogeyman of real-world planning. Don't hold your nose or look the other way, the author advises planners, but use politics to your own advantage. The author admits that most of the time planning theory doesn't have much to do with planning practice. These ideas rooted in the planner's real world are different. This strategy employs everyday political processes to advance planning, trusts planners' personal values and professional ethics, and depends on their ability to help clients articulate a vision. This volume will encourage not only veteran planners searching for a fresh approach, but also students and recent graduates dismayed by the gap between academic theory and actual practice.

Thunder Run - David Zucchini 2007-12-01 "A Pulitzer Prize-winning reporter provides a brilliant account of the harrowing drive into Baghdad by an American armor brigade" (Seattle Post-Intelligencer). Based on reporting that was a finalist for the Pulitzer Prize, Thunder Run chronicles one of the boldest gambles in modern military history: the surprise assault on Baghdad by the Spartan Brigade, the Second Brigade of the Third Infantry Division (Mechanized). Three battalions and fewer than a

thousand men launched a violent thrust of tanks and Bradley Fighting Vehicles into the heart of a city of five million people—and in three days of bloody combat ended the Iraqi war. More than just a rendering of a single battle, Thunder Run candidly recounts how soldiers respond under fire and stress and how human frailties are magnified in a war zone. The product of over a hundred interviews with commanders and men from the Second Brigade, it is a riveting firsthand account of how a single armored brigade was able to capture an Arab capital defended by one of the world's largest armies.
