Conceptual Modeling - ER 2002 - Stefano Spaccapietra 2003-06-30

For more than 20 years, the series of Conceptual Modeling – ER conferences has provided a forum for research communities and practitioners to present and - change research results and practical experiences in the ?elds of database design and conceptual modeling. Throughout the years, the scope of these conferences has extended from database design and speci?c topics of that area to more u- versal or re?ned conceptual modeling, organizing originally weak or ill-structured information or knowledge in more cultured ways by applying various kinds of principles, abstract models, and theories, for di?erent purposes. At the same time, many technically oriented approaches have been developed which aim to facilitate the implementation of rather advanced conceptual models. Conceptual modeling is based on the process of conceptualization, and it is the core of system structuring as well as justi?cation for information systems development. It supports and facilitates the understanding, explanation, pred- tion, and reasoning on information and knowledge, and their manipulation in the systems, in addition to understanding and designing the functions of the systems. The conceptualization process aims at constructing concepts relevant for the knowledge and information system in question. Concepts in the human mind and concept descriptions in computerized information systems are quite di?erent things by nature, but both should be taken into account in conceptual modeling. Usually concept descriptions are properly observed, but concepts in the human mind and their properties are often neglected quite carelessly.

The Streets of Baltimore - Joe Frantz 2023-03-07

Brandon Novak, an actor known for the films Jackass and Viva La Bam, among others, was a teenage skateboarder, but his lust for heroin led to a junkie's destiny on the streets of Baltimore. Arrests, rehabs, and drug-tortured love triangles consumed Novak's life, until his childhood friend and Jackass alumnus Bam Margera guided him to MTV fame. But Novak's stardom led him down a self-destructive path that forced him to sculpt his future. This suspenseful memoir is interspersed with action, humor, and inspiration.

The Dynamics of Persuasion - Richard M. Perloff 2010-05-26

The Dynamics of Persuasion provides a comprehensive and up-to-date introduction to persuasive communication and attitude change. Offering a thorough discussion of classic and contemporary theories of persuasion, this text explores the structure and functions of attitudes, consistency between attitude and behavior, and issues in attitude measurement. Examining persuasion through media, interpersonal, and psychological lenses, author Richard M. Perloff systematically investigates the impact of persuasive communication on attitudes toward a variety of topics, including health, politics, and racial prejudice. In addition to presenting persuasion theory and research, he provides numerous examples of persuasion in action, demonstrating the role of persuasion research in everyday life. Written in a highly accessible and clear style, The Dynamics of Persuasion serves to: introduce the social science perspective on persuasion enhance understanding of persuasion theories and research highlight the major issues discussed in the field of persuasion research explore the complexities and subtleties in the dynamics of everyday persuasion raise awareness about the ethics of contemporary persuasion. New to this edition are: 2008 election examples interspersed throughtout the text focused discussions on compliance-gaining and negative advertising examples of strong attitude, such as the pros and cons of using animals in research. The Future of Excellence in Public Relations and Communication Management - Elizabeth L. Toth 2009-03-04

The Future of Excellence in Public Relations and Communication Management brings together an outstanding group of public relations scholars and practitioners to consider the indelible theory building in public relations of James E. Grunig and Larissa A. Grunig, who with David M. Dozier, produced the 1992 IABC Excellence Study, a benchmark body of work examining best practices in the public relations field. In this assembled collection, editor Elizabeth L. Toth and the contributors show how and in what ways the theories of the Excellence Study have developed and changed. They present research that advances excellence theories, adds new dimensions and directions to the excellence theories, and shows how the excellence study has moved on to a global stage. Toth and her colleagues challenge future researchers to continue the theory-building that will lead to understand how strategic public relations management contributes to organizations and society. Public relations and communication management scholars, in addition to practitioners and graduate students studying these areas, will benefit immensely from the work included here.

Internal Combustion Engine Handbook - Richard Van Basshuysen 2016-03-07

More than 120 authors from science and industry have documented this essential resource for students, practitioners, and professionals. Comprehensively covering the development of the internal combustion engine (ICE), the information presented captures expert knowledge and serves as an essential resource that illustrates the latest level of knowledge about engine development. Particular attention is paid toward the most up-to-date theory and practice addressing thermodynamic principles, engine components, fuels, and emissions. Details and data cover classification and characteristics of reciprocating engines, along with fundamentals about diesel and spark ignition internal combustion engines, including insightful perspectives about the history, components, and complexities of the present-day and future IC engines. Chapter highlights include: • Classification of reciprocating engines • Friction and Lubrication • Power, efficiency, fuel consumption • Sensors, actuators, and electronics • Cooling and emissions • Hybrid drive systems Nearly 1,800 illustrations and more than 1,300 bibliographic references provide added value to this extensive study. "Although a large number of technical books deal with certain aspects of the internal combustion engine, there has been no publication until now that covers all of the major aspects of diesel and SI engines." Dr.-Ing. E. h. Richard van Basshuysen and Professor Dr.-Ing. Fred Schäfer, the editors, "Internal Combustion Engines Handbook: Basics, Components, Systems, and Perspectives"
