Michael Lucero - Mark Richard Leach 1996

Lucero's colorful, imaginative sculptures and ceramics synthesize diverse forms and influences?bottle trees and face jugs inspired by African art; a hanging ram and blood-red sacred hearts with roots in Mexico; looming stick figures suggestive of Native American rock art; delicate totem poles that evoke Pacific Northwest Indian cultures. Hybrid animals, found objects, jug-headed infants in baby carriages and dreamers who externalize the contents of their dreams in multilayered glazes animate the work of this California-born artist, now living in New York.

Cataloging a traveling exhibition that opened at the Mint Museum of Art (Charlotte, N.C.), this volume reproduces 47 of Lucero's glazed ceramic, bronze and mixed-media creations in full-page color plates. Co-curator Bloemink finds pervasive echoes of surrealism and Dada in Lucero's improvisations. Art historian Lippard relates his themes of intercultural exchange to his family history; his ancestors, practicing Sephardic Jews, escaped persecution in Spain by migrating to New Mexico. Also included is an interview with Lucero by Leach, the exhibit's curator. 74 colour & 58 b/w illustrations

It's Your Ship - D. Michael Abrashoff 2007-10-15

Read this million-copy bestseller for leadership insights about top-down change to improve productivity in your business starting with the most important person: You. When Captain Abrashoff took over as commander of USS Benfold, it was like a business that had all the latest technology but only some of the productivity. Knowing that responsibility for improving performance rested with him, he realized he had to improve his own leadership skills before he could improve his ship. Within months, he created a crew of confident and inspired problem-solvers eager to take the initiative and responsibility for their actions. The slogan on board became "It's your ship," and Benfold was soon recognized far and wide as a model of naval efficiency. How did Abrashoff do it? Against the backdrop of today's United States Navy, Abrashoff shares his secrets of successful management including: See the ship through the eyes of the crew: By soliciting a sailor's suggestions, Abrashoff drastically reduced tedious chores that provided little additional value. Communicate, communicate, communicate: The more Abrashoff communicated the plan, the better the crew's performance. His crew eventually started calling him "Megaphone Mike," since they heard from him so often. Create discipline by focusing on purpose: Discipline skyrocketed when Abrashoff's crew believed that what they were doing was important. Listen aggressively: After learning that many sailors wanted to use the GI Bill, Abrashoff brought a test official aboard the ship-and held the SATs forty miles off the Iraqi coast. From achieving amazing cost savings to winning the highest gunnery score in the Pacific Fleet, Captain Abrashoff's extraordinary campaign sent shock waves through the U.S. Navy. It can help you change the course of your ship, no matter where your business battles are fought.

Pyramid Quest - Robert M. Schoch 2005-06-02

The Egyptologist acclaimed for re-dating the Great Sphinx at Giza sets his sights on one of the true mysteries of antiquity: the Great Pyramid of Giza. What is the Great Pyramid of Giza? Ask that basic question of a traditional Egyptologist, and you get the basic, traditional answer: a fancy tombstone for a self-important pharaoh of the Old Kingdom. This, Egyptologists argue, is the sole finding based on the data, and the only deduction supported by science. By implication, anyone who dissents from this point of view is unscientific and woolly-minded—a believer in magic and ghosts. Indeed, some of the unconventional ideas about the Great Pyramid do have a spectacularly fabulous ring to them. Yet from beneath the obvious terms of this controversy, a deeper, more significant question arises: how is it that the Great Pyramid exercises such a gripping hold on the human psyche—adding cryptic grace to the back of the one-dollar bill and framing myriad claims of New Age "pyramid power"? In *Pyramid Quest*, Robert M. Schoch and Robert Aquinas McNally use the rigorous intellectual analysis of scientific inquiry to investigate what we know about the Great Pyramid, and develop a stunning hypothesis: This ancient monument is the strongest proof yet that civilization began thousands of years earlier than is generally thought, extending far back into a little-known time. In tracing that story, we come to understand not only the Great Pyramid but also our own origins as civilized beings.

Cracked it! - Bernard Garrette 2018-06-08

Solving complex problems and selling their solutions is critical for personal and organizational success. For most of us, however, it doesn't come naturally and we haven't been taught how to do it well. Research shows a host of pitfalls trips us up when we try: We're quick to believe we understand a situation and jump to a flawed solution. We seek to confirm our hypotheses and ignore conflicting evidence. We view challenges incompletely through the frameworks we know instead of with a fresh pair of eyes. And when we communicate our recommendations, we forget our reasoning isn't obvious to our audience. How can we do it better? In *Cracked It!*, seasoned strategy professors and consultants Bernard Garrette, Corey Phelps and Olivier Sibony present a rigorous and practical four-step approach to overcome these pitfalls. Building on tried-and-tested (but rarely revealed) methods of top strategy consultants, research in cognitive psychology, and the latest advances in design thinking, they provide a step-by-step process and toolkit that will help readers tackle any challenging business problem. Using compelling stories and detailed case examples, the authors guide readers

through each step in the process: from how to state, structure and then solve problems to how to sell the solutions. Written in an engaging style by a trio of experts with decades of experience researching, teaching and consulting on complex business problems, this book will be an indispensable manual for anyone interested in creating value by helping their organizations crack the problems that matter most.

Charlotte Wood, author of *The Natural Way of Things* For those who aim to be leaders, mastering the power of speechmaking -the art and craft of persuasion - is more important than ever. If you want to be heard, it's not enough to have something to say: you must know how to say it. But the right speech can build prosperity, drive peaceful solutions and bring people together. This book meets the difficulties of modern speechmaking head-on, taking us through the process of formulating ideas, finding the best ways to express them, and delivering an accomplished address. Using examples from history, literature and her 25-year career as a speechwriter, Lucinda Holdforth writes a compelling analysis of celebratory, rallying and explanatory speeches. She reminds us that democracies rise and fall on the quality of the debates we conduct and the subsequent decisions we make. This is not only a practical manual for crafting a powerful speech, it's a cracking read. The right words can be transformative. They can stir a heart or reimagine the world. *Leading Lines* will help you find those words, and lead the way. PRAISE 'A book for anyone who aspires to leadership. Lords of Strategy - Walter Kiechel 2010-03-03

Imagine, if you can, the world of business - without corporate strategy. Remarkably, fifty years ago that's the way it was. Businesses made plans, certainly, but without understanding the underlying dynamics of competition, costs, and customers. It was like trying to design a large-scale engineering project without knowing the laws of physics. But in the 1960s, four mavericks and their posses instigated a profound shift in thinking that turbocharged business as never before, with implications far beyond what even they imagined. In *The Lords of Strategy*, renowned business journalist and editor Walter Kiechel tells, for the first time, the story of the four men who invented corporate strategy as we know it and set in motion the modern, multibillion-dollar consulting industry: Bruce Henderson, founder of Boston Consulting Group Bill Bain, creator of Bain & Company Fred Gluck, longtime Managing Director of McKinsey & Company Michael Porter, Harvard Business School professor Providing a window into how to think about strategy today, Kiechel tells their story with novelistic flair. At times inspiring, at times nearly terrifying, this book is a revealing account of how these iconoclasts and the organizations they led revolutionized the way we think about business, changed the very soul of the corporation, and transformed the way we work.
