The Face of the Firm - Michele Rene Gregory 2016-02-12  
Despite decades of greater gender awareness at work in Western countries, gender inequality in the executive suites is alive and well. "The Face of the Firm" highlights new critical perspectives on the relationship between hegemonic masculine cultures, gender embodiment, and gender disparities in corporate organizations. Using data from over 100 interviews with female and male executives who worked for some of the most prestigious advertising and computer firms in the world, the book makes important connections between the empirical data and contemporary sexism in the United States and United Kingdom. The book refocuses the debate of executive work, organizational spaces, and gender inequality on gendered bodies at work. It also demonstrates that gendered and sexualized relations among executives often construct the production process. The book makes a contribution to masculinity, gender, and work scholarship and is organized along three key concepts: homogeneity, homosociability, and heterosexuality. These address such factors as the organizational locker room, sexual and heterosexual spaces at work, and the construction of women and men as different workers. This conceptual model is crucial for evaluating the mechanisms that support male dominance among highly skilled professionals and executives."

Portal Hypertension VII - Roberto de Franchis 2022-11-19

This book, the seventh in a series of proceedings volumes that began in 1995, reviews the latest developments in the diagnosis and management of cirrhosis and portal hypertension. It addresses a broad range of topics, including: risk stratification, HVPG, non-invasive surrogates for cACLD, CSPH, varices, progression and regression of cirrhosis, impact of etiological therapy on cirrhosis, impact of non-etiological novel therapies on cirrhosis, prevention of first/further decompensation, acute variceal hemorrhage, and Vascular Liver Disorders in Cirrhosis (VALDIG). The book is a compilation of lectures and important consensus statements from the Seventh Baveno International Consensus Workshop on Portal Hypertension, the latest in a series of workshops held every five years for hepatologists with an interest in the field. Portal Hypertension VII offers a valuable reference guide for clinical and research fellows in Gastroenterology and Hepatology and will inspire new research projects in the promising areas identified by the experts of the Baveno VII Faculty.

**The Place-names of Devon** - John Eric Bruce Gover 1931

The Co-creative University - Łukasz Mamica 2021-06-30

The co-creative university has become the main driver of social and economic development stimulating internal (students and academics) and external creativity (companies and institutional environment) as well as cooperation in various areas (e.g. applied graduation theses, research projects, lifelong learning). Intended as a contribution to a better understanding of how universities create value in numerous areas, this book discusses the determinants of creativity and ways of stimulating it with a special focus on approaches and practical solutions relevant to teaching. Examples include problem-oriented student theses, which represent a successful combination of creativity with practical knowledge. Based on the findings of international surveys of students, the author offers an in-depth analysis of the differences between what they expect from universities and the degree to which their expectations are met. Comparing students' opinions with those of employees of international corporations (working graduates) permitted the author to test the actual utility of selected aspects of university education. Regrettably, both groups of respondents gave low ratings to support for developing creativity, which should serve as a warning sign and inform future reforms at this level of education. This book is primarily targeted to those involved in education, policy-making, and socio-economic development. It provides a rich source of information for university managers on how to better fulfil their missions based on the idea of co-creativity. It also suggests how to improve the effectiveness of research and education in order to ensure that both can better respond to current development challenges.
