**Teaching Students How to Use Self-Management** - Margaret E. King Sears 2019-03-22

Self-management is a robust technique whereby students of all ages and ability levels learn how to control their learning and social behaviors. When students effectively self-manage, teachers spend more time on instruction and less time reminding students how to behave, which benefits teachers and students. Additionally, students learn independence when they self-manage. This guide presents a 10-step instructional sequence for teaching students three types of self-management: self-monitoring, self-evaluation, and self-reinforcement. Each type can be taught to a whole class, small groups, or individual students (grades K-12). Any type can be used with both learning and social behaviors. Through this simple 10-step process, students learn what self-management is, why to use it, how to apply it, and when to use it. Instruction includes role-playing, modeling, and demonstrating mastery during guided practice and in the actual setting. Instruction takes about one hour, spread across multiple sessions. After instruction, follow-up is necessary to reinforce students' use of self-management and confirm that accurate self-management occurs.

Encourage reading skills by highlighting the high frequency words essential for beginning readers. With our resource, students will begin to think of words as not only a series of individual letters and sounds, but as easily recognizable chunks of language. Make a word by adding an onset, like "sn", to the rime, like "ail". Then, say the word out loud. Finish a sentence by matching words, like "sweep" and "keep", to the boxes that show tall and small letters. Read a sentence, like "We like to glide down the wide slide", and circle all the words that rime. Then, write your own

sentences using words that rime. Aligned to your State Standards and written to Bloom's Taxonomy, reproducible writing tasks, rime & onset cards, crossword, word search, comprehension quiz and answer key are also included.
