Fifty years after its first publication, the multimillion-copy international bestseller is available again in English, sharing the heartbreaking tale of a gifted, mischievous, direly misunderstood boy growing up in Rio de Janeiro. When Zezé grows up, he wants to be a poet in a bow tie. For now the precocious young boy entertains himself by playing clever pranks on the residents of his Rio de Janeiro neighborhood, stunts for which his parents and siblings punish him severely. Lately, with his father out of work, the beatings have become harsher. Zezé's only solace comes from his time at school, his hours secretly spent singing with a street musician, and the refuge he finds with his precious magical orange tree. When Zezé finally makes a real friend, his life begins to change, opening him up to human tenderness but also wrenching sorrow. Never out of print in Brazil since it was first published in 1968, *My Sweet Orange Tree*, inspired by the author's own childhood, has been translated into many languages and has won the hearts of millions of young readers across the globe.

[The Moral Judgment Of The Child](#) - Piaget, Jean 2013-11-05

First Published in 1999. Readers will find in this book no direct analysis of child morality as it is practised in home and school life or in children's societies. It is the moral judgment that we propose to investigate, not moral behaviour or sentiments. With this aim in view, a large number of children from the Geneva and Neuchatel schools were questioned and held conversations with them, similar to those we had had before on their conception of the world and of causality. The present volume contains the results of these conversations.

[Marketing Performativity](#) - Katy Mason 2018-10-11

Marketing Performativity: Theories, practices and devices addresses concerns about the theory-practice gap so often discussed by marketing scholars, and indeed reframes this 'gap' by asking 'how is marketing theory performative?' How does marketing theory shape action? Who uses it in practice and to what effects? The individual contributions in this book look at how marketing theories are used in practice and what this means for our understanding of the practicing-theorising landscape of marketing. The book begins by considering what performativity is and how this concept is used in the marketing literature. It then considers three themes concerning the performativity of marketing that emerge from the contributions, before presenting ten empirical studies that ask how, why, and to what effect marketing theories are used and 'performed' in marketing practice. The book also summarises the implications of three themes and sketches research areas for further developing our understanding of the performativity of marketing. This book was originally published as a special issue of the Journal of Marketing Management.

**Real Leaders Don't Do PowerPoint** - Christopher Witt 2009-02-03

Think about the most powerful speech you've ever heard a leader give. What made that speech—and that speaker—memorable was likely a mix of authenticity, stage presence, masterful delivery, and—above all—an inspirational message. Nobody ever walked out of a great speech saying, "I loved the way she used PowerPoint." Yet, all too often, speakers rely on tools like it to carry them through a presentation. Real leaders speak to make a difference, to promote a vision, to change the way people think and feel and act. Their ability to lead goes hand in hand with their ability to get their message across, no matter what size audience they're addressing. Drawing on his years of experience in coaching executives, Christopher Witt shows not just how to make a speech but why and when you should make one. His practical advice on how to take your game to the next level includes:

- You are the message. Who you are—your character, experience, values—shapes the message your listeners hear.
- Content is king. Delivery is important, but it is only the helpful-or-unhelpful-servant of your message. So build each speech around one, and only one, "Big Idea."
- A confused mind always says no. When you want your listeners to say yes, you've got to make them understand what you want them to do and why they should care.
- Dare to do the unexpected. Leaders know the rules, and they know when, why, and how to break them. In chapters that can be read in five minutes or less and in a book that can be gone through in one sitting, Witt shows you how to become more confident, more commanding, more compelling speakers. But this isn't just a book about speaking. It's about leadership and about how people—CEOs and PTA presidents, small business owners and sales reps, middle managers and techno geeks—can present themselves and their ideas with greater impact.

Book of Mormon Student Manual - The Church of Jesus Christ of Latter-day Saints 2009-07

**Dialogue and Learning in Mathematics Education** - Helle Alrø 2006-04-11

Dialogue and Learning in Mathematics Education is concerned with

communication in mathematics class-rooms. In a series of empirical studies of project work, we follow students' inquiry cooperation as well as students' obstructions to inquiry cooperation. Both are considered important for a theory of learning mathematics. Special attention is paid to the notions of 'dialogue' and 'critique'. A central idea is that 'dialogue' supports 'critical learning of mathematics'. The link between dialogue and critique is developed further by including the notions of 'intention' and 'reflection'. Thus a theory of learning mathematics is developed which is resonant with critical mathematics education.

Can they beat the system in a school where cutthroat competition is the name of the game? "

**Welcome to the Desert of the Real** - Slavoj Žižek 2014-09-24

Liberals and conservatives proclaim the end of the American holiday from history. Now the easy games are over; one should take sides. Žižek argues this is precisely the temptation to be resisted. In such moments of apparently clear choices, the real alternatives are most hidden. Welcome to the Desert of the Real steps back, complicating the choices imposed on us. It proposes that global capitalism is fundamentalist and that America was complicit in the rise of Muslim fundamentalism. It points to our dreaming about the catastrophe in numerous disaster movies before it happened, and explores the irony that the tragedy has been used to legitimize torture. Last but not least it analyzes the fiasco of the predominant leftist response to the events.

*Syntax* - Talmy Givón 2001-01-01

This new edition of "Syntax: A functional-typological introduction" is at many points radically revised. In the previous edition (1984) the author

deliberately chose to de-emphasize the more formal aspects of syntactic structure, in favor of a more comprehensive treatment of the semantic and pragmatic correlates of syntactic structure. With hindsight the author now finds the de-emphasis of the formal properties a somewhat regrettable choice, since it creates the false impression that one could somehow be a functionalist without being at the same time a structuralist. To redress the balance, explicit treatment is given to the core formal properties of syntactic constructions, such as constituency and hierarchy (phrase structure), grammatical relations and relational control, clause union, finiteness and governed constructions. At the same time, the cognitive and communicative underpinning of grammatical universals are further elucidated and underscored, and the interplay between grammar, cognition and neurology is outlined. Also the relevant typological database is expanded, now exploring in greater precision the bounds of syntactic diversity. Lastly, *Syntax* treats synchronic-typological diversity more explicitly as the dynamic by-product of diachronic development or grammaticalization. In so doing a parallel is drawn between linguistic diversity and diachrony on the one hand and biological diversity and evolution on the other. It is then suggested that as in biology synchronic universals of grammar are exercised and instantiated primarily as constraints on development, and are thus merely the apparent by-products of universal constraints on grammaticalization.
