World-Class Grooming for Horses - Cat Hill 2019-11-15
When owning, training, riding,

and showing horses, there is a certain “look” to which one aspires. World-class “turnout”—a horse in peak condition, perfectly coiffed and luminous with health, outfitted with gleaming and well-fit tack appropriate for his sport—can take your breath away. And while it can certainly play a significant role in a competitive rider’s success, it is just as appealing to have any horse “groomed to the nines,” whether he’s headed for an afternoon lesson or just out on the trail. Achieving this superior look is not just about clean tack, shiny brass, spotless stockings, or perfect braids. The most important steps are in the day-to-day nitty-gritty of grooming and caring for the horse: noticing “something not-quite-right” about the way the horse looks or moves before it becomes “something wrong”; brushing and combing and trimming a little every day so the horse’s skin and coat remain healthy; knowing how to prepare a horse properly for training, and how to cool him down afterward. Now, two of

the best professional grooms in the business share their trade secrets, with over 1200 color photographs accompanying the ultimate modern-day guide for all riders who want their horses to look and feel their best.

[Core Conditioning for Horses](#) - Simon Coccozza 2019-10-22
Gentle ways to improve the

horse's core fitness while relieving pain related to conditions such as kissing spine. Every equestrian wants to know: what is the difference between the horse that "dances" when you are on him, and the one that doesn't? According to Visconte Simon Coccozza, Trainer and Examiner for the La Fédération Française d'Equitation (FFE), it all comes down to the horse's posture. The horse's ability to use the powerful mechanisms already built into his body relies not upon the strength we can see on the outside but the strength on the inside. This invisible and complex arrangement of internal "core" muscles control the horse's posture, suppleness, and agility. Their good condition is the key to the dance. Equine core muscles are very difficult to isolate with the traditional training techniques common to horse sports. However, by examining what we do with the human body when faced with a weak core, we can find new methods for conditioning these areas of the equine body. Coccozza has

taken principles of the human practice of yoga and used them to develop novel ways of reaching deep within the horse's body and: Gently "unlock" areas that may be a little "rusty." Improve core fitness. And even relieve pain related to conditions such as kissing spine. In this highly illustrated book, he provides step-by-step instruction explaining easy mounted exercises that enhance the horse's posture, and boost his confidence in his body and movement, making him easier to ride, and ultimately, the dance partner you've always imagined.
