[Factfulness](#) - Hans Rosling 2018-04-03

INSTANT NEW YORK TIMES BESTSELLER "One of the most important books I've ever read—an indispensable guide to thinking clearly about the world." - Bill Gates "Hans Rosling tells the story of 'the secret silent miracle of human progress' as only he can. But Factfulness does much more than that. It also explains why progress is so often secret and silent and teaches readers how to see it clearly." —Melinda Gates

"Factfulness by Hans Rosling, an outstanding international public health expert, is a hopeful book about the potential for human progress when we work off facts rather than our inherent biases." - Former U.S.

President Barack Obama Factfulness: The stress-reducing habit of only carrying opinions for which you have strong supporting facts. When asked simple questions about global trends—what percentage of the world's population live in poverty; why the world's population is increasing; how many girls finish school—we systematically get the answers wrong. So wrong that a chimpanzee choosing answers at random will consistently outguess teachers, journalists, Nobel laureates, and investment bankers. In Factfulness, Professor of International Health and global TED phenomenon Hans Rosling, together with his two long-time collaborators, Anna and Ola, offers a radical new explanation of why this happens. They reveal the ten instincts that distort our perspective—from our tendency to divide the world into two camps (usually some version of us and them) to the way we consume media (where fear rules) to how we perceive progress (believing that most things are getting worse). Our problem is that we don't know what we don't know, and even our guesses are informed by unconscious and predictable biases. It turns out that the world, for all its imperfections, is in a much better state than we might think. That doesn't mean there aren't real concerns. But when we worry about everything all the time instead of embracing a worldview based on facts, we can lose our ability to focus on the things that threaten us most. Inspiring and revelatory, filled with lively anecdotes and moving stories, Factfulness is an urgent and essential book that will change the way you see the world and empower you to respond to the crises and opportunities of the future. --- "This book is my last battle in my life-long mission to fight devastating ignorance...Previously I armed myself with huge data sets, eye-opening software, an energetic learning style and a Swedish bayonet for sword-swallowing. It wasn't enough. But I hope this book will be." Hans Rosling, February 2017.

**Maternal Divinity, Yemonja** - Lloyd Weaver 1998

As there are spirits in the earth, so the Yoruba believe that there are spirits dwelling in the rivers, lagoons and the sea. These spirits are revered principally by those who dwell near rivers, lagoons or the sea and who believe that the spirits, if suitably provided can in return provide man's needs. They control abundance of fish, they prevent the capsizing of canoes and river accidents; some of the spirits supply children to the barren. "Yemonja", for example, is believed to be the goddess of waters generally and from her body, according to the people's belief, all rivers, lagoons and the sea flow out. Today she is associated with the Ogun River and is given elaborate worship in those areas through which it flows, particularly in Abeokuta.

*The Atlas of Experience* - Louise van Swaaji 2000-10-13

An illustrated guide to the most adventurous journey there is: Life. Human beings have long been addicted to maps: they tell us where we are, how we got where we are, and where we are going next. But *The Atlas of Experience* is no ordinary book of maps. While adhering to the conventions of cartography, this atlas invites the traveler to follow routes through familiar-looking topography into hitherto uncharted realms of imagination, ideas, feelings and experience. Cradled by the Ocean of Possibilities, the Sea of Plenty and Still Waters, this strangely familiar place has its capital Boom, its airports Escape and Freedom. It encompasses beautiful regions like the Peninsular of Pleasure as well as desolate wastes such as the Swamps of Boredom and the Bay of Melancholy. Then again there are the well-known Mountains of Work and the Safe Harbour of Home. And what about the Volcanoes of Passion and the border towns of Challenge and Doubt? That's *The Atlas of Experience* the very special travel book that takes you on the long journey to where you are.

**Stepping Stones to the Father Heart of God** - Margaret Silvester 2012-08-08

Earthly fathers are meant to be windows on the father heart of God. Sadly, parenting can fall well short of this image. As a consequence we can have a poor interpretation of what God truly thinks of us and can spend our lives struggling with the symptoms of fear and insecurity. Today, more than ever, people have a love hunger which never seems satisfied, leading many searching in the wrong places to find fulfilment for their deep needs. One of the most defining aspects of Christianity, compared to other religions, is that God is also known as "Father." Jesus even instructs us to approach God this way through the Lord's Prayer. The revelation of the Father heart of God has for many been a major step on the road to true wholeness, and away from the anxiety of performance based striving to please God. As you move along the stepping stones described in this book, you will journey from a distorted self-image based on abandonment, neglect, rejection or abuse to an image based on the Word of God and revelation from the Holy Spirit - meaning you can finally remove your distance from God and experience the love and freedom there is to be had through a heavenly Father relationship.

Perfume - Patrick Suskind 2001-02-13

INTERNATIONAL BESTSELLER • Set in eighteenth-century France, the classic novel that provokes a terrifying examination of what happens when one man's indulgence in his greatest passion—his sense of smell—leads to murder. In the slums of eighteenth-century France, the infant Jean-Baptiste Grenouille is born with one sublime gift—an absolute sense of smell. As a boy, he lives to decipher the odors of Paris, and apprentices himself to a prominent perfumer who teaches him the ancient art of mixing precious oils and herbs. But Grenouille's genius is such that he is not satisfied to stop there, and he becomes obsessed with capturing the smells of objects such as brass doorknobs and fresh-cut wood. Then one day he catches a hint of a scent that will drive him on an ever-more-terrifying quest to create the "ultimate perfume"—the scent of a beautiful young virgin. Told with dazzling narrative brilliance, *Perfume* is a hauntingly powerful tale of murder and sensual depravity. Translated from the German by John E. Woods.

*The Rise and Fall of Human Rights* - Lori Allen 2013-04-24

*The Rise and Fall of Human Rights* provides a groundbreaking ethnographic investigation of the Palestinian human rights world—its NGOs, activists, and "victims," as well as their politics, training, and discourse—since 1979. Though human rights activity began as a means of struggle against the Israeli occupation, in failing to end the Israeli occupation, protect basic human rights, or establish an accountable Palestinian government, the human rights industry has become the object of cynicism for many Palestinians. But far from indicating apathy, such cynicism generates a productive critique of domestic politics and Western interventionism. This book illuminates the successes and failures of Palestinians' varied engagements with human rights in their quest for independence.

Microbiological Guidelines - Collective, 2018-04-04

Food plays an essential part in everyday life. Food should be tasty, healthy, sustainable and preferably not too expensive. But food should also be safe and with sufficient guarantees on maintaining good quality aspects until the end of shelf life. The various actors in the food supply chain have an interest in verifying the expected quality and safety by means of microbiological analyses of food. Measurement brings knowledge and microbiological guidelines help in the decision-making process for judging the acceptability of food or food production processes. The present handbook provides microbiological guidelines and current applicable EU legal criteria (status 1.1.2018) for a wide range of food categories (dairy, meat, seafoods, plant-based foods, bakery products, composite foods, shelf-stable food, water) and subcategories therein, based upon the type of food processing and intrinsic characteristics of the foods. This book can be consulted to provide quick answers on the expected microbiological contamination of foodstuff. It can help in interpretation of test results in assessing good (hygienic) practices in the production of food, determining the shelf life and ensuring food safety. The handbook also presents definitions of the wide variety of foodstuffs available and some reflections on, in particular, food safety issues or the on-going debate for some food items in assessing microbial quality. This book provides crucial information about food safety, for the use of students and professionals. EXTRACT "First we eat, then we do everything else" M.F.K. Fisher Food plays an important part in everyday life. But when being a food scientist or in the food business, food gets to be an even bigger part of your life. Our team at the Food Microbiology and Food Preservation research group (FMFP-UGent) at Ghent University during its academic tasks in education, research, scientific activities at committees, but also in interaction with many food companies and stakeholders in the food supply chain in projects or contract work, has built up considerable expertise on the microbiological analysis of a large variety of foodstuffs. Being

situated in Ghent, and thus close to Brussels, the heart of Europe, we intrinsically have to understand and deal with legal EU criteria or action limits. The latter is the reason why this book is mainly oriented towards inclusion or making reference to EU legal microbiological criteria for foodstuffs as well. ABOUT THE AUTHORS The main author, Prof. Mieke Uyttendaele, leads, together with Prof. Frank Devlieghere, the Food Microbiology and Food Preservation Research Group (FMFP-UGent) at Ghent University, Belgium. Her teaching and research area covers aspects of microbiological analysis of foods, food safety and food hygiene. She has built over twenty years of experience by executing, initiating and coordinating various projects in this research discipline dealing with sampling and testing to collect baseline data on the microbial contamination of foods, looking into the virulence of food-borne pathogens, elaborating challenge testing to study the behavior of food-borne pathogens. All this information serves as an input for quality assurance and microbial risk assessment to support food safety decision-making and setting microbiological criteria. She was/is the promotor of more than 25 Ph.D students (including EU and non-EU citizens). Throughout her career, Prof. Uyttendaele has published more than 270 peer reviewed scientific papers, authored several book chapters and presented at numerous international Conferences/Workshops. Throughout the years she has also used her scientific expertise in interpretation of test results for analyses obtained in routine monitoring or analysis executed at the food service lab at FMFP-UGent.

*Evolving Cosmos* - Govert Schilling 2004-11-18

Mankind is a child of the cosmos. The atoms in our bodies originate in the interiors of other stars, and we cannot regard our existence separately from the evolution of the universe. Without the Big Bang and the formation of galaxies, planets and organic molecules, we simply would not have happened. In this fascinating book, science journalist Govert Schilling takes the reader on a whirlwind journey through time. He describes the evolution of the cosmos, from the beginning of space and time fourteen billion years ago, to the creation of the Earth and mankind. The book ends with a glance into the distant future of the universe, because the here and now are only fleeting moments in its biography. A combination of compelling text and breathtaking photographs provide an impressive vision of the place of man in the cosmos.
