Hooked - Nir Eyal 2014-11-04

Revised and Updated, Featuring a New Case Study How do successful companies create products people can't put down? Why do some products capture widespread attention while others flop? What makes us engage with certain products out of sheer habit? Is there a pattern underlying how technologies hook us? Nir Eyal answers these questions (and many more) by explaining the Hook Model—a four-step process embedded into the products of many successful companies to subtly encourage customer behavior. Through consecutive “hook cycles,” these products reach their ultimate goal of bringing users back again and again without depending on costly advertising or aggressive messaging. *Hooked* is based on Eyal's years of research, consulting, and practical experience. He wrote the book he wished had been available to him as a start-up founder—not abstract theory, but a how-to guide for building better products. *Hooked* is

written for product managers, designers, marketers, start-up founders, and anyone who seeks to understand how products influence our behavior. Eyal provides readers with:

- Practical insights to create user habits that stick.
- Actionable steps for building products people love.
- Fascinating examples from the iPhone to Twitter, Pinterest to the Bible App, and many other habit-forming products.

The medical school application procedure can be a cause of great stress for its applicants as well as their parents. The pressure to complete complicated forms and undergo extensive revision as well as the additional anxieties about work experience make it difficult to know where to start. *How To Get into Medical School* offers practical help and advice on all of these subjects and more. It gives you a clear idea of what is required and desired

for medical school applications, real life examples with key learning points of what to avoid and how, as well as sample test questions from the UKCAT and BMAT exams. It is written by a doctor who qualified in medicine from Trinity College Cambridge and who also prepares high school children with potential for applications to Oxbridge and top universities in the UK and US, for the subjects of science and medicine. Online resources for this book include downloadable templates including sample letters, essays and work experience diary.

The Mayo Clinic - David Blistein
2018-09-18

A photo-filled history of the world-renowned medical center, based on the award-winning PBS documentary by Ken Burns, Erik Ewers, and Christopher Loren Ewers. On September 30, 1889, W.W. Mayo and his sons Will and Charlie performed the very first operation at a brand-new Catholic hospital in Rochester, Minnesota. It was called Saint Mary's. The hospital was born

out of the devastation of a tornado that had struck the town six years earlier, after which Mother Alfred Moes of the Sisters of Saint Francis told the Mayos that she had a vision of building a hospital that would "become world renowned for its medical arts." Based on the film by acclaimed documentary filmmaker Ken Burns, *The Mayo Clinic: Faith, Hope, Science* chronicles the history of this unique organization, from its roots as an unlikely partnership between a country doctor and a Franciscan order of nuns to its position today as a worldwide model for patient care, research, and education. Featuring more than 400 compelling archival and modern images, as well as the complete script from the film, the book demonstrates how the institution's remarkable history continues to inspire the way medicine is practiced there today. In addition, case studies reveal patients, doctors, and nurses in their most private moments as together they face difficult diagnoses and embark on uncertain treatments. The

film and this companion book tell the story of an organization that has managed to stay true to its primary value: The needs of the patient come first. Together they make an important contribution to the critical discussions about the delivery of health care today in

America—and the world.
