Analyzing the Strategic Role of Neuromarketing and Consumer Neuroscience - Atli, Dincer 2020-06-19
Marketing research in modern business has developed to include more than just data analytics. Today, an emerging interest

within scientific marketing researches is the movement away from consumer research toward the use of direct neuroscientific approaches called neuromarketing. For companies to be profitable, they need to utilize the neuromarketing approach to

understand how consumers view products and react to marketing, both consciously and unconsciously. Analyzing the Strategic Role of Neuromarketing and Consumer Neuroscience is a key reference source that provides relevant theoretical frameworks and the latest empirical research findings in the neuromarketing field. While highlighting topics such as advertising technologies, consumer behavior, and digital marketing, this publication explores cognitive practices and the methods of engaging customers on a neurological level. This book is ideally designed for marketers, advertisers, product developers, brand managers, consumer behavior analysts, consumer psychologists, managers, executives, behaviorists, business professionals, neuroscientists, academicians, and students.

The Conquest of Cool - Thomas Frank
1998-10-21

While the youth counterculture remains the most evocative and best-remembered symbol of the cultural ferment of the 1960s, the revolution that shook American business during those boom years has gone largely unremarked. In this fascinating and revealing study, Thomas Frank shows how the youthful revolutionaries were joined—and even anticipated—by such unlikely allies as the advertising industry and the men's clothing business. "[Thomas Frank is] perhaps the most provocative

young cultural critic of the moment."—Gerald Marzorati, *New York Times Book Review* "An indispensable survival guide for any modern consumer."—*Publishers Weekly*, starred review "Frank makes an ironclad case not only that the advertising industry cunningly turned the countercultural rhetoric of revolution into a rallying cry to buy more stuff, but that the process itself actually predated any actual counterculture to exploit."—Geoff Pevere, *Toronto Globe and Mail* "The Conquest of Cool helps us understand why, throughout the last third of the twentieth century, Americans have increasingly confused gentility with conformity, irony with protest, and an extended middle finger with a populist manifesto. . . . His voice is an exciting addition to the soporific public discourse of the late twentieth century."—T. J. Jackson Lears, *In These Times* "An invaluable

argument for anyone who has ever scoffed at hand-me-down counterculture from the '60s. A spirited and exhaustive analysis of the era's advertising."—Brad Wieners, *Wired Magazine* "Tom Frank is . . . not only old-fashioned, he's anti-fashion, with a place in his heart for that ultimate social faux pas, leftist politics."—Roger Trilling, *Details The Autocar* - 1988

The Luxury Strategy - Jean-Noël Kapferer
2012-09-03

The *Luxury Strategy*, written by two world experts on the subject, provides the first rigorous blueprint for the effective management of luxury brands and companies at the highest level. It rationalizes those business models that have achieved profitability and unveils the original methods that were used to transform small family businesses such as Ferrari, Louis Vuitton, Cartier, Chanel,

Armani, Gucci, and Ralph Lauren into profitable global brands. By defining the differences between premium and luxury brands and products, analysing the nature of true luxury brands and turning established marketing 'rules' upside down, it has established itself as the definitive work on the essence of a luxury brand strategy. This fully revised second edition of *The Luxury Strategy* explores the diversity of meanings of 'luxury' across different markets. It also now includes a section on marketing and selling luxury goods online and the impact of social networks and digital developments, cementing its position as the authority on luxury strategy.

Brand Admiration - C. Whan Park
2016-09-16

Brand Admiration uses deep research on consumer psychology, marketing, consumer engagement and communication to develop a powerful, integrated perspective and

innovative approach to brand management. Using numerous real-world examples and backed by research from top notch academics, this book describes how companies can turn a product, service, corporate, person or place brand into one that customers love, trust and respect; in short, how to make a brand admired. The result? Greater brand loyalty, stronger brand advocacy, and higher brand equity. Admired brands grow more revenue in a more efficient way over a longer period of time and with more opportunities for growth. The real power of Brand Admiration is that it provides concrete, actionable guidance on how brand managers can make customers (and employees) admire a brand. Admired brands don't just do the job; they offer exactly what customers need (enabling benefits), in way that's pleasing, fun, interesting, and emotionally involving (enticing benefits), while making people feel

good about themselves (enriching benefits). Providing these benefits, called 3 Es, is foundational to building , strengthening and leveraging brand admiration. In addition, the authors articulate a common-sense and action based measure of brand equity, and they develop dashboard metrics to diagnose if there are any 'canaries in the coal mine', and if so, what to do next. In short, Brand Admiration provides a coherent, cohesive approach to helping the brand stand the test of time. A well-designed, well-managed brand becomes a part of the public consciousness, and ultimately, a part of the culture. This trajectory is the fruit of decisions made from an integrated strategic standpoint. This book shows you how to shift the process for your brand, with practical guidance and an analytical approach.

[Branding in Asia](#) - Paul Temporal 2000-02-10
"Paul Temporal shows how the fundamental

principles of brand building are transferable to the Asian environment. A diverse collection of Asian caselets should convince us that the 21st century will see the emergence of more Asian regional and global megabrands." Professor John A Quelch Dean London Business School "Branding in Asia addresses an unusual situation in Asia - how is it that a region which has such high brand appreciation, produces few international brands of its own? The author's analysis of actual case studies, ranging from powerful global brands to local companies, illustrates his points clearly. This, coupled with a sensitive understanding of the cultural differences in the region makes it an excellent reference for everyone working with brands." Felix Herrnberger President BMW Asia Pte Ltd "Paul Temporal succinctly dissects the often mystical qualities that make up a successful brand. Too often Western insights, models

and case studies are applied arbitrarily across the globe, it is so refreshing to see branding tackled from a purely Asian perspective. An invaluable reference book and eminently readable, the step-by-step style and volume of relevant cases and examples makes this a must have for any manager in Asia looking to embark on creating his own regional or global brand."

Rollercoaster - Trevor Merriden 2003-06-27
Rollercoaster is a fast-paced and compelling business narrative that chronicles one of the most dramatic periods in business history. It is the story of Chris Gent and Vodafone. Loved by the City as a brilliant dealmaker, Gent himself is often described by those who know him as affable and self-effacing. Yet he has somehow fostered a deeply engrained culture of ruthless ambition in those who run Vodafone in his name. But as the telecommunications sector has imploded, Vodafone has been swept along by bad news amongst accusations of poor acquisitions, over-investment and "fat cat"

payouts for Gent himself. Trevor Merriden charts the dramatic rise of Gent and Vodafone and assesses the underlying forces driving the man and the company. He examines the turbulent recent history, of Gent's resignation, and asks searching questions about the future of the company. *Sticky Branding* - Jeremy Miller 2015-01-10

The Power of New Urban Tourism -

Claudia Ba 2021-07-21

The Power of New Urban Tourism explores new forms of tourism in urban areas with their social, political, cultural, architectural and economic implications. By investigating various showcases of New Urban Tourism within its social and spatial frames, the book offers insights into power relations and connections between tourism and cityscapes in various socio-spatial settings around the world. Contributors to the volume show how urban space has become a battleground between local residents and visitors, with changing perceptions of tourists as co-users of public and private urban spaces and as influencers of the local economies. This includes different roles of

digital platforms as resources for access to the city and touristic opportunities as well as ways to organise and express protest or shifting representations of urban space. With contemporary cases from a wide disciplinary spectrum, the contributors investigate the power of New Urban Tourism in Africa, Asia, the Americas, Europe and Oceania. This focus allows a cross-cultural evaluation of New Urban Tourism and its dynamic, and changing conception transforming and subverting cities and tourism alike. The Power of New Urban Tourism will be of great interest to academics, researchers and students in the fields of cultural studies, sociology, the political sciences, economics, history, human geography, urban design and planning, architecture, ethnology and anthropology.

Visual Identity of Urban International

Destinations - Lorena De Ferrari 2019

Several cities are not using the logo as an instrument for enhancing the city brand. They made a logo without working on their city brand; therefore, these cities do not have a positioning strategy. Conversely, some cities have worked on their city brand but left their logo as the last priority. A brand's first identification is the logo. Logos adhere to people's minds and are a gateway to the brand since they work as a synthesis of the brand's values. However, a key question emerges, that is, whether city brands are taking advantage of this valuable tool. This research re-evaluates the role of logos in city branding. It examines whether the city brand's logos are supporting brand communication or are merely used as a decorative element. It also explores the current city logo panorama by identifying the most effective graphics development

lines, the features that strengthen these logos, and the design strategies applied to them. The investigation performs a content analysis of the logos in the City Brands Index to judge their design quality and set a parallel ranking. We interview experts in place branding and identity design fields to compare their appraisals on the subject. The results indicate that high-quality design is compulsory for the correct operation of city logos. Provided that high-quality design is not applied to the city logo the message is lost, hence becoming a decoration. In conclusion, cities are not taking advantage of logos as design tools that serve the city brand.

Intellectual Property Law and the Fourth Industrial Revolution -

Christopher Heath 2020-05-22

The convergence of various fields of technology is changing the fabric of society. Big data and data mining, Internet of Things, artificial intelligence and blockchains are already affecting business models and leading to a social and economic transformations that have been dubbed by the fourth industrial revolution. Focusing on the framework of intellectual property rights, the contributions to this book analyse how the technical background of this massive transformation affects intellectual property law and policy and how intellectual property is likely to change in order to serve the society. Well-known authorities in intellectual property law offer in-depth chapters on the roles in this revolution of such concepts and actualities as the following: power and role of data as the raw material of the revolution; artificial inventors and creators; trade marks in the dimension

of avatars and fictional game characters; concept of inventive step change where the person skilled in the art is virtual; data rights versus intellectual property rights; transparency in the context of big data; interrelations of data, technology transfer and antitrust; self-executable and 'smart' contracts; redefining the balance among exclusive rights, development, technology transfer and contracts; and proprietary information versus the public domain. The chapters also provide complete analyses of how big data changes decision-making processes, how sustainable development requires redefinition, how technology transfer is re-emerging as technology diffusion and how the role of contracts and blockchain as instruments of monitoring and enforcement are being defined. Offering the first in-depth legal commentary and analysis of this highly topical issue, the book approaches the fourth industrial revolution

from the perspectives of technical background, society and law. Its authoritative analysis of how the data-driven economy influences innovation and technology transfer is without peer. It will be welcomed by practicing lawyers in intellectual property rights and competition law, as well as by academics, think tanks and policymakers.

Engaging the Heart in Business - Alice Alessandri 2020-07-23

In the wake of the profound upheavals that our society has been facing, the business world is undergoing change. Values such as trust, well-being, sustainability, and respect for human beings and their deeper ambitions are becoming increasingly important. Corporations and professionals can achieve and maintain success only if they can bring their relationship with their customers to a new, higher level. The condition that links the two is very similar to that created when we fall in love. The organizational models and marketing approaches based on the metaphor of war, and the inherent rhetoric of "command and control", are no longer valid; to form such a

bond we need love. The authors are aware of this. Since 2013, in collaboration with international scholars, they have been studying the new market dynamics and the fundamental role of ethics in gaining commercial results. While their previous book *Sales Ethics* (2015) helped to set up and manage customer relationships based on trust and fairness, this new book will support you in building your business strategy and designing marketing tools (from customer analysis, to the definition of your offer and the style of communication, up to the positioning of prices and the management of resources) in the light of a new model, the Loving Business Model, which aims to make the customer fall in love with you, and you with your work. This book, like its predecessor, is the result of independent research conducted between Italy and the United States combined with the authors' many years of professional

experience. It contains the most up-to-date and effective techniques available in the modern marketing landscape, supported by case studies, concrete examples and activities, which will guide you to put your newly acquired knowledge into practice. Brands and Branding - Rita Clifton
2009-04-01

With contributions from leading brand experts around the world, this valuable resource delineates the case for brands (financial value, social value, etc.) and looks at what makes certain brands great. It covers best practices in branding and also looks at the future of brands in the age of globalization. Although the balance sheet

may not even put a value on it, a company's brand or its portfolio of brands is its most valuable asset. For well-known companies it has been calculated that the brand can account for as much as 80 percent of their market value. This book argues that because of this and because of the power of not-for-profit brands like the Red Cross or Oxfam, all organisations should make the brand their central organising principle, guiding every decision and every action. As well as making the case for brands and examining the argument of the anti-globalisation movement that brands are bullies which do harm, this second edition of Brands and Branding provides an expert review of best practice in branding, covering everything from brand positioning to brand protection, visual and verbal identity and brand communications. Lastly, the third part of the book looks at trends in branding, branding in Asia, especially in China and

India, brands in a digital world and the future for brands. Written by 19 experts in the field, *Brands and Branding* sets out to provide a better understanding of the role and importance of brands, as well as a wealth of insights into how one builds and sustains a successful brand.
