**Decisive** - Chip Heath 2013-03-26

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions--in our lives, careers, families and organizations. In *Decisive*, Chip Heath and Dan Heath, the bestselling authors of *Made to Stick* and *Switch*, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have

identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

*Economy, Society and Public Policy* - The Core Team 2019

*Economy, Society, and Public Policy* is a new way to learn economics. It is designed specifically for students studying social sciences, public policy, business studies, engineering and other disciplines who want to understand how the economy works and how it can be made to work better. Topical policy problems are used to motivate learning of key concepts and methods of economics. It engages, challenges and empowers students, and will provide them with the tools to articulate reasoned views on pressing

policy problems. This project is the result of a worldwide collaboration between researchers, educators, and students who are committed to bringing the socially relevant insights of economics to a broader audience. KEY FEATURESESPP does not teach microeconomics as a body of knowledge separate from macroeconomicsStudents begin their study of economics by understanding that the economy is situated within society and the biosphereStudents study problems of identifying causation, not just correlation, through the use of natural experiments, lab experiments, and other quantitative methodsSocial interactions, modelled using simple game theory, and incomplete information, modelled using a series of principal-agent problems, are introduced from the beginning. As a result, phenomena studied by the other social sciences such as social norms and the exercise of power play a roleThe insights of diverse schools of thought, from Marx and the classical economists to Hayek and Schumpeter,

play an integral part in the book. The way economists think about public policy is central to ESPP. This is introduced in Units 2 and 3, rather than later in the course.

BTEC Level 3 National Business Student -

Catherine Richards 2015

BTEC and Heinemann have joined forces to bring you BTEC's own resources for BTEC Level 3 National Business - by the BTEC team, for BTEC learners - to support you every step of the way to BTEC success.

Exercises in Elementary Office Practice -

Margaret Rennie 1978

Two student books cover 18 units from the BTEC

National course, and an accompanying Tutor's Resource File with CD-ROM provides essential support for tutors with the preparation and delivery of lessons. Activities clearly match the assessment requirements of the course, so your students build up plenty of confidence as they go along. Your students need a good depth of theory at this level, but we've related it clearly to actual business practice. They'll be motivated by seeing how they could apply the theories they are learning to real business. Motivating case studies and examples are taken from a wide range of large and small organisations, to give students plenty of exposure to the types of businesses they might end up working in. The supporting Tutor Resource File gives you plenty of extra help in running the course.

**Pearson BTEC Level 3 in Information Technology** - Pm Heathcote 2019-02-19

The aim of this book is to provide comprehensive coverage of topics in Unit 1 of the BTEC Level 3 course in Information Technology in an interesting and approachable manner. If you are studying this course, you need to notice, read about, experience and analyse the impact and implications of current and emerging digital

technologies. Examples and case studies from scenarios and events that have recently been in the news are used to bring the subject to life. Reading and discussing articles from quality newspapers, whether printed or online, discussing relevant TV documentaries, noticing and analysing the use of digital technology in countless aspects of life, as well as learning from a textbook, are all going to contribute to a successful exam result. The book is divided into six sections corresponding to the six Learning Aims outlined in the specification, complementing each of the PG Online teaching resource packs. These sections are divided into between four and eight chapters, each containing material that can be covered in one or two lessons. The chapters have in-text questions which can be used as discussion points in a lesson. An extra chapter at the end of Learning Aim B on "Drawing System Diagrams" will be useful for students faced with a question on the exam for which they are required to draw such a

diagram. In addition to almost 100 in-text questions and discussion points, there are over 80 end-of-chapter exercises that are designed to give practice in answering exam-style questions, using command words such as state, describe, explain, analyse. As much practice as possible is needed in answering such questions and getting feedback from the teacher so as to understand how to gain the maximum possible marks in the final exam.
