

Bureau Of Reclamation Internship Unlv

As recognized, adventure as competently as experience virtually lesson, amusement, as with ease as treaty can be gotten by just checking out a books **Bureau Of Reclamation Internship Unlv** furthermore it is not directly done, you could take even more almost this life, nearly the world.

We allow you this proper as competently as easy habit to get those all. We pay for Bureau Of Reclamation Internship Unlv and numerous ebook collections from fictions to scientific research in any way. along with them is this Bureau Of Reclamation Internship Unlv that can be your partner.

America's Cultural Experiment in China, 1942-1949
- Wilma Fairbank 1976

To Dance On Sands - Marta Becket 2020-11-05

About Marta Becket . . . "Tears came to my eyes. Marta represented to me the spirit of the individual. The spirit of the theater. The spirit of creativity." - Ray Bradbury, Author "Marta's paintings have a degree of humor and playfulness. The use of color is outstanding and tell of a generosity, talent and skill." -Red Skelton, Comedian/Artist "Long before anybody invented the term performance art, Marta Becket was doing it, in an abandoned opera house in Death Valley Junction. She restored it an

The Saga of the Pony Express - Joseph J. DiCerto 2002

Threatened by civil war and Indian uprisings, the government in the mid-1800s needed better communication with its far-flung citizens in the West. Three visionaries dreamt up a seemingly impossible solution: the Pony Express. An elite cadre of riders would carry the U.S. mail across 2,000 miles of inhospitable wilderness in 10 days. Complete with dozens of illustrations, several maps, and appendixes of riders and relay stations--including stations the reader can still see today--The Saga of the Pony Express proves there's a reason some legends endure.

Santa Fe Design - Elmo Baca 1995

Sportsmanship - Tim Delaney 2016-02-16

Sportsmanship is a broad concept: ethics, fairness, honor and self-control. Some people find it difficult to define what makes a "good sport," but state "I know one when I see one." This collection of new essays brings together the work of more than two dozen contributors from around the world who teach sportsmanship in a range of academic disciplines including sociology, psychology, economics, education, kinesiology and applied athletics. Topics include the moral ambiguities of cheating; recreation in prison; ethics and character formation; coaching perspectives; gender; race; and the portrayal of sportsmanship in film. Instructors considering this book for use in a course may request an examination copy here.

Senate Joint Resolutions - Ohio. General Assembly. Senate 1925

Hazardous Metropolis - Jared Orsi 2004-01-05

An fascinating history of flood control efforts in Los Angeles from the 1870s to the present, showing how engineering has continually failed to contain nature. This book teaches us to think of cities as ecosystems.

Agriculture in Semi-Arid Environments - A.E. Hall 2012-12-06

The semi-arid zones of the world are fragile ecosystems which are being substantially modified by the activities of mankind. Increasing human populations have resulted in greater demands on semi-arid zones for providing human sustenance

and the possibility that this may enhance desertification is a grave concern. These zones are harsh habitats for humans. The famines that resulted from drought during the late 1960's and the 1970's in the African Sahel illustrated the unreliability of present agricultural systems in this zone. Large fluctuations in agricultural production have occurred in semi-arid zones of Australia, North America, and the Soviet Union due to periodic droughts, even though considerable agricultural technology has been devoted to agricultural development in these zones. The challenge to mankind is to manage these different semi-arid zones so that productivity is increased and stabilized, and environmental deterioration is decreased. Irrigation can be used to increase and stabilize agricultural production in semi-arid zones as discussed in Volume 5 of this series, *Arid Zone Irrigation*. The present volume, *Agriculture in Semi-Arid Environments*, focuses on dryland farming in semi-arid zones, and is relevant to the large areas of the world where rainfall is limiting and where water is not available for irrigation. This volume is designed to assist agricultural development in these areas and consists of reviews and analyses of available information by scientists working in Africa, Australia, and at the University of California.

New Deal Cowboy - Michael Duchemin 2016-09-22
Best known to Americans as the "singing cowboy," beloved entertainer Gene Autry (1907–1998) appeared in countless films, radio broadcasts, television shows, and other venues. While Autry's name and a few of his hit songs are still widely known today, his commitment to political causes and public diplomacy deserves greater appreciation. In this innovative examination of Autry's influence on public opinion, Michael Duchemin explores the various platforms this cowboy crooner used to support important causes, notably Franklin D. Roosevelt's New Deal and foreign policy initiatives leading up to World War II. As a prolific performer of western folk songs and country-western music,

Autry gained popularity in the 1930s by developing a persona that appealed to rural, small-town, and newly urban fans. It was during this same time, Duchemin explains, that Autry threw his support behind the thirty-second president of the United States. Drawing on a wealth of primary sources, Duchemin demonstrates how Autry popularized Roosevelt's New Deal policies and made them more attractive to the American public. In turn, the president used the emerging motion picture industry as an instrument of public diplomacy to enhance his policy agendas, which Autry's films, backed by Republic Pictures, unabashedly endorsed. As the United States inched toward entry into World War II, the president's focus shifted toward foreign policy. Autry responded by promoting Americanism, war preparedness, and friendly relations with Latin America. As a result, Duchemin argues, "Sergeant Gene Autry" played a unique role in making FDR's internationalist policies more palatable for American citizens reluctant to engage in another foreign war. *New Deal Cowboy* enhances our understanding of Gene Autry as a western folk hero who, during critical times of economic recovery and international crisis, readily assumed the role of public diplomat, skillfully using his talents to persuade a marginalized populace to embrace a nationalist agenda. By drawing connections between western popular culture and American political history, the book also offers valuable insight concerning the development of leisure and western tourism, the information industry, public diplomacy, and foreign policy in twentieth-century America.

Uncle - Irena McCammon Scott 2019-07-15
In the most comprehensive biographical study of John Purdue (c. 1802-1876) to date, Purdue's great-great-grandniece describes her travels to the diverse places where Purdue had lived in order to learn about the mysterious relative known in her family as Uncle. Using fresh, unpublished source materials-including Purdue's personal correspondence, business ledgers, and the family

oral histories-the author examines Purdue's beginning among illiterate, immigrant, Pennsylvania mountain-hollow folks. Uncle challenges a commonly held belief that Purdue was a cold-hearted business mogul. Instead the author shows Purdue as a human being and as a generous family man with a visionary nature.

Urban Water Demand Management and Planning - Duane D. Baumann 1998

Aims to demonstrate why demand-side management is critical to urban water supply planning and to provide methods for incorporation. This book explains how and why urban water demands have changed over time and includes methods for the analysis of urban water demands. It also offers methods for integrating supply side and demand-side planning and management.

The Last Oasis - Sandra Postel 2014-07-16

For decades now we have wasted and mismanaged the world's water supplies. Today, 27 countries are short of water, a quarter of the world's population has no safe water, 46 per cent have no proper sanitation and each year four million children die of water-borne diseases. As most of the world's major river systems cross several national boundaries, the scope disputes and the threat to international security is becoming more and more real. In *The Last Oasis*, Sandra Postel examines the economic, ecological and political factors affecting fresh water supply. She confronts the issues of mismanagement and profligacy and analyses and dangers of confrontation, both between nations and between rural and urban users. She also emphasises that the technology and know-how for effective water husbandry does exist. With methods already in use, farmers could cut their demand for water by 40-90 per cent, and cities by one-third, without sacrificing economic output or quality of life. Investing in water efficiency, recycling and conservation help meet rising demands and stave off disaster. But the priority is a common recognition of the gravity of the position, and with that a widespread push for institutions to manage sustainable use of water.

Writing Centers and the New Racism - Laura Greenfield 2011-12-16

Noting a lack of sustained and productive dialogue about race in university writing center scholarship, the editors of this volume have created a rich resource for writing center tutors, administrators, and scholars. Motivated by a scholarly interest in race and whiteness studies, and by an ethical commitment to anti-racism work, contributors address a series of related questions: How does institutionalized racism in American education shape the culture of literacy and language education in the writing center? How does racism operate in the discourses of writing center scholarship/lore, and how may writing centers be unwittingly complicit in racist practices? How can they meaningfully operationalize anti-racist work? How do they persevere through the difficulty and messiness of negotiating race and racism in their daily practice? The conscientious, nuanced attention to race in this volume is meant to model what it means to be bold in engagement with these hard questions and to spur the kind of sustained, productive, multi-vocal, and challenging dialogue that, with a few significant exceptions, has been absent from the field.

Perspectives on Water - David H. Speidel 1988

This important volume contains 36 chapters from such varied sources as U.S. government publications, scientific journals, and other relevant works. Together these articles offer a uniquely comprehensive discussion of water--its place in the environment; its uses, problems, and hazards; and its regulation by law, management procedures, and the economy. The authors present a rational approach to current problems and potential difficulties, stating the issues clearly without ignoring their complexity. It is crucial reading for undergraduates and graduate students of water resources in departments of geology, geography, and environmental science; as well as for hydrology students in departments of civil engineering, geology, and agriculture.

LatinX Voices - Katie Coronado 2018-07-16

LatinX Voices is the first undergraduate textbook that includes an overview of Hispanic/LatinX Media in the U.S. and gives readers an understanding of how media in the United States has transformed around this audience. Based on the authors' professional and research experience, and teaching broadcast media courses in the classroom, this text covers the evolving industry and offers perspective on topics related to Latin-American areas of interest. With professional testimonials from those who have left their mark in print, radio, television, film and new media, this collection of chapters brings together expert voices in Hispanic/LatinX media from across the U.S., and explains the impact of this population on the media industry today.

Thirteen Ways - Robert Harbison 1997

Robert Harbison offers a novel interpretation of what architectural theory might look like. The title is based on Wallace Stevens' "Thirteen Ways of Looking at a Blackbird", and like the poem, Harbison's work is a composite structure built of oblique meanings and shifts that give a portrait of architecture in which symbol and metaphor coexist. 10 illustrations.

Riparian Ecosystems - 1981

Guidelines for Water Reuse - 2004

Archaeology of the Old Spanish Trail/Mormon Road from Las Vegas, Nevada to the California Border - Keith Myhrer 1990

Solar Cell Nanotechnology - Atul Tiwari 2013-10-21
Focusing on the cutting-edge technologies available in the field of photovoltaics, *Solar Cell Nanotechnology* explores the latest research and development activities related to organic, inorganic, and hybrid materials being used in solar cell manufacturing. Several chapters are dedicated to explaining the fundamentals of photovoltaics and nanomaterials utilized in the manufacturing of solar

cells. Other essential subjects, such as microcontact printing, plasmonic light trapping, outdoor and indoor efficiency, luminescent solar concentrators, and photon management in photovoltaics, are comprehensively reviewed. Written for a broad audience, this is an essential book for engineers, nanotechnologists, and materials scientists.

The First 100 - A. D. Hopkins 2000-12

Profiles 100 people who played an important role in the creation of Las Vegas, Nevada, from the first Mormon settlers in the early 1900s to the business entrepreneurs of the last years of the 20th century.

African Americans on the Western Frontier - Monroe Lee Billington 1998

Thirteen essays examine the roles African-Americans played in the settling of the American West, discussing the slaves of Mormons and California gold miners; African-American army men, cowboys, and newspaper founders; and others on the frontier. Also includes a bibliographic essay.

The Size of the Risk - Leisl Carr-Childers 2015-10-09

The Great Basin, a stark and beautiful desert filled with sagebrush deserts and mountain ranges, is the epicenter for public lands conflicts. Arising out of the multiple, often incompatible uses created throughout the twentieth century, these struggles reveal the tension inherent within the multiple use concept, a management philosophy that promises equitable access to the region's resources and economic gain to those who live there. Multiple use was originally conceived as a way to legitimize the historical use of public lands for grazing without precluding future uses, such as outdoor recreation, weapons development, and wildlife management. It was applied to the Great Basin to bring the region, once seen as worthless, into the national economic fold. Land managers, ranchers, mining interests, wilderness and wildlife advocates, outdoor recreationists, and even the military adopted this ideology to accommodate, promote, and sanction a multitude of activities on public lands, particularly those overseen by the Bureau of Land

Management. Some of these uses are locally driven and others are nationally mandated, but all have exacted a cost from the region's human and natural environment. In *The Size of the Risk*, Leisl Carr Childers shows how different constituencies worked to fill the presumed "empty space" of the Great Basin with a variety of land-use regimes that overlapped, conflicted, and ultimately harmed the environment and the people who depended on the region for their livelihoods. She looks at the conflicts that arose from the intersection of an ever-increasing number of activities, such as nuclear testing and wild horse preservation, and how Great Basin residents have navigated these conflicts. Carr Childers's study of multiple use in the Great Basin highlights the complex interplay between the state, society, and the environment, allowing us to better understand the ongoing reality of living in the American West.

The Great Basin - Eliot Blackwelder 2012-04-01
Additional Contributor Is Robert R. Miller. *The Geological Background; The Zoological Evidence; Climatic Changes And Pre-White Man. Bulletin Of The University Of Utah*, V38, No. 20, June 30, 1948. *Biological Series*, V10, No. 7.

The Mortifications - Derek Palacio 2017-08-22
Derek Palacio's stunning, mythic novel marks the arrival of a fresh voice and a new chapter in the history of 21st century Cuban-American literature. In 1980, a rural Cuban family is torn apart during the Mariel Boatlift. Uxbal Encarnación—father, husband, political insurgent—refuses to leave behind the revolutionary ideals and lush tomato farms of his sun-soaked homeland. His wife Soledad takes young Isabel and Ulises hostage and flees with them to America, leaving behind Uxbal for the promise of a better life. But instead of settling with fellow Cuban immigrants in Miami's familiar heat, Soledad pushes further north into the stark, wintry landscape of Hartford, Connecticut. There, in the long shadow of their estranged patriarch, now just a distant memory, the exiled mother and her children begin a process of growth and

transformation. Each struggles and flourishes in their own way: Isabel, spiritually hungry and desperate for higher purpose, finds herself tethered to death and the dying in uncanny ways. Ulises is bookish and awkwardly tall, like his father, whose memory haunts and shapes the boy's thoughts and desires. Presiding over them both is Soledad. Once consumed by her love for her husband, she begins a tempestuous new relationship with a Dutch tobacco farmer. But just as the Encarnacións begin to cultivate their strange new way of life, Cuba calls them back. Uxbal is alive, and waiting. Breathtaking, soulful, and profound, *The Mortifications* is an intoxicating family saga and a timely, urgent expression of longing for one's true homeland.

Females Going Ape - Irena Scott 2015-10-30

Social and Ecological System Dynamics - Krystyna Stave 2017-04-06

This book is a social—ecological system description and feedback analysis of the Lake Tana Basin, the headwater catchment of the Upper Blue Nile River. This basin is an important local, national, and international resource, and concern about its sustainable development is growing at many levels. Lake Tana Basin outflows of water, sediments, nutrients, and contaminants affect water that flows downstream in the Blue Nile across international boundaries into the Nile River; the lake and surrounding land have recently been proposed as a UNESCO Biosphere Reserve; the basin has been designated as a key national economic growth corridor in the Ethiopian Growth and Transformation Plan. In spite of the Lake Tana Basin's importance, there is no comprehensive, integrated, system-wide description of its characteristics and dynamics that can serve as a basis for its sustainable development. This book presents both the social and ecological characteristics of the region and an integrated, system-wide perspective of the feedback links that shape social and ecological change in the basin. Finally, it summarizes key

research needs for sustainable development.

Lead Toxicity - Sarah E. Royce 2000

Consolidated Translation Survey - United States.
Central Intelligence Agency 1970-11

Counterculture Green - Andrew G. Kirk 2007

For many, it was more than a publication: it was a way of life. The Whole Earth Catalog billed itself as "Access to Tools," and it grew from a Bay Area blip to a national phenomenon catering to hippies, do-it-yourselfers, and anyone interested in self-sufficiency independent of mainstream America (now known as "living off the grid"). In recovering the history of the Catalog's unique brand of environmentalism, historian Kirk recounts how Stewart Brand and the Point Foundation promoted a philosophy of pragmatic environmentalism that celebrated technological achievement, human ingenuity, and sustainable living. Kirk shows us that Whole Earth was more than a mere counterculture fad. At a time when many of these ideas were seen as heretical to a predominantly wilderness-based movement, it became a critical forum for environmental alternatives and a model for how complicated ecological ideas could be presented in a hopeful and even humorous way.-- From publisher description.

The State of Sex - Barbara G. Brents 2009-12-16

The State of Sex is a study of Nevada's brothels that situates the nation's only legal brothel industry in the political economy of contemporary tourism. Nevada is part of the "new American heartland," as its pastimes, people, and politics have become more central to the nation. The rise of a service and leisure economy over the past sixty years has propelled sexuality into the heart of contemporary markets. Yet, neoliberal laws in the United States promote business but limit sexual commerce. How have Nevada's legal brothels survived, while the rest of the country criminalizes prostitution? How do brothels operate? Who works in them? This book brings social theory on globalizing economies,

politics, leisure consumption, and emotional labor in interactive service work together with research on contemporary prostitution and sexual commerce.

The authors employ an innovative, multi-method sociological approach, combining historical analysis of how the brothels came to be with over a decade's worth of ethnographic research on the current state of the industry.

Research Centers Directory - 1986

Research institutes, foundations, centers, bureaus, laboratories, experiment stations, and other similar nonprofit facilities, organizations, and activities in the United States and Canada. Entry gives identifying and descriptive information of staff and work. Institutional, research centers, and subject indexes. 5th ed., 5491 entries; 6th ed., 6268 entries.

Parasitic Diseases Seventh Edition - Dickson
Despommier 2019

Textbook on parasitic diseases

Cato Supreme Court Review, 2003-2004 - Mark K.
Moller 2004-10-25

Published every September in celebration of Constitution Day, the Cato Supreme Court Review brings together leading legal scholars to analyze the most important cases of the Court's most recent term. It is the first scholarly review to appear after the term's end and the only one to critique the court from a Madisonian perspective.

Twelve Years A Slave (Illustrated) - Solomon
Northup 2014-08-22

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in

Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

Hoover Dam - Joseph E. Stevens 2014-11-20

In the spring of 1931, in a rugged desert canyon on the Arizona-Nevada border, an army of workmen began one of the most difficult and daring building projects ever undertaken—the construction of Hoover Dam. Through the worst years of the Great Depression as many as five thousand laborers toiled twenty-four hours a day, seven days a week, to erect the huge structure that would harness the Colorado River and transform the American West. Construction of the giant dam was a triumph of human ingenuity, yet the full story of this monumental endeavor has never been told. Now, in an engrossing, fast-paced narrative, Joseph E. Stevens recounts the gripping saga of Hoover Dam. Drawing on a wealth of material, including manuscript collections, government documents, contemporary newspaper and magazine accounts, and personal interviews and correspondence with men and women who were involved with the construction, he brings the Hoover Dam adventure to life. Described here in dramatic detail are the deadly hazards the work crews faced as they hacked and blasted the dam's foundation out of solid rock; the bitter political battles and violent labor unrest that threatened to shut the job down; the deprivation and grinding hardship endured by the workers' families; the dam builders' gambling, drinking, and whoring sprees in nearby Las Vegas; and the stirring triumphs and searing moments of terror as the massive concrete wedge rose inexorably from the canyon floor. Here, too, is an unforgettable cast of characters: Henry Kaiser, Warren Bechtel, and Harry Morrison, the ambitious, headstrong construction executives who gambled fortune and fame on the Hoover Dam

contract; Frank Crowe, the brilliant, obsessed field engineer who relentlessly drove the work force to finish the dam two and a half years ahead of schedule; Sims Ely, the irascible, teetotaling eccentric who ruled Boulder City, the straightlaced company town created for the dam workers by the federal government; and many more men and women whose courage and sacrifice, greed and frailty, made the dam's construction a great human, as well as technological, adventure. Hoover Dam is a compelling, irresistible account of an extraordinary American epic.

Becoming a Landscape Architect - Kelleann Foster 2010-05-20

Explore exciting options for a career in landscape architecture Blending aesthetics and environmental consciousness, landscape architecture is one of the fastest growing fields, according to the US Department of Labor. **Becoming a Landscape Architect** gives you a comprehensive survey of the field as it is practiced today, and explains how to get started and how to succeed in this exciting, creative, and in-demand profession. Featuring more than thirty-five interviews with leading landscape architects and more than 250 illustrations, the guide covers everything an aspiring landscape architect needs to know- from education and training, design specialties, and work settings to preparing an effective portfolio and finding a job in residential, ecological, commercial, and parks design. Complete guide to the profession of landscape architecture, one of today's fastest growing fields More than thirty-five interviews with leading landscape designers and educators give you an idea of what it's really like to work as a landscape architect Over 250 striking illustrations and a lively interior make the book visually appealing as well as informative Explains different educational paths and their prerequisites and requirements Author Kelleann Foster is Associate Professor and Assistant Department Head, Department of Landscape Architecture, Pennsylvania State University and Managing Partner, Visual Interactive
