TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

Language, Education and Nation-building - P. Sercombe 2014-09-02

This volume tracks the complex relationships between language, education and nation-building in Southeast Asia, focusing on how language policies have been used by states and governments as instruments of control, assimilation and empowerment. Leading scholars have contributed chapters each representing one of the countries in the region.

The Sino-Tibetan Languages - Randy J. LaPolla 2006-05-17

There are more native speakers of Sino-Tibetan languages than of any other language family in the world. Records of these languages are among the oldest for any human language, and the amount of active research on them, both diachronic and synchronic, has multiplied in the last few decades. This volume includes overview articles as well as descriptions of individual languages and comments on the subgroups in which they occur. In addition to a number of modern languages, there are descriptions of several ancient languages.

Concise Encyclopedia of Languages of the World - 2010-04-06

Concise Encyclopedia of Languages of the World is an authoritative single-volume reference resource comprehensively describing the major languages and language families of the world. It will provide full descriptions of the phonology, semantics, morphology, and syntax of the world's major languages, giving insights into their structure, history and development, sounds, meaning, structure, and language family, thereby both highlighting their diversity for comparative study, and contextualizing them according to their genetic relationships and regional distribution. Based on the highly acclaimed and award-winning Encyclopedia of Language and Linguistics, this volume will provide an edited collection of almost 400 articles throughout which a representative subset of the world's major languages are unfolded and explained in up-to-date terminology and authoritative interpretation, by the leading scholars in linguistics. In highlighting the diversity of the world's languages – from the thriving to the endangered and extinct – this work will be the first point of call to any language expert interested in this huge area. No other single volume will match the extent of language coverage or the authority of the contributors of Concise Encyclopedia of Languages of the World. * Extraordinary breadth of coverage: a comprehensive selection of just under 400 articles covering the world's major languages, language families, and classification structures, issues and disputes * Peerless quality: based on 20 years of academic development on two editions of the leading reference resource in linguistics, Encyclopedia of Language and Linguistics * Unique authorship: 350 of the world's leading experts brought together for one purpose * Exceptional editorial selection, review and validation process: Keith Brown and Sarah Ogilvie act as first-tier guarantors for article quality and

coverage * Compact and affordable: one-volume format makes this suitable for personal study at any institution interested in areal, descriptive, or comparative language study - and at a fraction of the cost of the full encyclopedia

Myanmar (Burma) since the 1988 Uprising - Andrew Selth 2022-01-24

Updated by popular demand, this is the fourth edition of this important bibliography. It lists a wide selection of works on or about Myanmar published in English and in hard copy since the 1988 pro-democracy uprising, which marked the beginning of a new era in Myanmar's modern history. There are now 2,727 titles listed. They have been written, edited, translated or compiled by over 2,000 people, from many different backgrounds. These works have been organized into thirty-five subject chapters containing ninety-five discrete sections. There are also four appendices, including a comprehensive reading guide for those unfamiliar with Myanmar or who may be seeking guidance on particular topics. This book is an invaluable aid to officials, scholars, journalists, armchair travellers and others with an interest in this fascinating but deeply troubled country.

The Handbook of Linguistic Human Rights - Tove Skutnabb-Kangas 2022-12-20

A groundbreaking new work that sheds light on case studies of linguistic human rights around the world, raising much-needed awareness of the struggles of many peoples and communities The first book of its kind, the Handbook of Linguistic Human Rights presents a diverse range of theoretically grounded studies of linguistic human rights, exemplifying what linguistic justice is and how it might be achieved. Through explorations of ways in which linguistic human rights are understood in both national and international contexts, this innovative volume demonstrates how linguistic human rights are supported or violated on all continents, with a particular focus on the marginalized languages of minorities and Indigenous peoples, in industrialized countries and the Global South. Organized into five parts, this volume first presents approaches to linguistic human rights in international and national law, political theory, sociology, economics, history, education, and critical theory. Subsequent sections address how international standards are promoted or impeded and cross-cutting issues, including translation and interpreting, endangered languages and the internet, the impact of global English, language testing, disaster situations, historical amnesia, and more. This essential reference work: Explores approaches to linguistic human rights in countries of great demographic diversity and conflict Covers cases of linguistic human rights in the Americas, China, Europe, North Africa, India, Nepal and New Zealand, including international minorities, such as the Kurds and the Roma, and the Deaf worldwide. Illustrates how education worldwide has often blocked off minority languages by not offering mother-tongue medium education Presents and assesses conventions, declarations, and recommendations that recognize the rights of Indigenous peoples and minorities. Includes a selection of short texts that present additional existential evidence of linguistic human rights. Edited by two renowned leaders in the field, the Handbook of Linguistic Human Rights is an ideal resource for undergraduate and graduate students of language and law, sociolinguistics, applied linguistics, language policy, language education, indigenous studies, language rights, human rights, and globalization.

The Mainland Southeast Asia Linguistic Area - Alice Vittrant 2019-06-04

This book lies at the crossroads of areal typology, language contact and genetic affiliation. Concerned with mainland Southeast Asia in particular, the various grammatical sketches lay emphasis on characteristics shared by unrelated languages.

The Journal of the Burma Research Society - Burma Research Society 1918

The World's Major Languages - 2009-01-13

This volume features over 50 of the world's languages and language families. The featured languages have been chosen based on the number of speakers, their role as official languages and their cultural and historical importance. Each language is looked at in depth, and the chapters provide information on both grammatical features and on salient features of the language's history and cultural role. This second edition has been updated and revised. Two new languages, Amharic and Javanese, have been included. This accessible volume will appeal to anyone with an interest in linguistics. Key features: Attention is paid to both grammatical and sociolinguistic features. Attention is concentrated on the world's major languages. Designed to be accessible to all readers with an interest in language.

Languages of Mainland Southeast Asia - N.J. Enfield 2015-03-30

The studies in this book represent the rich, diverse and substantial research being conducted today in the linguistics of Mainland Southeast Asia. The chapters cover a broad scope. Several studies address questions of language relatedness, often challenging conventional assumptions about the status of language contact as an explanatory factor in accounting for linguistic similarities. Several address the question of Mainland Southeast Asia as a linguistic area, exploring new ways to imagine and define the boundaries, and indeed the boundedness, of a Mainland Southeast Asia area. Two contributions rethink the received notion of the 'sesquisyllable' with new empirical and theoretical angles. And a set of chapters explores topics in the morphology and syntax of the region's languages, sometimes challenging orthodox assumptions and claims about what a typical language of Mainland Southeast Asia is like. Written by leading researchers in the field, and with a substantial overview of current knowledge and new directions by the volume editors N. J. Enfield and Bernard Comrie, this book will serve as an authoritative source on where the linguistics of Mainland Southeast Asia is at, and where it is heading.

Sociolinguistics Around the World - Martin J Ball 2009-12-16

Offers a survey of research trends in sociolinguistics around the world. This work focuses on traditional variationist sociolinguistics and on the areas of bi- and multilingualism together with diglossia and code-switching, language and culture, language and power and language planning.

Encyclopedia of Linguistics - Philipp Strazny 2013-02-01

Utilizing a historical and international approach, this valuable two-volume resource makes even the more complex linguistic issues understandable for the non-specialized reader. Containing over 500 alphabetically arranged entries and an expansive glossary by a team of international scholars, the Encyclopedia of Linguistics explores the varied perspectives, figures, and methodologies that make up the field.

Linguistics in South Asia - Murray B. Emeneau 2016-11-21

The Aesthetics of Grammar - Jeffrey P. Williams 2014

This book provides a detailed comparative overview of an array of elaborate grammatical resources used in Southeast Asian languages.

Rethinking Grammaticalization - María José López-Couso 2008

This volume and its companion one "Theoretical and empirical issues in grammaticalization" offer a selection of papers from the "Third International Conference New Reflections on Grammaticalization," held in Santiago de Compostela

in July 2005. From the rich programme of the conference (over 120 papers), the twelve contributions included in this volume were carefully selected to reflect the state of current research in grammaticalization and suggest possible directions for future investigations in the field. Combining theoretical discussions with the analysis of particular test cases from a wide range of languages from various language families, the selected papers focus on such central questions as the need for a broader notion of grammaticalization, the distorting effects of grammaticalization on grammar, the areal perspective in grammaticalization and the relevance of contact-induced change to grammaticalization. Other topics discussed include the development of markers of textual connectivity and the emergence of cardinal numerals and numeral systems. **The Routledge International Handbook of Language Education Policy in Asia** - Andy Kirkpatrick 2019-04-17

This must-have handbook offers a comprehensive survey of the field. It reviews the language education policies of Asia, encompassing 30 countries sub-divided by regions, namely East, Southeast, South and Central Asia, and considers the extent to which these are being implemented and with what effect. The most recent iteration of language education policies of each of the countries is described and the impact and potential consequence of any change is critically considered. Each country chapter provides a historical overview of the languages in use and language education policies, examines the ideologies underpinning the language choices, and includes an account of the debates and controversies surrounding language and language education policies, before concluding with some predictions for the future.

The Matrix Of Language - Donald Brenneis 2018-02-20

This book presents a range of methodological approaches and case studies that illustrate the interconnection of language, culture, and social practice. It is useful for anyone exploring the relation of language to psychology, political theory, feminist studies, and literature and folklore.

Levels in Clause Linkage - Tasaku Tsunoda 2018-02-05

This is a cross-linguistic exploration of the use of clause linkage markers in causal, conditional, and concessive sentences. Employing a five-level classification of clause linkage based on semantic and pragmatic grounds, it shows that, within individual languages different markers exhibit different distributions on the five levels. Also, the rich evidence presented from seventeen languages from many parts of the world documents that these distributions present commonalities as well as differences across the languages of the sample.

Burmese - Julian K. Wheatley 1982

The Languages and Linguistics of Mainland Southeast Asia - Paul Sidwell 2021-08-23

The handbook will offer a survey of the field of linguistics in the early 21st century for the Southeast Asian Linguistic Area. The last half century has seen a great increase in work on language contact, work in genetic, theoretical, and descriptive linguistics, and since the 1990s especially documentation of endangered languages. The book will provide an account of work in these areas, focusing on the achievements of SEAsian linguistics, as well as the challenges and unresolved issues, and provide a survey of the relevant major publications and other available resources. We will address: Survey of the languages of the area, organized along genetic lines, with discussion of relevant political and cultural background issues Theoretical/descriptive and typological issues Genetic classification and historical linguistics Areal and contact linguistics Other

areas of interest such as sociolinguistics, semantics, writing systems, etc. Resources (major monographs and monograph series, dictionaries, journals, electronic data bases, etc.) Grammar sketches of languages representative of the genetic and structural diversity of the region.

The Major Languages of East and South-East Asia - Bernard Comrie 2022-01-27

Based on Bernard Comrie's much praised *The World's Major Languages*, this is a key guide to an important language family. The areas covered include Chinese, Japanese and Sino-Tibetan languages.

The Vanishing Languages of the Pacific Rim - Osahito Miyaoka 2007-04-12

This book presents the first comprehensive survey of the languages of the Pacific rim, a vast region containing the greatest typological and genetic diversity in the world. It includes the littoral regions of North and South America, Australasia, east and south-east Asia, and Japan, as well as the Pacific itself. As its languages decline and disappear, sometimes without trace, this rich linguistic heritage is rapidly eroding. In *The Vanishing Languages of the Pacific Rim* distinguished scholars report on the current state of the region's languages and provides a critical survey of the current state of the region's languages. They show what is currently known and recorded and what remains to be examined and documented. They consider which languages are the most vulnerable to extinction and what steps that can be taken to save them. Their analyses range from the regional to the local and focus on languages in a wide variety of social and ecological settings. Together they make a compelling case for research throughout the region, and show how and where this needs to be done.

Cross-linguistic Semantics of Tense, Aspect, and Modality - Lotte Hogeweg 2009-11-30

In recent years, we have witnessed, on the one hand, an increased interest in cross-linguistic data in formal semantic studies, and, on the other hand, an increased concern for semantic issues in language typology. However, only few studies combine semantic and typological research for a particular semantic domain (such as the papers in Bach et al. (1995) on quantification and Smith (1997) on aspect). This book brings together formal semanticists with a cross-linguistic perspective and/or those working on lesser-known languages, and typologists interested in semantic theory, to discuss semantic variation in the specific domain of Tense, Aspect, and Mood/Modality.

Burmese Supernaturalism - Melford E. Spiro 2017-07-12

Though the people of Burma, now called Myanmar, are formally Buddhist, their folk religion a type of animism or supernaturalism is so unlike classical Buddhism that it seems contradictory. For years scholars of religion and anthropology have debated the questions: Do these folk beliefs make up a separate religious system? Or is there a subtle merging of supernaturalism and Buddhism, a kind of syncretism? In either case, how exactly does folk religion fit into the overall religious pattern? Melford Spiro's *Burmese Supernaturalism* has been one of the major works in this debate, both for its position on the "two religions" question and for its arguments concerning the psychological basis of religion. The book begins with an introduction to the study of supernaturalism. The next section of the work covers various types of supernaturalism, including witches, ghost, and demons. Other areas of discussion include supernaturally caused illness and its treatment, the shaman, the exorcist, and the relationship between supernaturalism and Buddhism. In the introduction to this expanded edition Spiro further develops the underlying logic of his argument and evaluates the most recent contributions to the field of the anthropology of religion. *Burmese Supernaturalism* is an

intriguing study and will provide insightful reading for anthropologists, sociologists, theologians, as well as those interested in supernaturalism in Burma (Myanmar) and other cultures.

Tawang, Monpas and Tibetan Buddhism in Transition - M. Mayilvaganan 2020-06-11

This book presents various facets of border life in the strategic eastern sector of the India-China frontier, i.e. the Monpas of Tawang. It addresses the history of the Monpas' transnational cultural and religious interaction. The respective chapters cover diverse topics such as culture, religion, the environment, border management, and social activism. The book offers a compelling analysis of Mon identity, their lifestyles in transition, and the reach of development politics in the Tawang borderland. It maximizes the reader's insights into development works in borderlands. This book is an essential guide for students, scholars, activists, policy makers, and anyone interested in learning about this unique geographical borderland of Monpa.

The Folk-tales of Burma - Gerry Abbott 2018-12-24

This handbook is the first in-depth overview of the fascinating world of Burmese folk-tales. Part one provides a wide-ranging and multi-disciplinary survey of folk-tale studies, together with a broad functional classification of Burma's tales. Part two presents, mostly for the first time in a European language, the categorized actual tales themselves. With commentaries on plots and cross-cultural motifs - past and present. With index, substantial bibliography, and suggestions for further research.

Language and National Identity in Asia - Andrew Simpson 2007-08-30

Language and National Identity in Asia is a comprehensive introduction to the role of language in the construction and development of nations and national identities in Asia. Leading scholars from all over the world investigate the role languages have played and now play in the formation of the national and social identity in countries throughout South, East, and Southeast Asia. They consider the relation of the regions' languages to national, ethnic, and cultural identity, and examine the status of and interactions between majority, official, and minority languages. Illustrated with maps and accessibly written this book will interest all those concerned to understand the dynamics of social change in some of the most important countries in the world. It will appeal to all those studying, researching, or teaching issues in Asian society, language, and politics from a comparative perspective.

Linguistics in East Asia and South East Asia - Chao Yuen Ren 2019-04-01

To celebrate the 270th anniversary of the De Gruyter publishing house, the company is providing permanent open access to 270 selected treasures from the De Gruyter Book Archive. Titles will be made available to anyone, anywhere at any time that might be interested. South-East Asia - Patricia Herbert 1989-01-01

Mainland Southeast Asian Languages - N. J. Enfield 2019

A concise introduction to the languages of mainland Southeast Asia that provides a new look at this unique area.

The World's Major Languages - Bernard Comrie 2018-04-17

The World's Major Languages features over 50 of the world's languages and language families. This revised edition includes updated bibliographies for each chapter and up-to-date census figures. The featured languages have been chosen based on the number of speakers, their role as official languages and their cultural and historical importance. Each language is looked at in depth, and the chapters provide information on both grammatical features and on salient features of the language's history and cultural role. The World's Major Languages is an accessible and essential reference work for linguists.

Studies in Burmese Linguistics - Justin Watkins 2005

Studies in Burmese Linguistics' is a unique collection of articles dedicated to the linguistics of Burmese, a major language of South East Asia with perhaps forty million speakers, more than any other language in the diverse Tibeto-Burman language family. The articles cover various sub-disciplines within linguistics which will be of general interest to a broad constituency of linguists, including the phonology and the phonetics of constituent focus, a synchronic and diachronic treatment of reflexives, a discussion of optionality in morphosyntax, an analysis of the grammaticalisation of the verb 'give' as a causativiser, three complementary articles on the verbal tense-mode-aspect system and two on Old Burmese, the language of 11-13th Century inscriptions. There is also a report of a major German-Burmese lexicography project. The contributors have been invited to

write on research topics of their own choosing, making the volume a representative of current research on Burmese rather than a systematic linguistic survey of the language. While not all the articles are theory-neutral, the book has been edited to ensure accessibility to a broad readership, as well as consistent transcription, transliteration and linguistic glossing across all the articles.

Trans-Himalayan Linguistics - Thomas Owen-Smith 2013-12-12

The Himalaya and surrounding regions are amongst the world's most linguistically diverse places. Of an estimated 600 languages spoken here at Asia's heart, few are researched in depth and many virtually undocumented. Historical developments and relationships between the region's languages also remain poorly understood. This book brings together new work on under-researched Himalayan languages with investigations into the complexities of the area's linguistic history, offering original data and perspectives on the synchrony and diachrony of the Greater Himalayan Region. The volume arises from papers given and topics discussed at the 16th Himalayan Languages Symposium in London in 2010. Most papers focus on Tibeto-Burman languages. These include topics relating to individual - mostly small and endangered - languages, such as Tilung, Shumcho, Rengmitca, Yongning Na and Tshangla; comparative research on the Tibetic, East Bodish and Tamangic language groups; and several papers whose scope covers the whole language family. The remaining paper deals with the origins of Burushaski, whose genetic affiliation remains uncertain. This book will be of special interest to scholars of Tibeto-Burman, and historical as well as general linguists.
