Demystifying AI for the Enterprise -

Prashant Natarajan 2021-12-31

Artificial intelligence (AI) in its various forms — machine learning, chatbots, robots, agents, etc. — is increasingly being seen as a core component of enterprise business workflow and information management systems. The current promise and hype around AI are being driven by software vendors, academic research projects, and startups. However, we posit that the greatest promise and potential for AI lies in the

enterprise with its applications touching all organizational facets. With increasing business process and workflow maturity, coupled with recent trends in cloud computing, datafication, IoT, cybersecurity, and advanced analytics, there is an understanding that the challenges of tomorrow cannot be solely addressed by today's people, processes, and products. There is still considerable mystery, hype, and fear about AI in today's world. A considerable amount of current discourse focuses on a dystopian future that could adversely affect humanity. Such opinions, with understandable fear of the unknown, don't consider the history of human innovation, the current state of business and technology, or the primarily augmentative nature of tomorrow's AI. This book demystifies

AI for the enterprise. It takes readers from the basics (definitions, state-of-the-art, etc.) to a multi-industry journey, and concludes with expert advice on everything an organization must do to succeed. Along the way, we debunk myths, provide practical pointers, and include best practices with applicable vignettes. AI brings to enterprise the capabilities that promise new ways by which professionals can address both mundane and interesting challenges more efficiently, effectively, and collaboratively (with humans). The opportunity for tomorrow's enterprise is to augment existing teams and resources with the power of AI in order to gain competitive advantage, discover new business models, establish or optimize new revenues,

and achieve better customer and user satisfaction.

Stasiland - Anna Funder 2015-10-29
Stasiland tells true stories of people who heroically resisted the communist dictatorship of East Germany, and of people who worked for its secret police, the Stasi. Internationally hailed as a classic, it is 'fascinating, entertaining, hilarious, horrifying and very important' (Tom Hanks) and 'a heartbreaking, beautifully written book.' (Claire Tomalin). East Germany was one of the most intrusive

surveillance states of all time. One in 7 people spied on their friends, family and colleagues. In 'the most humane and sensitive way' (J.M. Coetzee) Funder tells the true stories of four people who had the extraordinary courage to refuse to collaborate with the Stasi, and the price they paid. She meets Miriam Weber, who was imprisoned at 16 after scaling the Berlin Wall. She drinks with the legendary "Mik Jagger" of the Eastern Bloc who was 'disappeared'. And she finds former Stasi men who defend their regime long past its demise, and yearn for the second coming of Communism. Stasiland won the Samuel Johnson Prize for best non-fiction published in English in 2004. It was a finalist for the Guardian First Book Award, the W.H. Heinemann Award, the Index

Freedom of Expression Awards, The Age Book of the Year Awards, the Queensland Premier's Literary Award and the Adelaide Festival Awards for Literature (Innovation in Writing). It is read in schools and universities in many countries, and has been adapted for CD and the stage by The National Theatre, London. *Practical Machine Learning* - Sunila Gollapudi 2016-01-30
