Prisoned Chickens, Poisoned Eggs - Karen Davis 2009

The original Prisoned Chickens, Poisoned Eggs became a blueprint for people seeking a coherent picture of the poultry industry as well as a handbook for animal rights advocates seeking to develop effective strategies to expose and relieve the plight of chickens. This new edition tells where things stand in a new century in which avian influenza, food poisoning, global warming, genetic engineering, and the expansion of poultry and egg production and consumption are growing concerns in the mainstream population.

Lionel - Dan Ponzol 2002-05-01

Celebrate one of the most beloved toys of the 20th-century - the timeless Lionel train. Other playthings have left their mark on the pages of American history and some still evoke a misty-eyed nostalgia, but no toy has had as dramatic an impact as these miniature cars, tracks, and accessories. For a full century, their magic has made children wide-eyed with joy at Christmas, inspired collectors of all ages, and launched a thousand dreams. Enjoy the history of Lionel's rise to greatness in a splendid oversize tribute, featuring larger-than-life, breathtaking images of perfectly preserved trains from every era, including some of the most famous and rare models, as well as reproductions of legendary catalogs and ads. A wealth of enlightening detail about individual pieces puts them in their proper place in the total Lionel output, from the first electrical devices invented by turn-of-the-century engineer (and company founder) Joshua Lionel Cowen to the technical marvels produced today. The legend continues to grow, as new generations find happiness playing with ever-more detailed and innovative models.

Narrative Mechanics - Beat Suter 2021-05-31

What do stories in games have in common with political narratives? This book identifies narrative strategies as mechanisms for meaning and manipulation in games and real life. It shows that the narrative mechanics so clearly identifiable in games are increasingly used (and abused) in politics and social life. They have »many faces«, displays and interfaces. They occur as texts, recipes, stories, dramas in three acts, movies, videos, tweets, journeys of heroes, but also as rewarding stories in games and as narratives in society - such as a career from rags to riches, the concept of modernity or market economy. Below their surface, however, narrative mechanics are a particular type of motivational design - of game mechanics.

Power in Economic Thought - Manuela Mosca 2018-10-17

This book offers a pluralistic vision of the way economists have dealt with the question of power in society over the last two centuries. Economists' ideas about power are examined from political, theoretical and policy-making points of view, with additional discussion of the active participation of economists in the management of power. The book is organized into four main conceptions of power relations: i) Power as embedded in political institutions; ii) Power as emerging from the asymmetric relations caused by the unequal distribution of income and wealth; iii) Power as associated to the monopolistic or oligopolistic position held by some firms in the market; and iv) Power as the management of economic policies by the state. Mosca brings together contributions from a range of scholars to analyse how economists have considered the role of power, putting the discussion into a much needed historical context.
