Good Capitalism, Bad Capitalism, and the Economics of Growth and Prosperity - William J. Baumol 2007-01-01

In this important book, William J. Baumol, Robert E. Litan, and Carl J. Schramm contend that the answers to these questions lie within capitalist economies, though many observers make the mistake of believing that "capitalism" is of a single kind. Writing in an accessible style, the authors dispel that myth, documenting four different varieties of capitalism, some "Good" and some "Bad" for growth. The authors identify the conditions that characterize Good Capitalism--the right blend of entrepreneurial and established firms, which can vary among countries--as well as the features of Bad Capitalism. They examine how countries catching up to the United States can move faster toward the economic frontier, while laying out the need for the United States itself to stick to and reinforce the recipe for growth that has enabled it to be the leading economic force in the world. This pathbreaking book is a must read for anyone who cares about global growth and how to ensure America's economic future.

**The History of Economic Thought: A Reader** - Steven G Medema 2004-02-24

This new reader in the history of economic thought is edited by two of the most respected figures in the field. With clearly written summaries putting each selection into context, this book will be of great use to students and lecturers of the history of economic thought as it goes beyond the simple reprinting of articles. Selections and discussions include such thinkers as Aristotle, John Locke, François Quesnay, David Hume, Jean-Baptiste Say, Karl Marx, William Stanley Jevons, Irving Fisher and Thorstein Veblen. The History of Economic Thought: A Reader can be used as a core textbook or as a supplementary text on courses in economic thought and philosophy, and will provide readers with a good foundation in the different schools of thought that run through economics.
